

Muscle Sale VI

Auctions Plus (Online Only) www.auctionsplus.com.au

Friday 6th March 2015. Commencing at 12 noon

AGENTS: SEJ Paul Phillips 0418 553 123, Neil Park 0408 515 117

Outside agent commission 2%

(Note: buyers must be introduced in writing at least 24hrs prior to the sale)

TRANSPORT/DELIVERY: Transportation following the sale is by arrangement with the Vendor. Vendors agree to hold cattle for a reasonable period whilst suitable arrangements are made. A network of Transport companies is available to facilitate delivery, please contact Vendors, Sale agents or Sale organisers for details.

Catalogue photos have been taken in December 2014, please be aware that sale animals will be approx. 2 months older by sale date than shown in the photo.

TYPE DESCRIPTION:

The origin of the Limousin breed in France uses 3 key type descriptions to define their cattle. These descriptions are linked to the maturity pattern of the animal and have been included in the catalogue to assist prospective purchasers:

Early (boucherie) – an early maturing heavily muscle type, particularly suited to vealer production. Cattle grow fast upto 450kg at 10-12 months and then taper off to a mature weight of around 1000kg for bulls and 650kg for females. A to A+ muscle scoring.

Mixed (Mix) – the middle / general purpose type cattle are described as mixed, they are early maturing, which continue to grow on. Mature finished weight will be around 1200kg for bulls and 800kg for females. A to A+ muscle scoring.

Late (Elevage) – The later maturing / elevage limousin type is primarily used to put size into females. These cattle are not primarily used for direct beef production but selectively used to maintain size in the herd. Mature finished weight will exceed 1200kg for bulls and 800kg for females. A to B muscle scoring.

F94L “Muscle Gene” VERIFICATION:

Full French – Verification based up the assumption that Full French cattle carry 2 copies of the F94L “Muscle” gene. This assumption is derived from sample testing of the Australian French Pure population which has shown the F94L gene to have an occurrence of 98.8% in this population. This assumption has been applied in verification of Full French lots as well as lots verified by pedigree.

DNA Test – Animals with a DNA Test verification have had a direct analysis of their DNA to confirm that they carry 2 copies of the F94L gene.

Pedigree – Animals verified by Pedigree are derived from French Pure and/or DNA tested pedigrees.

EBV's:

EBV's have not been included in the catalogue as ABRI indicates that they are not reliable below 90% accuracy and this accuracy is not achieved until an animal has had several progeny recorded. For prospective purchasers wishing to refer to EBV data, they will be provided in the supplementary sheet or upon request.

This is an Auction Plus Sale Only, there is no physical sale, so you can bid through your own computer. To bid you must be registered with Auctions Plus, preferably 48hrs prior to the sale. Bidding is done on a conventional Auctions Plus format (helmsman style).

One of the first Bahut Sons to be offered in Australia, thick, long and deep this bulls sire is living up to everything we have expected. Will produce heavy early maturing calves with sale topping quality.

Bahut Sire of Lot 3

4

Keystone Johnny English

Vendor: Keystone Genetics

SIRE: Sympa

Keystone Johnny English

DAM: Talana Yulench

Octopus

Operette

Highlander

Talana Wet Kisses

Lot Type: Bull
Type: Early

Comments:

Classic Muscle and Maternal genetics. This powerful sire is as typical Sympa son with exceptional thickness right through his topline, a powerful square backend and very sound feet and legs. Out of a top Highlander cow from the Fashion cow family this line has a lot of milk consistently producing exceptional male and female progeny. This is an elite muscle sire with very good temperament and will suit stud or topline commercial use, he would have been retained for stud use at Keystone if our herd hadn't reached saturation point with the Sympa bloodline.

Date of Birth: 12/3/13
Herdbook ID: KLGJ6

Talana Xpose

Vendor: Keystone Genetics

Date of Birth: 21/12/02
Herdbook ID: GLGFX50
Grade: Full French (100%)
F94L Status: Full French

Hammel Calvados

SIRE: Hammel Garder

Hovbro Ditte

Talana Xpose

Talana Richter

DAM: Talana Tempo

Talana Rhythm

Lot Type: Female
Type: Early - Mixed

Comments:

Proven donor female, Xpose has been flushed twice for an average of 9 A grade eggs per flush. Has produced top class progeny with a son performing stud duties for Bogong View and 2 daughters selling to stud. Possesses great volume and doing ability with strong milking capacity. Has always bred quiet powerful calves and is only being offered as we have several eggs in the tank, a complete productive female. In calf to polled Ferrari, depastured from 10/7/14.

Son of Xpose KLG Freak

NETHERHALL GALLANT

Calving Value	200D Growth	400D Growth	Muscle	UK Beef Value
97	123	132	119	139

SIRE: HALTCLIFFE DJ

DAM: MONTGOMERY VIXON (LASSO)

Netherhall Gallant is an outcross son of the 72,000gns Haltcliffe DJ who in turn is a son of the 42,000gns Cloughead Umpire (Haltcliffes follow on sire to Sympa) and Radio, one of Haltcliffes elite donor females. His dam is a highly proven female who has also bred well with another son (Netherhall Epic) being used very widely in Ireland as an AI sire.

Gallant is a very square sire with exceptional width at the plates. His progeny will have a lot of growth and power, yet still be above average for calving ease. Gallant's performance figures are unparalleled with a superb calving to growth spread with strong muscle and breed leading Beef Value, combined with his exceptional phenotype and pedigree background, this bull is a standout sire of the future.

"Gallant offers the works. Exceptional pedigree with outstanding figures. His father is the famous Haltcliffe DJ who was a much admired bull when he sold for 72,000gns. Gallant has a beef value in the top 1% of the breed with an exceptional calving value of +2, which really complements his outstanding growth. Gallant is exceptionally thick and he carries this throughout his body, having an unbelievable width to his loin and squareness to his plates. He will be no doubt a bull to produce quality". Boomer Birch, COGENT BEEF SPECIALIST.

Sire: Haltcliffe DJ

Dam: Montgomery Vixon

Comments:

2 LOTS OF 10 STRAWS. The age says it all. This bull has proven himself time and time again, yet at 12 years old continues to exceed all expectations. Longevity seems to run in the pedigree as his dam T55 is still a productive donor at age 16. T55 was also junior champion at beef 2000 Along with her full brother Sovereign taking out the grand champion and highest EMA of any breed. His females are long, extremely wide, and as deep as they come, bulls by Y39 have the quality to breed on in any stud herd or will value add to any crop of commercial calves. Tanholm Hero a top stud sire at Divine by Y39 had a 200d weight of 375kg with only grass and mums milk. A rare opportunity to secure some of the best genetics the limousin breed has to offer.
