

INVITATIONAL BULL SALE

FRIDAY 18TH AUGUST 2023

Welcome

We welcome commercial and seedstock producers alike to the 7th Annual BJB Limousin Invitational Bull Sale. The 2023 catalogue is loaded with some of the best Limousin genetics.

As a sale group we have focussed on getting the balance between EBVs and the physical functionality of our sale animals right. All of the bulls are commercially relevant and some have very strong stud potential. We are confident that this year's line-up of bulls will provide all potential buyers with the opportunity to purchase quality animals with the functionality, dispositions and genetics that will progress their breeding programs.

Our aim is to offer genetics that will have a positive impact on beef production. We look to provide buyers with access to genetics that will produce quality beef that in turn provides a quality eating experience for consumers whether eating in at home, dining out at a restaurant or in pubs and clubs. Our sale bulls carry carefully selected modern genetics that produce high yielding, soft, easy finishing progeny with high docility and good weight for age.

We invite everyone to a day of on property inspections and Bull Walk on Thursday 17th August with complimentary food and drinks through the day and into the evening for the conclusion of the Limousin Genetics Australia Elite Female & Genetics sale. Inspections on sale day start from 9.00am. Inspections can also be arranged outside of these times by appointment through our agents or directly with vendors.

If you cannot make it to the sale, please use AuctionsPlus online bidding or alternatively, you can contact our agents Aussie Land & Livestock or Bartholomew & Co to arrange phone bidding. Videos of all sale animals are available on AuctionsPlus and www.bjflimousin.com.au

Please contact Bradley (0410 022 750) prior to the sale if you have questions or need further assistance

Bradley and Jodie Frohloff

BUTCHER'S PERSPECTIVE

You may know or you may not. I was actually a butcher before I started breeding Limousin cattle. In 2004 Jodie and I opened Frohlie's Meats in Yarraman and continue to operate it today. We trialed various breeds over the years, but, as a butcher I found the most profitable to be Limousin. It is not just the high retail beef yield of the Limousin carcass that drives profitability, there are other important advantages of Limousin beef that keep our customers coming back for more.

Number 1 is consistency of Eating Quality.

Limousin beef has a very fine texture, a result of the influence of the F94L gene and as such is naturally tender and maintains moisture with excellent flavour during cooking. The knife cuts through the fine textured Limousin meat much easier than other breeds. Importantly the F94L gene is very heritable and as a result Limousin cross cattle carry the same characteristics.

Number 2 is evenness and optimal amounts of Fat Distribution

As a result of my 20 years of butcher's experience the type of Limousin cattle that we focus on breeding carry more fat and are much softer than the heavy muscled Limousin of the past. We find that the fat on the Limousin and Limousin cross carcasses is in all the right places so wastage is minimal with no effect on eating quality and with no extra feed. We place a strong emphasis on intramuscular fat. Limousin cattle have made massive gains in this important market driven trait in recent years.

When crossed with British or tropical cattle we are getting the perfect article for our butcher shop trade. We receive regular complimentary customer feedback on the flavour, tenderness and consistency of the quality of the Limousin meat. We invite you to drop into our shop and put it to the test.

Sale Information

PRE-SALE INSPECTIONS

Inspections of bulls are available on property from 9.00am on sale day, all day Thursday 17th August (see below) or prior in week of sale by appointment.

Earlier inspections can be arranged with agents or vendors outside of these times.

BULL WALK - THURSDAY 17TH AUGUST

Open invitation bull inspection Thursday 17th August. Complimentary dinner and drinks.

The bull walk will coincide with the Limousin Genetics Australia Elite Female & Genetics Sale on AuctionsPlus.

All females on offer will be available for inspection.

VIDEOS

Scan the QR code on each lot to view individual videos, or visit www.bjflimousin.com.au.

REGISTRATION AND GST

Buyers bid card system will be in operation.

All prospective buyers will be required to register prior to the commencement of the sale.

All lots are sold exclusive of GST with GST to be added to the sale price.

ONLINE BIDDING

Online bidding is available via AuctionsPlus.

See Page 4 of catalogue for instructions on how to register.

Scan QR code below to view AuctionsPlus catalogue and to bid online.

PHONE BIDDING

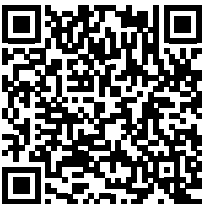

There is full mobile coverage at the sale venue.

If you intend purchasing over the phone please contact selling agents to reserve a line.

ACCOMODATION

There is accomodation available 7mins to Yarraman, 25mins to Nanango, 40 mins to Kingaroy and 1.5 hours to Toowoomba.

SCAN TO BID ONLINE

OUTSIDE AGENT REBATE

A 2% rebate applies to outside agents registering buyers in writing 48 hours prior to the sale, and settling on their behalf within 14 days of the related invoice. Rebate extended to 4% for agents attending the sale.

TERMS AND CONDITIONS

The sale is conducted under the ALPA Livestock Auctions terms and conditions (published 2017). These terms and conditions will be displayed on sale day.

BUYER'S INSTRUCTIONS

At the completion of the sale all successful purchasers are required to attend the office and complete a buyer's instruction and delivery sheet.

TRANSFER OF REGISTRATION

Bulls can be transferred to new owners for registration with the Australian Limousin Breeders' Society on request.

INSURANCE

Your new purchases are like any other piece of valuable farm equipment and it is wise to insure them especially for the first six/twelve months of their working life.

There are a number of options available through Elders Insurance who will have a representative onsite on sale day to look after your needs. While all care and attention will be taken the liability for sale animals lies with the purchaser at the fall of the hammer.

CATERING

Catering will be provided for morning tea and lunch with all proceeds going towards the local community group.

Everyone is also invited to join us for post sale drinks in appreciation of your support.

DISCLAIMER FOR ACCURACY OF CATALOGUE

All care has been taken to ensure all information in this catalogue is accurate during compilation, production and printing by all parties involved. All parties involved take no responsibility for any mistakes made during the compilation, production and printing or further actions taken by any party resulting from any mistake.

Herd Health

VACCINATIONS & TREATMENTS

Sale animals have been vaccinated/treated prior to sale according to recommendations as follows:

- ✓ Vaccinated against vibriosis
- ✓ Vaccinated against tick fever
- ✓ Vaccinated with 7 in 1
- ✓ Vaccinated against bovine ephemeral fever (3 day)
- ✓ Vaccinated against pestivirus
- ✓ Treated with pour on drench.

SEMEN TESTING

All bulls will be semen tested prior to the sale.

SCANNING & SUPPLEMENTARY SHEET

All bulls will be scanned for EMA, Rib & P8 Fat, and IMF, as well as having scrotal sizes measured on Monday prior to the sale.

These and any other relevant updates will be available on the Supplementary Sheet online, in hardcopy on property, or via email on request.

TEMPERAMENT

All of the animals for sale have been screened for temperament and vendors are confident that under normal circumstances each animal in the sale is of sound and acceptable temperament.

It is understandable that an occasional animal may misbehave on sale day due to the exceptional circumstances and the pressures of a number of strange people encroaching on their space.

SETTLING YOUR NEW BULL IN

On arrival at their new home it is important a suitable mob of animals is yarded to greet the newly purchased bull and minimise the stress on him. Suitable animals may include pregnant cows or steers but certainly not other bulls.

The Vendors warrant that:

- Bulls are fertile and capable of natural service within 6 months of date of sale to the purchaser (“Warranty Period”); and

The Vendor will either:

- Provide a satisfactory replacement; or
- Provide a credit for use at the next BJJ Limousin Bull Sale equal to the purchase price (excluding any costs and expenses of the purchaser in taking delivery) minus salvage value.

Where the purchaser claims a bull is infertile upon the purchaser submitting a veterinary report after the expiration of the Warranty Period stating that the bull is infertile or incapable of natural service:

- A statutory declaration by the purchaser to the effect that the substance of the report is true and correct must be provided; and
- The veterinarian must state that in his/her opinion there is no evidence that the bull has suffered any injury or illness during the Warranty Period which could have affected his breeding ability; and
- The veterinary report and the statutory declaration must be received by the vendor within 14 days of the Warranty Period expiring.

In the case of a warranty claim being submitted within the guidelines above the vendor reserves the right to seek a second veterinarian’s opinion and assessment of the bull as part of the process of settling the claim.

The purchaser acknowledges that:

- The purchaser does not rely, and it is unreasonable for the purchaser to rely, on the skill or judgement of the vendor as to whether the bulls supplied are reasonably fit for any purpose for which they are being acquired.
- To the extent permitted by law all other conditions and warranties implied by law in respect of the state, quality and condition of the bulls which may apart from this clause be binding on the vendor are excluded.
- The vendor has no liability (including liability in negligence) to any person for any loss or damage consequential or otherwise suffered or incurred by that person arising from the sale of the bulls to the purchaser.

Health & Safety

All of the sale bulls have been screened for acceptable temperament and are quiet to handle under normal circumstances.

Visitors must accept and understand that there are inherent risks associated with cattle handling and that sale day circumstances are not the normal environment the sale bulls and females.

- **Visitors are discouraged from entering the cattle pens and if they do they do so at their own risk.**
- **Children should be supervised at all times and not allowed to enter the cattle pens.**

People entering the cattle pens are at risk of injury.

Be especially alert to bulls fighting and if one is 'playful' with you do not respond by patting his head.

What a bull considers a playful nudge can break human legs.

We do not expect bulls to be aggressive with humans but sale day places extraordinary pressure on them as they experience an entirely foreign environment.

Remember even the quietest of bulls are in fact unpredictable animals.

Females with calves at foot may also be more protective than usual in these unfamiliar circumstances.

Do not crowd the animals or loiter in their pens.

We cannot cover every example of the dangers associated with cattle handling so please use common sense and be cautious and alert at all times.

Do not enter the pens unnecessarily.

Please call upon any of the agents for an escort through the bulls if required.

The days of bravado with stock have passed with Occupational Health and Safety legislation.

Pappalli T11 has the rare combination of homozygous polled and homozygous black. He is sired by the highly regarded Canadian sire 'Balamore Gryphon'. His dam produced a son last year by Summit Masterplan who was also homozygous polled and homozygous black (sold for \$17000). A calf with huge potential. Semen will be retained.

Technical Information

EXPLANATION OF ESTIMATED BREEDING VALUES

An Estimated Breeding Value (EBV) is an estimate of the genetic merit of that animal for each trait measured. EBVs are provided for the following traits:

Gestation Length: ranks sires for the time between conception and the birth of a calf. Shorter gestation is indicated by negative EBVs and longer by positive EBVs

Birth Weight: indicates the genetic potential for birth weight. Positive EBVs indicate higher birth weights and negative EBVs indicate lower birth weights of progeny.

200, 400 & 600 Day Weight: give us an estimation of the animal's genetic potential for growth.

Mature Cow Weight: estimates differences between animals in live weights of cows at 5 years of age.

Milk: a key component of fast growth to weaning is the dam's maternal performance. A bull with a high milk EBV should produce daughters which milk well.

Scrotal Size: indicates whether the bull will produce sons with above average or below average scrotal sizes.

Carcase Weight: ranks animals for carcass weight.

Eye Muscle Area: ranks animals for eye muscle area measured at the 12th rib on a 300kg carcass.

Rib Fat: ranks animals for rib fat depth at the 12th rib on a 300kg carcass.

Rump Fat: ranks animals for fat depth at the p8 site on the rump on a 300kg carcass.

Retail Beef Yield: ranks animals for the boned out retail beef yield of a 300kg carcass.

Intra Muscular Fat: ranks animals for the percentage of intramuscular fat at the 12th rib of a 300kg carcass.

Docility: is expressed as the increase or decrease in the percentage of progeny that will be scored as docile (score 1 or 2). Positive EBVs indicate a higher proportion of progeny that will be scored as docile and negative EBVs indicate a lower percentage of progeny being scored as docile.

COMPARING EBVS

The EBVs for Limousins cannot be compared with EBVs for animal of other breeds. They should be compared with the current average EBV for the Limousin breed shown below.

Breed Average EBVs for 2020 Born Calves

	GL	BWT	200WT	400WT	600WT	MCW	MLK	SS	CWT	EMA	RIB	RUMP	RBY	IMF	DOC
EBV	-2.1	+1.7	+21	+35	+49	+49	+7	+1.1	+31	+1.8	+0.0	-0.1	+0.8	+0.0	+43
Yearling Prime (\$)			+\$45				+\$41				+\$65				+\$81
				Domestic Maternal (\$)				Export Maternal (\$)					Northern Export (\$)		

ACCURACIES

Accuracies are presented with each EBV and give an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal and its relatives.

DISCLAIMER

The Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither the Australian Limousin Breeders' Society or ABRI oversee or audit the collection of this data.

Technical Information

EXPLANATION OF THE SUFFIXES TO ANIMAL NAMES IN THIS CATALOGUE

HORN STATUS

- PP - homozygous polled** - DNA test confirmed homozygous polled, or animal is homozygous polled by pedigree as both parents are confirmed homozygous polled, or animal is confirmed homozygous polled by progeny analysis process
- P - polled** - DNA test confirmed heterozygous polled, or animal is untested, information was provided by breeder.
- Ps - polled with scurs** - identified by details provided by breeder at time of registration, or DNA test confirmed heterozygous polled and breeder information indicates animal shows scurs.
- H - horned** - DNA test confirmed horned, or animal is untested, information was provided by breeder.

COAT COLOUR

- BB - homozygous Black** - DNA test confirmed homozygous black, or animal is homozygous black by pedigree as both parents are confirmed homozygous black, or animal is confirmed homozygous black by progeny analysis process.
- B - black** - DNA test confirmed heterozygous black, or animal is untested, information provided by breeder.
- R - red** - identified by details provided by the breeder.
- A - apricot** - identified by details provided by the breeder.
- O - other** - identified by details provided by the breeder.

F94L GENE

- AA - F94L 2 copies** - DNA test confirmed animal carries 2 copies of the F94L gene, or animal carries 2 copies of the F94L gene as both parents carry 2 copies of the F94L gene.
- AC - F94L 1 copy** - DNA test confirmed animal carries 1 copy of the F94L gene.
- CC - F94L 0 copies** - DNA test confirmed animal carries no copies of the F94L gene.
- U - F94L status unknown** - animal is untested and parent status is unknown.

LIM-FLEX

- LF - lim-flex** - animal is identified as Lim-Flex by pedigree details in line with ALBS regulations.

WHAT IS HOMOZYGOUS?

Homozygous is the term where an animal has two copies of the particular gene (tested or pedigree) for a trait (colour, polled). An example is homozygous polled where all progeny will be polled from that particular animal or homozygous black where all progeny will be black.
