Welcome to Wattletop Angus' 26th Annual Bull Sale

It is my pleasure to invite you to our 26th Annual Bull Sale. These are exciting times to be in the cattle/beef industry. We have gone through so many severe droughts in the past 6 years that our cattle numbers are now at an extremely low level resulting in reduced supply of cattle to all markets ranging from store re-stocker / backgrounders, feeders, replacement breeders, slaughter cattle and live export cattle. As a result cattle prices have reached unprecedented levels over the last nine months with the EYCI breaking the 600c/kg barrier in February this year.

As a result of this shortage, re-stockers in particular have sold at all time record levels with weaners reaching over \$1300/hd in some weaner sales. Currently there is very high demand for quality genetics to rebuild Australian cow herds. Wattletop strives to provide the sort of genetics to suit today's modern markets. That is genetics that provide sound, efficient, functional, fertile females that stay in the herd. These same genetics need to breed steers that are easily born, grow fast, be feed efficient, and be able to finish on grass as well as feedlots while meeting market specifications for meat quality.

In a recent consignment from Ranger's Valley, Paraway's Burindi Station, managed by Richard Puddicombe, had six steers that graded marble score 8. Burindi also sent steers to Killara feedlot for The Wormold family's 150 day grain fed angus program Jack's Creek, that had the highest daily gain and highest grading at slaughter from Killara. These steers were by Wattletop bulls from mainly Wattletop blood cows.

At the 2014 Merriwa Prime Cattle Show, Throwley Station, owned by Peter Nichols and managed by Graeme Grady had a great result being awarded most successful exhibitor and the highest point score on the hook. They placed 2nd on the hoof in class 1 which they won on hook and placed 2nd on the hook in class 2 winning Champion Pen on the Hook and Highest Point Score on the Hook. Throwley Station has used Wattletop bulls for a number of years.

Wattletop is a great supporter of the Angus Benchmarking Programme which we believe is an excellent way of sorting the wheat from the chaff. Sometimes the results may be painful while at other times gratifying. In the 2nd cohort of 47 sires, Wattletop E111, owned by Knowla Angus and Booragul Angus was around top 30-40% in most traits but ended up #2 bull for carcass marbling and MSA Index and #4 for feed efficiency. In the 4th cohort, Wattletop G188 ranked 6th for low birth weight, 3rd for 200 day growth, 1st for 400, 600 day growth and EMA and feed efficiency (ebvs top 1% of breed).

A highlight of this year's sale are the 32 yearling bulls catalogued by new sires to the wattletop programme such as Sydgen Black Pearl, Werner Westwood, together with Silviera's Conversion, Rennylea Edmund as well as several home bred Wattletop sires.

I would like to make a special thank you to our new team at Wattletop. Mitch Bennet has been with us since July last year with his partner Bec. Mitch is a very good operator with an outstanding skill set. He has taken an instant liking and appreciation of the Wattletop Stud. He is an outstanding cattleman with terrific dogs plus he is the only mechanic that we have ever had at Wattletop!!!

Jack O'Neil-Shaw and his partner Cecilie Terkelson are managing Stratton and doing a superb job looking after sale bulls, weaner bulls with some cows and trade lambs. I gave Cecilie a dog called Cooper and after half an hour Cooper was hers and wouldn't follow me.

It is really gratifying to be working with such a young and enthusiastic team.

We look forward to seeing you at our Open Day on Wednesday 27th July and Sale Day Wednesday 3rd August.

Regards,
Lock Rogers

Sale Information

Sale Location

Stratton is located 21kms west of Guyra on the Inverell Rd., turn left onto Stratton Rd.

Refreshments

Complimentary morning tea, lunch and refreshments available at Stratton by Bald Blair School.

This year we are celebrating our 25th Annual Bull Sale and we would like to invite everyone to stay afterwards for a cooking demonstration and dinner catered for by Peter and Narelle Malcolm from Rafters Restaurant.

Health

All bulls catalogued are free of the genetic conditions of AM, NH & CA

The bulls have had the following treatments this year:

- K Bulls – Eclipse, 7-1, Vibrio (22/03/16)
- K Bulls – 7-1, Vibrio (26/04/16)
- L Bulls – 7-1, Vibrio, Vit B1, Nitromec (6/07/2016)
- L Bulls – Vibrio, Pestiguard 7/07/2016

All bulls have been tested negative for Pestivirus. In areas where 3 day sickness and red water disease may be a problem, we recommend bulls be treated accordingly before they enter these areas.

Inspection

We are holding an open day on Wednesday the 27th of July but private inspections are welcome any time by appointment. Bulls will be available for inspection on Tuesday afternoon before the sale and from 8am on the morning of the sale.

Johne's Disease

Wattletop is an MN2 Herd.

Insurance

A representative from Wesfarmers Insurance will be in attendance at the sale to assist with all enquiries. We recommend that purchasers insure their bulls.

Stud Transfers

All sale lots will be transferred to new owners within 60 days of the sale.

Delivery

Local and interstate carriers will be in attendance at the sale.

Air Travel

Qantas Airlines (phone 13 13 13) fly to Armidale. Please contact the selling agents for pick up arrangements.

Angus Society Registration codes

- Herd Book Registered (HBR)
- Angus Performance Registered (APR)

Angus Quality Assurance Catalogue

Cattle producers using Angus bulls are making more money than those who don't. But that doesn't apply to just any Angus bull.

Don't be caught out with unregistered bulls with unknown backgrounds and without Angus Group Breedplan figures. Progeny on unregistered bulls are INELIGIBLE FOR CAAB™ and ASSURED ANGUS™ tags.

As a service to bulls buyers, the Angus Society has introduced a Quality Assured catalogue giving buyers confidence that bulls are registered and the catalogue truly reflects official data.

For more information contact the Angus Society or visit the website www.angusaustralia.com.au

Auctions Plus

This sale is to be interfaced with AuctionsPlus

This sale is live on line in real-time, but will be interfaced with a physical auction that is being controlled by an auctioneer. A hand-held wireless connected computer is used to bring the on site prices to the internet screen for the remotely connected bidders to observe.

These bidders can place a bid on their computer and the result is immediately transferred to the person on site who the wireless device with will raise that bid with the auctioneer.

Important Information:

- Bidding is only available to registered AuctionsPlus users
- You must register at least 24 hrs prior to the sale with AuctionsPlus Sydney on their website: www.auctionsplus.com.au

For further information about AuctionsPlus please contact

Andrew Starr on 0428 792 466 or email by andrew.starr@raywhite.com www.auctionsplus.com.au

PERFORMANCE WHERE IT COUNTS!

Producing Medal Winners in the Angus Sire
Benchmarking Program

Bull Breeding Soundness & Structure Exam

Peter Brown from Bovine Breeders, has given all sale bulls a thorough physical examination, including an inspection of all external reproductive organs, passed a semen quality assessment and cleared bulls of any abnormalities.

Once the sale group of bulls have been identified, Dick Whale of Independent Breeding and Marketing Services (IBMS) independently assesses all bulls using the Genetic Type Summery (GTS) structural assessment system to score every phenotype trait.

All bulls catalogued have passed this tough and strict assessment by Dick Whale. Wattletop places a very high degree of importance on structural soundness. We call this assessment the Dick Tick.

We at Wattletop Angus put great emphasis on docility and address this trait by both genetic selection and our attention to animal handling.

Managing your purchase

To ensure a long and effective working life of your new bull/s, vaccinate annually with 7 in 1, Pestiguard and Vibrio vaccine.

Monitor and maintain the body condition of your bull/s - especially yearlings which require good nutrition to reach their full potential.

It is also important to monitor your new bull/s throughout joining especially in the first 3 weeks. Watch for any signs of injury, infection (any high temperature can compromise bull semen quality) or possible serving dysfunction.

Early detection of any problems during this period can minimise the impact of the quality of service your bull provides.

Guarantee

In the unlikely event of infertility, provided it is not caused by injury, stress or disease contracted after our sale, we will endeavor to supply a satisfactory replacement if available or issue with a credit to equal to the

purchase price minus the salvage value which may be used to purchase at future Wattletop sales.

A veterinarian's certificate will be produced by the purchaser within 12 months of the purchase date.

"Campton"

AQIS Accreditation: ABC-015-NSW

4/7/16

To Whom It May Concern:

This is to certify that on the 30th June the 2016 Wattletop Sale Bulls were subjected to a crushside semen assessment and were examined for reproductive and structural soundness with satisfactory results relative to age.

Peter Brown
PRINCIPLE

"Service backed by experience"

Let IBMS tick all boxes for you

REVIEW AND DESIGN BREEDING PROGRAMS

- Breeding goals and markets targeted
- Breedplan and EBV's explained and tailored to your breeding aims
- Genetic defects (AM, NH, and others) explained in relation to the potential impact they may have on your herd
- Gene markers and molecular science understood.
Taking your cattle breeding enterprise into the future

ASSISTING BULL SELECTION AND PURCHASES

- Selecting herd sires at a seedstock sales.
- Selecting the bulls best suited to your breeding program
- Do you know how much you should be paying for these bulls

ANNUAL HERD AND BULL ASSESSMENT

- Your breeders and herd sires accurately assessed for structural soundness.
- Non performing cows in your herd identified

ADD VALUE TO YOUR BREEDING HERD

- Similar prices achieved for your surplus to requirement females as your feedlot or grass finished steers.
- A beef herd with optimum returns and minimal input costs

A brief description of EBV's and \$Index Values

UNDERSTANDING ANGUS BREEDPLAN EBVs

What is Angus BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- ◆ the breed average EBV
- ◆ the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

Considering Accuracy

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50- 74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of Angus BREEDPLAN EBVs

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

PERFORMANCE WHERE IT COUNTS!

Producing Medal Winners in the Angus Sire
Benchmarking Program

BIRTH			
Calving Ease Direct	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Calving Ease Daughters	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
Gestation Length	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
Birth Weight	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
200 Day Growth	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day Weight	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day Weight	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
Mature Cow Weight	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
Days to Calving	kg	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
Scrotal Size	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASS			
Carcass Weight	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
Eye Muscle Area	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
Rump Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
Retail Beef Yield	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
Intramuscular Fat	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

A brief description of EBV's and \$Index Values

FEED EFFICIENCY			
Net Feed Intake (Post Weaning)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
Net Feed Intake (Feedlot)	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
Docility	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
Front Feet Angle	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Front Feet Claw Set	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
Rear Feet Angle	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
Rear Leg Hind View	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
Rear Leg Side View	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
SELECTION INDEXES			
Angus Breeding Index	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
Domestic Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
Heavy Grain Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
Heavy Grass Index	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

PERFORMANCE WHERE IT COUNTS!

Producing Medal Winners in the Angus Sire Benchmarking Program

Angus Group Breedplan EBV Percentile bands for animals born in 2014*

Use this table as a guide to compare individual animals with the current genetic level of the Angus breed * based on EBVs from the June 2016 Angus BREEDPLAN analysis.

NB. The composition of any selection index and actual \$ Index Value differences between animals is sensitive to the assumptions used in the BREEDOBJECT analysis.

Angus GROUP BREEDPLAN EBV percentile bands for animals born in 2014*

Lot 82 K91 – Wattletop sale for Kath Brazier and family

The proceeds of this lot will go to Katherine Brazier and her four sons Harrison, Angus, Hugo and Thomas.

Earlier this year Katherine lost her husband Mark to Melanoma. Mark was a loving and dedicated father to these four beautiful boys all under the age of 11.

Mark was a well know identity in the Guyra community and a good friend of the Rogers family.

Katherine is also a Guyra girl and her family the Woods of "Calga", Guyra have been close friends of the Rogers for many years. The children of both families span some 23 years, but at various times they have gone to school together, played local sport together, partied together and even lived together.

Special mention however must be made to acknowledge the relationship that we have with Katherine's two eldest brothers Robert and Mitchell who have been coming to help us here on the Wattletop sale day for as long as we can remember.

We know it will be a long, tough road ahead for Katherine and hope that the sale proceeds from this bull will go some way to helping her on this journey.

We appreciate your support!

Lot 82a – Betts Rogers Transport

Cattle Transport to the value of \$2,000

As with the earlier Wattletop bull, the proceeds of this auction lot will go to Katherine Brazier and her four boys after the loss of Mark to Melanoma.

Liz Betts married Lock Rogers jnr and Liz's family from Walcha do the majority of our cattle carting and would like to help support Mark's family.

If you are the purchaser of this lot your cattle will be assured to riding in the best crates on the road, hauled by the smartest trucks on the road and with good courteous drivers who will handle your stock as if they were their own.

Betts Rogers Transport would like to thank Wattletop Angus for allowing them to use the Annual on Property Bull Sale to help raise funds for such a worthy cause.

Thankyou for your support!

BETTS
Rogers Transport

Versatility in motion

BETTS
Rogers Transport

Experience Safety Reliability

Experience

You have often spent years breeding them, so we understand the importance of handling your livestock with the greatest of care, minimum stress in the most time effective manner.

Our trucks, crates and drivers all come with the highest levels of expertise ensuring that your stock are delivered to your destination safely and humanely.

Our bulk tippers can do the hard work and load carrying they are designed to do, with ease and reliability.

Safety & Reliability

Betts Transport is accredited nationally in the National Heavy Vehicle Regulator (NHVR) for mass, maintenance and fatigue.

We have a current, mechanically reliable fleet. Regular maintenance ensures that our trucks run efficiently and on time, covering all eastern states, as well as South Australia.

Give us a call today, we would love to work with you.

PERFORMANCE WHERE IT COUNTS!

Producing Medal Winners in the Angus Sire
Benchmarking Program

The Legendary G188

'Crap' photo by Lock Rogers

From Angus Australia

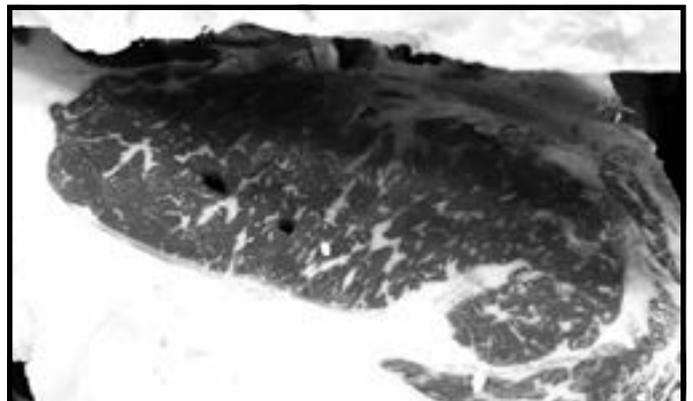

ASBP – Processing of Cohort 4 Steers Commences

The first mob of steers from Cohort 4 of the Angus Sire Benchmarking Program (ASBP) were processed and graded across the 30th and 31st June 2016.

This mob included 103 steers which were bred at "Burindi", Barraba, NSW which is a Paraway Pastoral property, managed by Richard and Ruth Puddicombe.

The steers, which were purchased by Rangers Valley as feeders, underwent a 270 feeding program including 100+ days in Tullimba research feedlot and the balance in Rangers Valley feedlot.

Out of the 103 carcasses, 94 (or 91%) graded marbling score 3 or greater while 8 bodies graded marbling score 5 or greater.

The eye muscle from ASBP steer PBHK182 from sire Wattletop Franklin G188. This steer had a carcass weight of 494 kg, dressing % of 60.5%, rib fat of 19 mm, 100 cm² EMA and Ausmeat marbling score of 5.

Semen available, call Lock on 0427 792 007

Vendor Declaration

NATIONAL VENDOR DECLARATION (CATTLE) AND WAYBILL - eDEC

Purchaser (Receiver) Original CD413 **32729939**

This form cannot be used where eligibility for the EU market is required.

Part A - To be completed by the owner or person who is responsible for the husbandry of the cattle.

Owner of cattle: Wattlelop Partnership

Property/place where the journey commenced: Stratton, 277 Stratton Rd

GUYRA NSW 2365

Property Identification Code (PIC) of this property: **NE250949**

Number	Description	Breeds or Marks
118	Angus Bulls	G-LAZY F
118	Total	

Consigned to: _____

Destination (if different) of cattle: _____

NLS devices used on these cattle: Number of ear tags: 118 Number of other devices: _____

Details of other statutory documents relating to this movement e.g. health statement

1. Have any of the cattle in this consignment ever in their lives been treated with a hormonal growth promoter (HGP)? (Use a second document for mixed consignments.)
 Yes No +

2. Have the cattle in this consignment ever in their lives been fed feed containing animal fats?
 Yes No (See Explanatory Notes)

3. Has the owner stated above owned these cattle since their birth?
 Yes No If No, how long ago were the cattle obtained or purchased?
 (If purchased at different times, list the lots corresponding to the line of the most recent purchase)
 A. Less than 2 months B. 2-4 months C. 5-12 months D. more than 12 months

4. In the past 60 days, have any of these cattle been fed by-product stockfeeds?
 Yes No If Yes, attach a list of the by-product stockfeeds, date when last fed and a copy of an analysis report if available.

5. In the past 6 months have any of these animals been on a property listed on the ERP database or placed under any restrictions because of chemical residues?
 Yes No If Yes, give details: _____

Valid till: **23/07/2016** Printed at: Wattlelop Partnership Print date/time: 23/06/2016 09:32

UPN Number: 42738 Phone: 0267791627 eFORM ID: 10012

2. Are any of the cattle in this consignment still within a Withholding Period (WHP) or Export Slaughter Interval (ESI) as set by APVMA or SAPEMSAT, following treatment with any veterinary drug or chemical?
 Yes No If Yes, give details: (Repeat additional details in question 6)
 Nitroscan 026772916 56 128

3. In the past 60 days, have any of the cattle in this consignment consumed any material that was still within a withholding period when harvested, collected or first grazed?
 Yes No If Yes, give details: _____

4. In the past 42 days, were any of these cattle:
 a) grazed in a spray risk area, or
 b) fed fodder out from a spray risk area? (See Explanatory Note for definition of spray risk area.)
 Yes No If Yes Date sprayed: _____

5. Additional information: see requirements in Explanatory Notes for completing this document.

Declaration

I, Lockyer Rogers Wattlelop 3814 Ebor Road
