Peter  
Brazier

**In 2014, while some saw risk, we saw opportunity.** We were fortunate in having Peter Brazier join our team. Harvey, Mark and Peter have the expertise, knowledge and integrity to provide the very best customer service to stud and commercial cattle breeders. We offer stud breeders a fresh and dynamic service to market their genetics. We advise buyers on selecting the best cattle to meet their requirements. **More and more breeders are using us - are you?**

**Supported by 15 GDL Branches** serviced by a dedicated team of local livestock agents in Blackall, Cunnamulla, Dalby, Goondiwindi, Kingaroy, Longreach, Meandarra, Miles, Mitchell, Moura, Quilpie, Roma, St George, Taroom and Wandoan.

**Supported by Ruralco** "Our national strength is the best local service" with over 500 outlets across Australia, each operating under its own brand, with its own culture, service model and unique value proposition.

**Stud Stock GDL... Trait leaders for growth, performance and commitment.**

# BURENDA

## Angus

# Welcome to the Burenda Angus Annual Roma Bull Sale

A spectacular offering of 120 thumping good Angus bulls will be offered for our seventh Annual Roma Sale. The presentation of these bulls comprise of 79 2 year olds and 41 18 month old. Genetically these bulls represent some of Queensland's best bulls on offer with progeny by some of Australia's best AI sires together with several outstanding Burenda sires. 108 of the 120 catalogued Angus bulls are better than breed average for Angus breeding, domestic, heavy grain and heavy grass. 74 of these bulls are in the top 20% for Angus breeding and 71 in the top 20% for heavy grain. For your convenience we have shaded the ebv's of each sale lot in the top 10% blue and top 20% yellow. These bulls are bred in Queensland conditions and come with a full 2 year fertility guarantee which is detailed in the sale information pages in this catalogue.

We have been particularly impressed with the improvements in the doing ability of this year's sires, particularly the Docklands, Emperor and Bartel sons. A decision was made a few years ago to look at the rib and rump fat levels as feedback had indicated that in certain environmental conditions such as wetter than normal years and drier years that it was difficult to maintain good herd fertility and achieve the minimum fat specifications for grass fed product. We feel that a good run of these sale bulls possess this easier doing ability and we have noticed this over the last two dry summers whilst the bulls have been running on grass and leucaena pastures. These progeny also do well on crop. A trial by the MLA also indicated that improved rib and rump fat levels on heifers at joining gave a lift in overall fertility in those females.

We are currently running around 700 registered Angus breeders, 100 commercial Angus cows and 100 registered Brangus females. Over the last 11 years we have made good gains on fertility and progeny performance by being tough on fertility and temperament. Either of these contribute to poor performance. The Burenda females are AI'd once and have only 6 - 8 weeks joining followed by pregnancy testing 40 days after bull removal. Empty females are fattened and sold direct to works.

This year we have included the actual calving interval or ACI in our catalogue comments for those that use this information. Most lots have good ACI's of around 365 days. There are also others marked as Donor (AI ET) and 365/recipient. The recipient means his dam has had both natural and embryo calves. Around 80% of our females are 6 years and younger as

we find these cows have the improvements of fertility, calving ease, growth, and carcass data that we are looking for. Our improvement in EBV's has been very noticeable in both our cows and the 2015 sale bulls. The combination of improvements in the fertility, ebv's and raw data performance within the Burenda herd will lead to improved profitability through these genetics.

The Burenda females are run as if they were a commercial beef herd with around 8 months of the year spent on agistment country spread around the Darling Downs and Eastern Maranoa areas. The remainder of the time is spent at Dalby Downs for calving and the AI process.

The beef industry is experiencing much improved prices of late but is still faced with numerous hurdles, the main one being the effects of drought, and as a Stud and commercial breeder we are fully aware of the problems experienced by our clients. As a consequence we are again offering some special conditions for this year's sale and these are detailed in the sale information pages in this catalogue. Briefly they offer extended terms for payment and volume buy discounts.

Manager Jonathan Schmidt has the bulls in great shape and they are powering ahead on a good oats crop. There are photos of many of the bulls on our website. Please contact Jonathan on 07 4663 4002 or 0429 067 313 for any further details. Auctions Plus was active last year with several buyers operating after inspecting the bulls in the paddock. Our insistence on breeding for fertility, growth and carcase quality is paying dividends. We believe buyers will be impressed when they assess this year's draft. The 2 year old bulls will average over 800kg and have plenty of length, strength and fleshing ability. The catalogue includes plenty of sires suitable for use on heifers. Please view full details of each bull on our website [www.burendaangus.com.au](http://www.burendaangus.com.au) and remember - you are always welcome at Burenda to check out our herd and operation.

## **SPECIAL ALLOWANCES FOR 2015 SALE**

Even with solid returns for beef cattle in the last few months, 2015 has been a difficult year for beef producers in many parts of drought affected Queensland. Burenda recognises this and has decided to keep offering assistance to those producers who are considering purchasing bulls at our 2015 Roma Sale. After a very dry start to the summer we have been blessed with a reasonable season and while we cannot influence weather conditions in other areas of Qld we can share some of the benefits that this season has given to our Stud. It is our sincere hope that all sections of the beef industry will benefit from improved conditions in the coming year

## **EXTENDED PAYMENT AND TERMS UP TO 1 YEAR**

Buyers of 2 or more bulls are offered extended terms as follows:

1. One half of the total purchase price plus full GST on sale day (or within 7 days through agents) and the balance payable on or before the 26th February 2016.
2. If the buyer is located in a drought declared area and the bulls are despatched to that location then one half of the total purchase price plus full GST is payable on sale day (or within 7 days through agents) and the balance payable on or before the 26th August 2016.

## **VOLUME DISCOUNTS**

Buyers of 2 or more bulls purchased at this year's Roma Sale will qualify for discounts as follows:

For 2 bulls purchased receive a 2% discount on total purchase price  
For 3 bulls purchased receive a 3% discount on total purchase price  
For 4 bulls purchased receive a 4% discount on total purchase price  
For 5 bulls purchased receive a 5% discount on total purchase price  
For 6 bulls purchased receive a 6% discount on total purchase price  
For 7 bulls purchased receive a 7% discount on total purchase price  
For 8 bulls purchased receive a 8% discount on total purchase price  
For 9 bulls purchased receive a 9% discount on total purchase price  
For 10 or more bulls purchased receive a 10% discount on total purchase price

## **Upcoming Burenda Sales**

# SALE INFORMATION

## Sale location and inspection times

The Burenda Angus Bull Sale 2015 will be held at the Roma saleyards, Warrego Hwy Roma Qld 4455. Sale time is 11:00am and inspections can be made from 8am on sale day. We will also be at the yards the day before if you are in the area for early inspections

## Identification

All bulls have NLIS tags, lot numbers and freeze brands.  
The Burenda PIC number is QAWB0619  
All bulls are registered with the Angus Society of Australia

## Safety Rules & Recommendations

We are confident all our bulls offered for sale are quiet and of sound temperament and are used to being handled in yards. However sale day brings a differing set of conditions and the bulls are subjected to unusual levels of noise and pressure with many people invading their space. Even the quietest bull is still an unpredictable animal who can misbehave. Visitors entering pens do so at their own risk and are subject to conditions set out by the Roma Saleyards.

## Buyer Registration

A buyer registration system will apply. Please register with the selling agent well before the auction commences. AuctionsPlus will be running in conjunction with this sale and registration must be completed within the conditions set out by AuctionsPlus. For these terms and conditions please visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

## Sale Conditions

All lots will be sold subject to the usual conditions governing auction sales which will be displayed on the day and are detailed in the back of this catalogue. The auction price is **exclusive of GST**

## Rebate

The vendor has agreed to allow 6% rebate to outside agents introducing the approved buyers no later than 24 hours prior to the sale, accompanying their buyer to the sale and settling on their behalf within 7 days of the sale. For outside agents introducing approved buyers within 24 hours prior to the sale **BUT NOT** attending the sale with their clients, a 3% rebate will be paid

## TERMS

Any buyer purchasing 2 or more bulls may pay one half of the purchase price on sale day ( or within 7 days through agents) and the other half on or before 26th February 2016.

**Buyers need to accept these terms on sale day when settling their account**

## Delivery and Transport

Free transport and delivery to selected Major centres is available by negotiation with Burenda Manager Jonathan Schmidt after the sale has concluded.

## Volume Discounts

For buyers who purchase 2 or more bulls a discount will be allowed as follows:

Buying 2 bulls = 2% discount on total purchase price  
Buying 3 bulls = 3% discount on total purchase price  
Buying 4 bulls = 4% discount on total purchase price  
Buying 5 bulls = 5% discount on total purchase price  
Buying 6 bulls = 6% discount on total purchase price  
Buying 7 bulls = 7% discount on total purchase price  
Buying 8 bulls = 8% discount on total purchase price  
Buying 9 bulls = 9% discount on total purchase price

Buying 10 or more bulls = 10% discount on total purchase price

## Health Treatments

All Burenda Angus Bulls presented at the sale have been treated for the following :

Pestiguard Vaccine, 7-in-1 Vaccine, Botulism Vaccine,  
3 Day Sickness Vaccine, Vibrio Vaccine, Tickfever Blood,  
Tested Pestivirus Free and pre treated for lice

## INSURANCE

Ownership passes at the fall of the hammer. Insurance can be arranged on the day through GDL or your own agent

## Breeding Soundness & Semen Test

All bulls have been semen & morphology tested and passed satisfactorily for soundness by John Chapman of South East Qld Genetics. Full details will be available on sale day

## Raw Data

All bulls will be selling with full information on weights, scrotal measurements and ultrasound scanning details. Enquiries prior to the sale regarding raw data can be made by contacting Jonathan Schmidt on 0429 067 313 also raw data will be posted on our website prior to sale day at [www.burendaangus.com.au](http://www.burendaangus.com.au)

## Semen Interest In Bulls

Burenda will retain a half interest in any semen sold from bulls in this sale. Because Burenda sells most of their top bulls it is possible they may wish to collect semen at some future date for their own use or for sale. This is a revenue sharing opportunity for buyers. We retain the right to access bulls at a negotiated time and place and at Burenda's cost. Owners have the right to use their half share in their own herds or revenue share with Burenda in semen sold to other users.

## 2 Year Guarantee

In addition to the standard warranties provided in stud stock auction terms, Burenda is proud to provide a 2 year guarantee for all bulls sold at this sale. We warrant that the bulls are fertile and capable of natural service at the time of the sale. Should a bull become infertile or break down within 2 years for reasons other than injury or misadventure from August 26, 2015 Burenda will:

1. Provide you with a satisfactory replacement  
OR

2. Provide you with a credit equal to the purchase price of the bull less salvage value and less seasonal value. This credit may be used at any future Burenda Bull Sale.

Burenda WILL require you to provide a veterinary report.

# IMPORTANT NOTICES FOR PURCHASERS

## SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

## DNA PATERNITY VERIFICATION

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

## PRIVACY INFORMATION

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

### ***BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA***

*If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.*

*I, the buyer of animals with the following registration numbers ..... from member ..... (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.*

*Signature: .....*

*Date: .....*

*Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail [office@angusaustralia.com.au](mailto:office@angusaustralia.com.au).*

# A BRIEF DESCRIPTION OF EBVS

## Understanding Estimated Breeding Values (EBVs)

Estimated Breeding Values (EBVs) are predictions of an animal's genetic merit, based on available performance data on the individual and its relatives.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences from the breed base. As the breed base is set to a historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic change within the breed. The current breed averages are shown below. These averages provide a useful benchmark for comparing EBVs for animals.

	June 2015 Angus Australia BREEDPLAN										
	Calving Ease Dir	Calving Ease Dtrs	Gest Length (days)	Birth Wt (kg)	200 Day Wt (kg)	400 Day Wt (kg)	600 Day Wt (kg)	Mature Cow Wt (kg)	Milk (kg)	Days to Calving	Scrotal
	-0.2	+0.0	-3.3	+4.4	+40	+74	+96	+86	+14	-3.4	+1.6

Carc Wt (kg)	EMA (sq cm)	Rib Fat (mm)	Rump Fat (mm)	RBV (%)	IMF (%)	NFI-p (kg/d)	NFI-F (kg/d)	Docility (trial)	Angus Breeding	Dome-stic	Heavy Grain	Heavy Grass
+53	+4.3	-0.1	-0.1	+0.4	+1.4	+0.08	+0.16	+3	+\$99	+\$99	+\$99	+\$100

### CALVING EASE TRAITS

**Calving Ease (DIR):** estimate of genetic differences among animals in the ability of their calves from 2 year old heifers to be born unassisted. Higher, more +ive, Calving Ease (DIR) EBVs are more favourable.

**Calving Ease (DTRS):** estimates of genetic differences among animals in the ability of their 2 year old daughters to calve without assistance. Higher, more +ive, Calving Ease (DTRS) EBVs are more favourable.

**Gestation Length:** estimate of genetic differences among animals in the number of days from the date of conception until the calf birth date. Lower, or more -ive, Gestation Length EBVs are generally more favourable.

**Birth Wt:** estimate of genetic differences between animals in kg of calf birth weight. Calf birth weight is the biggest contributing factor causing calving difficulty in heifers. While low Birth Wt EBVs are favoured for calving ease they are also often associated with lower growth potential. Small, or moderate, Birth Wt EBVs are more favourable.

### FERTILITY TRAITS

**Days to Calving (DC):** estimate of genetic differences among in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. Females with shorter DC EBVs tend to commence cycling earlier after calving and conceive earlier in the joining period. They also tend to attain puberty at a younger age as heifers. Lower, or more -ive, Days to Calving EBVs are more favourable.

**Scrotal Size:** estimate of the genetic differences among animals in scrotal circumference at 400 days of age. Increased scrotal size is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Larger, or more +ive, Scrotal Size EBVs are more favourable.

### GROWTH TRAITS

**200-Day Wt:** estimate of the genetic differences among animals in weight at 200 days of age. This is a measure of an animal's early growth to weaning. It is an important trait for breeders turning off animals as vealers or weaners.

**400-Day Wt:** estimate of the genetic differences among animals in weight at 400 days of age. This is an important trait for breeders turning off animals as yearlings.

**600-Day Wt:** estimate of the genetic differences among animals in live-weight at 600 days of age. This is an important trait for breeders targeting the production of animals suited for heavy weight grass finished or grain fed market

### MATERNAL TRAITS

**Milk:** estimate of the genetic differences among animals in milk production potential, expressed through variation in calf growth performance. Larger, more +ive, or moderate, Milk EBVs can be more favourable, depending on the environment.

**Mature Cow Wt:** estimate of the genetic differences among animals in cow weight at 5 years of age.

## **CARCASE TRAITS**

**Carcase Wt:** estimate of the genetic differences among animals in hot standard carcass weight at 750 days of age. Larger, more +ive, Carcass Weight EBVs are more favourable.

**EMA:** estimate of the genetic differences among animals in eye muscle area (cm<sup>2</sup>) at the 12/13th rib site on a 400kg carcass. Larger, more +ive, EMA EBVs are generally more favourable.

**Rib Fat:** estimate of the genetic differences among animals in fat depth (mm) at the 12/13th rib site, measured on a 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

**Rump Fat:** estimate of genetic differences among animals in fat depth at the P8 rump site on a standard 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

**IMF%:** estimate of genetic differences among animals in percentage intra-muscular fat (marbling) in a 400kg carcass.

## **EFFICIENCY TRAITS**

**Net Feed Intake (NFI):** estimate of the genetic differences between animals in efficiency. NFI is measured either post weaning (NFI-P), in young bulls and heifers, fed at around 300 days of age, or in steers fed at around 560 days of age (NFI-F). Lower, more negative (-ive) NFI EBVs are more favourable.

## **TEMPERAMENT TRAITS**

**Docility:** estimate of genetic differences between animals in temperament. Docility EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (ie. either "docile" or "restless"). Higher Docility EBVs are more favourable.

## **INDEX VALUES**

**Angus Breeding:** estimates the genetic differences between animals in net profitability per cow, joined in a typical commercial self-replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

**Domestic:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting the domestic supermarket trade, with progeny finished using either grass, grass supplemented by grain or grain finishing systems.

**Heavy Grain:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.

**Heavy Grass:** estimates the genetic differences between animals in net profitability per cow joined in a commercial self-replacing herd targeting pasture finished heavy steers.

## **TRAITS OBSERVED**

Indicates the traits that have been recorded for a particular animal and are contributing to the EBVs that have been calculated. These will appear directly below the table displaying the animals EBVs.

## **UNDERSTANDING ACCURACIES**

The accuracy associated with an EBV gives an indication of its reliability, and the likely extent of its possible change as more information becomes available. As more data becomes available on animals (or its progeny, or relatives) then the accuracy of its EBVs for particular traits will increase.

Accuracies are influenced by the heritability of traits and the genetic associations existing between them. For lowly heritable traits, more information is required to achieve a similar accuracy to that of highly heritable traits.

Accuracies are expressed as percentages. The higher the percentage, the greater the chance that the EBV is a close estimate of the animal's true genetic merit, and the less likelihood that the EBV will change as more information becomes available.

For more information please contact

Ranked in the Top: 30% for Angus Breeding, 40% for Domestic, 20% for Heavy Grain, 30% for Heavy Grass. Potential outstanding sire in Haiku with 67 progeny in the Burenda herd in a short while. These are his first sons on offer as yearlings and we are expecting good results in the future. The daughters have done extremely well with good results at the 400 day weights and scanning. 5 Sons Lots 48,52,59,60 & 113.

Ranked in the Top: 10% for Angus Breeding, 20% Domestic Markets, 5% for Heavy Grain. Emperor has over 3300 progeny and is the top selling son of Berkly for \$91000. His progeny stand out for muscle pattern and capacity, blending calving ease with high growth and carcass weight. The use of Emperor in the Burenda cow herd has produced thick meaty progeny with sire looks and a exceptional doing ability. **10 Sons Lots 1,6,11,12,13,14,20,32,38 & 80.**

Ranked in the Top: 60% Calving Ease, 70% Scrotal, 80% 200 day weight, 60% 600 day weight, 40% Angus Breeding, 10% Heavy Grass. Docklands has been used in the Burenda herd to improve calving ease, fertility, all growth traits and particularly our rib and rump fat levels. With the injection of these higher fats his progeny have excelled in their ability to do well under all environmental conditions.

Future Top Sire: Potential best describes Hammerhead, with a large number of Burenda Black progeny performing brilliantly well for us and we will have more angus sons in future sales. His daughters have been outstanding with excellent growth, carcass, EMA and IMF. They had some of the highest raw scan data on EMA and IMF at 400 days. You only have to look at the picture to see the ideal docility with muscle pattern and beef he holds together. 1170kg at 3 years of age after a total of 4 seasons in the spring and autumn joining.

2 Sons Lots 49 & 58.

Some good EBV data here. Our most important consideration in the Burenda cow herd in the last 10 years has been **fertility**. I keep mentioning the calving interval as this is very important as it is the ability of a cow to get in calf and rear a calf each year. They miss and they are gone. ACI 368 days.

**Dalby Rural Supplies own working solar pump display, pumping water on a rainy overcast day!**

At Dalby Rural Supplies we design, supply & install all facets of solar water pumping solutions for large livestock requirements through to agricultural, domestic and even industrial applications - the capabilities of our solar pumping packages are only limited by your imagination! We can install systems capable of over 4megalitre per day and pumps capable of over 450mt head with our high efficiency solar pumps accompanied by our highly efficient tier 1 solar panels.

In some situations we design systems to utilize 'Sun Tracking Arrays' in order to capture the sun for the entire duration of the day - this is just another example of why pumping efficiency is so important to us!

For an obligation free design and quote, talk to one of our team members who will be happy to guide you through the design and selection process to achieve the best possible outcome for your solar pumping installation.
