Breeding Quality

Breeding quality relates to the quality of the breeding programme and suitability for their end use. Descriptions of Breeding Quality should not be affected by condition.

Excellent

Top sires used and top standards of selection and management, i.e. the small percentage of really first class stock. A line with a large culling taken out.

Very Good

Good quality sires used with heavy culling and selection programme – stock with a reputation for growing out/fattening/producing well. A line with a reasonable culling taken out.

Good

Quality sires used, reasonable selection practices i.e. average stock. A line that has had some culls removed.

Fair

Average quality sires used, but otherwise little selection practiced. A line that needs a heavy cull taken out.

Plain

Very poor breeding quality, egg inbreeding, structural or conformation faults expected to limit future growth and/or fattening/production ability. Could apply to culls or at best seconds or thirds from a line of stock.

Frame

Frame specifies the likely mature size, fattening pattern, etc. Frame is relative to the BREED and AGE of the cattle. Frame is described as Very Large, Large, Medium or Small and is entered as a percentage.

Very Large Frame

Very tall and long bodied. Tendency to very late maturity and difficult to “finish” on some feed types.

Large Frame

Medium Frame

Small Frame

Short legs and body, early maturing and tendency to over fatness unless killed at light weights.

Temperament

Docile

Settled and somewhat dull disposition. Gentle and easily handled, moves slowly when in a mob, needs encouragement to move away from handler. Cattle easily handled individually in yards and paddock, without eagerness to return to mob. Does not pull on headgate when in crush and exits calmly.

Quiet

Displaying a quiet & calm disposition. Cattle easily handled individually and in mob. Handler in control at all times. May exhibit some stubbornness. Exits crush promptly, may try to back out of crush, pull on head gate and some flicking of tail.

Slightly Stirry

Manageable but impatient and moves quickly. Handling individually increases nervous behaviour, and exhibits clear signs of eagerness to return to mob. Handler in control when handled in a mob. Reluctant to stand quietly in crush, tail flicking, repeated pushing and pulling on headgate. Exits crush briskly.

Stirry

Out of control and jumpy. Struggles and clearly uncomfortable when handled in a mob. Runs fenceline and may jump when penned individually. Continuous tail flicking and bellowing in crush. Large flight distance, exits crush wildly. Considered scared of human interaction rather than aggressive. Not recommended for inexperienced handlers.

Aggressive

Aggressive behaviour, fearful, extreme agitation. Continuous movement when handled in a mob, disrupts handling of other cattle in mob. May exhibit attack behaviour when handled alone. May jump or continuously bellow while in crush. Exits crush frantically.

Scanning/ Pregnancy Statement

Please upload this document if you do not have the original scanning/ pregnancy certificate

1. Has the owner stated above owned these cattle since birth?

Yes ☐ No ☐

2. On the property stated above, has an on-farm biosecurity plan been implemented?

Yes ☐ No ☐

If yes, which plan (e.g. Farm Biosecurity, LPA, Grazing BMP)

3a. Have these cattle been tested for the presence of pestivirus antigen?

Yes ☐ No ☐
If tested, were any cattle found to be persistently infected? Yes ☐ No ☐

3b. Have these cattle been tested for the presence of pestivirus antibody?

Yes ☐ No ☐
If tested what percentage of the tested cattle were antibody positive?

4. Enzootic Bovine Leucosis (EBL) test result for animals being moved:

Date of test/...../.....

5. Are the cattle from an EBL accredited or certified free herd: Yes ☐ No ☐

6. Are these cattle from a herd or property with an occurrence of Johne's disease (JD) in any susceptible species within the last five years?

Yes ☐ No ☐ Don't know ☐ J-BAS of (optional)

7. On the property stated above, have cattle been co-grazed with dairy cattle and/or sheep?

Yes ☐ No ☐ Don't know ☐

8. Source herd has a negative JD test result: Check Test ☐ Sample Test ☐

Date of test/...../.....

9. If dairy cattle, the consignment has a Dairy Assurance Score of:
Part A (herd base score) Part B (calf credits) Part C (total Dairy Score)

10. Treatments

Treatments	Product	Date of treatment within last 6 months
Drench		
Liver fluke treatment		
Other treatments (type)		

11. Current vaccinations for the cattle being moved (see explanatory note)
Clostridial vaccination (e.g. 5 in 1): Yes ☐ Clostridial vaccination (Botulism) : Yes ☐
Pestivirus vaccination: Yes ☐ Bovine ephemeral fever vaccination: Yes ☐
Leptospira vaccination: Yes ☐ Vibrio vaccination: Yes ☐
JD (Silirum) vaccination: Yes ☐
Other vaccinations (specify):
12. Any other relevant health information
