Transport Assistance

Bolinda/Alpha/Ace South Devon Studs are offering **FREE TRANSPORT**, within 100 km of Gunnedah or 100 km of Armidale for any bull purchased at the sale.

In addition, we are offering **FREE TRANSPORT**, within 100km of Gunnedah / Armidale, or transport to Goondiwindi QLD (and stops directly enroute) for any bull purchased for the individual price of \$5000 or more.

The buyer's must clearly indicate to the selling agent their intention to undertake the free transport offer. Purchasers should note that the bulls are at the purchaser's risk at the fall of the hammer and all free transport offered by Bolinda/Alpha/Ace is at the purchaser's risk.

Fertility Guarantee

We guarantee all bulls to be structurally sound, fertile and capable of natural service. Bulls are guaranteed for up to one year from the date of auction. However, should a bull prove not to be able to perform the above duties, we will:

- Replace the bull with an agreed substitute if available, or
- Issue a credit equal to the purchase price less salvage value. This credit may be used at future bull sales.

The guarantee covers the purchase value of the bull, without interest, costs or damages. The guarantee shall apply providing the bull's incapacity is not caused by injury, misadventure or disease contracted since leaving Bolinda/Alpha/Ace. A veterinary certificate must also be supplied by the purchaser.

Lot 2 Bolinda Kingston

AuctionsPlus Information

This sale is only through AuctionsPlus

To bid via AuctionsPlus, contact your local agent or register online at least 48 hours prior to the sale commencing. Registration is free and easy, click the register tab on the AuctionsPlus home page to receive your log in details. Remember to have your PIC number and contact details ready. If you are already an AuctionsPlus user simply log in with your user name and password then click connect to Bolinda, Alpha & Ace Sale.

First time users of AuctionsPlus must click on Downloads found on the left hand side menu to make sure Silverlight has been installed on your computer. This software allows you to access the site and sale. Silverlight can take up to 10 minutes to download.

All your livestock agents should be able to assist you with bidding in an AuctionsPlus auction if required.

WEBSITE www.auctionsplus.com.au

This auction will be conducted exclusive of GST

SALE INFORMATION

INSPECTIONS: Of bulls is welcomed prior to auction by contacting vendors, Brian & Liz James, on 02 67435350 Mobile 0429484288 or John & Pam Flynn on 02 67752213. Bolinda bulls are at 'Derwent Park' 3846 Goolhi Rd Gunnedah and the Alpha and Ace bulls are at "Cluain Meala" 1076 Bundarra Rd Armidale.

REBATE: 2% on bulls to outside agents nominating buyers to Fleming & Ross in writing 24 hours prior to auction. This will be strictly enforced.

DELIVERY: Delivery will be given from the completion of the auction.

BUYER'S INSTRUCTION: All successful purchasers after the auction please contact the selling agents prior to delivery.

TRANSPORT: Bolinda, Alpha & Ace South Devons are offering generous transport assistance (see inside front cover for further details).

TRANSFERS: All registered lots will be transferred to the respective purchaser free of charge.

NLIS: It will be the responsibility of the purchaser for the NLIS transfer, unless alternate arrangements are made. Bolinda PIC is NG505722 and ALPHA and ACE PIC is NC022483

HERD HEALTH: The Bolinda/Alpha/Ace herds are TB and Brucellosis free and have never suspected or found any animal to have Johne's Disease. The herds are in a Johne's Protected area. .

GUARANTEE: All bulls offered for sale are guaranteed to be fertile and capable of natural service. Any claim made must be in writing and accompanied by a veterinary certificate within one (1) year of the date of sale. (see inside front cover for details).

Lot 1 Bolinda King

BOLINDA SOUTH DEVONS

The Bolinda South Devon Stud is run under commercial conditions at Willala and Goolhi NSW. The stud was founded in 1998 with the purchase of cows from the Nardlah Reduction Sale, Craivon Dispersal, Braeburn Dispersal, Waminda Dispersal and from Alpha and Ace, Lincoln, Merilba and Gadara. We continue to run an extensive AI program with some of the breed's elite sires.

We also run a crossbred commercial herd that focuses on supplying carcasses to Woolworths Supermarkets. The carcass attributes of our herd are evident when the majority of the carcasses grade above the MSA Index value of sixty one.

In 2015 we had a pen of steers in the RAS Beef Challenge. This pen was placed 3rd out of the 55 pens entered.

We continue to focus on producing quiet, efficient, easy care, performance recorded South Devons. We believe that these characteristics are evident in our cattle catalogued in the auction.

We welcome any inquiries or pre-sale inspections.

Brian & Liz James (02) 67435350 Mobile Brian 0429484288

Website: www.bolindasouthdevons.com.au

ALPHA & ACE SOUTH DEVONS

The ALPHA South Devon stud was established by John & Pam Flynn in 1996, using Merilba, M'Calá and Lincoln bloodlines. Subsequently their son, Michael, established his own South Devon herd – the ACE herd. Both herds are run together, share strict breeding objectives, are fully performance recorded, and participate in South Devon Group Breedplan.

Cattle are selected on the following characteristics:

- ❑ **Quiet temperament**
- ❑ **Strong maternal traits**
- ❑ **Desirable carcass characteristics**
- ❑ **Moderate frame & maturity pattern**
- ❑ **Good structural characteristics**
- ❑ **Broad genetic base**

Animals not meeting any of the above criteria are culled.

We welcome any inquiries regarding cattle.

John, Pam & Michael Flynn (02) 67752213

Website: www.southdevon-cattle.com.au

COMPARING ANIMALS USING EBVs

EBVs are a tool that will help you to make more educated decisions when you are choosing breeding stock. The best way to make use of this information is to first decide YOUR breeding goals and secondly to select animals with EBVs that match those criteria.

Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weight of her calves. For dams, it indicates her own milking ability.

200 Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum, measured in centimetres and adjusted to 400 days of age. This EBV is an estimate of a sire's genetic merit for scrotal size and is positively correlated to age of puberty in female progeny.

Eye Muscle Area EBV (sq cm) This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield Percent EBV (%) represents total (bone out) meat yield as a percentage of a 300kg carcass. A more positive EBV indicates higher percentage yield for the 300kg carcass size.

Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcass. Depending on market targets, larger more positive values are generally more favourable.

BREED AVERAGE EBVs FOR 2014 BORN CALVES

Gest Len EBV	Birth Wt EBV	200D Wt EBV	400D Wt EBV	600D Wt EBV	Mat Wt EBV	Milk EBV	Scrot Size EBV
-0.6	+1.0	+12	+21	+28	+30	+0	+0.5

	+18	+0.6	-0.2	-0.2	+0.3	0.0	

Only South Devon GROUP BREEDPLAN EBVs can be validly compared between herds.

Lot 3 Bolinda Keepsake

Lot 13 Bolinda Kody

Australian South Devon Selection Indexes

Vealer Index (VLR): Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting vealer production. Vealers are finished on grass and are marketed at 320 kg live weight (180 kg HSCW and 4 mm P8 fat depth) at 10 months of age. Daughters are retained for breeding. No marbling is required.

Supermarket Index (SUP): Estimates the genetic difference between animals in net profitability per cow joined for example commercial herd targeting the domestic supermarket trade. Steers are either finished on grass or grain (e.g. 70 days). Steers are marketed at 450 kg. Live weight (250 kg HSCW and 12 mm P8 fat depth) at 15 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

Export Maternal Index (EXP): Estimates the genetic difference between animals in net profitability per cow joined for an example commercial herd targeting the production of steers for the export market being finished or through a mid-fed feeding program (e.g. 125 days). Steers are assumed marketed at 600 kg live weight (330 kg HSCW and 20 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

All selection indexes are reported as a EBV, in units of profit per cow mated (\$) for a given production/market scenario. They reflect both a short term profit generated by a sire through the sale of his progeny, and the longer term profit generated by his daughters in a self replacing cow herd.

All selection index values have been derived using BreedObject technology.

71%	66%	62%	57%	70%	70%	67%

COMMENTS: This bull has a number of notable qualities. 1) He has very desirable carcass EBVs; with his EMA, subcutaneous fat and intramuscular fat EBV's being in the top 5%.

2) He has below average birth weight EBV, while having close to average growth EBVs.

3) His Vealer, Supermarket and Export indices are in the top 5%.

4) He has produced 52 progeny and has been joined to heifers with no calving problems being experienced.

TERMS AND CONDITIONS OF SALE

The Stock - As all lots are open for inspection prior to the commencement of the sale, the stock offered are to be sold with all faults and the buyer must satisfy themselves as to the condition, quality and fitness thereof before bidding. No error or misdescription shall invalidate any sale or give rise to any claim for compensation.

The vendor guarantees no animal has been foster mothered, hoof trimmed or given growth promotants of any kind.

All bulls are sold as being fertile and capable of natural service. The Bolinda/Alpha/Ace Fertility Guarantee will occur if within one (1) years of the date of sale the purchaser submits a veterinary report certifying that the bull is infertile and/or not capable of natural service. The veterinarian will also be required to state that in their opinion the bull has not had any physical injury or illness since leaving the vendor's property, which injury or illness could have affected the bull's breeding ability. The circumstances of such an illness or injury must be notified by the purchaser to the vendor within one week of occurrence and the vendor will have the right to arrange a veterinary inspection if required. No claim will necessarily be recognised unless presented within one (1) years of the date of sale.

Bidding will be exclusive of GST, with GST being added to the final auction price and invoiced to the buyer.

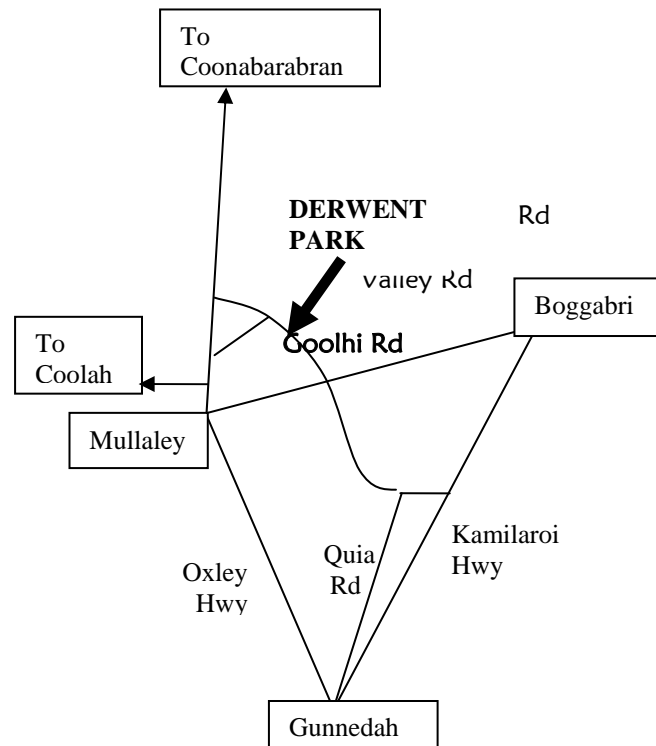

Payment - Unless otherwise stipulated by the selling agents, at the commencement of the sale, all lots shall be sold for cash.

Interest at the rate from time to time charged by selling agents shall be paid in any case where a purchaser makes default on due payment.

DISCLAIMER Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, neither the vendor nor the selling agents or representatives therefore assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this catalogue.
