Direction

The direction of our breeding programme has always had the commercial cattleman in mind and the markets he sells to. Constitution, growth and reproductive traits have always been to the forefront when breeding cattle in our varied and harsh environment.

Our steers have backed this up by their performance in feedback trials and the results of our clients in the market place.

Working Togs

You will see these cattle in their working togs, from desperate condition in December last year to a medium break in the Summer.

They will only get better.

History

26 Years of Breeding

Our entry into the Red Angus breed was instigated when we visited Red Angus ranches in Canada and the United States. We were so impressed with the quality and performance of the cattle we purchased embryo's from the Red Brangus herd at Calgary and these cattle formed the base of our herd.

The Duarran Stud has been very successful, selling Duarran Big Red for an Australian record price of \$15,000 in 1991 to Angus McGilvary. At the 1996 Ag Show Sale in Toowoomba the stud recorded the top sale average of \$5,500.

Our first Annual Bull Sale was in September 1997 and we have been selling 30-35 bulls annually since. The top bulls each year selling to \$8,000 and \$11,000.

Our Red Angus Cross Steers have always performed well in open competition in feedlot and carcass classes. Our Red Angus Steers were placed 2nd in the inaugural RNA Feedlot trial, gaining 16% above the average for weight gain; 14% above average for EMA; and 20% above average for marbling. Our Steers have continually performed well in the top three in this competition.
