

Keringa Angus is excited to introduce this year's exceptional bull lineup, which boasts length, depth, width, superb structure, and outstanding temperament. A solid maternal background supports all of these attributes.

In 2024, we offer the most extensive selection of grandsons from the legendary Millah Murrah Paratrooper P15 outside Millah Murrah. This includes sons of the record-breaking **Millah Murrah Rocketman R38, Millah Murrah Rembrandt R48,** and walking sire **Millah Murrah Paratrooper R127.** We also present a great selection of alternate lines from favourites **Millah Murrah Nugget N266, Millah Murrah Quixote Q96, Millah Murrah Nectar N334, Ascot Qualifier Q329, Landfall Nobleman N106,** and new lines from **Millah Murrah Rector R53** (Nectar son), **Banquet Quarter Pounder Q252,** and **Millah Murrah J194.**

Our focus is on breeding true-to-type modern Angus with exceptional phenotype. These bulls are raised on pasture for commercial resilience and will not disappoint. We use genomic technology to ensure all bulls are, at a minimum, sire-verified and dam-verified to all dams born after 2019. Genomics has enabled us to offer a much higher accuracy on the Estimated Breeding Values (EBVs) for younger bulls, which will limit data shifts in the future and give you more confidence in your investment.

Investing in Keringa bulls guarantees high-quality animals with superior genetics to improve your herd constantly and increase profitability.

Regards, Trent Walker

PARATROOPER

STRUCTURAL INTEGRITY PHENOTYPE-TEMPERAMENT-FERTILITY

PARATROOPER LINE
Paratrooper P15 1 son sells.

MILLAH MURRAH PARATROOPER P15 is a remarkable sire that produces consistent phenotype and performance in his offspring. This is demonstrated by the three sons who sired a significant portion of this year's catalogue. One son sells.

MILLAH MURRAH ROCKETMAN R38, the record-breaking son of a Paratrooper, was sold for \$280,000 to Brooklana Angus. He has excellent early growth and phenomenal phenotype and passes down all the best qualities of his sire to both bulls and females. The bulls are thick and long, with exceptional muscle patterns and soft skin. Nineteen sons sell.

MILLAH MURRAH REMBRANDT R48 is a remarkable bull, who fetched a whopping \$240,000 at the same sale as Rocketman. He is an exceptional female producer, born out of a female sired by Kingdom. Rembrandt's structure and phenotype are unparalleled; his son displays excellent length and muscle, with an impressive top and carcass. Four sons sell.

MILLAH MURRAH PARATROOPER R127 was acquired from Ross Thompson in 2021; this year represents his first son to sell. R127 is a moderately built, sturdy bull with a gentle temperament and excellent physical structure. We are impressed by the daughters of R127; his mother, Millah Murrah Abigail N162, was a highlight of the 2023 Millah Murrah Cow sale, selling for \$52,000. We have recently flushed several of his daughters as heifers in our spring joining program. Eight sons sell.

ELITE SIRE

LOT 13 KERINGA TITON T19

LOT 8 KERINGA THIRSTY T35

JUPITAR LINE
MILLAH MURRAH JUPITER J194- Jupiter is a Booramooka Theo son. We liked the first crop of calves and decided to return that way for his exceptional structure and thickness. His next batch of calves is no exception, doing just as we anticipated. Seven sons sell.

BANQUET QUARTER POUNDER Q252 - Purchased in partnership with Millah Murrah and Alpine Angus in 2021. What we found particularly appealing about Quarter Pounder was his outcross pedigree, thick top, and strong head. Moreover, the fact that Jupiter J194 sired his dam made him an excellent fit for our program while introducing a new genetic line. Three sons sell.

LOT 2 KERINGA TREASURE T10

LOT 14 KERINGA TOWER T40

NECTAR LINE
MILLAH MURRAH NECTAR N334- Nectar bulls have been quite popular in recent years, and the females produced from this line are also exceptional. Many of them have made it to our donor pen and have produced some outstanding bulls in this year's sale. Three sons sell.

MILLAH MURRAH RECTOR R53- one of ABS's recent sires. He was sold alongside Rocketman and Rembrandt but was somewhat overshadowed. However, public approval of R53's calves at the 2023 Millah Murrah female sale has recognised his potential. His bulls are generally more moderate and thicker topped, while his females display outstanding softness and balance. Six sons sell.

LOT 25 KERINGA TITANIUM T168

LOT 19 KERINGA TANTALISE T144

OTHER LINES
MILLAH MURRAH QUIXOTE Q96, a son of Chisum 255 and Millah Murrah Brenda N8, was the highest-selling bull at the 2020 Millah Murrah bull sale. Woonalee Simmentals and JT Angus purchased him, and he has been widely used in AI programs nationwide. Quixote's offspring exhibit early growth, more frame and length while maintaining thickness. Five sons sell.

MILLAH MURRAH NUGGET N266 - Record-priced yearling in 2018, Nugget was sold for \$54,000. He gained fame for producing top-quality females with fine, sleek coats, superb udders, and excellent structure. At the 2023 Millah Murrah female sale, his offspring were highly sought after and topped at \$90,000. Nugget has been a favourite over the years and has consistently produced high-quality offspring. Three sons sell.

LANDFALL NOBLEMAN N106 - introduced several years ago; his first daughters are represented in this year's sale drafts dams. These females have met our expectations with their excellent structure, impeccable udders, and ability to transmit high-quality carcasses to their progeny. All the bulls by Nobleman in this year's sale are by ET out of top donor females. There are four sons available for purchase.
