EXPLANATORY NOTES FOR CATALOGUES

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or it's relatives. Accuracy below 75% should be considered low.

CALVING EASE

EBVs are based on calving ease (CE) scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 and 400 day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic different in cow weight at 5 years of age.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

The Trans-Tasman Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Shorthorn Society of Australia, the Beef Shorthorn Society of Australia, the New Zealand Beef Shorthorn Association nor the ABRI oversee or audit the collection of this data.

DOM: Heavy Domestic Index (\$) estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in a temperate environment targeting pasture grown and finished steers for the domestic trade (eg. supermarket). Steers are marketed at 480 kg live weight (260 kg HSCW and 10 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding.

EXP: Export Maternal Index (\$) estimates genetic differences between animals in net profitability per cow joined for an example commercial herd (self-replacing herd run in a temperate environment) targeting steers for the Japanese B3 market. Steers are assumed to be pasture grown to feedlot entry then feedlot finished for 150 days. Steers are assumed to be marketed to the feedlot at 450 kg live weight, and then slaughtered after finishing at 675 kg live weight (370kg HSCW).

NM: Northern Maternal Index (NM) estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia (e.g. Brahman, Droughtmaster or Santa Gertrudis cows) targeting the export trade. Steers are finished on grass and marketed at 600 kg live weight (320 kg HSCW and 10mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

VISUAL APPRAISAL

Although EBVs provide an estimate of an animal's genetic merit for a range of production traits, they do not provide information for all of the traits that must be considered during selection of **functional** animals. In all situations, EBVs should be used in conjunction with visual assessment for other traits of importance (structural soundness, temperament, fertility etc). A recommended practice is to firstly select replacement breeding stock based on EBVs and to then select from this group to ensure that the final selections are visually acceptable.

Average EBV's for 2014 Born Calves

	CE Dir. (%)	CE Dtrs. (%)	Gest. Length (days)	Birth Wt. (kg)	200 D Wt. (kg)	400 D Wt. (kg)	600 D Wt. (kg)	Mat. Wt. (kg)	Milk (kg)	Scrotal Size (cm)	Carcase Wt. (kg)	E. Mus Area (sq. cm)	Rib Fat (mm)	Rump Fat (mm)	RBV (%)	IMF (%)	DOM Index (\$)	EXP Index (\$)	NTHN Index (\$)

NOTE: Lots with shaded boxes on their Breedplan figures indicates they are in the Top 25% of the breed for the shaded trait.

Welcome to Futurity

Welcome to our 2016 Annual on Property Sale. Thank you for taking the time to review this catalogue. We firmly believe this is the most exciting and potentially profitable time in a generation to be a Beef producer.

What a great time to be a beef producer and breeding shorthorn cattle. It has never been so exciting with the breed now having its own branded beef programme **Thousand Guineas thanks to JBS Swift and the Shorthorn Society of Australia.** The shorthorn breed is now being recognised not just for its performance traits but also its outstanding eating quality. Record prices for stock, favourable seasonal conditions and a very positive outlook for protein sources going forward makes this the time to be part of and invest in the Beef Industry.

It was great to see 86% of cattle from last year's sale going to repeat buyers. Thank you for your ongoing support of our program. We are happy to be able to offer a larger but even better line of bulls for this year's sale to help our supporters secure the bull of their choice.

At Futurity we believe it is of the up most importance to breed cattle that are profitable for you the producer. This is achieved by them being Easy Doing, Easy Calving and having Rapid Rebreeding Intervals which all lead to high weaning percentages, the true profit driver of any beef production unit. **This is with no doubt the most maternally profitable group of cattle we have offered to date.**

About the Bulls

The bulls for this year's sale are the most balanced line of bull we have had, they offer longevity, growth for age, carcass merit and high maternal profitability. The bulls also have great temperament which I am sure they will pass on to their progeny.

Due to our commitment to producing accurate performance data (EBV's) the bulls have been run in one contemporary group since weaning. The bulls have been tested negative to Pesti Virus vaccinated with 7 in 1, Vibrio, and Pestiguard. They have also been semen tested to ensure they are ready to go straight to work for you.

We encourage viewing of the cattle prior to the sale if possible. We believe this is an investment in your business. Seek to find the best combination of genetics, performance data and physical attributes to improve profitability in your herd. Your investment now will reap rewards in the future. We would like to assist in advising you on the purchase that will be most profitable for your operation so please ask if you would like any assistance.

About the Females

This year we are offering both stud and commercial heifers both are the best we have. The stud heifers represent a great opportunity for those wanting to start a stud or add some elite genetics to their existing operation. We are offering the lead of our commercial heifers to help supply the growing need for shorthorn females to supply the Thousand Guinea's programme and other high value markets.

Please see more explanatory notes at the start of the female lots.

We look forward to catching up with you on the day and extending our hospitality to our visitors. Thousand Guineas steak will be on the menu.

Regards
Jason & Kylie Catts

REFERENCE SIRES

FUTURITY GAME CHANGER (P)

Born: 05/09/2011 Colour: Red Ident. No.: JJJG129

FUTURITY ROYAL ENIA (P) (AI) RLW

Game Changer was sold for our top price of \$22000 to Southcote Stud SA in 2013. We continue to use Game Changer by AI due to the quality of his progeny. Game Changer's progeny are very consistent easy care cattle and very versatile in there design. **He is a trait leader for 600 day growth, EMA and retail beef yield.**

We used Honey Badger as a yearling over a group of first calf cows after AI to produce his first batch of calves. We continue to use Honey Badger heavily due to the extra carcase shape and growth his progeny display whilst being a genuine calving ease sire. ABS own the global semen rights to Honey Badger and he is receiving plenty of praise from commercial producers that have used him. **He is a trait leader for 400, 600 day growth and retail beef yield.**

NOTES: We have put one of our best up to start the sale. Kodiak has outstanding structure is very thick, soft and heavy. This young sire excels across all traits making him ideal to service all markets and maintain the highest level of maternal profitability. Kodiak has some of the most impressive performance data in the sale, low birth weight high growth, great calving ease and outstanding carcass data.

THE GROVE EASTER WARRIOR (P) Red
THE GROVE DALE T187 (P) (ET) Red
THE GROVE BLUE DALE 3RD (H) (ET) (AI) Red

NOTES: Kenebri is a real standout for his phenotype and overall balance, he is very thick and heavy, long bodied, super quiet and has perfect structure. Very rarely do we see a bull so good across so many traits, note the outstanding carcass data on this young sire. Kenebri is from a female who has bred very consistently for us producing three top sale bulls and has out cross genetics for most.

We firmly believe this bull has much to offer the Shorthorn breed due to his overall balance and outstanding carcass attributes. Futurity has collected semen from this bull for in herd use and for the Shorthorn Beef Commercial Progeny Test Programme. Retaining 50% semen rights.

JR LEGEND 78H (IMP USA) (P) Red
FUTURITY LEGEND'S RUBY Y45 (P) (AI) Red
FUTURITY RED CLOUD'S RUBY W12 (P) (AI) Red

NOTES: Kickstart is arguably the best all-rounder in the draft, very thick made, great structure and a great set of EBV's to back up a very eye appealing phenotype. This young sire is certainly one of the highest Export Maternal Indexing bulls in the 2014 drop due to his low birth, high growth, high carcass merit and strong maternal profitability. Kickstart's Dam is breeding exceptionally well and he has a maternal lot selling as lot 58A.

INTRODUCING *the new* PREMIUM SHORTHORN BRANDED PROGRAMME

THE STORY OF
THOUSAND GUINEAS

The story begins in the North East of England in the 18th century, where Teeswater & Durham cattle breeds were being refined using selective breeding techniques by Charles and Robert Colling. This program would go on to give rise to one of the *most highly sought after beef cattle breeds* anywhere in the world... **THE SHORTHORN.**

The culmination of this breeding program was the birth of the bull Comet in 1804, who, in 1810 went on to fetch 1,000 Guineas at the Brafferton sale, breaking all records as the first bull to draw such a price tag.

THIS BLOODLINE would go on to be a key influencer in the Modern Shorthorn breed that is celebrated for its superb eating qualities.

SUPERIOR IN TASTE

WITH **THOUSAND GUINEAS** you will enjoy an open texture with a buttery flavour, a great bite *and lots of juice*. Perfectly suited for that special occasion when friends, family or colleagues come together to share a richly rewarding *moment in time*.

Elite Female Offering

Due to our long term commitment to the genetic advancement of the Shorthorn breed we are this year offering our Best 20 Independently Selected 2015 drop heifers.

We have been breeding registered, performance recorded shorthorns for almost thirty years and by offering the best allows others to take advantage of the hard work we have done and share great shorthorn genetics to improve the Shorthorn breed generally.

The heifers have been independently assessed and selected from our entire 2015 drop by Alastair Rayner, respected cattle consultant (see below letter from Alastair). The heifers have also been checked for reproductive soundness by artificial breeding specialist Garry Wilkinson, to ensure the breeding future of your purchase.

Due to the elite quality of the heifers and our own requirements to keep our programme productive we are offering a pick of two heifers per lot with the successful purchaser taking the lot of their choice. The heifers represent some of the best cow families in the breed and have our highest validation for the contribution they will make to the purchasers herd.

This is truly a once only opportunity so please take the opportunity to secure the best genetics the breed has to offer and get in at the top floor.

Assessment by Alastair Rayner, Rayner Ag

RaynerAg

Jason and Kylie Catts requested I assess the entire draft of heifers in order to select a picked draft of 20 females for this year's sale. I was able to work through the entire draft to select females that met my expectations for structural correctness, excellent temperament, growth for age, and displaying the attributes destined to improve yield.

The group of females selected more than met my expectations for these attributes. They are a very quiet, easily handled group of animals. All display balanced maturity patterns with above average growth for age. I was extremely impressed by their soundness and for the attributes of muscle that I know will contribute in a positive way to any herd.

In addition to their impressive physical attributes, these females offer significant genetic advantage to any breeder. All are recorded on BreedPlan with genetic potential well above breed average. I was very happy to see the strong correlation between their genetic potential and their physical appearance at selection.

I was pleased to have the chance to work through these heifers individually and to identify them from the entire sibling draft. I am confident these heifers individually, or as an entire group will make a positive and long lasting contribution to any herd they are placed within.

Commercial Heifers

This year we are presenting the lead of our commercial heifers as a special offering for those that like the finest. With the cattle market at an all-time high and the Shorthorn breed going from strength to strength we have decided to offer the lead of our commercial heifers that will no doubt make front pasture cows of the future.

These EU accredited heifers are 13 to 14 months great types and ready to join now or to the purchasers requirements. They are by sons of Yamburgan Ossie D96 and The Grove Phenomenon.

The heifers will be offered in three lots and a full description will be available on **Auctions Plus**.

FUTURITY VICTORY (P) (ET) (AI) Roan
FUTURITY RUBY Z74 (P) (AI) Red
FUTURITY RUBY'S LEGEND W30 (P) (AI) RLW

NOTES: I don't believe that I am offering Futurity Honey Badgers full sister. You judge for yourself how good her genetics are by the run of bulls in the sale by her brother Honey Badger. Futurity Taboo's Ruby L43 is also a maternal sister to last year's top price bull Futurity Judas who sold to Riverside Meats for \$24000. This young female is put together just right, plenty of growth and thickness and still a lovely wedge shape. Taboo's Ruby L43 has some of the best and most accurate performance data in the breed.

Dam: FUTURITY CHICAGOS ENIA D7 (P) Red
SPRYS CHICAGO HOPE Y092 (P) RLW
FUTURITY ENIA'S HOPE B5 (H) RLW
FUTURITY ENIA (P) Red

NOTES: We believe this is truly an exceptional female that will make a mark on the Shorthorn breed. Her proven sire Futurity Drought Breaker still has some of the best performance figures in the breed and her mother has been one of our most consistent breeders selling sons to \$12000. Futurity DB Enia L15's dam Futurity Chicago's Enia D7 has also come back 74 days in her calving interval and would be our most efficient cow for calf weaning/cow weight ratio. Futurity DB Enia L15 is very deep and wedge shaped. She was one of the heaviest weaners of her drop.

SALE INFORMATION & CONDITIONS

- **Inspection** – We encourage prospective buyers to inspect the cattle prior to sale. This gives us the opportunity to assist in selection of the best genetics for your particular requirements. Inspection on Sale Day will be from 10 am.
- **Supplementary Sheet** – Up to date weights, scrotal size and scanning data will be supplied.
- **Breeding Guarantee** - Bulls have been semen tested and breeding soundness assessed prior to sale. In the unlikely event of infertility, the vendor guarantees that (without expenses, interest, cost and damages) if the bull proves to be totally infertile or totally incapable of natural service, provided it is not caused by an injury or disease contracted since leaving the sale, to either replace with an animal of comparable value or credit to the full purchase price will be given at the next sale or on a private sale animal. If a bull does not possess a reasonable fertility, although not totally infertile any claim shall be considered on its merits by the vendor and his Veterinarian. Any complaint must be lodged with a relevant Veterinary Certificate within 6 months of the date of Sale direct to the Vendor. Bulls that run in a multiple joined environment are not guaranteed for breakdown or injury.
- **Female Guarantee:** Females are guaranteed fertile for natural joining for 6 months post sale with the exception of Embryo transfer, illness or injury.
- **Health** – TB & Brucellosis free herd and stock are free to move anywhere in Australia. BJD Status is Protected.
All bulls have been tail hair sample tested negative and vaccinated against Vibrio, Bovine Pestivirus and 7 in 1.
- **Buyers Orders & Phone link up** – Buying orders will be diligently executed by a person nominated by you to act on your behalf. Bidding by phone will be available. Contact Jason, Terry or your preferred agent 48hrs prior to sale to make arrangements for phone numbers and time.
- **Intending buyers please note-** Buyers numbers system will be in operation, therefore all prospective purchasers will be required to register prior to the commencement of the sale.
- **Insurance** - Insurance representatives will be in attendance on Sale Day. We encourage you to insure all purchases.
- **Delivery** – While every care will be taken, no responsibility can be accepted for injuries whilst awaiting delivery. We would like to offer a freight subsidy on your new bull capped at \$100/bull up to 400km or to the NSW border on a major route. This will only apply if freight is arranged by Jason or Terry.
- **Personal transport** - we can arrange transport to and from “Glen Ayr” please contact the selling Agent or Vendors. The closest major airport is Dubbo 2.25 hrs. Air strip available on request at Baradine for private planes.
- **Accommodation-**
 - Warrigal Gardens B & B
Baradine - 02 68431765
 - Tattersalls Hotel
Baradine - 02 68431444
 - Acacia Motor Lodge
Coonabarabran - 02 68421922
 - Camp Cypress
Baradine - 02 68431035
- Refreshments for morning tea and a light lunch will be supplied prior to the Sale.
- **Please Note** –
 - It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in the sale, on the sale premises.
 - The Vendors will not be responsible for an errors or omissions in this catalogue.
 - GST will be added on the fall of hammer to purchase price.
 - All cattle will have their NLIS buttons and will be transferred to successful purchaser's number by selling agent at completion of sale

IMPORTANT NOTICES

The selling Agent, its members, subsidiary or related corporations, officers, agent and employees for themselves and for those for whom they act, while exercising due care provide all information without responsibility and give no guarantee whatsoever as to its accuracy, All persons who attend the sale do so entirely at their own risk and the Selling Agent, its members, subsidiary or related corporations, officers, agents, employees and its principals for themselves and for those for whom they act, do not assume or accept any responsibility or liability of whatever nature for an injury or damage whatsoever which may occur.

BUYER'S INSTRUCTION SLIP

To be handed in to the Settling Office immediately after the sale (by all purchasers).

TEMANA CHAROLAIS

Welcome

After 5 years of dry at last we have had rain. At the beginning of June we had 82mls which filled all our dams.

With a good season under our belts so far and positivity and confidence in the markets it is with pleasure to welcome you to our on property Bull Sale.

The consistency in breeding continues at Temana.

On offer are 31 moderately frame meaty bulls displaying good carcass characteristics, even fat cover, sound structure and great temperament.

In the 31 we have 5 yearling bulls which we think are exceptional with softness, length, muscle and great temperament.

PRIVATE SALE we have some females.

We look forward to seeing you at the Sale, if you like to view the bulls or require assistance in selection prior to the Sale we would be more than happy to provide this.

We would like to congratulate DSK and Moongool Studs on the progeny of Temana Golden Logie and Murray and Nicole Nicholls on winning Led Steers and carcass competitions using progeny sire by Temana bulls.

Regards

Terry & Maylene Griffin
