We have a selection of Amarula White Dorper Rams that are showing the characteristic Amarula White Dorper traits of very good forequarters & muscling with full shedding sleek coats.

In the opinion of Justin and Lorroi, the 4 first white dorper rams are stud rams. Lot 99 was selected as part of our National Sale team, but was lame.

The White Dorper rams have never been shorn. All rams except two have never had their hooves trimmed. The 2 have been noted in the catalogue.

What you see is what you get. Lot 101 is a magnificent Stud ram, but has had his feet trimmed a month ago.

As much information as we can has been provided. If you don't understand the Lambplan ASBVs, please ask.

Stud rams from this group have been sold at the National Sale.
