

2023 Royal Qld Show (EKKA)
Prime Lamb Carcass Competition

21st Dorper & White Dorper

RAM SALE

Friday 22 September 2023

On-property - Bellevue - Millmerran - QLD

Commencing 1pm (Qld time)

Inspections from 10 am

2022 Royal Qld Show Prime Lamb Carcass Competition. L-R: Pat McMahon, McMahon Bros, Killarney; Sophie Madge, Bellevue; Mark Carey, Carey Bros Abattoir, Yangan.

2019 Royal Qld Show Prime Lamb Carcass Competition. L-R: Robbie Curtis, Bellevue; Ross Fraser, Frasers Transport; David Curtis, Bellevue.

21st Dorper & White Dorper Ram Sale

Friday 22nd September 2023

Bellevue - Millmerran - Qld

Inspections from 10am
Sale commences 1pm (Qld)

Interfaced AuctionsPlus

Bellevue: David Curtis - 0427 066 535
Sophie Madge - 0449 183 181

Nutrien: Colby Ede - 0417 265 980
Gus Foott - 0400 901 387
Andrew Costello (AuctionsPlus) - 0429 485 191

Images of all lots will be available at:

Nutrien Ag Solutions Pittsworth	89 Yandilla Street, Pittsworth	07 4693 6200
Nutrien Ag Solutions Oakey	6 - 8 Gayle Street, Oakey	07 4691 1577
Nutrien Ag Solutions West Prairie	7 Jeffries Road, West Prairie	07 4692 4246

Welcome

The Curtis family welcome you to Bellevue's 21st Dorper and White Dorper Ram Sale.

Championship ribbons at the 2023 Royal Queensland Show (EKKA) Prime Lamb Carcass Competition continues to back up our long-held breeding objectives and 'ground truths' the rams we breed.

The 2023 Royal Queensland Show (EKKA) Prime Lamb Carcass Competition saw Bellevue Dorper commercial lambs achieve the following:

- *Overall Paddock to Plate Champion Lamb*
- *Overall Champion Pen of Three Lambs (1st, 2nd & 3rd - Pen of Three Heavy Trade Lambs)*
- *Champion Nominated Grass Fed Pen of Three Lambs*
- *Champion Nominated Grass Fed Single Lamb*

The 2022 Royal Queensland Show (EKKA) Prime Lamb Carcass Competition saw Bellevue Dorper commercial lambs achieve the following:

- *Overall Champion Pen of Three Lambs (1st, 2nd & 3rd – Pen of Three Light Trade Lambs)*
- *Champion Grass Fed Pen of Three Lambs*

This feedback reinforces that Bellevue's stud selection criteria is 'on-point', confirming we are using the correct parameters with our data collection, Lambplan and visual selection to produce rams that sire quality prime lamb carcasses.

Bellevue Dorper and White Dorper rams are selected to produce an earlier-maturing lamb with a quality meat-trade desirable carcass, featuring excellent conformation, fat distribution, eating quality and very good meat to bone yield. Importantly, these prime lamb carcasses are giving good recovery for the butcher/processor selling the meat.

As seed-stock producers we believe it is inherent on us to deliver to our commercial clients' rams that breed prime lambs with these industry

desirable carcass traits. We put a lot of time, effort and data collection into our stud Dorper genetics, and it is satisfying to see our Bellevue Dorper lambs coming out on top.

Our breeding continues to focus on the factors we believe align with the production of quality commercial prime lamb.

- ***Hardiness and functionality.***
- ***Fast growth to market weight.***

Early maturing lambs that are ready for the market at an earlier age and have bigger muscle cuts at an earlier age.

- ***Medium framed ewes and rams for efficient and early production of finished lambs.***

Breeding stock that won't eat you out of house and home. They will not have the highest adult weight, because they reach maturity earlier in their life.

Early maturing can be measured by performance testing; however, it can also be visually seen in a certain 'type' that does not carry all their weight in height and length, but as much in width and depth - in balance.

Because of early maturing the Dorper often removes the feedlot from the value chain.

- ***Maternal characteristics of fertility, easy lambing, milking and mothering.***

The Dorper is a Maternal breed where reproductive ability, fertility, mothering and functionality are important traits. A certain amount of fat is desirable as it assists not only with eating quality but with fertility and good mothering, especially when seasons are dry.

A certain amount of fat also makes the opportunity for double-joining ewes a reality.

- ***Exceptional and high yielding carcass attributes that are desired by butchers.***

“Meat at Billy’s”, Brisbane’s best butcher (2022 courier Mail Poll), continue to purchase our lambs seasonally. Butcher Brad Strudwick says “whatever you are doing at Bellevue, don’t change a thing, we love your lamb”.

The Curtis family thank *NAB Regional and Agribusiness Toowoomba* for once again supporting our ram sale and providing post-sale refreshments. NAB have been long-time supporters of the Bellevue Ram Sale. Please feel welcome to make yourselves known to David Moffitt, Jason Lipp and the NAB team attending.

Please join us for morning tea and lunch, which will be served prior to commencement of the auction. Refreshments will be served following the sale, so please feel welcome to stay on afterwards and catch up. If you’re not in the market this year and would enjoy an outing, we encourage you to come along, catch up.

To all breeders, we wish you every success with your Dorper endeavours. To everyone participating in this sale, we thank you for your support.

David, Robbie & Sophie Curtis & family

Bellevue Dorper Rams - Carcass Championship Winning Genetics

The Rams

We are proud to offer for sale this year's draft of rams. We are impressed by the rams and the data backing them up.

The rams catalogued are just turning 12 months of age. Most will still have their lamb's teeth.

They will be sold in their 'working gear', no haircuts. And as Spring has sprung, some still have their lamb-cover, while most have commenced their first shedding.

All rams are full-blood and eligible to be registered with the Dorper Sheep Society of Australia. Syndicate joining has been used to replicate the commercial production environment, and DNA testing will be used to identify sire parentage for anyone requiring registration of their purchase. Please indicate on the 'buyer instruction' page if you want your rams registered.

Sale Information

The auction will be conducted by Nutrien and is scheduled to start at 1pm sharp (Queensland time), Friday 22nd September 2023, on-property at 'Bellevue', 60 Bellevue Road, Millmerran, Qld. Inspections are welcome from 10am on sale day. The auction is interfaced with AuctionsPlus.

Outside Agent Rebate

Nutrien Toowoomba is the agent. A 3% rebate is offered to outside agents, introducing a client in writing to Nutrien Toowoomba (07 4637 3000) 24 hours before the sale and who attend the sale with, or buy on behalf of their client, and settle within 7 days.

Inspection of Sale Rams

Inspections are welcome prior to sale day, by arrangement. Otherwise, inspections are welcome from 10am on sale day.

AuctionsPlus

This auction is interfaced with AuctionsPlus to allow buyers to participate who will not be able to attend on sale day. If using AuctionsPlus you must register *at least 24 hours prior to the auction*; www.auctionsplus.com.au

Telephone Bidding

If you are unable to attend the auction and will not be using AuctionsPlus, telephone bidding is available. Please speak with your livestock agent or contact Nutrien to arrange. Bellevue has mobile telephone coverage with the **Telstra** network. Some carriers do not have coverage here.

Animal Health

Brucellosis: Bellevue is Ovine Brucellosis accredited (QGMM0549 expires 31/10/2024).

Ovine Johne's Disease (OJD): Introductions to Bellevue over the last five years are less than 5 head and have been selected from properties with biosecurity plans and/or negative testing. To the best of our knowledge the Bellevue flock is not, and is not suspected of being infected with OJD.

Insurance

We recommend insurance for your new purchases. Insurance may be arranged at the sale through Nutrien.

Collection of Sale Animals

For those unable to collect or attend in person on sale day, we will assist with coordination of the delivery of your purchases. Please talk to us about delivery of your rams, complimentary delivery is offered to major centres in Qld & NSW.

Please note that no animals will be available for loading/transport until after completion of the auction.

Directions

“Bellevue” is located 11km off the Gore Highway, approximately 80km west of Toowoomba, 140km east of Goondiwindi and 20km east of Millmerran in Queensland.

Google maps: Please type **Bellevue Grazing Company** if using Google maps, so that you arrive at our front gate, exactly where you need to be. (If you use our physical address of 60 Bellevue Road, you may end up in a back paddock...)

From Millmerran, take the Gore Hwy towards Toowoomba for approximately 10km. Turn right into **Millmerran - Leyburn Road** (150m past historic church on left). After 6km, turn right into **Reichle Road** which is gravel. (If looking for a landmark there is a white railing property entrance fence on left at the Reichle Road turnoff.) Bellevue is located 5km along Reichle Rd. Keep to your right and don't take any roads that veer left. Bellevue's entrance is located 600m down a no through road spur off Reichle Rd named **Bellevue Road**.

Bellevue Ram Sale signs will be in place. If you need further directions please phone Robbie Curtis 0427 789 655.

Bellevue Stud Dorper & White Dorper Rams

Performance Information

Two tables of performance information have been presented for each lot. The first table gives the *LambPlan ASBV's*. The second table gives the visual scores of the *'Bellevue Ram Evaluation Guide'* for each ram.

LambPlan

KEY BENEFITS: LAMBPLAN enables sheep breeders to enhance their ability to select the correct ram for their enterprise, to improve the rate of genetic gain of their flock and to more reliably meet market specifications and improve overall productivity.

Only LAMBPLAN provides a benchmarking system that allows breeders to track the level of improvement in the genetic make-up of their flock.

LAMBPLAN provides flexibility enabling ram breeders to concentrate on the traits considered important to their breeding objectives and the requirements of their clients.

Commercial buyers can use LAMBPLAN ASBVs to objectively compare rams and identify those which best suit their production system and market targets.

An ASBV is an estimate of the genetic potential an animal will pass on to its progeny. ASBVs are available for a range of economically important traits and are designed to be used in conjunction with visual selection.

The appearance and performance of an animal is a combination of its genes and the *environment* in which it is raised (e.g. the amount and quality of feed, single/twin/triplet birth). ASBV's account for these environmental effects, allowing the comparison of sheep based on the genes they will pass on to their progeny. It is important to remember when selecting sheep, you are choosing the genes, not the environment.

Birthweight ASBV's (BWT) estimates the genetic difference between animals in weight at birth.

Liveweight ASBVs (WWT & PWT) indicate an animal's genetic merit for growth. A more positive ASBV means the animal is genetically faster growing.

WWT: Rams with a more positive weaning weight (WWT) will on average produce lambs that grow more quickly to weaning (100 days).

PWT: Rams with a more positive ASBV for post weaning weight (PWT) produce lambs that grow more quickly and reach target weights in a shorter time. PWT estimates the genetic difference between animals at 225 days of age.

We caution against 'over-selecting' for traits such as high growth while not checking that the animal has length and width and depth and balance.

Fat depth ASBVs (PFAT) describes the fat depth of an animal at a constant weight. A more negative ASBV means a genetically leaner animal.

PFAT: Rams with a more negative ASBV for post weaning fat (PFAT) will produce lambs that are leaner at the same weight. Post weaning fat estimates the genetic difference between animals at 225 days of age.

In a self-replacing flock, fat is important, not only for eating quality. Ewes need fat to milk and mother and maintain body condition, especially in dry climates. Fat helps the ewe to conceive readily and to successfully raise her lambs. In wetter climates, positive fat is not as important as the climate is kinder.

Eye muscle depth ASBVs (PEMD) describes an animal's genes for eye muscle depth at a constant weight. A more positive ASBV means a genetically heavier muscled animal that will have slightly more of its lean meat in higher-priced cuts. A positive PEMD increases the value of the carcass by increasing the amount of lean meat it contains, as well as the dressing percentage.

PEMD: Rams with more positive ASBV's for eye muscle depth (PEMD) produce lambs that have a higher lean meat yield. Post weaning muscle depth estimates the genetic difference between animals at 225 days of age.

MCP Index (Maternal Carcass Production Index) The MCP index is for a self-replacing maternal operation with a carcass production focus where there is no mating to terminal sires. Consequently, MCP favours high early growth animals with good carcass and reproductive performance. *This index balances the main economic traits relevant to Maternal breeders who consider that fleece traits are not economically important.* This allows higher gains to be made for growth and carcass traits. The index also assumes no mating to terminal sires. The index aims to maintain adult weight at current levels.

The Bellevue Ram Evaluation Guide Explanation

In this catalogue, listed below the LambPlan details for each ram is the *Bellevue Ram Evaluation Guide*. This Guide gives individual information for each lot, to assist with the visual selection of the most appropriate ram for a given enterprise.

Please note that the rams presented at this sale have not been independently typed under the International Breed Standard.

Head quality is scored from 5 Stud, 4 Stud, and 3 Commercial (2 and 1 are culled).

Balance is a score for masculine length, width and depth, in *Balance*. Ideal carcass shape and full of meat will score 5. A score 4 is still studable and 3 score is good commercial (Score 2 and 1 are culled).

Structure is a score for structural correctness. An animal with ideal structure will score a 5. A score 4 is still studable and a score 3 is a good commercial that is structurally sound and functional.

Feet is a score for foot structure and claw set. (Score 2 and 1 are culled).

Colour and Cover are scored as per the breed standard.
