

# YELLOW ROCK HEREFORDS

"A LITTLE GOLDMINE OF OUTCROSS GENETICS"

Dear Cattle Breeder

The 2020 and 2021 drop bulls show tremendous promise, consistently displaying the characteristics being sought by Cattle Breeders of many breeds today, consistently low birth weight, calving heifers and cows anytime of the year without supervision, a body shape displaying the thickness of a good carcass but also the ability to convert grass into muscle and fat to a finished level, cattle that attract premium's you need to stay more profitable, whilst also producing the type of cow with longevity that produce more calves to offset the high cost of carrying extra replacement heifers.

The bulls are presented as the season allows, some of the older bulls may weigh less than their November weights as grass availability and quality has reduced over the summer.

The Carter family have enjoyed breeding registered Horned Hereford Cattle for 51 years

View photos and multiple video's on each lot on the AuctionsPlus website.

Robin or myself or Agents Drew Stratton and Will Lowe from McKeen McGregor in Bendigo Vic along with the team from AuctionsPlus are pleased to help.

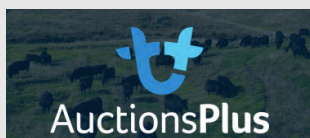

If you wish to have a *no obligation* inspection at DINGEE VIC Australia please contact us.

Regards,

*John Carter*
