WELCOME TO OUR 2023 ROMA SALE

Welcome to our 2023 Roma Sale to be held at Roma Saleyards at 11am Friday 28th July 2023 and conducted with Nutrien Ag Solutions and interfaced with Auctions Plus.

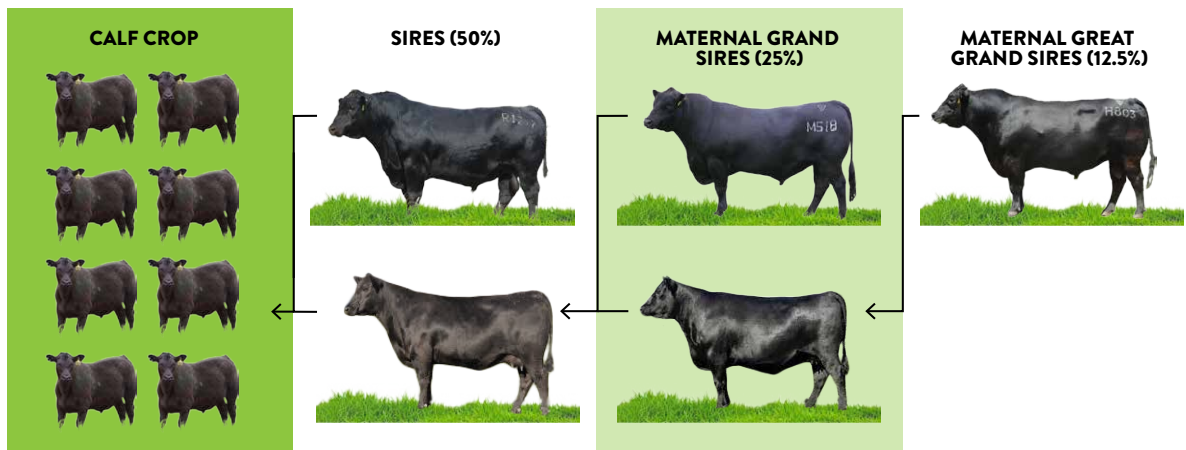

WE HAVE AN EXCITING GROUP OF 93 SALE BULLS CATALOGUED FOR THIS YEARS' SALE WITH 33 TWO-YEAR OLD BULLS AND 60 18-MONTH OLD BULLS. THESE SALE BULLS ARE BY FAR THE HIGHEST INDEXING BULLS (ACROSS ALL MAJOR INDUSTRY INDEXES), WITH EXCEPTIONAL CALVING EASE, GROWTH, MODERATE MATURITY PATTERN AND UNMATCHED CARCASE.

The Sale bulls have been running at BFeeders, Rodgers Creek, Queensland for the past 80 days. They do an excellent job with the bulls running in larger paddocks so they are fit to go straight out to work. Prior to that the bulls are developed in our intensive grazing system at Yea, Victoria.

These boys are in a league of their own in terms of multi-trait excellence. The 2023 Sale bulls are the highest Heavy Grain Index (\$GN) bulls on offer in Queensland by a long way! They represent the best-balanced performance tested bulls in the breed with 80% rock-solid calving ease bulls.

! 87% OF GENETIC COMPOSITION OF CALF CROP IS DETERMINED BY THE SIRES USED OVER THE LAST 3 GENERATIONS.

THE HIGHEST HEAVY GRAIN INDEX (\$GN) BULLS ON OFFER IN QUEENSLAND IN 2023 AND THE ONLY ANGUS STUD TESTING FOR FEED EFFICIENCY ON-FARM.

GETTING THE BALANCE RIGHT FOR NORTHERN BREEDING PROGRAMS USING ANGUS GENETICS

We understand our bulls need to perform and survive often under tough commercial conditions in Northern Australia. We remain steadfast in our belief and breeding objectives that genetics play a big role in making sure as beef farmers we keep up with finding productivity gains in all parts of the supply chain.

Calving ease is possibly the most important trait for any beef producer, even more so for Northern breeding programs where close supervision of calving is often not a practical option. Dystocia is actually the number one trait for both economics and animal welfare and we do our best to provide our clients with the most accurate and up to date advice on the calving ease suitability of our bulls. Any bull that has a calving ease tick (red tick) is suitable for heifers and in this catalogue there are 74/93 (80%) rock-solid calving ease bulls.

- 74/93 (80%) of the bulls have a calving ease tick ✓ meaning they are ideal to mate with heifers and 59/93 (63%) are above breed average (+2.2) for Calving Ease Direct (DIR) and 70/93 (75%) are below breed average (+4.1) for Birth Weight EBVs.
- Top 49% for Calving Ease Direct (DIR) and lowest 35% for Birth Weight (BW).

We have always maintained you can never have enough growth as we understand kilograms is what you get paid on, but it needs to be in the right package. Having a disciplined approach to breeding along with technology like Fixed Time AI (AI) and embryo transfer (ET) allows us to move quickly in the direction we want for genetic gains. We believe our bulls are some of the best value on the market and they provide a much higher, more predictable and sustainable option for Northern producers.

- Top 50% for 600D Growth
- Top 30% for Mature Cow Weight (MCW) with +89 vs breed average of +100
- Top 10% for marbling (intramuscular fat) and Eye Muscle Area (EMA)
- Top 10% of the breed for Heavy Grain Index (\$GN) and top 15% for Angus Breeding Index (\$D), Angus Breeding Index (\$A) and Heavy Grass Index (\$GRS)

KEEPING YOUR BULLS UPDATED WITH ANNUAL BOOSTERS AND MINERALS IS IMPORTANT FOR HERD FERTILITY AND BULL LONGEVITY

All Sale bulls have been semen tested and vaccinated for pestivirus (BVD), vibriosis and 7 in 1 along with Trivalent Tick Fever, Ultravac BEF (Three Day Sickness), Bovillis MH and Rhinogard IBR. We stress it is important to give bulls their annual booster of pestiguard, vibrio and 7 in 1 (as a minimum) to ensure their on-going immunity and if possible regular access to minerals and/or multimin injectables at least twice a year and well in advance of mating season. We also recommend an annual semen test. Bulls are covered under our Three Year Guarantee for Fertility and Structure (refer page 50 for details), however, please note that this is not an insurance policy for injuries and we recommend bulls be insured at least for their first season.

We look forward to visiting more of you in the next couple of years and hopefully seeing you on Sale Day at Roma on Friday 28th July 2023.

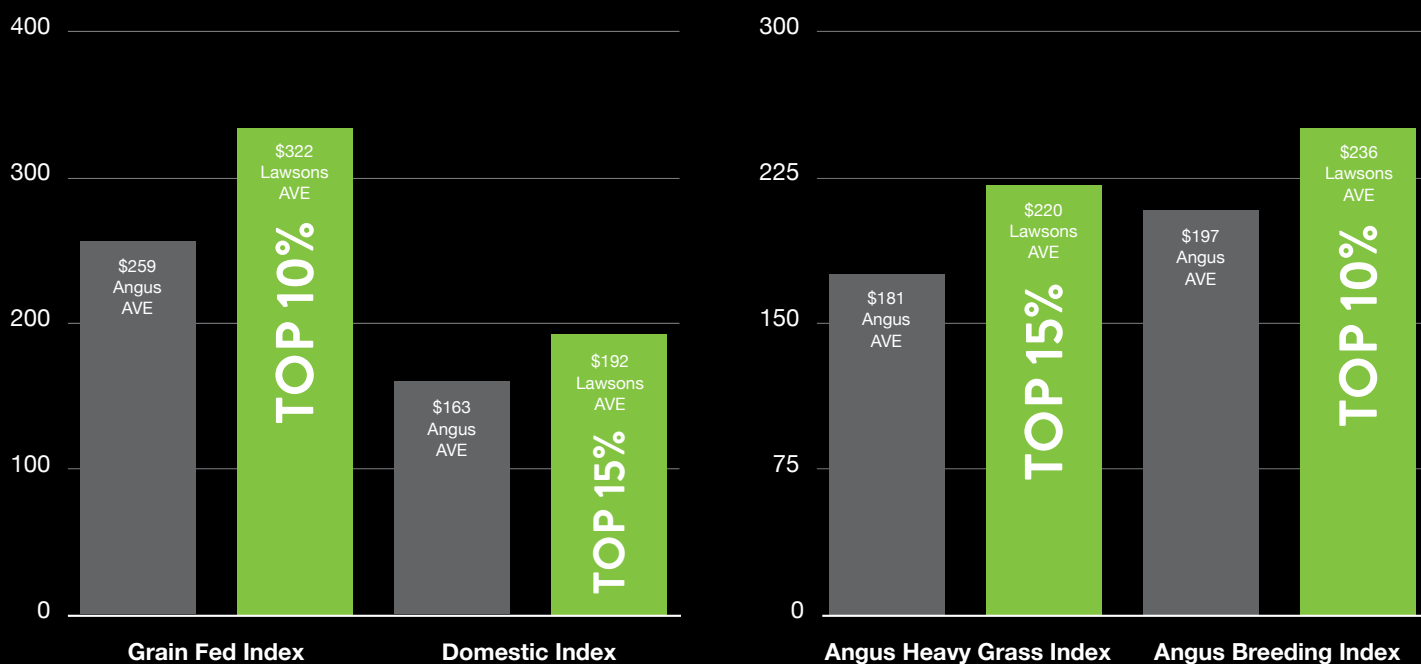

Regards,

Harry Lawson

HOW DO **LAWSONS ANGUS ROMA BULLS** COMPARE TO THE ANGUS BREED AVERAGE?

THESE ROMA SALE BULLS EXCEL ACROSS ALL KEY ECONOMIC TRAITS. THEY ARE UNIQUE IN THEIR BALANCE OF CALVING EASE, HIGH GROWTH, MODERATE COW SIZE AND UNMATCHED MUSCLE AND HIGH MARBLING POTENTIAL.

REFERENCE SIRES

GAR HOMETOWN

Home Town is your next step in our pursuit for multi-trait excellence! Home Town sold for a record US\$475,000 in the GAR 2020 Spring Sale and is marketed through Select Sires and World Wide Sires. Home Town progeny are truly unique for calving ease, early growth, stature, maternal function and elite end-product value.

SC ABUNDANCE 42F

Abundance is an Ashland son that combines exceptional calving ease, high growth and moderate maturity pattern backed up by his curve-bending EBVs and massive muscle and marbling combination. Abundance is a rock-solid calving ease bull that will shine through at weaning and every part of the supply chain - a combination of key traits for beef producers that very few sires can match!

GAR KANSAS

Kansas has solidified his place as a heifer bull, with superior calving ease, massive growth and moderate stature. His calves are appreciated for their rapid early growth and added muscle expression and loads of marbling potential.

GAR ASHLAND

GAR Ashland is a good outcross for most and one of the high use sires across the US and Australia. Visually attractive and unmatched in his combination of calving ease, growth, marbling and muscle. No other sire we have used have this much muscle in such a stout, moderate frame. Ashland is also the sire of GAR Home Town, GAR Kansas and SC Abundance 42F.

LAWSONS MOMENTOUS M518

Please note that changes in TACE carcass traits have now elevated Momentous to +5.8 IMF, amongst the highest in the Angus breed and top 1% plus his EMA is now +13.8, top 2% of the breed! No other sire in the Angus breed matches Momentous for muscle and marbling. Momentous bull calves have been breaking records across Australia, we have over 1,355 of his 4,305 registered calves so in our program giving you the power numbers to select from with superior genetics at an affordable price. It was pleasing to see his spread between 600D and Mature Cow Weight (MCW) widen with his MCW now +88 and well below breed average of +100. Apart from Momentous unmatched multi-trait excellence his calves are wide-topped, thick set with exceptional docility and structure. We now have 4-year-old Momentous cows in the herd doing a superb job.

LAWSONS MIRACULOUS Q44

A game changing sire in terms of calving ease, muscle and feed efficiency! Lawsons Miraculous Q44 is the highest HBR sire in the Angus breed for Eye Muscle Area (EMA) at +21.5 and his progeny are visually wide-topped, stout with impressive performance and feed efficiency. Miraculous was one of the highest feed efficiency tested bulls in Cohort #4, being above average for every metric including Net Feed Intake (NFI) and his progeny have backed up with impressive feed efficiency data. Q44 was the top selling bull in our spring 2020 Sale, purchased by TRT Pastoral in King Island. Semen is marketed through Genetics Australia.

GAR MOMENTUM

Momentum is regarded as one of the breeds elite calving ease, high carcass merit sires, progeny are stout, moderate frames with exceptionally high EMA and marbling. Sires moderate fertile, easy calving daughters that set the bar for cow efficiency and elite carcass genetics.

GAR QUANTUM

GAR Quantum is another son of Momentum with higher growth than Momentous, Rocky and Miraculous. Quantum is +15 EMA, top 1% of the Angus breed and +133 on 600D Growth, top 20% of the breed. Quantum progeny excel across the board with excellent structure and docility.

GAR METHOD

Another of the elite Momentum sons we have used to add muscle and growth. Some of our best cows are Method daughters.

GAR RELIANT

Reliant blows you away with his impressive phenotype, powerful design and gentle disposition. Stacked with maternal strength and feed efficiency with Sure Fire, B/R Destination 727-928 and goes back to one of our all time favourites and big time "influencers" GAR Predestined. Adds lots of power and moderate maturity pattern for that much growth.

GAR RELEVANCE

A stout impressive Prophet x Progress son with low birth weight and high \$ Indexes for the right reasons. Relevance is an outstanding calving ease bull, moderate maturity pattern and combines the genetics of the two highest proven marbling bulls in the breed. One of the standout feed efficiency sires in Cohorts 5 and 6 Vytelle groups.

GAR GENUINE

GAR Genuine is an outcross sire we selected on our trip to the US in 2019. Big time spread with 8.4 CED and +130 for 600D and +113 MCW. Progeny are long bodied, attractive and suit mating with all our major sire-groups.

DEVELOP YOUR OWN SIMPLE 10 YEAR PLAN

Using Lawsons Angus genetics will provide a highly predictable path to keeping you a decade ahead of the average Angus breeder.

Lawsons Angus breeding program is built on multiplying the best bulls available in the world. Sire-Mate helps breeders develop a simple, but still flexible mating plan that minimises inbreeding and maximises genetic gain.

SALE CONDITIONS

BUYERS REBATE

Rebate of 2% is available to outside agents settling on behalf of buyers within 7 days. Buyers must be introduced via email to either Andrew Holt, Nutrien Ag Solutions Roma andrew.holt@nutrien.com.au or lawsons@lawsonsangus.com.au or in writing prior to Sale day. All agent rebates and settling arrangements are to be confirmed on bidding cards on Sale day and agreed to by Nutrien Ag Solutions Roma.

DELIVERY OF SALE BULLS

Lawsons Angus and Selling Agents will do our best to assist in the efficient and safe delivery of your bulls. Buyers, please ensure bulls are insured at the fall of the hammer as our insurance does not cover injury of bulls in transit. Buyers must organise cartage of bulls at their own expense.

REGISTRATION STATUS AND TRANSFER OF BULLS

Most bulls on offer are Registered Herd Book animals with the Angus Society of Australia (ASA). Registration status of bulls is shown in the catalogue. 'H' indicates the animal is registered in the ASA Herd Book, 'A' indicates bulls are registered with ASA Performance Register (APR). All bulls will be transferred to purchaser at no cost on request. Non-transfer commercial bulls are denoted 'NT' or 'COM' status.

HEALTH STATUS OF BULLS

All bulls have been independently semen and morphology tested including a physical evaluation of the bulls reproductive tract.

All bulls offered in this Sale have been vaccinated with Ultravac 7 in 1, Vibriosis, Pesti Guard (BVD), tick fever, 3-day sickness, bovillilis MH and rhino gard IBR.

3 YEAR BULL GUARANTEE

All bulls have undergone rigorous and independent assessments for fertility, including a semen test and physical evaluation of the bulls reproductive tract. On top of this we offer the strongest guarantee of any seedstock herd in Australia.

All breeding cattle sold by Lawsons Angus are fertile and structurally sound to the best of our knowledge. If a bull becomes infertile or breaks down due to reasons other than injury or misadventure, at any time in the next 36 months, we will:

1. provide you with a satisfactory replacement if available, or
2. issue you with a credit equal to purchase price minus salvage value, that may be used to purchase any animal in future Lawsons Angus sales.

The Lawsons Angus 3 year bull guarantee is not a life insurance policy. Normal care needs to be taken as we cannot replace an animal that is injured or dies for any reason. We recommend you insure animals against injury. An insurance service will be available on Sale day.

This guarantee is in addition to normal terms and conditions governing auction sales, and as such the discretion and final decision as to issuing a credit will be with the vendor. Any credit will be limited to bull purchase price less salvage value and not include any costs, damages or loss of income incurred as a result of claims under this guarantee.

We stress it is essential to give your bull(s) their annual booster of pesti guard, vibrio and 7 in 1 as a minimum and mineral status is maintained.

OUR 3 YEAR BULL GUARANTEE IS THE GREATEST WARRANTY PROVIDED BY ANY SEEDSTOCK HERD IN AUSTRALIA.

CALVING EASE

We have included a red tick in summary pages and individual catalogue information for bulls that we recommend are suitable to use in most situations over yearling heifers. Most of these bulls are ≥ 2.2 for Calving Ease Direct (DIR) and less than breed average birth weight (≤ 4.1 Birth Weight EBVs). We believe this combination gives you the best risk management guide for selecting bulls to mate yearling heifers and simplifies the information so that you can focus on improving other key economic traits.

We urge breeders not to over analyse this information and narrow down selection options as is often the case. There are a few exceptions that we have made to these EBVs criteria, but we believe these bulls to also be safe calving ease candidates. Individual herds may use bulls outside this recommended range depending on their maternal herd and production system, but these are our recommended 'safe' heifer specifications and they are working well for commercial beef herds.

We also recommend you talk to us about helping to develop a pre-calving heifer **management** plan that can be used in conjunction with these EBV specifications to achieve predictable calving ease and rebreeding results for two year old heifers. Remember management of heifers is equally important as the **genetic** potential of the sires and dams to optimise calving and reproductive performance of heifers.

DISCLAIMER

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information. Buyers should also note other Sale Conditions listed on this page including those under "3 Year Guarantee".

A BRIEF DESCRIPTION OF EBVS AND \$INDEX VALUES

The following is a brief description of EBVs and \$Index values and Accuracies. For a more detailed explanation please refer to Angus Society of Australia web site (www.angusaustralia.com.au).

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase.

CALVING EASE DIR (%)
~ Estimates of the genetic differences between animals in the ability of their calves, from 2 year old heifers, to be delivered without assistance.

CALVING EASE DTRS (%)
~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

GESTATION LENGTH (DAYS)
~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

BIRTH WT (KG) ~ Estimates of the genetic differences between animals in calf birth weight.

200-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

MATURE COW WEIGHT (KG) ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

MILK (KG) ~ Estimates of the genetic differences between animals in milk and animals in percentage retail beef yield, in a 300kg carcass.

INTRA-MUSCULAR FAT % (IMF%) ~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 300 kg carcass.

ANGUS BREEDING INDEX
~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals

that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

DOMESTIC INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

HEAVY GRAIN INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

HEAVY GRASS INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished heavy steers.
