HARRY' S WELL

2023 RAM INFORMATION

All rams in the catalogue have had the following treatments:

- ☑ Scabiguard scratched as lambs
- ☑ O.J.D vaccinated as lambs
- ☑ Full vaccination program with Glanvac 6 B12 and GlanEry7 B12
 - (Last treatment: 13/8/2023)
- ☑ Backlined with lice treatment Extinosad
 - (Last treatment: 5/7/2023)
- ☑ Drenched with Avomec Duel
 - (Last treatment: 13/8/2023)
- ☑ Ovine Brucellosis Accredited (SA 1347)
- ☑ All rams 100% paddock reared

**South Australian Property Identification Number
(S.A. 325198)**

**Vendor declarations and Animal Health Statements
are in this booklet.**

MUSCLE SCANNING

Muscle scanning was performed through Rachel Chirgwin of RAC Farming on 21/11/2022.

HARRY' S WELL

WHITE SUFFOLK SIRES - 2023 SALE RAMS

***Both Somerset rams are Sired by SOMERSET NEXTGEN (TCP 173.5), who at the time of recording held the **highest terminal TCP** in Australia.*

SOMERSET 20/159 (TCP: 167.9, PFAT: -0.1, PEMD: 4.9)

Long, stylish and large framed sheep with smooth shoulders, high muscling ram with PEMD of 50mm. Ranks in the Top 5% for all terminal breeds on TCP, PWT, PEMD & LMY.

SOMERSET 20/203 (TCP: 162.6, PFAT: 0.1, PEMD: 4.7)

Stylish, stocky and correct with a tremendous carcass. Highly muscular ram as seen by the huge PEMD of 58mm!

DAYS 17/354

Purchased at the Day's White Suffolk sale.

A huge and long ram. Very white in the muzzle.

RAMSAY PARK 18/8200

Purchased at Ramsay Park dispersal sale.

A long structural correct ram with a clear white muzzle.

OMAD 16/308

Purchased at the Royal Adelaide Show.

A long, well balanced ram with clean points.

BUNDARA DOWNS 18/2322

Purchased at the Foundation Breeders Sale.

A long muscular ram with depth of carcass.

CATALOGUE GLOSSARY

D = DAYS | RP = RAMSAY | S159, S203 = SOMERSET | O = OMAD | B = BUNDARA DOWNS

WHITE SUFFOLK SIRES - 2023 SALE RAMS

Today's sale features the first sons of our Somerset bloodline. Both Somerset rams were joined with selected ewes to further enhance on their ability to provide correct structure, early growth, and muscling.

Both Somerset rams were sired by NEXTGEN (**TCP: 173.5**), pictured below as a lamb. NEXTGEN born in 2018 is still used as a sire by Somerset White Suffolks.

The injection of early muscling and lower birth weights particularly from the Somerset line provides us with confidence that the 2023 sale team is the best we have presented yet.

The maximum weight of 46.5kg at weaning for 13-week-old lambs was impressive and shows the importance of chasing good genetics.

HARRY' S WELL

AUSTRALIAN WHITE – SIRES

The beginning of the Australian White journey began in 2022, with the purchase of 21 SIL Tattykeel red tag ewes joined to Tattykeel red tag sires. This was followed by the purchase of 40 mated ASBV compatible stud registered Baringa Ewes.

In late 2022 we purchased Lot No.1 at the Baringa Seriston on farm auction at Avenue Range for \$14,000. A full shedding ram with thick skin and correct structure. The earliest of the 2024 sale team rams were weaned on 18/8/2023 at an age of 14 weeks, with multiple quality ram lambs weighed to an impressive MAX of 54.5kg. A testament to the early growth of this line of lambs sired by Baringa Seriston 21A133T.

Lot No.1 – Baringa, 21A133T for \$14,000

Another 30 red tag Tattykeel ewe lambs were purchased in 2023 to further bolster the 2024 ram sale team, all joined with Baringa, 21A133T.

STUD NEWS

The team at Harry's Well would like to welcome you all to our 2023 Ram sale. This year we are embarking on our new venture with the introduction of our Australian White Stud. We have chosen to put 15 rams up and look forward to many more next year. The 2024 sale will include some Australian Whites with full ASBVs, along with some rams carrying a single and double copy of the MyoMax gene. A single copy (Myomax) can produce animals with 7% LESS FAT and 5% MORE MUSCLE and a double copy (Myomax Gold) up to 14% LESS FAT and 10% MORE MUSCLE.

During cataloguing of the White Suffolks we chose to retain two rams as stud sires for our future breeding program, both were sired by Somerset 159. Both rams share the genetic traits of their sire and exhibit correct structure, smooth shoulders and a solid carcass weighing in at 130kg (VID: 1035) & 122kg (VID: 1097).

The Somerset bloodline has increased the potential for strong early growth. This increased ability along with marbling is exciting and we look forward to our clients telling us how their 2023 lambs have reached export weight limits just like multiple clients did in 2022.

With the season being relatively slow after the opening rains we were pleased with an average weight across all sale day rams of 104kg. Being late June/July drop lambs, these rams have more growing to do and will weigh heavier than listed in the catalogue on sale day.

A special thanks to Curly and the team at Nutrien Ag Loxton, Gordon Wood from Nutrien Stud Stock and to all our fantastic helpers, without you the day wouldn't run as smoothly as it does.

We thank you for your attendance and hope you find some rams that will suit your needs.

Understanding LAMBPLAN Terminal ASBVs

- Australian Sheep Breeding Values (ASBVs) allow you to compare the genetic differences between rams.
- Rams contribute half of a lamb's genetics. Rams have the largest impact on genetic progress, as they have more progeny throughout their lifetime.
- ASBVs are based around 0. It is important to compare ASBVs against current industry percentiles, which can be found on the Sheep Genetics website.
- ASBVs are reported with an accuracy figure. The higher the accuracy, the more information there is contributing to the ASBV, and the closer it is to the true breeding value of the animal.
- ASBVs are reported with an age stage, shown as a letter at the beginning of a trait e.g. weaning weight is WWT.
- Indexes combine traits into a single ranking value to describe an animal's suitability for a given production system.

How to interpret ASBVs

A selection index is an important tool to drive genetic improvement when there are a range of traits of economic or functional importance. Rams with higher indexes will produce lambs that are more suited to a particular production system.

Rams with a more positive ASBV for weight (WT) will produce lambs that grow faster and therefore reach target weights in a shorter period of time.

Rams with a positive ASBV for fat (FAT) will produce lambs that are fatter, at the same weight. This ram will produce lambs that are on average 0.5mm fatter at the GR site when compared with an ASBV of 0mm.

Intramuscular fat (IMF) is a measure of the chemical fat percentage in the loin muscle of a lamb and is often referred to as marbling. IMF has been shown to have a significant impact on the flavour, juiciness, tenderness and overall liking of lamb. Rams with more positive IMF ASBVs produce progeny with more intramuscular fat.

Shear force (SF5) is a measure of the force or energy required to cut through the loin muscle of lamb after 5 days of ageing, the ASBV is reported in deviations of kilograms of force. Rams with more negative SF5 ASBVs produce lambs with more tender meat.

INDEX	WT (kg)	EMD (mm)	FAT (mm)	LMY (%)	IMF (%)	SF5 (kg)	LE_DIR (%)	WEC (%)
199.46	9.5	1	1	2.4	-0.1	-0.5	3.0	-40
ACC. 58	ACC. 70	ACC. 65	ACC. 63	ACC. 57	ACC. 55	ACC. 57	ACC. 55	ACC. 52

Rams with a more positive ASBV for eye muscle depth (EMD) produce lambs that have more muscle. A ram with an ASBV of 1mm will breed lambs with 0.5mm more eye muscle than a ram with an ASBV of 0mm.

Rams with a more positive ASBV for lambing ease (LE_DIR) will produce lambs that have a lower incidence of lambing difficulties. A ram with an LE_DIR of 3% will produce 1.5% fewer difficult lambing events than a ram with an ASBV of 0%.

Rams with more positive lean meat yield (LMY) ASBVs produce lambs that have a higher lean meat yield percentage at slaughter. Lean meat yield is expressed as a percentage of the Hot Standard Carcass Weight, where all bone and salvage fat is removed. A ram with an ASBV of 2.4 will produce progeny that are 1.2 percent higher than progeny of a ram with an ASBV of 0.

Rams with a more negative worm egg count (WEC) ASBV will produce progeny that are more resistant to worm burdens. A ram with a WEC ASBV of -40% will produce progeny that have 10% less worms compared to a ram with an ASBV of -20%.

NATIONAL SHEEP HEALTH DECLARATION

July 2019

Property Identification Code (PIC) of this property

This MUST be the PIC of the property that

the stock is being moved from

S A 3 2 5 1 9 8

Attached to accompanying NVD/Waybill No.

2 4 5 4 4 5 0 3

SECTION A – Biosecurity Information

1. All consigned sheep are from a Livestock Production Assurance (LPA) accredited property? Y N

2. The number of different sources of sheep that have been introduced onto the consignment property in the last 5 years is:

0 (Closed flock) 1-5 6+ Rams Only

SECTION B – Animal Health Information

3. All consigned sheep are from a flock that is free of virulent footrot? Y N

4. All consigned sheep are from a flock that is free of benign footrot or scald? Y N

If (N) please provide further information below

5. All consigned sheep are from a flock that is free of lice? Y N

6. All consigned sheep are from a flock in an ovine brucellosis accreditation scheme? Y N

If Yes, Flock Accreditation No. (except Qld) 1347 Expiry Date 31/12/2023

7. All consigned sheep are Johnes disease (JD) Approved Vaccinates? Y N

If Yes, I have been continuously vaccinating all retained lambs in the consignment flock against JD for 8 years. (Vendor-bred sheep only)

8. All consigned sheep are from a SheepMAP flock? Y N

If Yes, Status Year commenced Certificate Number

*See explanatory notes on back page for further information

9. All consigned sheep are from a flock with a negative test for JD? Y N

If Yes, which test? Date of test / /

10. Any other JD management practices carried out on the property?

ALL SHEEP VACC WITH GUPAIR

11. Any other relevant health information

SEE ATTACHED NATIONAL VENDOR DEC

SECTION C – Treatment Information of Consigned Sheep

Treatment type	Product	Date of last treatment
External Parasite Treatment	EXTINGAP	5/7/2023
Internal Parasite Treatment	AVUMEC PUEL	13/8/2023
Other treatments	GUPAIR	AS LAMBS
	SCABIGUARD	AS LAMBS
Vaccination (other than JD)	GLANERY 7 B12	13/8/2023

Declaration (see explanatory notes for further information)
