

**17th Red Angus
National Sale Catalogue**

Red Angus
National Show & Sale
21st & 22nd
June 2016

Dubbo Showground, NSW

Crossbreeding in cattle has been well documented and proven to be advantageous in commercial operations. Cross breeding takes advantage of Heterosis or Hybrid Vigour. Heterosis or hybrid vigour refers to the superiority in performance of the crossbred animal compared to the average of the purebred parents. Crossbreeding allows a producer to improve their cattle by complementing their herd with a breed that offers traits required to improve productivity, such as milking ability or maturity pattern. The strong traits of one breed compensate for the weak traits of the other. This is referred to as breed complementarity.

Producers when considering crossbreeding should evaluate their production systems carefully and select breeds that suit their property capability, market specifications and also access to the purebred seed stock required for the program. As an example British breeds such as Red Angus generally excel in carcass attributes and early maturity. Bos indicus breeds such as Brahman excel in the northern environment of Australia. Combining the two breed types results in offspring that have desirable levels of growth, carcass quality and environment adaptability.

Breeds chosen should produce calves that are appropriate for their end use and optimise producer profitability. Breeders retaining replacement heifers may emphasise maternal traits such as milk production, calving ease and moderate mature cow weight. Vealer producers may require breeds that increase early growth rates and finishing ability. The good news is that heterosis is free and when you incorporate Red Angus into your cross breeding program you receive the Red Angus REAL ADVANTAGES.

Calving Ease

Naturally Poll

Solid pigmented Red Coat colour

Moderate maturity

Docile Temperament

High Fertility

Excellent Carcase Attributes

Sale Information

> Monday 20th June 2016

Prior to 12pm - Arrival of all lots

1pm - Breed Inspection & Scanning

> Tuesday, 21st June 2016

10am - Judging begins

2.30pm - AGM

> Wednesday, 22nd June 2016

10am - Parade of sale cattle

11am - Sale

BIDDING: A buying number system will be used on sale day. Prospective purchasers must register their name and address and obtain their individual buying number before commencement of sale. This will be done at the agent's office.

REGISTRATION: All cattle are sold as herd book registered and are eligible for transfer at vendor's expense. Please advise transfer details on your registration of buyer's number.

BUYING ORDERS & PHONE LINKUP:

A person nominated by you to act on your behalf will diligently execute buying orders. Bidding by mobile phone will be available.

Contact John Settree 0408 297 368

INSURANCE: Insurance is recommended and will be available on sale day through attending representatives.

REBATE: A 1% rebate is to be paid to outside registered agents attending with and settling on behalf of their clients within 7 days of receipt of invoice.

REFRESHMENTS: Breakfast available from 7am onwards. Lunch and refreshments will be available.

GST: All bids are made on the understanding they are exclusive of GST, that is GST is to be added to all prices gained on the day.

HEALTH STATUS: JDMAP status is shown for every lot indicating the Bovine Johnes status of sale animals.

At all times intending purchasers should consult with their local RLPB District Veterinarian for health conditions applying for importing livestock into their district and crossing state borders.

EMBRYO LOTS: All Embryos collected before sale date. Vendor to guarantee 1 pregnancy per lot if done by mutually agreed technician between vendor and purchaser. Lots are to be offered on a per embryo basis. Claims on Embryos are to be submitted to the vendor with 18 months of the sale. Organising freight of embryo packages is the purchaser's responsibility. Please contact the vendor directly to authorise release of embryos from the nominated AB centre.

WARRANTIES:

1. Females catalogued as unjoined are

warranted fertile to natural service within 12 months of date of sale. The purchaser is to have the right to a full refund of the purchase price of the female (excluding any costs and expenses of the purchaser) on submitting a veterinary report after the expiration of 12 months to the effect that the purchaser has been unable to get the female in calf to natural service. The veterinarian must state that in his/her opinion there is no evidence that the female suffered any injury or illness since being sold to the purchaser, which could have affected her breeding ability. The veterinarian must also state that in his/her opinion there is no evidence that the female has been subjected to embryo transfer procedures. The veterinary report (together with a Statutory Declaration by the purchaser to the effect that the substance of the report is true and correct) must be forwarded to the vendor within 14 days of the first anniversary of the sale date.

2. Bulls under 14 months must be sold as being able to serve and settle after reaching 14 months of age. The buyer is expected to provide reasonable care and feeding. Should the bull prove to be a non-breeder, the buyer shall notify the seller within four months after the bull reaches 14 months of age. The seller shall then have six months to prove the bull to be a breeder. In no case shall the buyer be

responsible for more than the selling price. Any issues arising from the sale of these younger cattle will not be the responsibility of the sale committee or the Red Angus Society. Bulls over 14 months in the National Sale are to be sold as fertile and capable of natural service. The purchaser is to have the right to a full refund of the purchase price of the bull (excluding any costs and expenses of the purchase) within 3 months of the date of the sale subject to submitting a veterinarian's report stating that the bull is infertile or incapable of natural service. The veterinarian must also state that in his/her opinion the bull has not suffered any injury or illness since being sold to the purchaser, which could have affected his breeding ability. The veterinary report (together with the Statutory Declaration by the purchaser to the effect that the substance of the report is believed by the purchaser to be true and correct) must be forwarded to the vendor within 14 days of the date being three months after the sale date. All bulls have passed a semen test and passed a Veterinary Inspection within four weeks of the sale.

REFUND RESPONSIBILITY: The responsibility to refunds based on conditions warranties lies with the particular vendor(s) of the lot(s). While the agents will assist in facilitating a refund if all conditions are met, the agents are not responsible for providing the refund regardless of the vendor's situation.

Breedplan Explanatory Notes

Red Angus GROUP BREEDPLAN EBVs cannot be validly compared to the GROUP BREEDPLAN EBVs for other breeds (including Angus).

Estimated Breeding Values (EBVs): An Estimated Breeding Value EBV is an estimate of the genetic value of that particular animal for each trait measured.

Accuracy: Accuracy is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered low.

Birth: BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

Fertility: SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate larger scrotal size. SS is also positively associated with female fertility.

Growth: Milk: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 and 400 day weight of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500

days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight. 00-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate EBVs are generally more favourable.

Carcase: CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th-rib site of a 300kg-dressed carcase. More positive EBVs indicate larger eye muscle area and therefore higher retail beef yields.

RIB: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP: Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase weight.

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th-rib site in a 300kg carcase. For some markets, larger more positive values are more favorable.

Selecting Animals Using Selection Indexes

The Selection Index value for an animal is effectively an EBV of the animal's profitability in a defined commercial production system and market. Ranking seedstock animals on their Selection Index value sorts them based on their progeny's expected profitability for the targeted production system.

Red Angus Selection Index Descriptions

Supermarket (SUP) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting the domestic supermarket trade. Steers are either finished on grass or grain (e.g. 70 days). Steers are marketed at 450 kg live weight (250 kg HSCW and 12 mm P8 fat depth) at 15 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

Vealer (VLR) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting vealer production. Vealers are finished on grass and are marketed at 320 kg live weight (180 kg HSCW and 4 mm P8 fat depth) at 9 months of age. Daughters are retained for breeding. No marbling is required

Northern Steer (NTH) - Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Northern Australia with Bos indicus cows targeting grass finished steers for export. Steers are marketed at 600 kg live weight (330 kg HSCW and 10 mm P8 fat depth) at 27 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

2016 Judge & Associate Judge

Mr Tim Lord

Harry Turnham

Mr Tim Lord is the Judge for the 2016 National Show and Sale. Tim is the manager of KO Angus stud, based in Bowral NSW. He has 17 years of judging experience and 25 years experience in the cattle industry as a whole. Tim has judged at various country shows in New South Wales and also at the Launceston Royal & Sydney Royal. Tim lists some of his greatest achievements to date as breeding and selling the 2012 \$110,000 Australian record price Angus bull, exhibiting the Supreme Angus exhibit in 2013 and being the most successful Angus exhibitor in 2011 & 2013.

Harry Turnham is the Associate Judge for 2016. Harry hails from a farm in Gisborne, Victoria. His family has been breeding Australian Lowlines before he was born so you could say he has been around cows his whole life. When he was 13 Harry's family purchased a couple of Red Angus cows from Moorwatha and he has loved the breed ever since. Harry is 16 and has a few of his own Reds. For his whole childhood Harry's Dad has taught him how to lead and Judge cattle. Harry has participated in Cattle Camps, Paraders competitions and Junior Judging competitions for as long as he can remember. He has received great support from some very close friends and family and he is very proud to be the Associate Judge at the 2016 Red Angus National Show and Sale.

A/c: **WD CATTLE Notes:** K07 is an exciting young sire that is packed with both performance and pedigree. His dam was the \$13,000 high selling lot from the Pride & Passion II Sale. His sire is the \$65,000 Red Six Mile Game Face 164Y bull. A balanced, moderate framed bull with plenty of carcass. Also, K07 is eligible to travel to WA.

A/c: **GARY & SHELLEY TURNHAM** *Notes:* KC is a bull full of rock solid elite genetics sired by OLC Chateau K465 who is a test and proven performance sire. KC's dam is from the renowned Diffy cow family from the Red Angus Foundation herd Moorwatha. KC is a big boned, easy doing bull who oozes style. A well balanced bull with a thick top, great muscle pattern who maintains softness with an awesome temperament. He moves like a big cat and will provide a maternal package with fleshing ability to any herd. Barregowa will be retaining some semen for in herd use.

A/c: **GW & SJ JORDAN Notes:** King Henry is the first Red Northline Chuck Norris 305X son to be offered for sale in Australia. The son of our popular young cow Holly H9 who is a member of the Kite line of cows from Trevone Park. King Henry was a member of the 2016 Goonoo Show Team and won Junior Champion Bull at two of the shows that he was exhibited at in the North and stood 2nd in a strong 16/18 month class at the Feature Show in Sydney. We have a strong belief that this young bull is one of the very best. He exhibits everything that his sire is renowned for; strength, length, muscle and mobility. Get in on the ground floor with the Chuck Norris & Kite bloodline, they will not disappoint.

A/c: **GW & SJ JORDAN Notes:** The only son of Red Northline Rockstar 911U in Australia and what an individual he is. Kulcher was part of the Goonoo Show Team this year and had some impressive results throughout. Junior and Grand Champion Bull at Tamworth 2016 Show and went on to be Supreme Exhibit of the show under Mr John Manchee, well known Shorthorn breeder from Narrabri. Natural thickness and softness were the type of comment that got Kulcher over on that day and he certainly exhibits all of those qualities. Kulcher is impressive, call around and inspect him.

Donation Lot

42 **PICK OF THE TRONAR 2016 HEIFER CALF DROP**

A/c: Donated to the Red Angus Society of Australia by Ross & Tracy Collard

Notes: All proceeds donated to the Red Angus Society to raise funds for the promotion of Red Angus. Offering the purchasers pick of the entire 2016 Tronar registered Red Angus heifer calf drop. Tronar is based in Gingin in Western Australia. Ross and Tracy Collard have been breeding Red Angus cattle for over 45 years. Over the years Tronar genetics have been introduced to breeding programs all over Australia. Tronar is fully recorded with BREEDPLAN and record an average of 175 calves per year. The selection is to be made by December 31st 2016. The purchaser is responsible for all freight. Transfer of ownership is deemed to occur when the heifer is selected and the purchaser is responsible for insurance from that date. If the selected heifer is purchased by a breeder in the Eastern states, it may stay at Tronar until the WA bull sales in February to assist in coordinating freight. Tronar is a Johnes Free Area
