Dear Beef Producers

Welcome to our 59 Years of Breeding Sale of the Spry Family. We have seen three years of excellent prices for agricultural products including beef which we believe has a great future in particular 2025 onwards.

We have continued to work hard on improving our Clients bottom line by sire line testing and the use of superior Shorthorn & Angus genetics including the purchase of the \$190,000 Knowla So Right S48 sire last spring from Knowla Livestock.

We are excited to present beef producers one hell of a set of Shorthorn & Angus bulls and a superior Shorthorn Donor cow and calf. The bulls are so even and solid with predictable genetics with balanced data sets.

Bulls are fully Vet checked by Holbrook Cattle Vets and are presented with our full breeding guarantee. Our sale preparation has in mind the longevity of the bulls so they have a long working life for their new owners. Big sale weights are not a priority but longevity is. Bulls are presented in excellent working condition.

If we can be of any assistance prior to or after the sale please do not hesitate to make contact. We thank you for your interest in our breeding programmes and we cherish the friendship with many of our Clients.

Best wishes for a safe, healthy and prosperous 2023.

Kindest Regards,
Gerald, Lynden & Matt

BREEDING BETTER BEEF - SUPPLYING BETTER BULLS

Lot 1 - Shorthorn Donor Cow & Calf
Lots 2-25 - Shorthorn Bulls
Lots 26-61 - Angus & Angus x Shorthorn composite bulls
Lots 62-89 - Shorthorn Bulls

WEDNESDAY 26th April, 2023

On property, "Ardlui", Wagga Wagga commencing at 1pm.

**Video of sale bulls & female will be on our website approximately
3 weeks prior to sale.**

Michael Coggan – 0409 848 411

SALE INFORMATION

“THE SELLING SYSTEM” The sale shed is located in close proximity to the bull pens. The auctioneer sells the bulls by auction with video of each lot projected onto the screen, rather than running the sale bulls into the sale ring. This system is very well accepted and we believe it is buyer and animal friendly and concurs with modern occupational, health and safety requirements.

INSPECTION

Bulls can be inspected prior to sale with arrangements with the vendor or selling agent. This gives us the opportunity to assist in selection of the best genetics for your requirements.

GUARANTEE BULLS AND SOUNDNESS EVALUATION as per attachment.

HEALTH

TB and Brucellosis free herd. JD Status is JBas 6.

All bulls have vaccinated twice with 7 in 1. Also vaccinated against Vibriosis once, make sure you give the 2nd vaccination.

Bulls have been tested negative for persistently infected Pestivirus (BVDV).

Please note: The bulls in this catalogue have never been handled with horses. We recommend that if you use horses that you move your new bull with non cycling cattle so they are not spooked by a new situation. We also recommend that the new bulls are moved on their own by motorbike as this is what they are used to. We also use dogs on bulls. Gradually introduce the movement of bulls with horses so they can adapt in their own time.

DELIVERY

We take personal interest in efficient delivery of all lots after the sale - contact Gerald direct with a minimum of 24 hours notice.

AUCTIONSPLUS

This sale is interfaced with Auctionsplus. This will enable remote bidders to operate in the sale from their location via computer. Bidding will only be available to registered Auctionsplus users. Prospective bidders must register at least 24 hours prior to sale with Auctionsplus. Contact Auctionsplus 02 92624222 www.auctionsplus.com.au

BUYERS ORDERS AND PHONE LINK UP

Mobile phones operate successfully at the Sale Shed (Venue). We encourage potential purchasers who are unable to attend the

sale to make arrangements with the vendor or his Agent if you wish to be contacted during the sale to place bids. Please make arrangements at least 48 hours prior to sale.

PERSONAL TRANSPORT TO AND FROM SALE VENUE

We can arrange transport to and from the sale venue, please contact the selling Agent or Sprys.

TRANSPORT OF YOUR PURCHASED ANIMALS Stud Stock transport representatives will be available on sale day.

Please speak with Gerald regarding his recommendations. No delivery on sale day.

Transport rebate to \$200 per bull given to purchasers in Sth Australia, Qld, Tasmania & KI & NT and WA.

INSURANCE

We encourage you to insure your purchased lot or lots. All care will be taken from the fall of the gavel but it is the purchaser's responsibility for any injury or death. An insurance agent will be in attendance Sale day.

PLEASE NOTE

It is unethical for anyone to promote or advertise or arrange the sale of cattle, other than those Vendors in the sale, unless with permission by the vendors.

AIR FACILITIES

Good airport facilities are at Wagga and Albury and private planes may also use Holbrook.

CATERING

Complimentary morning tea and lunch will be available prior to the sale, catered for by Little Billabong CWA.

OUTSIDE AGENT REBATE

1. The Vendors agree to allow a rebate to outside Agents introducing their client in writing within 24 hours prior to the sale and settling on their behalf within 7 days of the sale. (This clause will be strictly enforced). Introductions must be sent direct to the Vendors.
2. Any outside Agent travelling a distance to the sale with their client and settling on their behalf within 7 days should contact the Vendor prior for approval of a larger rebate.

Sale Catalogue Disclaimer: All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor or the selling agents make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

IMPORTANT NOTICES

The Selling Agent, its members, subsidiary or related corporations, officers, agents and employees for themselves and for those for whom they act while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy. All persons who attend the sale do so entirely at their risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals, for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for any injury or damage whatsoever which may occur.

USING EPD SELECTION AT SPRYS

EPD selection isn't the only selection tool for commercial breeders, there are other key criteria.

Structure is a good example. Sires need to cover a lot of ground at joining time and so if they are to deliver their genetics to your next generation of breeders, they can't be limited through joining by poor structure.

Actual scrotal size is another physical trait that matters. Physical scrotal size has a direct relationship to the animals ability to sire a sufficient number of calves in a short joining period.

So there are clearly important selection tools, beyond EPD's.

Every breeder will have their own selection criteria, usually made up of a combination of selection tools such as advice from the seedstock breeder or agent, visual selection, pedigree and raw data. That all makes sense, since what you are buying is the sire you can see in front of you.

But the sire you buy is a direct cost to your business. What determines your profitability isn't the sire you see; it's how his progeny perform for key traits. And that's why EPD's exist. Quite literally, EPD means Expected Progeny Differences and that's what they are trying to describe.

Not all seedstock producers are concerned by your profitability. For some, their profitability is enough. At Sprys however, commercial profitability matters and that's why not only are Sprys sires attractive, every effort is made to ensure that their progeny are best placed to deliver value for your herd.

After all, how much you pay for a sire isn't as important as how much profit he generates. That's value.

So how do you use EPD's in your selections?

Firstly, set a really clear breeding objective for your program. Know what you need to achieve. Remember this though. Growth is an obvious target because weight pays. Or does it. Heavier calves return more \$/ head but are they more profitable? Maternal traits will have a far greater impact on your net profitability.

Secondly, select 3 key traits you wish to improve to meet your objectives. These may require more than one EPD per trait, but selecting too many traits to improve at once will make it harder to make significant gains.

Thirdly, take the time to go through the sale catalogue before sale day to narrow your selection to the sires that fit your needs. Then use your other selection tools on sale day to select from the preselected group.

USE RANK%

It's hard learning new breeding values. Traditionally, knowing the breeding value meant nothing if you didn't understand where that value sat in relation to the rest of the breed. You had to be familiar with that breeds percentile table.

Shorthorn EPD's are also published with Rank % (%RK). Rank % is used to describe where the particular EPD value for that animal sits relative to animals in the Shorthorn population in Australia.

An EPD with a Rank % of 1 means that 1% of animals within the Shorthorn population have an equal or more favourable EPD value for that trait.

An EPD with a Rank % of 95 means that 95% of animals within the Shorthorn population have an equal or more favourable EPD value for that trait.

So when you are making your selections, you don't need to focus on the EPD value, just the Rank % (%RK).

EPD DEFINITIONS - MATERNAL TRAITS			
EPD	DEFINITION	BULL A EPD	BULL B EPD
CE-D Calving East Direct	Bull A should have 4% more unassisted births from first-calf heifers than Bull B.	10	6
MILK	Daughters from Bull A should produce calves that are 12 pounds heavier at weaning. This is not a measure of pounds of milk but rather weaning weight due to milk production.	28	16
MCE Maternal Calving Ease	Bull B's daughters should calve as first-calf heifers with 2% more unassisted births (6-4) than the daughters of Bull A.	4	6
MWWT Maternal Weaning Weight	Daughters from Bull A will produce calves that are 16 pounds heavier at weaning on average because of their combined genetics for growth and milk.	58	42
STAY Stayability	A measure of reproductive longevity. Daughters of Bull B are 7% more likely to stay productive in the herd to age 6.	9	16
DOC Docility	Bull B should sire 13% more calves that have a temperament in the most docile score than Bull B.	4	17
EPD DEFINITIONS - CARCASS TRAITS			
EPD	DEFINITION	BULL A EPD	BULL B EPD
CW Carcass Weight	Bull A should produce calves that have 30 pounds more adjusted carcass weight.	34	4
REA Rib Eye Area	At 475 days of age, calves from Bull A should have rib-eye areas that are 0.46 square inches larger than Bull B's calves.	0.58	0.12
FAT Rib Fat	At 475 days of age, calves from Bull A should be 0.06 inches fatter when measured at the 12th rib.	-0.02	-0.08
MARB Marble Score	Calves from Bull A should have a 0.45 higher marbling score than calves from Bull B.	0.47	0.02
EPD DEFINITIONS - GROWTH TRAITS			
EPD	DEFINITION	BULL A EPD	BULL B EPD
BW Birth Weight	Bull B's calves would be on average 3.3 pounds heavier at birth. When selecting bulls to use on heifers, the economically relevant trait is Calving Ease.	2.1	5.4
WW Weaning Weight	Calves from Bull A should average 30 pounds more on adjusted weaning weights because of additional growth.	64	34
YW Yearling Weight	Bull A's calves should average 40 pounds heavier at 1 year of age.	102	62
\$INDEX VALUES			
API All Purpose Index	Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and graded for both carcass quality and quantity.		

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on Sale Day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

You can Purchase with confidence at Sprys

A strong emphasis is placed on traits that contribute positively to commercial profitability and sustainability of beef production.

Firstly we aim to breed a functional female focusing on Structural Soundness, Docility, Fertility & Calving Ease.

Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria are culled. The focus then moves towards Growth & Carcase quality, avoiding extremes. Sprys Angus & Shorthorns perform well in the natural environments of Australia.

Homozygous Polled

Prophecy P13 was purchased for top price at the Futurity bull sale by Outback & Glengyron studs. Outcross genetics for a number of herds. He is producing progeny with high growth & good carcass quality and has several very good sons catalogued.

THOUSAND GUINEAS
AUSTRALIAN SHORTHORN

EXCLUSIVE BY NAME, EXCLUSIVE BY NATURE...

PERFECTLY SUITED FOR THAT SPECIAL OCCASION WHEN FRIENDS, FAMILY OR COLLEAGUES COME TOGETHER TO SHARE A RICHLY REWARDING MOMENT IN TIME.

Enrich that moment with a legend.

WWW.1000GUINEAS.COM.AU

Thousand Guineas steak will be provided for Lunch by JBS and Sprys.

THOUSAND GUINEAS SHORTHORN BEEF IS A TIMELESS CELEBRATION OF AUSTRALIA'S RICH AGRICULTURAL HISTORY. A HISTORY OF FARMING FAMILIES THAT HAVE DEDICATED THEIR LIVES TO BRINGING YOU THE FINEST BEEF ONLY THEIR PRISTINE COUNTRYSIDE AND WORLD CLASS LIVESTOCK CAN PRODUCE.

Enjoy it. Savour it. Remember it.

HUNDREDS OF YEARS OF WORK, OF REFINEMENT, OF GOOD TIMES, AND OF BAD, UNITE WITH THOUSAND GUINEAS SHORTHORN BEEF TO BRING YOU A BEEF PRODUCT THAT IS RIGHTFULLY RESERVED FOR ONLY THOSE THAT WILL TRULY APPRECIATE AND TAKE DELIGHT THE EXPERIENCE IT DELIVERS.

Be a part of this journey.

SIGHT UNSEEN PURCHASING PROGRAM

100% satisfaction guarantee.

Available to buyers who cannot attend the Sale.

For those purchasers who have discussed their requirements with us prior to the Sale we offer a 100% money back guarantee if the purchaser is not completely satisfied with their purchase.

We must be notified within seven days of taking delivery.

However the purchaser will be responsible for return transport costs.

SPRYS BULL GUARANTEE:

All bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bull's incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim.

It is important to understand that normal care must be taken and good husbandry practices observed, as we cannot replace a bull that is injured or dies for any reason. As such, we recommend you insure animals against injury. A representative of an insurance service organisation will be available on sale day.

PURCHASER TOP PRICED BULL AT AUCTION

Semen collection
to the value of \$400.
Donated by Sprys

VISUAL APPRAISAL

Although EBV's and EPD's provide an estimate of an animal's genetic merit for a range of production traits, they do not provide information for all of the traits that must be considered during selection of **functional** animals. In all situations, EBV's should be used in conjunction with visual assessment for other traits of importance (structural soundness, temperament, fertility etc). A recommended practise is to firstly select replacement breeding stock based on EPD's and EBV's and Indexes and to then select from this group to ensure that the final selections are visually acceptable.

SHE SELLS OUTRIGHT

What a Donor we are offering – in our opinion, the best breeding Shorthorn female we have ever offered. M36 has produced many outstanding progeny including Sprys Goldenrod P39 who sold for \$30,000 and other sires sold to Marrington & Sillwood studs. Embryo's from M36 have been sold to the UK with outstanding progeny resulting.

Daughters have now entered our elite Donor program. Her dam, who produced many top progeny including Sprys Boom Time M222's dam, was sold to Trojon Shorthorns.

Sells open ready to flush. (She has not been flushed since calving and has previously flushed up to 23 freezable embryo's in one flush.)

M36 has a top roan bull calf at foot, Sprys Gold Rush U1 by Eloora Gunner R10, purchased for \$30,000 last year, born 17/01/23. Sprys retain the right to collect semen from Gold Rush U1 at Sprys expense for within herd use only.

What a Shorthorn Sire – considered the most complete Shorthorn sire bred by Sprys in 59 years of breeding and could be the most complete son of Thermal Energy so far. Down Under S77 has the genetics, data set & phenotype to make a great breeding sire.

Sprys are retaining the right to collect semen at a time convenient to the purchaser at Sprys expense for within herd use only and would be interested in purchasing half possession and 50% income from the semen marketing at 50% of the purchase price. Interested parties must talk to Gerald at least 2 hours prior to the Auction if interested in the above.

His dam is a medium framed, good uddered female who entered our elite Donor herd in Spring of 2022.

S84 has a great combination of carcase and phenotype and a big bonus of an excellent set of EPD's. He is the number 1 EPD on Marbling for animals born 2021 at 0.54. A ¾ brother sold in our 2022 sale to Terra & Doolibah studs.

You will note the natural thickness in him which is quite outstanding for an animal with very high marbling. What an opportunity to increase profitability to your herd. Sprys retain the right to collect semen for use in Sprys herd.

Top 3% for Carcase wt, Top 5% for Marbling, Top 10% for Weaning & Yearling wt, Top 15% for API & Docility.

An Autumn drop bull who displays a lot of natural thickness with weight & depth of body. He will add extra weight & marbling to his progeny. S13 is extremely docile.

Purchaser: \$.....

UNDERSTANDING TRANS TASMAN ANGUS CATTLE EVALUATION (TACE)

CALVING EASE			
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
Days to Calving	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
FEED EFFICIENCY/TEMPERAMENT			
NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel)	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws)	Lower EBVs indicate more desirable claw structure.
SELECTION INDEXES			
SA	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular market end-point, but identifies animals that will improve overall net profitability in the majority of commercial, self replacing, grass and grain finishing beef production systems.	Higher selection indexes indicate greater profitability.
\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are either finished using pasture, pasture supplemented by grain, or grain (e.g. 50-70 days) with steers assumed to be slaughtered at 510kg live weight (280kg carcass weight with 12mm P8 fat depth) at 16 months of age.	Higher selection indexes indicate greater profitability.
\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers assumed to be slaughtered at 800kg live weight (455kg carcass weight with 30mm P8 fat depth) at 24 months of age, with a significant premium for steers that exhibit superior marbling.	Higher selection indexes indicate greater profitability.
\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 650kg live weight (350kg carcass weight with 12mm P8 fat depth) at 22 months of age. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.	Higher selection indexes indicate greater profitability.

Homozygous Polled

A dark red, long bodied bull who will produce outstanding daughters & steers. A lot of great females in S267 pedigree including the Ann family. He will add weight, maternal & fat cover to his progeny. S267 has lost some weight from other sale bulls picking on him so once he is away he will put it back on.

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

.....

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following idents.....

CARING FOR YOUR BULL

Arrival

Upon arrival ensure your new bulls socialize with a group of animals, (anything except other bulls in the yards, when they arrive).

Run the new bull with a small group of empty females, (he has come from a different herd and may not have had exposure to some of the normal pathogens present in your herd). This must be done, only two new bull at a time, with the empty females, for a period of 2 to 4 weeks. Ideally give the cows prostaglandin every 2 weeks so they can continue to cycle.

Pre Joining

We recommend a breeding soundness examination (BSE), including structural assessment, testicular palpation and (ideally) a service ability test. This is mandatory for second joining and older bull each year. It will improve the fertility performance of the herd, by removing non-working bull out with the cows. If bull(s) are not service tested it is essential you observe the bull serve in the first week of joining.

Keep vaccinations up to date, vibrovax, pestivirus and leptospirosis 7 in 1 and an annual drench, 4-6 weeks prior to joining.

Joining

New bull(s) have the highest risk of breakdown in the herd, this risk can be reduced by:

- Protect a new bull by not overjoining, 40 females per bull maximum.
- It is recommended, if single sire joining with a new bull, to rotate him with a proven bull for at least once cycle. Also, it is good practice to rotate proven bull(s) for the last cycle with all new bull(s).
- Recommend that all females are joined in groups with 2 bulls.

'Most new bull fertility issues develop during the joining period, rather than being pre-existing problems, this means that bull surveillance during the joining period is essential.'

Once the joining is set up, monitoring is essential to identify issues as they develop.

Your new bulls need to be run in mobs that are easily monitored, check them 2 to 3 times a week for the first three weeks and then weekly thereafter. This includes looking for:

- The bull serving, (this has not been successful until the bull thrusts). If a bull is continually mounting without serving it is often a sign the bull has developed a penile infection and needs to be rested and replaced immediately.
- Lameness
- Evidence of penile or prepuccial swelling or inflammation
- Signs of ill health, lethargy, etc
- Numbers of females cycling, (for every 21 females, once cycles each day at the commencement of joining). After three weeks of joining, there should be one cow cycling every three days per 21 females if the bulls are working satisfactory.

Post Joining

Bulls need to be removed from the cows, at the same time, to create their new mobs. This will limit the amount of potential injuries by reducing the number of bull interactions.

Bull paddock management is very important to minimize injury between joining's. The bulls need enough room to reduce fighting, restricted feed and water will increase interaction.

The target between joining's is to restrict weight gain in older bulls to prevent breakdowns. Ideally young bulls have access to a higher level of nutrition as they continue to grow.

Early pregnancy testing is essential for good female management and detection of surprises. The earlier the pregnancy testing is undertaken, the more likely the cause of the problem will be identified. This will not only give you early notice of the problem but also help in formulating a plan to help reduce the chance of the problem occurring in the future.

BUYER'S INSTRUCTION SLIP

To be handed in to the Settling Office immediately after the sale (by all purchasers).

KNOWLA SO RIGHT S48

Sire: BALDRIDGE ALTERNATIVE E125

ANIMAL ID: BLA21S8

DOB: 01/03/2021

PEDIGREE:

Dam: KNOWLA DESIGNER L21

Calving Ease: ★★★★★

Carcase: ★★★★★

Docility: ★★★★★

Growth: ★★★★★

Maternal: ★★★★★

Structure: ★★★★★

- So Right was the \$190,000 selection at the 2022 Knowla Livestock Prouction Sale, where 8 Alternative E125 sons averaged just under \$50,000.
- So Right has a tremendous amount of spring and depth of rib, stoutness and muscling, all being clean fronted with a great ability to move effortlessly with presence and eye appeal.
- The cow power behind So Right is unmatched, mother entering the donor program, already having two daughters in the donor pen. So Right is a great grandson of Designer V96, who is arguably the best cow to walk at Knowla. The longevity in the pedigree is outstanding, expect So Right daughters to last.
- When you analyse the phenotype and structure of the bull, his amazing temperament, the cow power behind him, and the data set he brings to the table, So Right S48 is the complete package.

Knowla So Right S48 was purchased for \$190,000 in Spring 2022 for extensive use in Sprys & Cottage Creek studs. An outstanding young sire who combines phenotype, structure & a balanced data set in an ideal maturity package. So Right is a tremendous investment in the future profitability of our clients herds.
