Re : Ennerdale Proprietors Pty Ltd - 2024 Sale Bulls

On Wednesday 6th December, 2023, I visually examined the conformation, mouths, eyes and gait of 37 Poll Hereford bulls being offered for sale on Wednesday 14th February, 2024 by **Ennerdale Proprietors** at the Dundonnell property, "Ennerdale".

At the same time, I examined the external genitalia of these 37 bulls, both visually and/or by manual palpation. The scrotal circumference of each bull was also measured and recorded. All bulls measured in excess of the minimum scrotal circumference as recommended for the breed. Testicular consistency was considered to be normal in all 37 bulls.

Lot No	Tattoo No	SC (cms)	Lot No	Tattoo No	SC (cms)
1	ENNT202	37.5	21	ENNT261	39
2	ENNT269	36	22	ENNT276	40
3	ENNT240	35	23	ENNT228	36
4	ENNT259	36.5	24	ENNT211	40
5	ENNT283	37	25	ENNT267	37
6	ENNT216	36.5	26	ENNT204	35
7	ENNT264	42	27	ENNT226	38.5
8	ENNT225	37	28	ENNT277	39
9	ENNT229	38	29	ENNT208	36.5
10	ENNT207	40	30	ENNT248	37
11	ENNT273	34.5	31	ENNT201	37
12	ENNT257	36	32	ENNT328	32
13	ENNT310	39	33	ENNT314	36
14	ENNT317	38.5	34	ENNT344	34
15	ENNT305	34	35	ENNT359	38
16	ENNT297	39.5	36	ENNT339	38
17	ENNT315	40	37	ENNT331	36
18	ENNT321	37.5			
19	ENNT306	39.5			
20	ENNT212	38			

From the examination performed, I consider each bull to be free from any significant physical defect at the time of examination, with the results being consistent with good fertility. As a result, I consider each bull to be a good candidate for insurance.

A sample of tissue has also been collected from each bull offered for sale in the form of an ear notch. These samples were submitted for BVDV antigen capture ELISA testing. All 37 bulls were found to be negative for this test. This means that **NO bulls in this sale are persistently infected with BVDV ie All bulls in this report are non PI animals.**
