100	Irongate Nominees Kalgan, WA	Semen	50 Straws	Landmark Breeding Services Bunbury WA		<a href="#">Click here for Breeding Details</a>	Mitch Braithwaite Primaries of WA, Mount Barker 0427 702 311 	IRONGATE WAGYU ITOSHIGENAMI B6 (AI) is producing Wagyu Fullblood 100% and Crossbred Wagyu F1 50% feeder steers and breeders. His progeny are consistently high marbling, he is in the top 1% for Marble Score. He has great depth of pedigree on both sire and dam. The virility of this stud sire is outstanding and he has a great placid temperament. Many Fullblood females have been retained in the Irongate herd from this bull as we see him have a great future in our herd. Feedback supplied from key feedlots and processors including Mayura, Macquarie Downs and AACo over the last few years has identified B06 as an outstanding Wagyu sire. On an average 310 days feed ration his fullblood progeny produce a Beef Marble Scores averaging 8.1. Carcass Weights averaging 431kg. Tested free of all genetic disorders. Freight and Insurance is at the purchasers cost and the delivery point is Landmark Bunbury WA. All Semen purchased must be paid for in full before delivery.
101	Irongate Nominees Kalgan, WA	Semen	50 Straws	Landmark Breeding Services Bunbury WA		<a href="#">Click here for Breeding Details</a>	Mitch Braithwaite Primaries of WA, Mount Barker 0427 702 311 	IRONGATE WAGYU ITOSHIGENAMI B6 (AI) is producing Wagyu Fullblood 100% and Crossbred Wagyu F1 50% feeder steers and breeders. 102	Irongate Nominees Kalgan, WA	Semen	50 Straws	Landmark Breeding Services Bunbury WA		<a href="#">Click here for Breeding Details</a>	Mitch Braithwaite Primaries of WA, Mount Barker 0427 702 311 	IRONGATE WAGYU NOMBY ICHURYUNO C016 is suited to producing large frame replacement females. A trait leader in top 1% for 600 day & Mature cow weight, Top 5% for 200 and 400 day growth and carcass weight. This is the bull you want producing replacement females in your herd today to be later crossed with a high marbling sire. We have found his feeder progeny are fast growing and need to enter the feedlot at a higher induction weight (same age as cohort), as they still need normal time on feed to mature and build their frame. From this feeding you will see some high MS and 500KG+ carcass results. This EBV trait leader should be used within the Takeda Breeding Rotation as a Group C male mated to a Group B female. Freight and Insurance is at the purchasers cost and the delivery point is Landmark Bunbury WA. All Semen purchased must be paid for in full before delivery.
103	Irongate Nominees Kalgan, WA	Semen	50 Straws	Landmark Breeding Services Bunbury WA		<a href="#">Click here for Breeding Details</a>	Mitch Braithwaite Primaries of WA, Mount Barker 0427 702 311 	IRONGATE WAGYU NOMBY ICHURYUNO C016 is suited to producing large frame replacement females. 104	Irongate Nominees Kalgan, WA	Semen	50 Straws	Landmark Breeding Services Bunbury WA		<a href="#">Click here for Breeding Details</a>	Mitch Braithwaite Primaries of WA, Mount Barker 0427 702 311 	IRONGATE ITOSHIGENAMI H13 is a son of ITOSHIGENAMI B6 and from a dam that has produced some extraordinary carcass weights. We currently have some of his progeny in the feedlot with no processing and carcass results as yet. However if you are interested in a newer sire with extraordinary growth rates and a long body that may produce a decent marbling result then IRONGATE ITOSHIGENAMI H13 may be worth taking some interest in. We will keep you updated with our carcass performance results. Freight and Insurance is at the purchasers cost and the delivery point is Landmark Bunbury WA. All Semen purchased must be paid for in full before delivery.
