1.1 INTRODUCTION

The Forestry Corporation of NSW ('FCNSW') is the largest manager of commercial native and plantation forests in NSW. Managing more than two million hectares of forests for the economic, environmental, and social benefit of the people of NSW and Australia, FCNSW adheres to the values of integrity, collaboration, respect, innovation, customer and stakeholder focus, safety and sustainability. FCNSW is a statutory State owned corporation, constituted under the *Forestry Act 2012* (NSW), sitting within the NSW Trade & Investment Cluster and reporting to a Board of Directors.

FCNSW manage a native forest estate of approximately 1.8 million hectares and approximately 35,000 hectares of hardwood plantations, producing approximately 1,300,000 tonnes per annum of log products. FCNSW is committed to ensuring a supply of timber from NSW State forests today and into the future while also protecting other forest values such as biodiversity, clean air and water and public access for recreation. We are committed to running a safe and profitable business for the people of NSW.

1.2 OBJECTIVES

FCNSW' objectives for this procurement are:

- To source competent apiarists to successfully and professionally manage currently vacant "high demand" apiary ranges into the future;
- To undertake the procurement in a fair and equitable manner, consistent with the principles of transparency and accountability;
- To deliver value for money to FCNSW.

1.3 SCOPE OF WORKS

FCNSW has identified 24 currently vacant South Coast apiary ranges that have been categorised as potentially "high demand" as they carry varying proportions of highly sought after Spotted Gum forest. These ranges are vacant for a number of reasons including:

- No payment of Permit fees;
- Previously poor State forest access;
- Handed back by previous licensee; and
- Long term vacancy for unknown reason.

This trial competitive allocation process will be managed and determined by FCNSW.

All ranges will be allocated for a fixed 5 year Term with a renewal option at the end of the Term. All ranges will be subject to full payment for the 5 years at the commencement of the Term.

1.4 AUCTION PROCESS

An online auction process will be used for the allocation of ranges. The auction itself will be conducted by an independent third party (AuctionsPlus Pty Ltd) and will be conducted online. An Auction Catalogue document will be available and will be placed on the AuctionsPlus Website at the link below:

<http://www.auctionsplus.com.au/>

All current holders of a FCNSW' Forest Permit – Bee Keeping will be advised by post of the Online Auction process and the location of the information package and documentation on the AuctionsPlus Website. Additionally, bee keepers who may not have current Permits but who may have already expressed an interest in taking up one of the vacant ranges, and who have left their contact details at FCNSW' Batemans Bay Office, will also be advised of the process by post.

The Online Auction process will also be advertised in local printed media, on the FCNSW' internet Website, and in *Honey Bee News*, the official journal of the NSW Apiarists Association (NSWAA).

AuctionsPlus will contact each of the parties invited to participate in the auction to enable them to register for the auction and access the online auction website.

Auction Rules

1. Highest Bidder

Subject to the other Auction Rules the highest bidder for each lot (range) will be deemed to be the winner of the lot (range).

2. Bidding Structure and Units

Bids should comprise an annual price/rate, including GST, offered for each year of a fixed 5 year Term. All bids should be in whole dollars.

3. Passed in Lots

A lot (range) will be passed in when, at the completion of the auction, the highest bid is less than the reserve.

Where a lot is passed in, the person who makes the highest bid may, within the time period specified by the market operator in the catalogue (in this case 1 hour), increase his bid to a price equal to the reserve price, in which case the lot will be deemed sold at the auction at that price.

Part 3 – Terms and Conditions

The winning bidder for each lot (range) will be deemed to have entered into a binding contract in the form of a Forest Permit – Bee Keeping for a 5 year Term.

The relevant contract terms and conditions will then be delivered to the winning bidders.
