GUILFORD

POLL HEREFORDS

Welcome to Guilford. Our 49th annual sale will be held on Friday 14th of April at 1.30pm, offering 45 bulls and 5 specially selected registered T heifers.

This year we will once again be using the Helmsman sale system, and we hope this will allow buyers the opportunity to purchase lots in their order of preference regardless of the catalogue order. The sale will be interfaced with AuctionsPlus, allowing buyers who cannot make it to the sale to bid online. To bid you must be a registered AuctionsPlus user and must register preferably 24 hours prior to the sale. Phone bidding through an agent on site is also available. For buyers not able to physically make it to the sale to inspect the cattle we will have photos and videos of all lots available on the website and through AuctionsPlus. We will endeavour to have as much information as possible on our supplementary sheet which should be available on our website no later than 11/4/2023. Agents and ourselves are also happy to give detailed descriptions of any bulls via phone and answer any questions you may have. Anyone buying bulls sight unseen can rest assured that their purchases are fully backed up by us, and we will do as much as possible to make sure that they are satisfied with their purchases. Pre sale day inspections of the bulls are welcomed and can be arranged by appointment.

Guilford stud cows are run under the same conditions as our commercial cows, and calve on large runs unassisted, checked 3 times a week to tag and weigh calves. To maintain their place they must rear a good calf and get back in calf in some pretty tough conditions some years.

In the store sale yards, Guilford cattle are well sought after by finishers due to the extra weight gain and doing ability they offer, which is product of the growth, milk, muscle, and doing ability that we have bred into our herd.

Last year it was very pleasing to sell our \$26,000 top price bull into a large commercial operation in Western Australia, to help them build on their high performance cattle herd.

The bulls have all been run as one group from weaning until December 23rd, and then split into two groups (Lots 1-24, and lots 25-45) with identical feed conditions.

We are pleased with this years bulls and we believe they may be the most even line we have presented, with very good type and performance running right through the catalogue, and we offer them with confidence.

If you are looking for easy care cattle with proven commercial performance, then we look forward to assisting you on the 14th of April or pre sale inspection by appointment is welcome any time before. If we can be of any assistance before or on sale day please do not hesitate to ask.

The Davie Family.

Sale Information

Guilford is located on Tor Hill Road approximately 13kms from Ouse and 23kms from Bothwell.

Pre-sale inspection of cattle is welcome and can be arranged by appointment with the vendors.

Sale Day inspection from 10:30am. Helmsman sale starts at 1.30pm.

Bull weight sheet available on sale day. Or available on our website by 11/4/2023

Free delivery to Melbourne, King Island, and Flinders Island on bulls sold at auction for \$5000 & over.

Bulls will be delivered free locally and to major connection points. Eg. Powranna.

Vendor terms for 1st September payment are available to buyers approved by the agents.

Insurance is highly recommended and can be arranged for transit and/or periods up to 12 months cover. Ownership transfers at the completion of the sale. While every care will be taken, no responsibility can be accepted whilst awaiting delivery.

A rebate of 5% commission will be available to all outside agents who attend the sale with or on behalf of their client, and introduce clients in writing at least 12 hours prior to the commencement of the sale.

A rebate of 1% commission will be available to all outside agents not in attendance but introducing clients in writing at least 12 hours prior to the commencement of the sale.

The sale will also be interfaced with AuctionsPlus, to bid you must be a registered AuctionsPlus user and must register preferably 24 hours prior to the sale.

Sale venue has Telstra coverage and phone bidding can also be organised by contacting the selling agents.

Transport and accommodation available through the agents.

Limited refreshments available at sale.

We will comply with any Government regulations and procedures surrounding COVID-19.

Health.

All bulls offered have been inspected and semen tested, by Dr Liam Ockenby from Vet in the Valley.

All bulls have been tested PI negative for Pestivirus (BVDV).

The bulls have also been vaccinated with 5 in 1 vaccine and annual boosters are recommended. Last done 23/12/2022

Property has transitioned to a Johne's Beef Assurance Score (J-BAS) of 8, had been in the BJD MAP since 2000.

Property is EU accredited.

Sale Information

Guarantee.

All bulls sold are guaranteed fertile. This condition is valid for a period of 12 months after date of sale and if the vendor receives notification of infertility, not caused by injury or illness, together with a certificate from a registered veterinarian on or before that date. In the event of an animal failing to breed, a credit equal to the full purchase price minus salvage value will be given at the following sale or by negotiation with the vendors. Any bulls for which claims are made must be delivered free of charge by the purchaser to any place mutually agreed upon.

Genetic Testing

All sale bulls have had a Genomic test completed. The Genomic information from this test is used to enhance EBV data and accuracy, verify the sire of all bulls, test for any genetic conditions, and also identify bulls that are homozygous poll. Homozygous poll animals are identified with (PP) after their name. (P) indicates a poll animal that carries a recessive horn gene. (S) indicates an animal has scurs.

If mated to horned cows, these bulls that carry two copies of the poll gene (PP) could genetically dehorn up to 100% of their progeny. These bulls would be of assistance to breeders with horned females that wish to accelerate genetic dehorning in their herds. Generally, strong poll herds do not need to focus on the gene due to the dominance of the poll gene (P) to the horn gene (h).

Handling your new bull.

Most of our stock work is done using horses and dogs. The cattle are also familiar with quad bikes and vehicles. In the yards the cattle are handled quietly and confidently. All sale bulls have been evaluated for temperament and are quiet and easy to handle under these conditions. However we recommend that when your new bull arrives home, have some steers or cows in the yards when you unload him to help him adjust to his new environment, especially if a solo purchase.

Semen Collection.

Guilford would like to reserve the right to collect semen in any bull (if desired in the future) for our own in herd use only. Collection would be at vendors expense and at a time suitable to the purchaser.

Liability.

Although accidents at sales are rare, people attending do so entirely at their own risk.

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue.

Online catalogue with photographs & video of all sale bulls and some sires available at www.guilford.com.au

Please bring this catalogue to the Sale.

BREEDPLAN EXPLANATION

Breedplan is a performance evaluation programme that describes the genetic profile of bulls for a number of commercially important traits. This profile is given as an Estimated Breeding Value (EBV), expressed as a figure (+/-) relative to the breed benchmark of zero (0) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan from other herds.

AVERAGE 2023 GROUP BREEDPLAN EBVs FOR 2021 DROP CALVES.										
Bwt	Milk	200	400 wt	600 wt	CWT	EMA	Rump	RBV%	IMF%	SS
+3.9	+17	+34	+56	+79	+53	+4.0	+1.0	+0.8	+0.6	+2.2

GL - Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate easier calving & increased growth after birth.

BWT - Birth Weight EBV (kg). The lower the birth weight EBV, the lighter is the birth weight potential of the progeny.

Milk - Genetic milk EBV (kg) reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.

200 WT - 200 Day Weight EBV (kg) indicates the relative weight advantage of a sire at 8-10 months of age.

400 WT - 400 Day Weight EBV (kg) indicates the relative weight advantage of a sire at yearling age.

600 WT - 600 Day Weight EBV (kg) indicates the relative weight advantage of a sire beyond yearling age.

CWT - Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA - Eye Muscle Area EBV (sq.cm) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. Bulls with positive (+) EBVs for this trait are expected to produce more muscular progeny than bulls with negative EBVs.

Rump - More positive EBVs indicate more subcutaneous fat and earlier maturity. Bulls with negative EBVs for this trait are expected to produce relatively leaner progeny than bulls with positive EBVs

RBV% - Retail Beef Yield Percentage EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield.

IMF% - Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on target markets, positive values are generally more favourable.

SS - Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality & quantity. Positive EBVs indicate higher fertility. SS is also positively associated with female fertility.

Accuracies - The accuracy provides a measure of the reliability of the EBV. The higher the value, the less likelihood of the EBV changing with the addition of more performance information on the animal or its relatives. Accuracy of less than 75% should be considered low.

Stockman is a bull that ticks a lot of boxes. A long bull with excellent weight for age, excellent cosmetics with a soft slick skin, and a rare combination of EBV's which put him in the top 1% for 400 & 600 Day wt as well as Rib & Rump fat & Scrotal. Top 5% for IMF% and 200 Day wt. Top 20% for EMA and excellent Milk.

We will be retaining a semen interest in Stockman for within herd use only. Top stud sire prospect. HYF DLF IEF MSUDF. Photo on back cover.
