Don't let pestivirus rob you blind

Pestivirus is an insidious cattle disease. It can take from you before you know it.

It causes significant reproductive and performance issues, and weakens immune systems – leading to other costly cattle health problems like respiratory disease. In fact it costs the industry over \$114m every year.^[1]

To protect your herd from pestivirus and optimise your returns, it pays to be on Pestigard.

Find out how easy it is at your local rural reseller or cattle vet.

Zoetis Australia Pty Ltd. ABN 94 156 476 425. Level 6, 5 Rider Boulevard, Rhodes NSW 2138. @2022 Zoetis Inc. All rights reserved. www.zoetis.com.au ZL1544B 01/23

2023 NARACOORTE SHORTHORN BULL SALE

SALE TERMS & CONDITIONS

HEALTH All herds have a J-BAS 6 or better score. All bulls have been vet checked and semen tested. All bulls are Immune Ready Vaccinated with 7 in 1, Pestigard and Vibrovax including IBR.

BULL GUARANTEE It is a condition of sale that Vendors warrant that all bulls are to be sold as fertile and capable of natural service within 6 months of the date of the sale;

The Vendors shall refund to the Purchaser the purchase price paid (excluding any costs or expense of the purchaser) upon the Purchaser providing to the Vendor within 12 months of the sale date:-

- a) A report from a licensed veterinarian certifying that in his or her opinion:-
 - i. The bull is infertile or incapable of natural service;
 - ii. There is no evidence that the bull has suffered any injury or illness subsequent to being sold to the Purchaser which could affect his breeding ability
- b) A Statutory Declaration from the Purchaser warranting that in the opinion of the Purchaser the facts stated in the veterinarian's report are true and correct.

NUMBERS SYSTEM TO APPLY Prospective buyers and their agents must register for a buying number prior to the commencement of the sale.

- **DISCLAIMER** The Committee and/or their agents do not give any warranty as to errors and omissions if any in these particulars which they believe to be accurate when compiled. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.
- **PUBLIC LIABILITY** Any person attending the sale does so at his/her own risk. All persons attending the sale release the Committee and vendors from all actions and demands due to any loss, death, damage or injury occurring on the premises. The Committee and vendors are not responsible and have no liability for any death, or injury to any person or any loss of, or damage to any person attending the Sale, their property or otherwise.
- **INDEMNITY** All persons attending the sale agree to indemnify the Committee or vendors from and against any liability, loss, damage, expense or claim which the Committee or vendor may incur, including to a third party, during or after the Sale in all respects.

OUTSIDE AGENTS REBATE A 3% rebate is offered by the vendors to all outside agents who register in writing 24 hours prior to the sale, purchase and pay within the terms of settling agent.

SPECIAL PRIZE DETAILS

THANK YOU TO:

Nutrien – Nutrien Award for the longest supporting buyer of the sale

To be eligible please advise the year you purchased your first bull in Naracoorte when you register at the sale.

Castec – Awarded to the buyer of the highest priced bull

Zoetis – Awarded to a buyer in the lucky draw

Coopers Animal Health – Awarded to the buyer of the most bulls

UNDERSTANDING IGS EPDS

(Please note, EPDs are correct as at January 31, but are updated on a weekly basis.)

MATERNAL EPDs

CALVING EASE DIRECT (CE-D)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-D is relative to the direct Calving Ease of the animal. Higher values are more favourable.

CALVING EASE MATERNAL (CE-M)

Reported as the percentage of extra unassisted births in first calving heifers, relative to the average. CE-M is relative to the Calving Ease of the daughters of the animal. Higher values are more favourable.

MILK

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. Predicts the difference in maternal production of daughters relative to milk production and mothering. Values are relative to the environment of the production system. Low input environments should be very conscious of introducing too much milk due to the increased nutrient requirements that it can place on cows.

MATERNAL WEANING WEIGHT

Reported as pounds of weaning weight of progeny from the animals daughters, relative to the average. This is a measure of weaning weight differences relative to the combined effects of growth and milk. Breeders who are not looking to change milk production should consider Total Maternal as the most relevant EPD for maternal weaning weights. Higher values are more favourable.

STAYABILITY (STAY)

Reported as the differences in percentage of a sire's offspring that are predicted to still be in the herd at 6 years of age... given that they calved at 2, relative to the average. Stayability is a measure of reproductive longevity. Higher values are more favourable.

DOCILITY

Reported as the percentage of progeny, relative to the average, that will record a score of docile. Higher values are more favourable.

GROWTH EPDs

BIRTH WEIGHT

Reported in pounds of birth weight relative to the average. When selecting bulls to use on heifers, breeders should also focus on the Calving Ease EPD as Birth weight is already used in the Calving Ease EPD calculation.

WEANING WEIGHT – ADJUSTED TO 205 DAYS

Reported in pounds of weaning weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birth weight.

YEARLING WEIGHT – ADJUSTED TO 365 DAYS

Reported in pounds of yearling weight of direct progeny, relative to the average. Higher values are usually more favourable dependant on its relationship with birth weight.

UNDERSTANDING IGS EPDS

CARCASE EPDS – ADJUSTED TO 475 DAYS OF AGE

CARCASE WEIGHT

Reported as pounds of Carcase Weight relative to the average. Higher values are usually more favourable, however this is relevant to each producers target market.

RIB EYE AREA

Reported as square inches relative to the average. Higher values are usually more favourable.

FAT

Reported as inches of back fat relative to the average. Higher values are usually more favourable, however this is requires a balance between adequate doing ability in daughters and carcase fat thresholds for target markets.

YIELD GRADE

Reported as expected differences in progeny average USDA Yield Grade scores. Yield Grade is used to improve the yield potential of progeny and may seem a strange value for Australian animals. Whilst Australian animals will never receive a USDA graded Yield Grade score, they will also never receive an actual Retail Beef Yield % value either. However, US Shorthorns (including progeny of Australian sires used in the US) are USDA graded each year and so the pedigree linkages provide linkage to actual USDA Yield Grade values. Lower values are usually more favourable, however because of the negative correlations between fat and yield it is important to maintain some balance in the selection.

MARBLE SCORE

Reported as the differences in actual carcase marble scores relative to the average. This is different to IMF% which is used as an indicator trait in Marble Score. Higher values are more favourable.

ALL PURPOSE \$INDEX – API

Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ Indexes come in. Through well conceived, rigorous mathematical computation, \$ Indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line.

The All Purpose \$Index (API) evaluates sires for use on the entire cow herd, bred to both first-calf heifers and mature cows, with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put onto feed and marketed for both quality grade and yield.

UNDERSTANDING ACCURACIES

BOLT EPD accuracies have experienced the most change, usually lowering numerically and especially for non-parent animals, however the reported accuracy will be more accurate.

Accuracy refers to the amount a reported EPD can possibly change as more data is added. EPD values with higher accuracy result in less possible change for the value over time. More accurate accuracies better represent the amount of possible change for each EPD.

COLOUR INDEX

- 1 Red
- 2 Roan
- 3 White
- 4 Red Little White
- 5 Red & White

Average EPDs for 2021 born animals in the 2023 January Shorthorn Group Breedplan.

JANUARY 2023 SHORTHORN GROUP BREEDPLAN AVERAGES FOR 2021 BORN CALVES														
CE	BW	WW	YW	Milk	MCE	MWWT	STAY	DOC	CW	REA	FAT	MARB	YG	API
8.0	2.8	52.8	81.7	25.2	5.6	51.5	12.9	10.8	4.5	0.38	-0.080	-0.03	-0.34	109.17

UNDERSTANDING SHORTHORN IGS EPD'S

The Shorthorn IGS Genetic Evaluation - Powered by BOLT offers a full suite of EPD's for Maternal, Growth, Production and Carcass Traits. IGS is the largest genetic evaluation for beef cattle in the world and IGS EPD's measure the genetic merit of an animals progeny.

SHORTHORN IGS EPD'S EXPLAINED

EPD	MEASURE	TRAITS
CE-D	%	CALVING EASE DIRECT - % OF EXTRA UNASSISTED BIRTHS IN HEIFERS. POSITIVE VALUES ARE MORE FAVOURABLE.
CE-M	%	CALVING EASE MATERNAL - % OF EXTRA UNASSISTED BIRTHS IN 1ST CALVING HEIFERS. POSITIVE VALUES ARE MORE FAVOURABLE.
BWT	POUNDS	BIRTH WEIGHT - POUNDS OF BIRTHWEIGHT.
WW	POUNDS	WEANING WEIGHT - POUNDS OF WEANING WEIGHT ADJUSTED TO 205 DAYS.
YW	POUNDS	YEARLING WEIGHT - POUNDS OF YEARLING WEIGHT ADJUSTED TO 365 DAYS OF AGE.
MILK	POUNDS	MILK - POUNDS OF WEANING WEIGHT OF DAUGHTERS PROGENY DUE TO MILK PRODUCTION.
MWW	POUNDS	MATERNAL WEANING WEIGHT - POUNDS OF WEANING WEIGHT OF DAUGHTERS PROGENY DUE TO MILK AND GROWTH.
STAY	%	STAYABILITY - % OF DAUGHTERS REMAINING IN THE HERD AT 6 YEARS OF AGE. POSITIVE VALUES ARE MORE FAVOURABLE.
DOC	%	DOCILITY - % OF PROGENY RECEIVING A DOCILITY SCORE OF 1 (IDEAL). POSITIVE VALUES ARE MORE FAVOURABLE.
CWT	POUNDS	CARCASS WEIGHT - POUNDS OF CARCASS WEIGHT.
REA	SQ. INCHES	RIB EYE AREA - RIB EYE AREA IN SQUARE INCHES.
FAT	INCHES	RIB FAT - RIB FAT IN INCHES.
YG		YIELD GRADE - UNLIKE RBY%, LOWER YIELD GRADE SCORES ARE MORE FAVOURABLE.
MS		MARBLE SCORE - DIFFERENCES IN CARCASS MARBLE SCORES. POSITIVE VALUES ARE MORE FAVOURABLE.

ALL PURPOSE INDEX

API \$INDEX - SIRS USED IN SELF REPLACING COW HERD WITH PROGENY MARKETED FOR BOTH QUALITY AND YIELD.

RANK % - EPD RANKING RELATIVE TO SHORTHORN PERCENTILE BAND. LOWER % VALUES USUALLY MORE FAVOURABLE

UNDERSTANDING RANK %

EPD Values are a critical function, however to use EPD's correctly, it is important to first understand how the EPD Values ranks relative to the breed average. To make this process easier, the Rank % Value is published with each EPD and \$Index and tells you where each value ranks relative to breed average.

With the exception of EPD and \$ Index Values that may exceed or your thresholds for that trait, breeders should concentrate on the Rank % itself, as the critical value.

Tissue Sampling Unit (TSU)

Allflex® Tissue Sampling Units provide a simple but effective means for DNA testing livestock. Collect a clean, uncontaminated sample in seconds with a single squeeze motion, TSU's are easy to use and yield excellent lab results.

TSU's can be paired with a matching NLIS and visual management tag, creating a simple link between the genetics of an animal and it's Identification.
