# Welcome

This is a truly exciting time to be a part of the Australian beef industry.

Prices for steers and heifers never seen before, with good rains in most areas and ideal growing conditions for cereal and fodder crops are providing good returns to cattle producers.

This buoyant market provides the ideal environment to ensure you gain maximum profitability for your beef cattle enterprise.

With export and domestic beef processors such as Teyes Brothers on the cusp of rewarding producers with value-based payment systems, buying the best genetics is even more crucial.

This means that traits that affect a processor's profitability are going to start to have an impact on the price that commercial producers can expect to achieve for their product.

Now is the time to act to ensure that commercial herds have the genetic characteristics to increase the value of the processor outcomes.

Over the last two years, almost 15,000 Te Mania Angus progeny have been recorded on Angus Breedplan. The analysis of this data fine tunes early genetic predictions of sires and improves the accuracy of all the sires within the breeding herd.

The collection and analysis of data is crucial to breeding bulls that will provide commercial producers with a premium for their product.

**Fertility, structure, growth and carcass quality are all key profit drivers which when measured, assessed and used as selection tools, have an enormous effect on the bottom line.**

The focus on testing and proving Te Mania Angus sires throughout Australian commercial herds, adds to the consistency in EBVs and the brand recognition throughout the wider industry.

It enables commercial producers to more accurately make trait selections to improve their herds and to meet the specifications of their markets, whether they be breeder markets, backgrounding or feeder markets.

Value based marketing will be driven by meat quality and yield. Meat quality is correlated very significantly with Marbling, which has high consideration in the value based system. The Intramuscular Fat (IMF%) EBV is an indication of Marbling.

Retail Beef Yield which gives the processor more product per kilogram of live weight, will also be a key driver in the value based system. This is understood and predicted in the RBY% EBV.

Using proven, Te Mania Angus genetics which have a focus on retail beef yield (RBY%) and marbling ensures that you, our clients, can profit from this industry-wide, value based system.

We are passionate about breeding quiet cattle with good temperament while meeting expectations for all the economic traits.

- **90% of the sale bulls are in the top 25% of the breed for the Heavy Grain \$Index.**
- **90% of the sale bulls are in the top 30% of the breed for marbling (IMF%)**
- **\$150 is the average Heavy Grain \$Index for the sale bulls (breed \$110)**
- **+3.0 is the average IMF% for the sale bulls (breed +1.6)**

Te Mania Angus is a family owned and run business which began over 87 years ago.

We pride ourselves on the partnerships that we have formed with our clients and we focus on assisting then to improve their profitability.

We look forward to seeing you on sale day and also remind you the Team Te Mania Online Commercial Female Sale, will be conducted live on Auctionsplus straight after the bull sale at 3 pm.

This year Team Te Mania members will be offering over 600+ quality commercial females.

The cows stay on the vendor's property but are available for viewing by appointment.

More information is available on the Te Mania Angus web site and the final catalogue will be on auctionsplus.com.au one week prior to the sale.

## HOW SALE DAY WORKS

All the sale bulls will be penned and available for viewing from 7.30 am on sale day.

The bulls will be sold by open-cry auction, with video footage displayed on large, closed-circuit screens inside the woolshed.

Buyers have the option of bidding from the woolshed, from the bullpens or through AuctionsPlus.

This system was introduced at the 2010 Autumn on property Bull Sale and has received positive feedback from both purchasers and their agents.

Join us for breakfast on sale morning from 7 am. Bacon and eggs will again be cooked by the Southern Cross Genetics crew for all to enjoy.

## PHYSICAL OWNERSHIP AND SEMEN INTERESTS

Aligned with our commitment to deliver the highest quality genetics to our clients, we need to protect our access to all genetics sold into the market place.

Te Mania Angus retains the right to collect semen from all bulls sold. This is strictly for Te Mania's own use, and/or for progeny testing within Team Te Mania commercial herds. If the right to collect semen is exercised, Te Mania Angus will consult with the new owner of the bull to arrange a convenient time for collection, with the cost of collection being paid for by Te Mania Angus.

In the case of syndication, which may be arranged at or after the sale, the joint owners of the bull must be nominated to Te Mania Angus within three months from the date of sale. Semen may only be used within the nominated owners' herds and may not be on-sold to outside parties.

If the bull is on-sold at a later date, these conditions carry forward.

Te Mania Angus retain no interest in the physical ownership nor the salvage value of the bull.

# SALE INFORMATION

## 169 BULLS SOUTHERN AUTUMN BULL SALE ON-PROPERTY MORTLAKE WEDNESDAY 1<sup>ST</sup> MARCH 12 NOON

### THE TE MANIA ANGUS GUARANTEE

Any Te Mania Angus bull that proves to be structurally unsound, infertile or incapable of service is guaranteed for up to three years from date of sale.

Under these circumstances Te Mania Angus will:

- 1) Replace the bull with a satisfactory substitute if available, or
- 2) Issue a refund equal to the value remaining \*see below, less the salvage value.

\*The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Te Mania, the value remaining is calculated on the basis that the guarantee is reduced by one third of the purchase price for each year of service from the sale date. A veterinary certificate must be supplied by the purchaser on request.

If any bull that is purchased does not possess a reasonable fertility, although not totally infertile, any dispute that may arise shall be settled by an arbitrator appointed by the auctioneers and must be lodged within 12 calendar months from date of sale.

We recommend that all purchasers discuss injury insurance of their bulls at the sale with Elders Ltd or their Agent. This guarantee is in addition to the normal terms and conditions governing auction sales.

### HEALTH TREATMENTS

All the sale bulls have been ear notched and screened for BVDV (also known as Pestivirus) and have been found to have a high immunity to BVDV and it is therefore not necessary to vaccinate. We recommend that you consult your vet regarding an ongoing BVDV programme for your herd. All the sale bulls are vaccinated for Vibriosis and given a booster. We recommend annual boosters are given to all bulls.

All of our bulls receive 7 in 1 vaccinations at three-months of age, six weeks later and a booster as a yearling. They are drenched at weaning and periodically according to worm counts.

All Te Mania Angus bulls are examined by a veterinarian prior to sale day which includes palpation of the sexual anatomy and the circumference of the testicles. The jaw is checked for correct bite.

The Te Mania Angus herd is Monitored Negative Two (MN2) Status for Johnes Disease. Certificate Number is VC100.

### GENETIC DISORDERS

ALL OUR SALE BULLS ARE TESTED FREE AND/OR PEDIGREE FREE OF:

Arthrogryposis Multiplex (AM), Neuropathic Hydrocephalus (NH) and Contractural Arachnodactyly (CA), formerly known as Fawn Calf Syndrome.

Some sale bulls carry the Developmental Duplications (DD) recessive gene, please refer to each lot for notification.

For more information on AM, NH, CA and DD visit our web site [www.temania.com.au](http://www.temania.com.au)

### FREIGHT ASSISTANCE

Conditions apply, see page 3 for details.

### CATERING

Breakfast, morning tea and lunch will be provided at the sale. Please join us after the bull sale for refreshments and the Team Te Mania online Auctionsplus female sale at 3 pm.

### PRE SALE INSPECTION

Bulls will be yarded by 7.30 am on the morning of the sale. Inspections are welcome any other time by arrangement.

### REBATES

All purchasers will be asked to nominate a settling agent and a 3% rebate will be paid to all settling agents who settle within 7 days of the invoice being received.

### GST

Bulls will be sold GST exclusive ie. If the bull is knocked down for \$4,000, you will be charged \$4,400.

### AUCTIONSPLUS

The sale is interfaced with AuctionsPlus, with live audio and will be conducted live on line in real time. For those not able to attend the sale, you must register within 24 hours prior to the sale in order to bid.

For further information contact:

Peter Rollason on 0419 600 323 or peter.rollason@elders.com.au

[www.auctionsplus.com.au](http://www.auctionsplus.com.au)

### SELLING AGENTS

Ross Milne: 0408 057 558  
Clarke Roycroft: 0409 677 281  
Elders Camperdown office: 03 5593 1822  
Auctioneer: Brian Leslie

[www.temania.com.au](http://www.temania.com.au)

### GETTING THERE

Te Mania Angus is 10 minutes from Mortlake in Western Victoria (see the map on the inside back page)

Mortlake is on the Hamilton Highway, between Geelong and Hamilton.

### Approximate travel times

From Melbourne	3 hours
From Geelong	2 hours
From Hamilton	1 hour
From Warrnambool	30 mins

Please note: sale day entrance from Reichmans Lane via rear entrance, please do not enter from Connewarren Lane

### Charter flights and transfers

Please contact Te Mania Angus to arrange a group booking, or transfers to Te Mania Angus.

Charter flights are available through Sharp Airlines or Ph 1300 55 66 94 to Warrnambool and Mortlake

### ACCOMMODATION

#### Mortlake

*The Stables Motel*, 128 Dunlop Street, Mortlake, Ph: 03 5599 2019

*Ronolea Gardens Bed & Breakfast*, 20 Hyland St, Mortlake, Ph: 0427 153 692

#### Camperdown

(Distance from Mortlake – 45 kms)

*The Camperdown Mill*, (4.5 star) 3 – 5 Curdie Street, Camperdown, Ph: 03 5593 2996

*Manifold Motor Inn*, 295 Manifold Street, Camperdown, Ph: 03 5593 2666

*Cascade Motel* (3.5 star), 311 Princes Highway, Camperdown, Ph: 03 5593 1144

*Timboon House & Stables B&B*, 320 Old Geelong Road, Camperdown, Ph: 03 5593 1003

#### Warrnambool

(Distance from Mortlake - 55kms)

*Mantra Deep Blue*, (4 star) 16 Pertobe Road, Warrnambool. Ph: 03 5559 2000

*Comfort Inn On Raglan*, (4 star), 349 Raglan Parade, Warrnambool, Ph: 03 5562 2755

*Olde Maritime Motor Inn*, (3.5 star), Cnr Banyan & Merri Street, Warrnambool, Ph: 03 5561 1415

*Colonial Village Motel*, 31 Mortlake Rd Hopkins Hwy Warrnambool, Ph: 03 5562 1455

*Hopkins House Motel*, Cnr Mortlake Rd & Whites Rd, Warrnambool, Ph: 03 5561 6630

*Hotel Warrnambool*, Cnr Koroit & Kepler Streets, Warrnambool, Ph 03 5562 2377

# FREIGHT ASSISTANCE

**Te Mania Angus will provide purchasers from:**

## **VICTORIA**

A freight free service direct to Sale and Mansfield, beyond these destinations will be the purchaser's responsibility.

## **SOUTH AUSTRALIA, WESTERN AUSTRALIA & NORTHERN TERRITORY**

A freight free service to Lucindale, South Australia, via major towns on a direct route. All onward freight arrangements for state and interstate destinations from those mentioned above will be the responsibility of the purchaser.

## **NEW SOUTH WALES & QUEENSLAND**

A freight free service between Mortlake, Victoria and Roma, Queensland and through Walgett, NSW, and en route via Dubbo. Onward freight arrangements from Dubbo or intermediate points will be the purchaser's responsibility.

## **TASMANIA, KING & FLINDERS ISLANDS**

Freight assistance of \$200 per bull purchased.

## **CONDITIONS**

To make use of this offer and service, it is essential purchasers notify Te Mania Angus if they wish to use this service before making any other freight arrangements.

This service cannot be made available to purchasers who have already contracted for freight before talking to Te Mania Angus. All other destinations are arranged at low cost to the purchaser.

## **CARRIERS**

Dick Smith Transport of Dubbo have been invited to attend the sale to coordinate the delivery of stock with the assistance of our Colac based carriers, Kent's Transport.

They can be contacted on:

Dick Smith Transport  
02 6882 2463 or 0428 636 236 or  
Kent's Transport  
03 5233 1306 or 0418 520 721

*\*Please note freight of any females purchased will be at the cost of the purchaser.*

# STRUCTURAL SCORES AND STRUCTURAL ESTIMATED BREEDING VALUES

**At Te Mania Angus, all cattle are individually assessed by Jim Green. This includes:**

- Assessment of all sale bulls
- Annual assessment of all stud females as 2 year-olds, 3 year-olds and 4 year-olds and all donor cows.
- All animals who do not meet the strict criteria at Te Mania Angus are culled from the stud herd.
- All raw structural scores are shown under the EBV's of each bull throughout the catalogue. Structural EBV's are no longer trial and have been adopted as an EBV within the full list tabled for each lot .

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognized that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability.

Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

The current trend for improving consistency and quality of product has shifted producers' focus, towards selecting seedstock on carcass and growth genetic traits (EBV's). Whilst, this selection

has been, and will continue to be pivotal in developing the Australian beef industry, we must not forget the fundamentals of livestock breeding.

The Beef Class Structural Assessment System was designed by the MLA, the BIA and several breed societies to address structural problems in the beef industry. Detailed analysis of three thousand animals in genetically linked herds indicated that structural characteristics such as leg and foot structure were moderately to highly heritable. BEEFXCEL now services many seedstock operations in their selection and grading of stock using the Beef Class Structural Assessment System.

Te Mania Angus is continually expanding their structural assessment program in order to optimise soundness and performance in their stock. The program involves an independent assessor from BEEFXCEL analysing the structural composition of the herd on an individual basis. The program used at Te Mania comprises of:

- An annual assessment of all sale bulls;
- An annual assessment of all breeding females and donor cows
- All animals deemed inadequate are culled.

**For more information please contact:  
Jim Green 0402 003 137 or  
Liam Cardile 0409 572 570**

## THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The Beef Class Structural Assessment System uses a 1-9 scoring system for feet and leg structure;

- A score of 5 is ideal;
- A score of 4 or 6 shows slight variation from ideal, but this includes most sound animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of 3 or 7 shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of 2 or 8 are low scoring animals and should be looked at cautiously and inspected very closely before purchasing;
- A score of 1 or 9 should not be catalogued and are considered immediate culls.

Jim Green

Liam Cardile

# YOUR NEW BULL, HIS PAST & FUTURE

The calves are weaned at four months of age. Early weaning was introduced a number of years ago to enhance rumen function and to allow the females a better run through the Autumn and winter.

At Te Mania Angus all calves are weighed and tagged with an NLIS tag and stud tag on the day they are born. They are weighed again at weaning and at 400 days, when they are ultrasound scanned for marbling, fat cover and eye muscle area. Testicle measurements are taken on the bull calves. Heifers are weighed again at 600 days and all this data is submitted to Breedplan.

Cows are weighed at weaning to contribute to the Mature Cow Weight EBV.

All the cowherd mating details are recorded with Group Breedplan, which calculates a gestation length EBV. Short gestation length is a crucial EBV to use along with Birth Weight when selecting young bulls to use over heifers.

All the bulls receive 7 in 1 vaccinations at three-months of age, six weeks later and a booster as a yearling. They are drenched at weaning and periodically according to worm counts. They will also receive a drench before leaving the property. All Te Mania Angus bulls are examined by a veterinarian immediately prior to sale day. This examination includes palpation of the sexual anatomy and measurements of the circumference of the testicles.

All the sale bulls have been ear notched and screened for BVDV (also known as Pestivirus) and have been found to have a high immunity to BVDV and it is therefore not necessary to vaccinate. We recommend that you consult your vet regarding an ongoing BVDV programme for your herd. All the sale bulls are vaccinated for Vibriosis and given a booster. We recommend annual boosters are given to all bulls.

**For information on BVDV go to [www.temania.com.au](http://www.temania.com.au)**

This is in line with world's best practice, and provides the highest level of protection possible against the terrible losses that Pestivirus can sometimes cause.

Structural assessments are carried out by Jim Green and are provided for each bull throughout the catalogue. This ensures that any bulls not meeting our uncompromising standards for structure are culled by an independent assessor.

When a bull leaves Te Mania Angus, he is leaving the security of a large mob and will arrive at unfamiliar territory at your property. If you can't put him into the bull mob straight away, unload him and make sure he has a steer or cow as a companion.

A young bull can move in with older bulls and settle in well, but remember, being the youngest he will get the last of the feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed.

Young bulls are still growing fast and need enough feed to maintain their growth pattern and to be able to settle the cows quickly and efficiently.

Te Mania Angus bulls are accustomed to being handled by stockmen on motorbikes and with dogs. Most of the fences are electrified and the bulls treat them with respect. Always be considerate to your bull and handle him with respect and kindness. You will find you will receive these acts of respect back from him.

## 7 IN 1 VACCINATION

We recommend bulls be given a 7 in 1 vaccination annually, 2 to 4 weeks prior to joining.

## VIBRIOSIS VACCINATION

Vibriosis is a common cause of infertility and is transmitted by bulls from one female to another. It is easily prevented by vaccination. Te Mania sale bulls have been given their primer and booster shots. For future years we recommend your bull be given an annual booster 4 to 6 weeks prior to joining.

## BULL :COW RATIO

Under reasonable paddock conditions, a rising 2 year old bull should handle 40 empty cows on his own. An older bull can probably handle slightly more.

A synchronized AI program can decrease the number of bulls needed, because cows become pregnant to AI, but be aware that if the returns are returning over one week rather than three, then this will increase your bull requirement. Please contact Te Mania Angus for further clarification if required.

## BEFORE PUTTING THE BULL OUT

Before mating, cows should be seen cycling in groups with male calves also hanging around. The cows must be on a rising plane of nutrition, before you put the bull out, this ensures they have the optimum chance of cycling.

## OBSERVING THE BULL

A bull is most likely to develop a condition or injury that causes infertility AFTER THE JOINING PERIOD HAS STARTED. It is vital that you monitor your bull at least twice weekly to ensure that he is able to mount cows and that he looks physically normal and is not lame.

Towards the end of the mating period, you should spend some time watching the cows to make sure that large numbers of cows are not cycling. Set aside half an hour one afternoon when the cows are at rest to make sure that most of the cycling activity has stopped, and give yourself some peace of mind! Writing down the cows number at service and observing them 21 days later is the most thorough infertility check.

## AFTER MATING SEASON

When the season is finished, the bull should be drenched and put away on good feed. Adequate feed will help stop fighting and help the bulls settle into their groups.

# UNDERSTANDING ANGUS BREEDPLAN EBVS

## WHAT IS ANGUS BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England.

Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- the breed average EBV
- the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

## CONSIDERING ACCURACY

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF ANGUS BREEDPLAN EBVS

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

## ANGUS BREEDPLAN EBVS 2017

BIRTH			
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth
GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age. Higher EBVs indicate heavier live weight.	Lower EBVs indicate shorter gestation length.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

## ANGUS BREEDPLAN EBVS 2017

FERTILITY			
Days to Calving	kg	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASE			
Carcase Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.
FEED EFFICIENCY			
Net Feed Intake (Post Weaning)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
Docity	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
SELECTION INDEXES			
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

## TEAM TE MANIA ONLINE ONLY COMMERCIAL FEMALE SALE

# 600+ ANGUS FEMALES

Live online on Auctionsplus at 3 pm straight after the bull sale on March 1st

Te Mania Angus bloodlines and/or PTIC to Te Mania Angus bulls from Team Te Mania herds across NSW, Vic and SA.

This is an outstanding opportunity to access some of the leading commercial females in the breed.

All cattle are independently assessed by AuctionsPlus and are held on vendor properties until sold. Interested purchasers are welcome to contact the vendors directly to arrange pre-sale inspections or further details.

### FREIGHT ASSISTANCE FOR TEAM TE MANIA FEMALE SALE

#### Terms and Conditions

A freight subsidy of \$15/head will be paid by Team Te Mania direct to successful purchasers. It will be paid for females purchased during the Team Te Mania Online Female Sale, or within 24 hours of the completion of the sale (by 5pm Wednesday March 2nd). The purchaser should claim the subsidy direct from Team Te Mania, from [hamish@temania.com.au](mailto:hamish@temania.com.au).

### AUCTIONSPLUS SIMULTANEOUS AUCTION

Online bidding is available only to registered users. You will need to register with AuctionsPlus, at least 48 hours prior to the sale in order to bid. For further information, please contact AuctionsPlus on 02 9262 4222.

A strong and stylish bull with good natural thickness. The past four generations on both sides of this bulls pedigree have been by artificial conception with this bull being the first of eleven sons of Jerome being offered. He has a small amount of white in his groin. First calf out of a two year old heifer.

Regent and Berkley have combined well in this grandson. These Gaskin sons are impressive with presence, frame and body length. Well suited for use over heifers. L169 is the first calf out of a two year old heifer. The dam of this bull is currently in our donor mob. Note the IMF at 4.9% is in the top 1% of the breed.

A Garth son with great presence and style. The dam of this bull ran through our donor program in 2011 and she remains active within the stud herd as a rising 10 year cow and has contributed 23 progeny to our herd. The Barunah cow family line is our second most prominent with 780 direct and active descendants currently in our herd.

“We use Te Mania genetics because they are the most progressive performance based Angus stud in Australia. There are no ‘smoke and mirrors’. Performance is backed by hard data, collected via Team Te Mania herds and feedlot feedback. This gives producers confidence when selecting Te Mania sires to use in their herds. I’ve invested a lot of money in Te Mania genetics during the last seven years and have been more than happy with the results”.

Duncan Clowes, Valdemar NSW

Balanced with good body length on display. The past three generations on the dams side of this bull are ET and have all run through our donor program. Combined they have contributed 113 progeny to our herd. There is a small amount of white in the groin area.

Exceptional cow lines are the foundation of genetic improvement.

At Te Mania Angus the Lowan cow line has 935 direct descendants currently active in the Te Mania Angus herd. There are 787 Barunah descendants and 456 Mittagong descendants.

Every cow at Te Mania Angus must pass an independent structural assessment as a 2yo, 3yo and 4yo to remain in the breeding herd.

Te Mania Garth VTMG67 is a versatile, multi-purpose sire with exceptional EBVs. He is a moderate to large framed son of Te Mania Africa, with the same outstanding temperament. He has good body length, is free moving with slick skin and fine hair, tight sheath and outstanding structure. Garth is ideal for heifer joinings with high accuracy, low birth weight and short gestation length EBVs. He has exceptional fertility and marbling. As a sign of his versatility he is in top 1% of the breed for the AB, Domestic and Heavy Grass \$Index and the top 5% for the Heavy Grain \$Index. He is a trait leader for calving ease (dtrs), gestation length, milk, scrotal size, days to calving and IMF%. Garth bends the growth curve with moderate birth weight to high 600-day growth. Te Mania Garth's maternal grand-sire is Te Mania Yorkshire VTMY437, sire of Te Mania Berkley VTMB1. His pedigree includes longevity and some of the great female lines of the Te Mania Angus herd, including Te Mania Beac W112 and Te Mania Jedda Y32, who bred in the stud herd to 10 years of age.

Te Mania Berkley B1 has magnificent phenotype which breeds through into his progeny. He is very balanced with natural thickness and good length of body. He combines high growth and carcase weight with good calving ease. Berkley is the 2nd highest ranking sire on Australian Breedplan for the Heavy Grain Index, and the 2nd highest for the Angus Breeding Index. Te Mania Berkley has progeny throughout 160+ herds, and they stand out for muscle pattern and capacity, blending calving ease with high growth and carcase weight. He is the sire of Te Mania Emperor E343 who sold at auction in 2011 for \$91,000. In November 2010, possession and 50% of semen marketing rights were purchased by Hazeldean Angus for \$65,000. Semen has been sold to Europe, the UK and Ireland and extending his global influence, he is now registered with the American Angus Association.

A moderately framed son of Regent. We now have 485 progeny within the Te Mania Angus herd by Regent. G429 displays good balance and body length. He has been further progeny tested through Team Te Mania. His dam VTMZ811 at rising twelve years of age remains active within the stud herd from the Dandloo cow family line. General is a trait leader for 200 and 600 day growth, scrotal size and IMF%.

In our March 2015 bull sale, our first offering of GAR Twinhearts 8418 sons sold to \$21,000. This very exciting, handsome outcross sire was bred by Gardiners Angus Ranch, Kansas. He has \$Index values topping Australian Group Breedplan, with a good combination of calving ease, high growth, fertility and carcase qualities. We are one of the only herds in Australia where you can purchase one of his sons.

Vermont Drambuie D57 was introduced to the program as a total outcross sire. His sons are easy doing and have good eye appeal. His EBVs indicate great growth, with slightly more moderate maturity pattern than some of the high growth outcross sires we have used. We have sold sons to a high of \$17,000. He is trait leader for scrotal size and EMA.
