Notes

DNA - The calves that have no qualified parents noted next to them are at this stage only registered as commercial calves. We are hopeful after submitting several sires that previously had no DNA attached that they will be able to be registered. This is not a guarantee.

Pink Eye - Calves have had some pink eye through the herd and have been noted on the supplementary sheet. All calves have been treated with Orbenin on the 26th of February for some calves this has been there second treatment.
