## Welcome to Wattletop Angus' 25th Anniversary Sale

At last the cattle market has done what it has threatened to do for the last three years, that is take off , adding much needed cash and confidence into the system. Currently 470 kg feeder steers at \$3.40 are returning almost \$1600.

Demand for quality Australian beef is at unprecedented levels with supply not able to match demand at the moment. The considerable lift in the cattle market has happened without a break in the season in Queensland. When the drought breaks in the north, supply will be even more restricted which points to a very positive outlook for beef.

This was certainly the sentiment expressed by most people that we caught up with at Rockhampton Beef Week in May. This was the first year that we have held a stand at Beef Week promoting our Angus and Wagyu genetics. We really enjoyed meeting people from all over Australia and learning about their operations. I think we were even able to persuade a few to make the switch to Wagyu cattle after they tasted the tender Wagyu we served up in the afternoons!! As export markets become more competitive we believe that the Australian beef industry will need to differentiate itself by marketing more high quality grass fed beef.

Thomas Foods International continue to penetrate the American market with their outstanding brand "Angus Pure" which is marketed as 'Open Nature' in America's second biggest super market chain Safeway and is described as Australian grass fed beef. Currently TFI are processing 3000 bodies per week and intend to expand this to 5000 per week.

The Wormoll family's Jack's Creek brand is marketing beef into 20 different countries. They feed Angus steers at Killara Feedlot managed by Andrew Talbot for 150 days .The Paraway pastoral Co Burindi, managed by Richard Puddicombe supply steers to Killara that have performed exceptionally well. They had the highest daily gain and highest grade of all cattle at Killara. The Burindi steers were pure Wattletop blood.

Wattletop continue to focus on breeding cattle that thrive in a range of environments from drought stricken Hughendon in Queensland to King Island and Tasmania. We strive to breed efficient, fertile, moderate framed,high growth cattle that produce carcasses with excellent yield and meat quality. We continue to focus heavily on marbling genetics .

We are excited with this years bulls sired by a number of Wattletop sires as well as other Industry sires. Wattletop Franklin G188 continues to perform well at Wattletop and in the Angus Benchmarking Program, We have some very good Tuhwharetoa Regent D145, Silveiras Conversion 8064 sons in the catalogue

We are selling 15 yearlings that are mainly calving ease bulls by Wattletop G188, Rennylea Edmund E11, Sydgen Trust and Carabar Docklands.

**This year we are celebrating our 25th bull sale. We Invite you to our Open Day on Wednesday the 29th Of July and sale on the 5th of August.**

Regards,  
Lock Rogers

## Sale Information

### Sale Location

Stratton is located 21kms west of Guyra on the Inverell Rd., turn left onto Stratton Rd.

### Refreshments

Complimentary morning tea, lunch and refreshments available at Stratton by Bald Blair School.

This year we are celebrating our 25th Annual Bull Sale and we would like to invite everyone to stay afterwards for a cooking demonstration and dinner catered for by Peter and Narelle Malcolm from Rafters Restaurant.

### Health

All bulls catalogued are free of the genetic conditions of AM, NH & CA

The bulls have had the following treatments this year:

- 12/2/15 Multimin, Eclipse, Pestiguard
- 9/4/15 Bovilis, 7-1, Vibrio
- 1/6/15 Vibrio

All bulls have been tested negative for Pestivirus. In areas where 3 day sickness and red water disease may be a problem, we recommend bulls be treated accordingly before they enter these areas.

### Inspection

We are holding an open day on Wednesday the 29th of July but private inspections are welcome any time by appointment. Bulls will be available for inspection on Tuesday afternoon before the sale and from 8am on the morning of the sale.

### Johne's Disease

Wattletop is an MN2 Herd.

### Insurance

A representative from Wesfarmers Insurance will be in attendance at the sale to assist with all enquiries. We recommend that purchasers insure their bulls.

### Stud Transfers

All sale lots will be transferred to new owners within 60 days of the sale.

### Delivery

Local and interstate carriers will be in attendance at the sale.

### Air Travel

Qantas Airlines (phone 13 13 13) fly to Armidale. Please contact the selling agents for pick up arrangements.

### Accommodation

**Guyra**  
Guyra Park Motel  
(02) 6779 1022

**Shiralee Motel**  
(02) 6779 1380

**Armidale**

(02) 6772 9999

**Glen Innes**  
New England Motor Lodge  
(02) 6732 2922

### Angus Society Registration codes

- Herd Book Registered (HBR)
- Angus Performance Registered (APR)

### Angus Quality Assurance Catalogue

Cattle producers using Angus bulls are making more money than those who don't. But that doesn't apply to just any Angus bull.

Don't be caught out with unregistered bulls with unknown backgrounds and without Angus Group Breedplan figures. Progeny on unregistered bulls are INELIGIBLE FOR CAAB™ and ASSURED ANGUS™ tags.

As a service to bulls buyers, the Angus Society has introduced a Quality Assured catalogue giving buyers confidence that bulls are registered and the catalogue truly reflects official data.

For more information contact the Angus Society or visit the website [www.angusaustralia.com.au](http://www.angusaustralia.com.au)

## Auctions Plus

### This sale is to be interfaced with AuctionsPlus

This sale is live on line in real-time, but will be interfaced with a physical auction that is being controlled by an auctioneer. A hand-held wireless connected computer is used to bring the on site prices to the internet screen for the remotely connected bidders to observe.

These bidders can place a bid on their computer and the result is immediately transferred to the person on site who the wireless device with will raise that bid with the auctioneer.

### Important Information:

- Bidding is only available to registered AuctionsPlus users
- You must register at least 24 hrs prior to the sale with AuctionsPlus Sydney on their website: [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

For further information about AuctionsPlus please contact

**Andrew Starr on 0428 792 466 or email by [andrew.starr@raywhite.com](mailto:andrew.starr@raywhite.com) [www.auctionsplus.com.au](http://www.auctionsplus.com.au)**

## Bull Breeding Soundness & Structure Exam

Peter Brown from Bovine Breeders, has given all sale bulls a thorough physical examination, including an inspection of all external reproductive organs, passed a semen quality assessment and cleared bulls of any abnormalities.

Once the sale group of bulls have been identified, Dick Whale of Independent Breeding and Marketing Services (IBMS) independently assesses all bulls using the Genetic Type Summery (GTS) structural assessment system to score every phenotype trait.

All bulls catalogued have passed this tough and strict assessment by Dick Whale. Wattletop places a very high degree of importance on structural soundness. We call this assessment the Dick Tick.

We at Wattletop Angus put great emphasis on docility and address this trait by both genetic selection and our attention to animal handling.

### Managing your purchase

To ensure a long and effective working life of your new bull/s, vaccinate annually with 7 in 1, Pestiguard and Vibrio vaccine.

Monitor and maintain the body condition of your bull/s - especially yearlings which require good nutrition to reach their full potential.

It is also important to monitor your new bull/s throughout joining especially in the first 3 weeks. Watch for any signs of injury, infection (any high temperature can compromise bull semen quality) or possible serving dysfunction.

Early detection of any problems during this period can minimise the impact of the quality of service your bull provides.

### Guarantee

In the unlikely event of infertility, provided it is not caused by injury, stress or disease contracted after our sale, we will endeavor to supply a satisfactory replacement if available or issue with a credit to equal to the

purchase price minus the salvage value which may be used to purchase at future Wattletop sales.

A veterinarian's certificate will be produced by the purchaser within 12 months of the purchase date.

## REVIEW AND DESIGN BREEDING PROGRAMS

- Breeding goals and markets targeted
- Breedplan and EBV's explained and tailored to your breeding aims
- Genetic defects (AM, NH, and others) explained in relation to the potential impact they may have on your herd
- Gene markers and molecular science understood.  
Taking your cattle breeding enterprise into the future

## ASSISTING BULL SELECTION AND PURCHASES

- Selecting herd sires at a seedstock sales.
- Selecting the bulls best suited to your breeding program
- Do you know how much you should be paying for these bulls

## ANNUAL HERD AND BULL ASSESSMENT

- Your breeders and herd sires accurately assessed for structural soundness.
- Non performing cows in your herd identified

## ADD VALUE TO YOUR BREEDING HERD

- Similar prices achieved for your surplus to requirement females as your feedlot or grass finished steers.
- A beef herd with optimum returns and minimal input costs

Pendulous & loose Good & tight

## A brief description of EBV's and \$Index Values

Estimated Breeding Values (EBVs) are predictions of an animal's genetic merit, based on available performance data on the individual and its relatives.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences from the breed base. As the breed base is set to a historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic change within the breed. The current breed averages are shown below. These averages provide a useful benchmark for comparing EBVs for animals.

	June 2015 Angus Australia BREEDPLAN										
	Calving Ease Dir	Calving Ease Dtrs	Gest Length (days)	Birth Wt (kg)	200 Day Wt (kg)	400 Day Wt (kg)	600 Day Wt (kg)	Mature Cow Wt (kg)	Milk (kg)	Days to Calving	Scrotal
	-0.2	+0.0	-3.3	+4.4	+40	+74	+96	+86	+14	-3.4	+1.6

Carc Wt (kg)	EMA (sq cm)	Rib Fat (mm)	Rump Fat (mm)	RBV (%)	IMF (%)	NFI-p (kg/d)	NFI-F (kg/d)	Doc-ility (trial)	Angus Breeding	Dome-estic	Heavy Grain	Heavy Grass
+53	+4.3	-0.1	-0.1	+0.4	+1.4	+0.08	+0.16	+3	+\$99	+\$99	+\$99	+\$100

### CALVING EASE TRAITS

**Calving Ease (DIR):** estimate of genetic differences among animals in the ability of their calves from 2 year old heifers to be born unassisted. Higher, more +ive, Calving Ease (DIR) EBVs are more favourable.

**Calving Ease (DTRS):** estimates of genetic differences among animals in the ability of their 2 year old daughters to calve without assistance. Higher, more +ive, Calving Ease (DTRS) EBVs are more favourable.

**Gestation Length:** estimate of genetic differences among animals in the number of days from the date of conception until the calf birth date. Lower, or more -ive, Gestation Length EBVs are generally more favourable.

**Birth Wt:** estimate of genetic differences between animals in kg of calf birth weight. Calf birth weight is the biggest contributing factor causing calving difficulty in heifers. While low Birth Wt EBVs are favoured for calving ease they are also often associated with lower growth potential. Small, or moderate, Birth Wt EBVs are more favourable.

### FERTILITY TRAITS

**Days to Calving (DC):** estimate of genetic differences among in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. Females with shorter DC EBVs tend to commence cycling earlier after calving and conceive earlier in the joining period. They also tend to attain puberty at a younger age as heifers. Lower, or more -ive, Days to Calving EBVs are more favourable.

**Scrotal Size:** estimate of the genetic differences among animals in scrotal circumference at 400 days of age. Increased scrotal size is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Larger, or more +ive, Scrotal Size EBVs are more favourable.

### GROWTH TRAITS

**200-Day Wt:** estimate of the genetic differences among animals in weight at 200 days of age. This is a measure of an animal's early growth to weaning. It is an important trait for breeders turning off animals as vealers or weaners.

**400-Day Wt:** estimate of the genetic differences among animals in weight at 400 days of age. This is an important trait for breeders turning off animals as yearlings.

**600-Day Wt:** estimate of the genetic differences among animals in live-weight at 600 days of age. This is an important trait for breeders targeting the production of animals suited for heavy weight grass finished or grain fed market

### MATERNAL TRAITS

**Milk:** estimate of the genetic differences among animals in milk production potential, expressed through variation in calf growth performance. Larger, more +ive, or moderate, Milk EBVs can be more favourable, depending on the environment.

**Mature Cow Wt:** estimate of the genetic differences among animals in cow weight at 5 years of age.

#### **CARCASE TRAITS**

**Carcase Wt:** estimate of the genetic differences among animals in hot standard carcass weight at 750 days of age. Larger, more +ive, Carcass Weight EBVs are more favourable.

**EMA:** estimate of the genetic differences among animals in eye muscle area (cm<sup>2</sup>) at the 12/13th rib site on a 400kg carcass. Larger, more +ive, EMA EBVs are generally more favourable.

**Rib Fat:** estimate of the genetic differences among animals in fat depth (mm) at the 12/13th rib site, measures on a 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

**Rump Fat:** estimate of genetic differences among animals in fat depth at the P8 rump site on a standard 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

**IMF%:** estimate of genetic differences among animals in percentage intra-muscular fat (marbling) in a 400kg carcass.

#### **EFFICIENCY TRAITS**

**Net Feed Intake (NFI):** estimate of the genetic differences between animals in efficiency. NFI is measured either post weaning (NFI-P), in young bulls and heifers, fed at around 300 days of age, or in steers fed at around 560 days of age (NFI-F). Lower, more negative (-ive) NFI EBVs are more favourable.

#### **TEMPERAMENT TRAITS**

**Docility:** estimate of genetic differences between animals in temperament. Docility EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (ie. either "docile" or "restless"). Higher Docility EBVs are more favourable.

#### **INDEX VALUES**

**Angus Breeding:** estimates the genetic differences between animals in net profitability per cow, joined in a typical commercial self-replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

**Domestic:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

**Heavy Grain:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

**Heavy Grass:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture finished heavy steers.

#### **TRAITS OBSERVED**

Indicates the traits that have been recorded for a particular animal and are contributing to the EBVs that have been calculated. These will appear directly below the table displaying the animals EBVs.

#### **UNDERSTANDING ACCURACIES**

The accuracy associated with an EBV gives an indication of its reliability, and the likely extent of its possible change as more information becomes available. As more data becomes available on animals (or its progeny, or relatives) then the accuracy of its EBVs for particular traits will increase.

Accuracies are influenced by the heritability of traits and the genetic associations existing between them. For lowly heritable traits, more information is required to achieve a similar accuracy to that of highly heritable traits.

Accuracies are expressed as percentages. The higher the percentage, the greater the chance that the EBV is a close estimate of the animal's true genetic merit, and the less likelihood that the EBV will change as more information becomes available.

For more information please contact

# Wattletop Sales through the eyes of Donna Davidson

2013

# Queensland 2015

Dyan Hughes at "Wentworth" Moranbah

**Queensland pre Beef Week Road Trip**  
 Lock and Jess would like to thank the Comiskeys, Reas, Hughes and Sproats for taking the time to show them their farms and cattle, especially in these dry times. We appreciated the opportunity to view the Wattletop progeny at the Comiskey and Sproat properties and to see them holding up in the dry conditions. We sincerely hope there is some drought breaking rain on the way very soon.

Wattletop bred calves at "Ludgate Hill"

Pete, Pete jnr Comiskey and Bryony Puddicombe at "Westpoint" Nebo

Sproat Family, "Ludgate Hill" Muttaborra

First Wattletop progeny at Sproat's "Ludgate Hill", Muttaborra

Isobel Knight and Babs Goldsmith, Proagrive

James Parker and Helen Bottom, Monto

Tom Newsome and Graeme Finlayson

Kirsty and Sam White, Bald Blair

## Rockhampton Beef Week 2015

Henry MacDougall, Brett Guest Clunie Range, Ben Simpson

Kirsty Hawkins and Jess Skillbeck

Mike Tully, Jess and Ian Winks

Vincent Posada, Jasmin Hanson and Lock

Andrew and Sally White Eastern Plains

Keith and Alex Hammond, Robbins Island Wagyu

Hicks Family, Holbrook

Andrew Salter, Vanessa and Lachie Cullen and Phil Salter, Doughboy Angus

Alec and Jodie Hall, Wandoan

Lock, Steph Turnbull and Richard Puddicombe, Paraway Pastoral

## Experience Safety Reliability

### Experience

You have often spent years breeding them, so we understand the importance of handling your livestock with the greatest of care, minimum stress in the most time effective manner.

Our trucks, crates and drivers all come with the highest levels of expertise ensuring that your stock are delivered to your destination safely and humanely.

Our bulk tippers can do the hard work and load carrying they are designed to do, with ease and reliability.

### Safety & Reliability

Betts Transport is accredited nationally in the National Heavy Vehicle Regulator (NHVR) for mass, maintenance and fatigue.

We have a current, mechanically reliable fleet. Regular maintenance ensures that our trucks run efficiently and on time, covering all eastern states, as well as South Australia.

**Give us a call today, we would love to work with you.**
