SALE INFORMATION

SALE REBATES:

1. A 5% rebate will be to all outside agents who attend this sale with or on behalf of their clients and settle within 7 days.
2. A 2% rebate will be paid to all agents who introduce their clients prior to the sale but do not attend the sale and settle within 7 days.

STOCK HEALTH:

Anvil is **MN2** accredited (VC 651) under the BJD Market Assurance Program. All bulls have been through the Pfizer "Star" program which requires them to be notched and tested for BVDV PI. Vaccinated twice with Pestiguard, Ultravac 7in1 and Vibrovax. Drenched prior to sale. In addition all bulls have been inspected by Drew Pickford at Nationwide AB for semen morphology and breeding soundness, having been semen and physically examined. Liam Cardile of LRC Livestock has also independently structurally assessed the bulls and the results will be available pre-sale from Jess on 0429 843 625 and on the day.

PHONE BIDDING:

Please contact Andrew Allan at least 24 hrs prior to the sale on 0428 410 341.

TRANSPORT:

Anvil prides itself on "our farm to your farm" service. All bulls are delivered **free of charge** - Either by Anvil directly or by a small select group of operators we trust to look after your investment. If you have any questions please contact Ian Bates on 0418 367 209.

INSPECTION:

We encourage buyers to inspect the bulls prior to sale day. This allows us to discuss with you the bulls in greater detail and assist in selection of a sire best suited to your requirements. Please call Stephen on 0427 262 823 to arrange a visit. Lots catalogued will be available for inspection from 1.00pm on sale day, Wednesday 11th March.

ANVIL GUARANTEE:

Anvil 2 year Guarantee

All bulls have been assessed for structural soundness and evaluated for fertility. To the best of our knowledge the bulls offered are in sound working order as at the time of sale. If during the next 24 months, a bull breaks down due to reasons other than illness, injury or disease contracted after leaving Anvil, we will:

1. Look to provide a mutually agreed upon replacement as quickly as practicable, or if a replacement is not possible;
2. We will issue a refund equal to the purchase price minus any salvage value. In some cases a veterinary report may be requested. The guarantee is for the value of the bull, without interest, costs or damages.

It is important to understand that normal care and good husbandry practices must be observed as replacement or a credit is not available if a bull is simply injured or dies for any other reason. As such we highly recommend you insure your bull/s against injury or death. A Rodwells Insurance agent will be available on the day.

DISCLAIMER:

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors, the selling agents or representatives thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included herein.

Welcome to the 10th annual Anvil Angus autumn production sale.

We appreciate you taking the time to view our catalogue and invite you to attend our bull sale preview on Wednesday 2nd March and the bull sale on Wednesday 9th March.

How fast 10 years has flown by. It seems like only a couple of years ago we moved our small herd of registered cows to Acheron and hosted our first sale. That year we sold 19 out of 24 bulls with the top price bull, A75, selling for \$5,250 to Ted Moss at Ancona Station. The sale was held in a very temporary sale ring under a marquee. We knew back then what we wanted to achieve long term and progressed at a rate the market dictated. Over the next few years we moved to a permanent sale ring, still using a marquee. Next was a shed and finally we have our purpose built sale headquarters and office.

All of this is the direct result of you, our clients and friends, who have supported our sales. For this we are forever thankful. You have offered feedback and advice, most of which we would like to think we listened to, adding it to our own goals and directions. We have worked to produce a range of bulls rather than a singular type and bulls that are suitable for a number of markets and cow types. We have also focused on delivering this at the right price by increasing the number of bulls rather than letting the average drive up.

At the heart of our program we realise that our job is not so much selling a bull as it is selling pregnant cows. A bull's primary role is getting cows in calf and as a result we have focused heavily on fertility. Sometimes, to our own detriment, we have withdrawn a bull from our sale for not meeting our standards, which others would have otherwise sold. The upside of this are the phone calls we receive from you telling us how happy you have been with your pregnancy rates.

Next in priority to pregnancy rates comes cow functionality. A cow must have a physical structure that will provide longevity in the herd. She must have an udder shape, teat size and attachment that will ensure a calf can suckle from birth to weaning. Sire selection for us is very cow focused. We are constantly thinking about the end effect on our cows and ultimately your cows when we select bulls.

To this end I think you will be very excited with the new sires in this year's sale and be happy to see we have kept some of the more popular lines. The South Dakota sons for us offer a chance to return to the Density line and type of bull, but bring in a more performance focused edge. This is his first set of sons to sell and will probably be the only set offered anywhere in Australia.

Another highlight are the GPS and Gus sons offered for sale. Earlier sisters to these bulls are in production and look fantastic.

We look forward to seeing you on sale day and hope you can take the time to join us after the sale for an Angus Steak.

Stephen and Melissa Handbury

Straight from the very heart of our program. This selection of young heifers has all the world in front of them. They offer an opportunity to anyone just starting out to add many of the great cow families to their herd, or perhaps add something new to an existing herd.

We have been very protective of our exclusive access to a number of U.S. cow families and two of these heifers offer a unique opportunity to join us in developing them, here in Australia.

They also offer an excellent opportunity to select heifers sired by a number of new sires. Allowing your herd to go straight to the front of the line.

Heifers

Is a granddaughter of Millah Murrah Flower X24, one of the donors we selected at the Millah Murrah mature cow dispersal. F251 her WK Replay dam, crossed to Millah Murrah D78 has put together everything needed for a potentially great cow in the future. Scanned 3/2/16 450kg, 7-5 Fats, 66 EMA and 4.3/6.2 IMF. AI'd to Koupals B&B Titan 5029 on 12/11/15, backed up to HBUJ200.

Traits Observed: BWT,400WT

A great granddaughter of the Legacy Jestress cow P116. This heifer has a pedigree stacked with maternal animals. Density - exceptional udders and teat confirmation with great body. WK Replay - frame, milk and temperament. Millah Murrah D78 has topped this off by pushing 600 day weights with great body and structure. We are only offering up these D78 females because we are the third highest user of D78 behind Gilmandyke and Millah Murrah Angus. Scanned 3/2/16 471kg, 4-4 fats, 70 EMA and 3.8/6.2 IMF. AI'd to PA Ranch house 349 on 11/11/15, backed up to HBUJ200.

This year we really wanted to offer up something special in our cow line up so we selected 4 young cows rearing their second calf. Kite P43 the granddam of this young cow really needs little introduction with over 50 calves registered at Banquet, Bindarra, Rossander and Vermont. We were lucky enough to get a heifer from the embryos purchased and add to our line of Kite cows. H201 sells with male calf HBUL513 at foot, born 19/09/15 and sired by HBUJ301. H201 is AI d to Irelands Galaxy G43 on 19/11/15 and backed up to HCAG113.

I really do like our Tradition daughters they are great functional cows that rear a good calf and keep getting back in calf. Descending from the Wilsons Down Queenie V189, she has a pedigree for maternal bulls. Tradition, Grid maker and Papa Equator are all well known for their outstanding daughters. H368 sells with female calf HBUL298 sired by Benfield Substance and born on 25/08/15. H368 is AI'd to Irelands Galaxy G43 on 19/11/15 and backed up to HCAG113.

Last chance to grab a Tradition daughter, we have run out of Tradition semen so will not be offering any more daughters for sale after H328. Like H368 here is a pedigree stacked with true cow building sire power. Pack Power, 41-93 and Traditional. Its about as maternal as it gets. H328 sells with female calf HBUL297 at foot, sired by Benfield Substance 8506 and born on 25/08/15. H328 is AI d Irelands Galaxy G43 on 19/11/15 and is backed up to HCAG113.

NAQW38, A cow that really needs little introduction. The dam of well used and respected AI Sire Ardrossan Equator A241. W38 was purchased by Michael Ball for \$41,000 from Ardrossan and sold for \$12,000 as a mature cow at the Aberdeen dispersal. Embryos are offered due to an extra large flush. South Dakota was a phenotype sire selection and will offer an excellent opportunity to access full sibling to Anvil progeny.

Anvil Kaharau H325, was selected to enter our donor program for her ability to add substance and fleshing to her calves. Her first calf HBUK191 has been retained in herd. Identity is an excellent mating for her, putting back some of the femininity Berkley took out. These embryos are only available for sale due to the large number flushed.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers from member (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

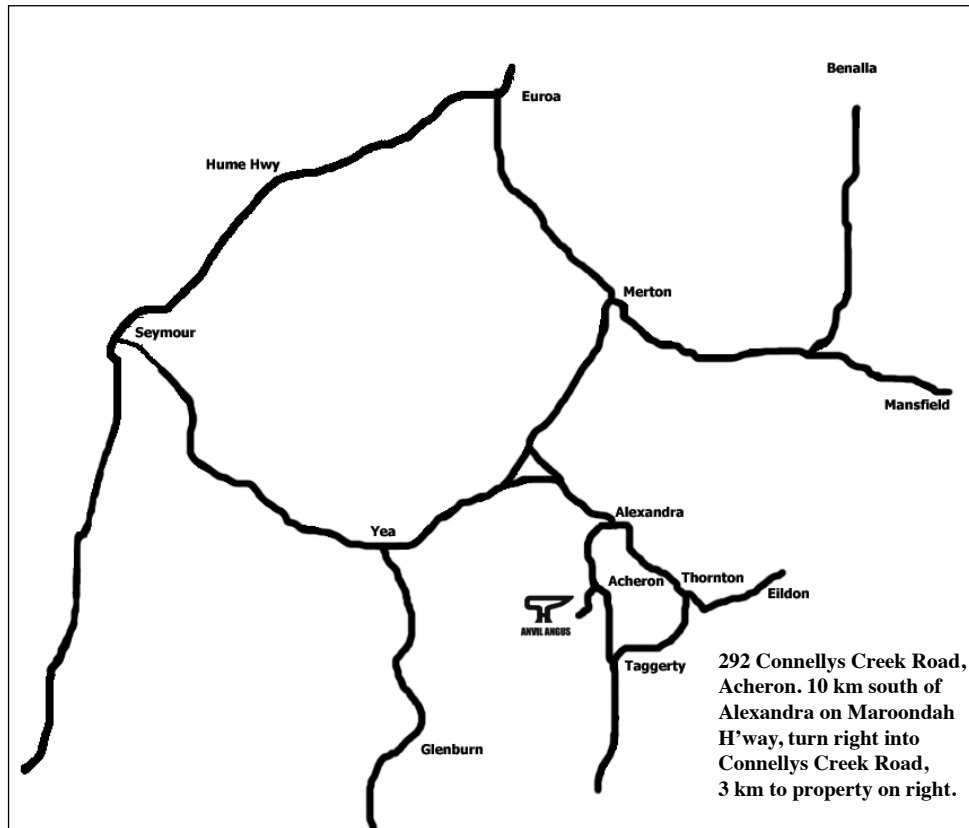

Signature:

Date:

Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

*We would like to thank all buyers, bidders and visitors
for your support.
Please join us for refreshments and a great Angus steak
after the sale.*

LOCATION MAP

Please bring this catalogue to the sale with you.

There is not an Upward son available in Australia that can match him for phenotype, structure or as balanced a set or Estimated Breeding Values as he has. Docility has long been a problem with the Upward line and we are not surprised the combination of 6595 from his dam has removed it from this bull, leading to the number one docility son of Upward at +10. His daughters are big hipped broody cows with excellent udder and teat size and attachment. We have watched this bull closely as he has developed and were quick to take up the offer to purchase the walking rights back on the bull allowing him to walk cows here at Anvil.

Sale book comments from 2011 :

An imported American embryo and an outcross to 036 and 1680. A strong bodied thick bull with exceptional balance and style and an ideal maturity pattern with excellent movement. 200, 400, 600 day weight and carcass are in the top 10% for the breed and Scrotal and Milk are in the top 5%. His sire, Sitz Upward, is the star of the Sitz program producing sons that have topped the last four Sitz sales including 2010 where his sons were four of the top five priced bulls out of 400. His Alliance 6595 sired dam is a stnadout at Ellison Angus. EA Emblynette 434 is wide hipped, big girthed and out of one of SAVs very top cow families.

Picture taken January 2011

Semen rights are retained by Morago Angus, New Gisborne. Semen can be purchased from Anvil or by contacting John Mc Crory at Morago. **Price \$50 per straw bulk discounts available.**

NOTES

Bringing Your New Bull Home

BRINGING YOUR NEW BULL HOME

PURCHASE

DELIVERY

AFTER PURCHASE TIPS

ARRIVAL

MATING NEW/ YOUNG BULLS

MANAGING OLDER HERD BULLS

DURING MATING

NORTHERN AUSTRALIA

When purchasing a bull, care and handling after the sale can be as important as the purchase itself. Looking after your bull well during the initial stages of his working life may ensure longevity and success within your breeding herd.

Purchase

Temperament is an important characteristic when selecting a bull. Selecting a bull that may be flighty or aggressive will make life difficult for you each time he is handled. Note which bulls continually push to the centre of a mob, run around, or are unreasonably nervous, aggressive or excited.

At the sale, note any changes of temperament by individual bulls. Some bulls that are quiet in the yard or paddock may not like the pressure and noise of the auction and become excited. Others that were excited beforehand get much worse in the sale ring and can really perform. Use the yard or paddock behaviour as a guide, rather than the temperament

shown in the ring.

Delivery

When transporting your new bull insurance against loss in transit, accidental loss of use, or infertility, is sometimes provided by vendors. Where it is not, it is worth considering.

After purchase tips:

- When purchasing, ask which health treatments he has received.
- Treat and handle him quietly at all times - no dogs, no buzzers. Talk to him and give him time and room to make up his mind.
- With more than one bull from different origins, you must be able to separate them on the truck.
- Make sure that the truck floor is covered to prevent bulls from slipping. Sand, sawdust or a floor grid will prevent bulls from being damaged by going down in transit.

- If you can arrange it, put a few quiet cows or steers on the truck with the bull. Let them down into a yard with the bulls for a while before loading and after unloading.
- Unload and reload during the trip as little as possible. If necessary, rest with water and feed. Treat bulls kindly—your impatience or nervousness is easily transmitted to an animal unfamiliar to you and unsure of his environment.

If you use a professional carrier:

- Make sure the carrier knows which bulls can be mixed together.
- Discuss with the carrier, resting procedures for long trips, expected delivery time, truck condition and quiet handling.
- Give ear tag and brand numbers to the carrier and make sure you have the carrier's phone number.
- If buying bulls from interstate, organise any necessary health tests before leaving and work out if any other requirements must be met before cattle can come into another State.

When buying bulls from far away, you may often have to fit in with other delivery arrangements to reduce cost. You should make it clear how you want your bulls handled.

Arrival

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company.

Provide hay and water, then leave them alone until the next morning .

The next day, bulls should receive routine health treatments. If they have not been treated before, all bulls should be vaccinated with:

- 5-in-1 vaccine;
- vibriosis vaccine;
- leptospirosis vaccine (if in areas like the Hunter where leptospirosis exists);
- three-day sickness vaccine (if in areas where this sickness can cause problems).

Give particular attention to preventing new bulls bringing vibriosis into a herd. Vibriosis, a sexually transmitted disease, causes infertility and abortions and is most commonly introduced to a clean herd by an infected bull. These bulls show no signs of the illness. Vaccinated bulls are free from vibriosis, so vaccinating bulls against the disease should be a routine practice.

Vaccination involves two injections, 4–6 weeks apart, at the time of introduction, and then a booster shot every year. Complete the vaccinations 4 weeks before joining.

Consult with your veterinarian and draw up a policy for treating bulls on arrival and then annually. Bulls should be drenched to prevent introducing worms and, if necessary, should be treated for lice.

Plan to give follow-up vaccinations 4–6 weeks later.

Leave the bulls in the yards for the next day or two on feed and water to allow them to settle down with other stock for company. A bull's behaviour will decide how quickly he can be moved out to paddocks.

Mating new young bulls

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later.

When the young bulls are working, inspect them regularly and closely.

Managing older herd bulls

Older working bulls also need special care and attention before mating starts. They should be tested or checked

every year for physical soundness, testicle tone, and serving capacity or ability.

All bulls to be used must be free-moving, active and in good condition. Working bulls may need supplementary feeding before the joining season to bring up condition

During mating

- Check bulls at least twice each week for the first 2 months. Get up close to them and watch each bull walk; check for swellings around the sheath and for lameness.
- Have a spare bull or bulls available to replace any that break down. Replace any suspect bull immediately.
- Rotate bulls in single-sire groups to make sure that any bull infertility is covered. Single-sire joining works well but it has risks. The bulls must be checked regularly and carefully, or the bulls should be rotated every one or two cycles.

Bulls are a large investment for breeding herds and they have a major effect on herd fertility. A little time and attention to make sure they are fit, free from disease and actively working is well worthwhile.

Northern Australia

Although the Angus breed originated in a cooler climate, they can adapt to subtropical regions with many straight-bred and cross bred producers finding success in Northern Australia. Some of the following information may also be helpful for new bulls located in more temperate climates.

Adaptation

They key to Northern success for Angus is that cattle introduced from the Southern regions of Australia be allowed to adapt to their new environment before commencing their working life. If possible, a break of 3 months is advisable before you set your bull to work.

Purchase in cooler months

Ensure your bulls are in good condition before they do commence their working life. The cooler months are an ideal time to purchase and introduce Angus cattle, allowing them plenty of time to acclimatise.

Change of feed source

When inducting Angus cattle into your herd consider their source of feed. Have you taken an animal which has been supplemented on grain straight to a dry pasture? Animals should be gradually changed over to their new feed to ensure they do not lose condition. This may involve using supplements which could include dry lick/urea blocks.

Managing Cattle Ticks

For ticky areas, bulls should be vaccinated prior to transport and given another booster afterwards. Remember males are more susceptible to ticks than females.
