GREENDALE MERINOS

Greendale Merinos is a family owned and operated commercial merino breeding business consisting of five properties based around Cooma in Southern NSW.

We currently mate 8500 ewes annually and use this ewe base to select a nucleus breeding flock. All ewes are measured and tested for all wool traits, fleece weights and body weights. Only the best performing 10% of maiden ewes join the selected nucleus flock each year. Maiden ewes are **selected off ASBV's measurements and visually assessed for structural integrity.**

Our business is **completely commercially focused** aiming to produce the most efficient, productive, and profitable Merino under realistic, commercial **paddock** conditions.

Greendale genetics have benchmarked to the merino industry for **over 35 years** with the introduction of **ASBV's, Genomic Testing and DNA parentage** driving the **growth and profitability** of our business and that of our clients' businesses to **the highest profit potential**.

GREENDALE GENETICS are Benchmarked to the Merino Industry using:

- **Trials** - over 35 years of performance for production and profitability in more than 20 trials across NSW. With results that are unmatched by any other merino genetic source.
- **ASBV's** - performance data has been entered into Merino Select for the past 13 years.
- **Sire Evaluations** - Greendale sires have been entered in evaluations and trials comparing their progenies performances to other merino industry genetics.
- **Introduced Genetics** - Only genetics that has performance in all three benchmarking tools above are introduced using an annual AI programme.
- **Genomic Testing and DNA Parentage** - Greendale has recently introduced genomic testing to determine DNA parentage into out nucleus flock. This allows precise identification of a progeny's potential genetic merit based on its pedigree.

This focus on benchmarking genetics has driven the growth, profitability and sustainability of our business and our clients' merino breeding businesses.

SALE INFORMATION

September 2022 Drop Rams

Shorn/Fleece Weight	6 June 2023
Mid Side	5 July 2023
Body Weights	10 September 2023 (Av. BWT 60kg)

Health Status

Ovine Brucellosis Accredited – Cert No. CW05/1

Gudair Vaccinated

6 in 1 Vaccination Program

GREENDALE GENETICS ECONOMIC IMPACT AND PERFORMANCE

Greendale Merinos consistently proven; high-ranking results are unmatched by any other merino genetic source. Our continuous involvement in various trials and evaluations, emphasises the substantial impact and improvement Greendale genetics can obtain on the most heritable and profitable traits of a commercial merino business.

Greendale genetics has retained the highest profit per hectare as well as the highest profit per head for the past 15 years of the Bookham Ag Wether Trial.

“Through adopting the use of genomic technology and comparison tools to predict genetic performance allows increasing accuracy of the animal data over its lifetime.”
 “This enables us to breed and choose the most profitable genetic performances to secure and receive profitable results to meet your breeding flock objectives.” Alan McGufficke

With a well-recognised and prominent focus in benchmarking genetics it has driven the growth, profitability and sustainability of our commercial breeding business and our clients.

Table: Year 4 Overall results for Wool (\$/hd) and Meat(\$/hd) value (Greendale Genetics Teams)

2022 Teams	CFW	FD	BWT kg	Meat \$/hd	Wool \$/hd
McGufficke Partners	4.86	16.4	71.70	\$ 153.83	\$ 119.46
Mayfield Partnership	4.97	16.8	68.60	\$ 147.42	\$ 116.27
SR SE Mills	4.61	17.0	73.90	\$ 161.07	\$ 105.17
Avoca	5.19	17.7	70.10	\$ 149.89	\$ 105.27
Greendale Average	4.91	17.0	71.08	\$ 153.05	\$ 111.54
Trial Average	4.30	17.0	73.90	\$ 153.40	\$ 91.70

GREENDALE GENETICS ECONOMIC IMPACT AND PERFORMANCE

Greendale genetics have proven that breeding **moderate sized sheep** to be the **most efficient** and **profitable animals**. This has and continues to be proven over a number of comparisons in which Greendale clients participate in.

Greendale Genetics ranked **number one for \$/DSE out of 73 other bloodlines** measured and compared in the *2007-2018 Bloodline Comparison evaluation*.

Through adopting the use of genomic technology and comparison tools to **predict** genetic performance allows **increasing accuracy** of the animal's data over its lifetime.

The continuation of collecting and measuring data from an animal's youth into their adulthood enables us to see longevity and choose and breed the most profitable genetic performers to secure profitable results for your breeding flock objectives.

NOTES

Independent Breeding Advice and Services
You Can Depend On

- Breeding program design
- Electronic identification systems
- Data collection processes
- On farm and off farm benchmarking
- Data management and analysis
- Provider of RAMPOWER indexes
- Sheep Genetics MateSel Provider
- Educator and mentor to young industry leaders
