## Introduction

Welcome to the Robbins Island Wagyu Fullblood Genetics Auction

Here at Robbins Island Wagyu our focus is on producing BALANCED animals with the HIGHEST CARCASE VALUE. This highest carcass value is based on actual data from carcasses produced for the Robbins Island branded beef program.

Firstly, they have to be fertile, as this is traditionally the number 1 driver of profitability in commercial cattle. Our females must be good milkers, as we wean calves at 7 months of age. The difference in a poor milking female can be 70+ kg in the calf at weaning. Our cattle require good structure, as they must walk vast distances when traversing the islands and hold up to long days on feed. These are critical drivers that make our operation work.

Of course, we find out more as the young stock are grown and processed. They must have good carcass weights, big eye muscle areas, and above all else high marbling. Without carcass weight you are sacrificing big money on the hook. Without marbling you might as well not have Wagyu.

These have always been our drivers, and after 28 years of hard work, the proof is in the meat.

Robbins Island Wagyu is one of the most sought-after single origin Wagyu brands in the World. Having fantastic genetics is the foundation.

Here we give the Wagyu industry the opportunity to capitalize on decades of precision breeding.

**Lot notes:** Tested FREE of all genetic disorders. J1396 is Robbins Island Wagyu's best Kanadagene 100 son. Averaging BMS 8.75, HSCW 448, EMA 107 across 40 carcasses, he is balanced across the carcass traits. Robbins Island Wagyu kept 6 Kanadagene 100 bulls in 2013 to prove up. After 9 years, a lot of carcasses, and a lot of contemporary groups, J1396 is the best of these bulls. This bull is now dead and semen is tightly held.

**Note:** The successful purchaser of Lot 7 has the first option to purchase Lots 8 & 9 at the same price. This decision must be made at the fall of the hammer.

**Lot notes:** Q156 is a strategically bred Kitaguni Jr son. He is out of a big frame, quiet Kanadagene 100 female. His dam, J1390 has 2 carcasses, both grading BMS 9, av. HSCW 462kg, av. EMA 102 sq cm. His grand dam A1, has had 3 carcasses averaging BMS 8.7, HSCW 477kg, EMA 97 sq cm. He is out of a line of proven, big framed, quiet females. Combined with the elite marbling abundance and fineness of Kitaguni Jr. Q156 has inherited the big frame and temperament from his dam. He is currently in the AWA progeny test program, so can be used as a link sire as well as having the assurance of data being plugged into Breedplan.

**Note:** The successful purchaser of Lot 10 has the first option to purchase Lots 11 & 12 at the same price. This decision must be made at the fall of the hammer.

**Lot notes:** Kitateruyasudoï may be the most underappreciated bull in the industry. People don't seem to talk about him much. However, he is in the pedigrees of countless elite animals. From being the sire of Y408, the grandsire of Mayura Noble, to being present in many of Blackmore Wagyu's top bulls. He is in the pedigrees of many of our top cows. We consider him an elite female producer. One of the very best 100% Tajima bulls to ever leave Japan.

**Lot notes:** This combination is one of a kind. Blackmore doesn't sell semen in Australia, and we will honour his wishes, only using E6 semen in our own operation and for the production of embryos. As a result, this may be one of the only times you see embryos for sale. One of Blackmore Wagyu's best bulls with one of Island Wagyu's most promising females. Q150 is a Kitaguni Jr x DM100 x 40/1 x Michifuku female; her depth of pedigree is the result of decades of work. Q0150 comes from a proven line and out of one of Island Wagyu's best DM100 females. She also has great temperament, which isn't always a positive trait for Kitaguni Jr. J1437 has had a Bar R 52Y steer grade: BMS 9, HSCW 534kg, EMA 108cm<sup>2</sup>. She is also performing highly for Strathdale Wagyu and has bred on to produce a performing bull. Combining elite, balanced genetics from the dam, with the size, large ribeye areas and increased fineness and distribution of marbling throughout the carcass from E6. A combination of genetics from 2 of Australia's most recognisable producers of Wagyu cattle and carcasses.

**Lot notes:** L0124 is one of Robbins Island Wagyu's best DM100 females. She has had a BMS 9+ carcass with a homozygous polled bull PWYPMQ184. She is an incredibly efficient feed converter. Consistently looking in top condition while on not much feed, and with a calf at foot. We have combined her with Kitateruyasudoj, who we consider to be the best 100% Tajima bull to leave Japan. You will see him in most of the top performers from our herd and if you look closely at Blackmore's genetics they are also filled with him. A lot of our best females have a combination of 003 and DM100 in the pedigree. A combination that works.

**Lot notes:** L107 is one of Robbins Island Wagyu's outlier females. A daughter of Kanadagene 100, bred almost exclusively for size and milk, that is marbling at our highest end. She has had a Bar R 52Y steer grade BMS 9+, HSCW 465, EMA 115. The fineness of her marbling is where she excels. BYWFY0398 is one of the only Fukutsuru J068 sons who is performing. A rare outcross bull who is out of a TF146 female. Y398 is performing in both Robbins Island and Strathdale Wagyu's production systems. The combination of Y398 and DM100 is working for us, giving balanced animals that marble.

**Note:** The successful purchaser of Lot 57 has the first option to purchase Lot 58 at the same price. This decision must be made at the fall of the hammer.

**Lot notes:** Kitaguni Jr is a rare bull in Australia, sired by the legendary Kitaguni 7/8. He is a proven marbling machine, with extreme fineness to his marbling. Here we have combined him with 2 Kitateruyasudo (003) females who are both out of Kanadagene 100 females. A potent combination of high Tajima genetics, while maintaining size. The 2 granddams, J1437 and J1411 are big DM100 females who have only ever given us BMS 9 carcasses. Deep pedigrees and rare genetics. We have now used all of our Kitaguni Jr semen.

<p><b>Buyer -</b></p> <hr/> <p><b>Price -</b></p> <p>\$ _____ per embryo</p>
--

**Lot notes:** Another package of 2 embryos from rare combinations. A081 is a TF151 female who has given us a BMS 9, HSCW 532kg, EMA 102cm<sup>2</sup> steer carcass. She is now almost 18 years old and is still raising a calf for us. TF151 x Kanadagene 101 should give a balanced animal, that has size, marbling and plenty of milk. A beautiful combination for producing females. J1410 is a DM100 x TF151 cow. She had a marble score 9, HSCW 514kg, EMA 118cm<sup>2</sup>. One thing you can bank on with DM100 is balance. Marble, big carcasses, and very big ribeye's. Here she is combined with Y398, a J068 son out of a TF146 female. Y398 is performing in both Robbins Island and Strathdale Wagyu's production systems. Extremely rare breeding and a combination that is performing.

**Lot notes:** Lone Mountain Daisuke is a bull who is marbling highly in America. A son of Kitaguni Jr x Sanjiro x Takazakura. Robbins Island Wagyu bought Lone Mountain Wagyu genetics a few years back, trying to get more Kitaguni and Yasufuku genetics into the herd. Daisuke was a result of this search. A performing bull, in Fullblood and F1 production. He does lack size, so we combined him with a good frame Genjiro female, who is an outcross to most Australian genetics. She is a Genjiro x TF147 x TF40 x Yukiharunami 4. She has only had one carcass, who was a heifer, grading BMS 9. She keeps producing heifers, so we don't have any steer data yet. Her mother was a super star outcross female for us, giving 4 carcasses averaging 9+, HSCW 492kg, EMA 113cm<sup>2</sup>. A performing line, with no TF148 in the pedigree on either side.

<b>Buyer -</b> _____
<b>Price -</b> \$ _____ per embryo

**Lot notes:** L107 is one of Robbins Island Wagyu's outlier females. A daughter of Kanadagene 100, bred almost exclusively for size and milk, that is marbling at our highest end. She has had a Bar R 52Y steer grade BMS 9+, HSCW 465, EMA 115. The fineness of her marbling is where she excels. We have combined her with Kitateruyasudoj, who we consider to be the best 100% Tajima bull to leave Japan. You will see him in most of the top performers from our herd and if you look closely at Blackmore's genetics they are also filled with him. A lot of our best females have a combination of 003 and DM100 in the pedigree. A combination that works.

<b>Buyer -</b> _____
<b>Price -</b> \$ _____ per embryo

**Lot notes:** Q0122 is a Kitateruyasudo female out of a Kanadagene 100 x TF40/1 x Michifuku female. Her dam J1437 is one of our top DM100 daughters. She has had a Bar R 52Y steer grade: BMS 9, HSCW 534kg, EMA 108cm<sup>2</sup>. She is also performing highly for Strathdale Wagyu and has bred on to produce a performing bull. J1437 features in multiple female pedigrees at this sale – we produced as many females as we could from this line, because we know how good it is. We also view 003 as a great female producer. Here we have crossed Q122 to Shigeshigetani. Shigeshigetani is one of the hottest bulls in the Wagyu game at the moment, and rightly so. He is renowned for producing high marbling carcasses and massive ribeye areas.

**Lot notes:** Q150 is one of Island Wagyu's most promising females. She is a Kitaguni Jr x DM100 x 40/1 x Michifuku female; her depth of pedigree is the result of decades of work. Q0150 comes from a proven line and out of one of Island Wagyu's best DM100 females. Her dam, J1437 has had a Bar R 52Y steer grade: BMS 9, HSCW 534kg, EMA 108cm<sup>2</sup>. She is also performing highly for Strathdale Wagyu and has bred on to produce a performing bull. Here we have crossed Q150 with female sexed semen from Dom and Jo Bayard's Super Sire: Goorambat Mr Marble. K483 is a large frame bull who is performing and proven across all carcase traits and is positive for milk. This combination of a proven Shigeshigetani son, over a Kitaguni x DM100 female is unique and an exciting prospect for someone looking to produce their next elite female.

**Lot notes:** K918 is a unique animal in the Robbins Island Wagyu herd, she is our only Genjiro x TF148 x Michifuku female. She is a compact female, who has tremendous depth of body. Reminding us a lot of Itoshigenami JNR cattle. She has had 1 carcass with JKCPLO471. It graded BMS 9, HSCW 422kg, EMA 108. This is encouraging as L0471 is only averaging BMS 7.8. He is one of those bulls that we wish we had never produced. Here we have crossed K918 with Overflow Kaneyama. A full brother to Shigesigetani, who in some circles is considered a superior bull.

<b>Buyer -</b> _____
<b>Price -</b> \$ _____ per embryo

**Lot notes:** K862 is a good frame Genjiro female, who is an outcross to TF148. She is a Genjiro x TF147 x TF40 x Yukiharunami 4. She has only had one carcass, who was a heifer, grading BMS 9. She keeps producing heifers, so we don't have any steer data yet. Her mother was a super star outcross female for us, giving 4 carcasses averaging 9+, HSCW 492kg, EMA 113cm<sup>2</sup>. Here we have crossed her with Kitateruyasudo, who we consider to be the best 100% Tajima bull to leave Japan. You will see him in most of the top performers from our herd and if you look closely at Blackmore's genetics they are also filled with him. Another performing line, with no TF148 in the pedigree on either side.

**Lot notes:** This is a unique combination. Another maternal trait breeding at the highest level. J1410 is a DM100 x TF151 cow. She has had a marble score 9, HSCW 514kg, EMA 118cm<sup>2</sup> carcass. World K's Kage is a son of Reiko; a Kitaguni 7/8 x Monjiro female. Japanese Royalty. He brings a lot of size and milk to an already maternal pedigree. J1410 has TF151 and TF40 close to the top. 151 is known for putting good frame and milk into his females. TF40 is probably lesser known, but is one of the best milking of the 100% Tajima bulls. TF40 is the sire of the sought after Sumo TF40/1.

\$ \_\_\_\_\_ per embryo

**Lot notes:** Lone Mountain 1441Y is a bull who is marbling highly in America and producing carcasses with extremely fine marbling. A son of Kitaguni Jr x Yasufuku Jr x Michifuku. Combining genetics of Kitaguni 7/8, Yasufuku J930 and Monjiro. Robbins Island Wagyu bought Lone Mountain Wagyu genetics a few years back, trying to get more Kitaguni and Yasufuku genetics into the herd. 1441Y was a result of this search. A performing bull, in Fullblood and F1 production. 1441Y is injecting marbling into his progeny, but taking away a lot of weight. J1411 is an extremely large framed Kanadagene 100 female, back to TF40/1. J1411 has only ever produced us females, however her full sister, and her mother are both performing on the carcass. An ideal cross, bringing balance to the extreme size of J1411 and the extreme lack of size from 1441Y. While also bringing marbling from a performing female line, with extreme marbling from the sire.
