# WELCOME TO THE ANNUAL CHARLEVILLE DORPER AND WHITE RAM SALE TO BE HELD AT THE CHARLEVILLE SHOWGROUNDS AT 11am ON FRIDAY 20TH OCTOBER

## Smit Dorpers and Boondarra White Dorpers

The love of Dorpers began for the Smit Family in South Africa around 1990. Smit Dorpers and Boondarra (White Dorpers) Studs have been established since 2006. The Studs began when Louwrens, Emma and Francois Smit Emigrated from South Africa to Western Australia. They brought a few Dorper embryos with them, mainly from Kasteel White Dorpers. In 2007 the Smits bought a few Dorper Ewes from Kaya Dorpers, Adrian Veitch from Kaya helped the Smits with an Embryo program from some of his Stud Rams. In 2010 The Smits moved to QLD with the small Stud and from there it grew.

Wayne and Karen Dingle then purchased both Studs -Smit Dorpers and Boondarra (White Dorpers) in March of 2020. They had just been waiting for the right time to come around as they had been reading up about Dorper's and wanted to start a Stud at "Westlands" 20km West of Mungallala, QLD 4467 and by chance they were at the right place at the right time when they met Louwrens and Emma for the first time.

Wayne and Karen are breeding for Structural soundness especially through the shoulders along with good feet, barrel depth and fertility. Good genetics breed on to create your next lot of breeding stock. All our Rams and up and coming Ewes are Classed by Qualified Dorper Inspector Nick Pagett who is very passionate about passing on his knowledge to other Dorper Breeders. All our Rams and Ewes are inspected with sticking to the strict conditions of the Dorper World Standards, so we are confident that you as a buyer are purchasing quality stock.

As Stud owners Wayne and Karen are very hard on the selection program, to stay in the stud the Ewes must rear and wean a lamb every year regardless of the season. They do 2 drops each year so they have Rams available to sell all year round to the commercial breeding market. They wean at 3 – 3 1/2 months of age averaging 35 kg. They look for quick weight gains in lambs and the ewes must hold their condition to get back in lamb. The ram and ewe lambs are classed out over the next few months. Within the stock they are selecting structure, sound feet and mouths, shedding ability and colour along with wet skin and good fat cover. The dorper's graze on natural grasses and are supplied a lick made up to suit the soil tests collected. The grasses consist of buffel, native blue grass, kangaroo grass, spear grass, and seasonal herbage and the dorper's like to browse on sandal wood, wilga, brigalow and mulga. These Dorper's are climatized to the harsh western QLD conditions ranging from -6 degrees to 45 degrees plus.

For the maiden Ewes are all now classed with only keeping the Stud T4 & T5 within the studs. The Ewes are then put to the rams at 45kg and up for a 6-week cycle where they are then scanned. The pregnant ones are then one step closer to being placed in the stud, the T3 ewes are sold as commercial ewes and the ewes not pregnant go to the meatworks. The new maiden stud ewes must deliver and raise a lamb unassisted and be very protective mothers along with holding their condition to get back in lamb to remain in the Stud. Each flock is single sired with approx. 40 to 70 Ewes in a paddock.

Wayne and Karen Dingle have added some new bloodlines to their Studs such as Winrae, Amarula, Burrawang, Dell, Bellevue, Boonoon, Etiwanda, African Dumisa and Norwood.

Smit Dorpers and Boondarra flocks are both accredited under the QLD Ovine Brucellosis Accreditation Scheme and are compliant with a Biosecurity Plan and free of Ovine Dermatoparaxsis which is a requirement by the Australian Dorper Society.

At the end of the day, it's about fertility and quick growth as that is what Smit Dorpers and Boondarra White Dorpers are bred for. They are *"Breeding Producers, Not Excuses"*.
