# Welcome

This year we're excited to celebrate 20 Years of Paringa! To mark the occasion we've planned an Autumn Sale, offering top of the drop HBR females from the heart of our Angus herd, alongside a great line up of 13-20 month old Angus bulls.

As a dedicated family run business, we've been reflecting on our Paringa journey, how far we've come from inception, as well as our impact and achievements over the past two decades. We are indebted to clients, friends and associates for support over the years, and for trust in our breeding program. As you are likely aware, we began with a strong background in breeding elite performance Angus genetics.

The most recent 20 years has enabled us to venture into a new generation of genetics and sustainable land stewardship. The move to a focus on soils, pasture and its link to animal health began. We started by breeding a new type of Charolais, a new breed, developed a composite breeding program, and developed and supplied customised genetics for large northern corporates and family operations. Now our elite Angus and Red Angus program is at the heart of our breeding program, alongside the Stabilizer® herd. We enjoyed the opportunity to work with incredible people through that time. Not only broadening our view on wider genetic populations, as well as forming business relationships with international partners has enabled us to effectively breed "better" Angus by involvement in the global performance analysis \$Profit and benchmarking our herd in a much larger population.

We are humbled that many of the "top" livestock producers across Australia follow or invest in our genetic program, many turning off grass finished, high MSA product. Our favourite part of this job is the ONE-on-ONE close working relationships we've developed over the years, and mutual learning opportunities we've experienced as a result. It is rewarding witnessing how our genetics help drive businesses forward and keep beef producers ahead of the game. The consistently positive feedback we receive helps us focus on what is important to our clients and encourages us to continue to strive for improvement in the "right direction".

## BULL HIGHLIGHTS

This Angus bull line up represents a balance of top stud sire prospects (T57, T55, U15, U1) who push the genetic boundary, as well as outstanding commercial bulls that will suit weaner production, MSA grass finished, and grain fed systems. Also, if you are looking for bulls for deliver "sleep easy" calving ease while producing high value carcasses then look no further than the sons of Booroomooka Fireball R156. Another added advantage of all Paringa Angus bulls on offer, are the fabulous replacement females they will produce.

## FEMALE HIGHLIGHTS

These special release Angus females are all Herd Book Registered, tested red gene free and defect free. Leading edge data, royal sire and maternal lines, with elite cutting edge joining sires Conneally Craftsman, Paringa Statesman and Rissington Sovereign. Beautiful young heifers stacked with next generation genetics, PTIC maiden heifers, and PTIC cows with calves at foot - 3 in 1 packages. There are incredible potential donor opportunities, as well as ideal foundation females to choose from.

Please get in touch if you have any questions, or if you would like to make a time to visit prior to sale day and inspect the sale animals. We are looking forward to catching up on 11th April, cattle will be penned by 10am and refreshments available.

All the best,

*Tom & Olivia*

Tom & Olivia.

# THE WORLD ANGUS EVALUATION

Scott Wright (CEO Angus Australia)

In October 2023, Angus Australia announced a very significant development and partnership. Years in the making, The World Angus Evaluation (WAE) is a globally focussed genetic analysis of Angus cattle. It combines data sources (phenotypes, genotypes and pedigree) from the American Angus Association®, Canadian Angus Association and Angus Australia with the results being Expected Progeny Differences (EPD), which are similar to Estimated Breeding Values (EBV), for a specific list of traits on Angus sires.

The WAE is facilitated by Angus Genetics Incorporated (AGI), which is a subsidiary of the American Angus Association (AAA). In conjunction with the release of the World Angus Evaluation, Angus Australia released an Angus Education Centre Module, to help Angus Australia members further understand the Evaluation. The education module can be found on the Angus Australia website.

Currently the World Angus Evaluation only displays EPD's on sires that have at least 5 calves with weaning weights and 2 registered calves. Over time it is anticipated that the data displayed will grow to include all sires and females.

Essentially there are thirteen EPDs published from the World Angus Evaluation covering calving ease, growth, carcass and structural soundness. The specific EPDs are:

- Calving Ease Direct (CED)
- Calving Ease Maternal (CEM),
- Birth Weight (BW)
- Weaning Weight (WW)
- Yearling Weight (YW)
- Scrotal Circumference (SC)
- Maternal Milk (Milk)
- Claw Set (Claw)
- Foot Angle (Angle)
- Carcass Weight (CW)
- Marbling (Marb)
- Ribeye Area (RE)
- Fat Thickness (Fat)

Australian producers should expect sires to rank similarly, but not exactly the same when comparing WAE EPDs to TACE EBVs, for the same trait. This is a result of significantly more data (from North America) included in the WAE, along with some differences in the analysis models and trait definition (e.g. carcass traits are age adjusted in the WAE, but weight adjusted in TACE).

For example, for a sample group of Angus Sires with 200 or more progeny registered with Angus Australia (n=1062), the WAE EPD to TACE EBV correlations for Weaning Weight, and Marbling/IMF is 0.96 and 0.87 respectively.

The World Angus Evaluation is updated weekly with the Sire list updated quarterly. At this stage there are no percentile tables as producers would expect with TACE values.

Angus Australia believes that the World Angus Evaluation will for the first time give Angus breeders in the United States, Canada, Australia and New Zealand the ability to compare genetics across each of the populations. It will allow members to make better sire choices and will potentially open up export markets for Australian Genetics.

*"In my opinion, the World Angus Evaluation WAE is a significant development in beef genetics for Australian beef producers, as significant perhaps as the introduction of beef estimate breeding values predictions in the 1970s, or the development of selection indices. It provides a truly global ranking system on TACE estimated breeding values.*

*Previously it was taking up to 5 years to prove elite outside sires, as generational interval is still to most powerful tool for genetic gain. Now with the WAE we can select potential sires quicker with confidence, and not missing a few generations in between.*

*Also, it means that our own Australian sires can be compared or ranked better as a true reflection of their genetic potential. To put it simpler, some of Australia's extreme marbling sires are ranked not so extreme on the WAE, while other Australian sires such as our herd sire Booramooka Fireball R156 have risen significantly - above known elite marbling sires on the Australian Angus data base, due to better linkage and systems analysis.*

*For commercial producers, it can give confidence their bull breeder can select sires with greater accuracy to produce better bulls faster for the commercial sector. If you are interested in further information on the WAE I am happy to discuss."*

Tom Lawson

# SALE DAY INFORMATION

## SALE DATE AND PRIOR INSPECTION

Selling will commence at 1 pm on Thursday 11<sup>th</sup> April, 2024. Cattle may be inspected from 9am on the morning of the sale, or at another time by prior arrangement with the agents or vendors. The sale will be conducted on property and interfaced with AuctionsPlus.

## SELLING SYSTEM

Sale of animals will be conducted under Open Cry Auction terms and conditions, and interfaced sequentially online with AuctionsPlus. Please ensure to register with the selling agents and/or AuctionsPlus to obtain a buyers number if you are considering making a purchase. Successful purchasers are requested to give written advice to the selling agents regarding transport arrangements at the conclusion of the sale.

Note this will be sale by video auction – sequentially sold from lot 1 onwards. All lots will have photos and/or video uploaded to AuctionsPlus mid March. Please register your trading details with AuctionsPlus prior to sale day.

## DELIVERY

Delivery can be organised by the vendor or the purchaser but please advise the selling agents of your requirements on sale day on the buyer sheet including full contact details. Delivery is at the cost of the purchaser. Please note: no transport is permitted during the auction.

## GST

All animals are sold exclusive of GST.

## INSURANCE

All due care is taken in the delivery of animals purchased however buyers are responsible for the insurance of animals against injury or death from the fall of the hammer. Insurance is available on the day or arrangements can be made prior to the sale. We strongly recommend taking out insurance on bulls for the first 12 months and especially during joining.

## PAYMENT OPTIONS

Settling of accounts will be facilitated by the selling agents. Payment options are Agent Settlement or Direct Settlement with payment on the day by Direct Deposit (EFT), Cheque &/ or Credit Card (1.5% surcharge applies).

## REBATE

A 3% rebate is offered to all Livestock Agents who are in attendance at the sale, or introduce their client(s) in writing by email to [livestock.gtsm.nsw@raywhite.com](mailto:livestock.gtsm.nsw@raywhite.com) at least 24 HOURS PRIOR to sale start time and settle within 7 days of sale. A 1% rebate is offered to all Livestock Agents who are not in attendance and introduced via email within 24 hours of the sale & settle within 7 days of sale.

## PLEASE NOTE

OUR CATTLE ARE NATURALLY QUIET, HOWEVER VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. FOR THEIR OWN SAFETY CHILDREN MUST NOT ENTER THE PENS AND YARDS AT ANY TIME.

## BREED SOCIETY TRANSFERS

For stud ownership, the transfer of ownership of the animals at Angus Australia will be organised by the vendors if requested. Please ensure accurate herd prefix, and transferee details are supplied on the buyer registration form. There is no obligation for commercial buyers to transfer animals.

## PARINGA BULL GUARANTEE

In the event of a bull proving to be infertile or incapable of natural service into their first working season, the vendor will credit the purchase price, less the salvage value of the bull, provided the problem is not caused by injury or disease incurred since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim, and to inspect the animal in person. Note: this is not an insurance policy – we recommend each purchaser takes out their own bull insurance policy, and avoid single sire mating.

## PARINGA FEMALE GUARANTEE

Paringa guarantees the sale females are fertile and sound at point of sale. Those sold as PTIC were pregnancy tested by Yea Veterinary Clinic and certificates are available. Young U heifers are guaranteed fertile for first joining, however not if flushed by the purchaser. The guarantee does not cover future fertility and soundness.

This guarantee is additional to the normal terms and conditions governing auction sales, and as such the vendors decision will be final. Paringa Livestock Pty Ltd reserves the right to refuse a guarantee in some cases. Please note, Paringa Livestock Pty Ltd is not liable for genetic defects, either current or future.

## INDEPENDENTLY ASSESSED

Sale bulls were independently assessed for structure, temperament and scrotal by Jim Green. Scores submitted to Angus Breedplan and \$Profit databases for analysis.

## FERTILITY TESTED

Bulls are fertility and semen checked prior to sale day by Nationwide Artificial Breeding Services. Motility and morphology analysed.

## HEALTH & MANAGEMENT

All sale animals have been lifetime raised on pasture with access to mineral lick.

**Sale Bulls:** All tested PI free from Pestivirus (Zoetis). T bulls received 7in1, pesti booster, and Trifecta oral drench February 1st 2024. U bulls received 7in1 March and May 2023, PestiGuard October 1st 2023. Platinum Pour On November 2023. Trifecta oral drench February 29th 2024.

**Sale Females:** All tested PI free from Pestivirus (Zoetis). Cows and heifers received August 2023 pre-calve 7in1 booster, PestiGard, Selenium. Trifecta oral drench February 2024. U Spring Calves received 7in1 Oct /Dec 2023. Selovin December, oral drench Trifecta Feb 10th 2024.

Notes: This magnificent cow calf unit traces back to the famous Wilpena F30 cow, the dam of Paringa Judd J5. We were fortunate to secure F30 from Bruce Newport years ago, while we were searching for the next Bartel E7 replacement. We considered a Regent X Berkly B1 an excellent prospect. Lucky for us, she produced a very handy bull calf in Judd J5, who carried the positive genetic attributes of both his sire and dam. S41 is a wonderful young Angus female with a bright future ahead of her. She sells with a cracking heifer calf at foot HKF23U98. JOIN AI Conneally Craftsman 22/11/23. Cover sire NGM22T3 1/12-27/12/23.

Notes: These Pine View Mogul daughters will be some of the first to sell in Australia, if not globally. This magnificent young heifer U130 traces back to some of our old favourites at Ythanbrae Angus, with E80 combining with Hingaia 322, Massive and Zodiac of Kaharau. These U heifers were conceived during the 2022 floods; the AI tech couldn't get through, so the old gun had to pull on the glove. So, we figure these Paringa dams must be fertile! HKF23U130 is a spectacular Angus heifer calf.

Notes: A great way to kick off the start of the bull lots in our Autumn 2024 offering. The combination of GAR Hometown with our Texas No Regrets x E7 first calf heifer has really worked. He is a true calving ease sire, with high 400D growth, massive carcass, and would suit any program; from selling weaners to grass or grain finishing operations with his big EMA, growth and fats. His top 3% ranking for \$ABI index puts him amongst the upper echelons of the Angus breed.

Notes: + STUD ALERT + Honestly, I'd like to put everything aside and just look at this bull all day long - in the flesh he is flawless. HKF22T55 carries himself beautifully with style, added frame and length and perfect claw shape that many astute breeders are searching for. Also check out his genetic profile, it is beautifully balanced for a modern Angus bull. His pedigree is elite and traces back to the famous GAR 2104 cow, thrown in with some elite outcross genetics from Beckton Angus in Wyoming... and wow. Note: tested red gene free.

Notes: \*STAR LOT\* We regard this Veracious son as one of the "best ever" to sell, with sharp looks, beautiful feet, legs, and docility. HKF22T57 has a freakish genetic profile with strong calving ease, growth, carcass, claw set, top 1% \$ABI !! BUT what sets him apart are the traits you cannot see; his stayability (FRT global \$Profit) is one of highest Angus bulls on record, plus rare \$Profit / \$Ranch combination. We have discovered on his maternal pedigree 10 generations, with average calves per generation of 6.5, all within a 365-day calving interval. That's 65 natural calves born over 10 generations. If anyone can find an animal that matches this performance, please let us know! This is why T57 has TRUE stud potential. Tested very high semen quality. \*Paringa retains semen rights for within herd use.

<b>\$285</b>	<b>\$427</b>
<b>1</b>	<b>5</b>

**Traits Observed:** GL, 200WT, 400WT, 600WT, SC, DOC, Genomics

**Notes:** We consider this bull to be a real highlight. HKF22T89's style and presence, combined with his pedigree and EBVs make him a must for any serious breeder. We originally drafted T89 to be a feature lot of our Spring yearling sale in 2023, but unfortunately suffered a knock to his nut just before the sale (as bulls seem to do). (Note he is now fully recovered and passed semen test.) Top 1% SABI.

**Traits Observed:** 400WT, 600WT, SC, DOC, Genomics

**Notes:** These SAV Rainfall progenies are incredible; consistently the easiest doing progeny off grass we have ever raised, and honestly it was quite unexpected. They are extremely long, wide based cattle and just flourish even when things get tight. We added Rainfall to bring in some outcross genetic lines, and he has certainly done that, and more. T138 is an impressive bull with front paddock looks and punch that will make your calves stand apart!

Notes: It was an easy decision to list HKF23U1 as our lead off yearling bull in the sale, and not only because he is Paringa Trademark T14's full brother. Dam Paringa N23 is considered one of the best beef cows you will ever see, with perfect feet and udder. U1 is phenomenal in the flesh and already 600kgs at 12 months of age. He moves like a cat, with near perfect claw shape. His own genetic predictions and combinations are RARE; calving ease direct, daughter calving ease, big growth, top 11% carcass weight, top 27% IMF. Weight for age and high MSA potential = extra \$\$\$ in your pocket. Check out U1's Research EBVs, ranking him top 1% daughter body condition, top 16% Immunedex, and top 5% meat tenderness.

### STRUCTURAL SOUNDNESS SCORES

Subjective structural soundness scores are collected using the Beef Class Structural Assessment System.

# BRINGING YOUR NEW BULL HOME

WHEN PURCHASING A BULL, CARE AND HANDLING AFTER THE SALE CAN BE AS IMPORTANT AS THE PURCHASE ITSELF.  
LOOKING AFTER YOUR BULL WELL DURING THE INITIAL STAGES OF HIS WORKING LIFE MAY ENSURE LONGEVITY  
AND SUCCESS WITHIN YOUR BREEDING HERD.

## PURCHASE

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament shown in the ring.

## DELIVERY

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering. After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.
- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

## IF YOU USE A PROFESSIONAL CARRIER:

- Make sure the carrier knows which bulls can be mixed together.

- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

## ARRIVAL

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning.

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

**MANAGING OLDER HERD BULL**

**DURING MATING**

**NORTHERN AUSTRALIA**

# BRINGING YOUR NEW BULL HOME

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later. Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

## MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

## MATING NEW YOUNG BULLS

Older working bulls also need special care and attention before mating starts. They should be tested or checked every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition.

## DURING MATING

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

## NORTHERN AUSTRALIA

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

## ADAPTATION

The key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

## PURCHASE IN COOLER MONTHS

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

## CHANGE OF FEED SOURCE

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

## MANAGING CATTLE TICKS

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.
