Welcome to our 24rd Annual Sale.

Chandpara Southdown Stud was officially registered in 1988 but its founder, Andrew Sellars-Jones, has been breeding Southdowns since 1974. Over the years, with the aid of imported and local genetics and a policy of keeping the ewe numbers small thanks to harsh culling, the flock has become a dependable producer of high quality sheep with the renowned Southdown traits: Easy lambing, rapid weight gain, unsurpassed eating quality and a carcass that is sought after by processors. In 2021, the Southdown/White Suffolk hybrid was offered for the first time and proved popular with commercial prime lamb producers, combining the best attributes of both breeds.

Health

8/22: Glanvac 6-in-1

3/10/22: Glanvac 6-in-1, Gudair vacc

6/1/23: All: Triguard drench. Rams: 5 in 1 vacc

3/5/23: All: Dynamax controlled release capsules.

13/9/23: Tridectin drench

The Chandpara flock is footrot, lice and Brucellosis-accredited free. This year's lambing percentage stands at 168% lambs surviving and thriving beyond 2 months of age. Low fertility and poor reproductive performers are not tolerated and are culled. Every effort has been made to present these sheep for sale in a healthy and fertile state. Due to biosecurity reasons, sold sheep cannot be returned. They represent a significant investment and as such, **livestock insurance is strongly recommended.**

G -ve denotes Gaucher negative (tested or via pedigree). All sires used are Gaucher negative. The entire 2021 ewe drop are Gaucher negative.

Scanning

This year the rams were **LAMBPLAN scanned on February 10th** and **STOCKSCAN'd on September 13^h 2023.** Stockscan data are displayed in the catalogue. Lambplan data will be available on Sale Day
