The benefits of using ALC Brahmans Genetics in your herd

Selection generates change

Key traits that drive profit in a beef herd

ALC Brahmans Facts:

- 50% of the bulls in the 2023 ALC Bull Sale team are Polled or Scurred
- 55% of the bulls in the 2023 ALC Bull Sale team are out of two-year-old calving Dams or Grand Dams.
- Our two-year-old calving females this year are running at an impressive 85% wet re-breed.
- All cows are joined for a total of 10 weeks (always while lactating).
- Yearlings are joined for 10 weeks and 2-year-old heifers for 7 weeks
- All ALC Breeders lactate for 7 months every year.

Take this opportunity to introduce ALC's internationally proven Brahman genetics into your herd...
Sale, 5th July 2023

HELMSMAN BID SYSTEM

This method of buying bulls combines the good features of both the auction system and sale by private treaty. You get the opportunity to bid on and buy any bull in the offering and you pay competitive market value without any pressure.

HOW IT WORKS

1. On arrival, the intending purchasers who have already registered, go to the bid table and receive a buyer number, catalogue and bidder cards.
2. All bulls are displayed for inspection as usual, with relevant information provided in the catalogue.
3. When the sale commences, all bulls are on the market simultaneously. You may bid on any bull, regardless of lot number, by filling in a card and handing it to a 'runner'.
4. You may open the bidding from 10:30am according to the opening pen price as displayed. Further bids in multiples of a minimum bid amount of \$1,000 will be accepted. There is no limit on the size of bid.
5. Bids are recorded with the buyer's number on a large board adjacent to the bull display area. You can bid on any number of bulls and can see at a glance whether your bid still stands or has been overbid.
6. There is no pressure to commit to another bid. If your first choice bull goes over your limit, you can still bid on any other bull on sale. A bid once submitted and recorded cannot be retracted, and the person responsible for submitting such a bid will be responsible for it until it is overbid.
7. All bulls are for sale simultaneously for the duration of the sale. **Bidding from 10:30am to 12 O'clock will happen with no timer countdown in place.** This gives buyers plenty of time to walk back through the pens of bulls, whilst analysing the data supplied, without pressure.
8. Lunch will be offered from 12 O'clock to 12:30pm. No bids will be accepted during this time.
9. **From 12:30pm** the sale will recommence in simultaneous bid format still, however a **timer countdown will be in place.** The clock will start at 2 minutes, then after some time will reduce to 1 minute then 30 seconds. If any bull is bid on during a specific countdown timeframe, the clock is then restarted for that countdown timeframe. If no bulls are bid on during any allocated countdown timeframe, then the sale is officially closed.
10. The sale is anticipated to conclude by 1:30pm. This format would therefore mean that **all** bulls lotted will be open for bidding until sale closure which is determined by the timer countdown system.
11. The sale is interfaced with AuctionsPlus, with the Helmsman system meshing perfectly with the simultaneous online auction in real time.

THE BENEFITS

1. You have more time to consider lodging a bid. You can place genuine bids on any bull of your choice at any time during the sale period.
2. You have the opportunity to re-assess each lot during the sale period without any pressure to make an instant decision.
3. You have the opportunity to take home the bulls you want, irrespective of where they are positioned in the catalogue. For example, having been out-bid on the bull of your first choice, you can move back to your second choice bull positioned anywhere in the catalogue.
4. When you are buying multiples or groups of bulls, Helmsman gives you flexibility and time to average your purchase costs.

A Closer Look At ALC Sale Bull Data Sheets...

The principle of ALC genetics management is to report all data from our whole herd, to our clients and potential clients. Our aim is to have the most important data in nett commercial terms, readily available, in easy to read format.

In most regions of the commercial beef-raising world the important profit index ranks as follows for every \$10 margin:

- \$7 earned by good reproduction
- \$2 earned by live weight growth
- \$1 earned by other traits (carcase, colour, temperament etc)

The ALC herd stems from four decades of intense selection in the traits of **fertile, gentle and growthy** cattle **adapted** to our Northern Australian costs and conditions. Four traits are plenty to select for.

- **Fertility and adaptation** may end up meaning the same thing.
- **Good temperament** is essential for low costs in labour and facilities, and minimising market losses.
- **Growth** usually equals consumption, so there is literally no free feed there, in normal Northern Australian conditions. The most elusive factor is adequate groceries for our herds. You can equate this in several ways, eg. stocking rates per square mile, stock days per hectare per 100mm of rain, or acres to the beast. All of these have an equivalent *dollar cost*, whether on your own country or on agistment. Quantity and distribution of rainfall has a big impact on our costs each year also.

SO LET'S FOCUS ON THE REAL STUFF.

Fertility and adaptation... we can use the simple fertility measures of pregnant or empty, and weaned a calf or lost a calf or pregnancy. This criteria of pregnant must fall in a set period, or we would be hiding behind excuses forever. Similarly, a weaner in the yard, or no weaner is pretty final judgement too. For every year of ownership, any less than a calf weaned plus a pregnancy is simply not an option. They are then proven adapted cows.

We provide very transparent data on all Dams, Grand Dams, Great Grand Dams and Great Great Grand Dams of our ALC sale bulls.

2. Location—The 1st, 2nd or 3rd month Dam calved for S'23 calving season.
3. PT result in weeks from April 2023 pregnancy test.
4. Age at first calf.
5. Number of calves born.
6. Subsequent calving interval in days.
7. Days to Calving EBV (DTC) is an indicator of female fertility based on the time between a cow's first exposure to a bull and when she subsequently calved.
8. Kg live weight in June.
9. Testicle scrotal circumference (SC) in June.
10. Age in months at puberty.
11. Estimated Breeding Values (EBV's) for growth at 200, 400 and 600 days of age along with scrotal size (SS), days to calving (DTC), Central Production \$ index (CP) and Live Ex. \$ index (L Ex).
12. Bulls are penned in groups of 15 to 20 head. Pens are labelled on the gates. For example, a grey A* sale bull marked Lot # 6 would be found in the pen labelled "PEN GY-A* LOTS 1-15".
13. Sale bulls are categorised as categories A and A*. Category A* being what we consider to be the lead of the sale bulls.
14. Only clean headed bulls were poll tested and verified as either (PP) Homozygous Poll or (P) Heterozygous Poll. The bulls marked as (S) for Scurred are a visual assessment and may have been snipped at branding.

Production and genetic information for all sires is also provided.

Almost all of this data is related to speed of production driven by reproduction indicators. ALC bulls are priced accordingly. Please contact us direct for further discussion and sale bull data.
