Sale Foreword

If you haven't yet recognised the significance of the Genomix Genetic Sale, take a few moments to consider it. Australia has long been recognised as a prime beef producer, and as the years continue to pass, the world increasingly looks to the cattle breeders of this great island continent for supply of high quality beef.

Generations of hardworking men and women have spent their lives working the land and breeding cattle - carefully pairing bull and dam to ensure a positive movement forward in their herd's genetics. The result of their labours is evident today.

Genomix recognises the great legacy and contribution of Australia's early pioneers and settlers in building, what is today, a thriving global demand in the Australian Beef Industry. Genomix is a strong proponent of Australian beef genetic development through genetic technologies. It sees this multi-breed genetics sale as an opportunity for Australian and Global beef producers to acknowledge and award breeders who have achieved high levels of quality in their herds' genetics.

We welcome you to this inaugural sale of the best of Australia's beef genetics and invite you to take advantage of prized genetics on offer.

Sincerely,

Bruce Arkins, Genomix
Jonny Arkins, Genomix

Genetics for Sale - Standard offerings, please see each lot for any variation.

- | | |
|---------------------------|---|
| Frozen Embryos - | Four or Six 'A' grade embryos per lot with a 50% pregnancy rate guarantee. Implants at Purchaser's cost. See conditions of sale. Bid price will be per embryo exclusive of GST. |
| Flush; Pick of the Herd - | Purchaser to nominate and flush a selected female within twelve months of sale date. Female to produce a minimum of four 'A' grade embryos. Flushing and implants at Purchaser's cost. Semen supplied by Purchaser. See conditions of sale. Bid price will be for the one lot exclusive of GST. |
| Semen - | All lots of semen shall be licenced semen. See conditions of sale. Bid price will be per straw of semen exclusive of GST. |

Sale Information

Sale System

The Genomix Genetics Sale will be held over three days on the AuctionsPlus Simultaneous Sale format. All lots are available for sale at the same time. Each lot will have a starting price and a set bidding increment, which may differ between lots. Bidding can take place via a GDL bidding station at the showground at the Ruralco trade stand (C209) during Beef Australia 2015 in Rockhampton, QLD from 12 noon Monday, May 4th.

From 4pm on Wednesday afternoon until 5.30pm, remaining bids will be placed at the Genomix Beef Genetics Sale event at Hegvold Stadium located at the southeast corner of the Rockhampton showgrounds, adjacent to the stud cattle housing.

Buyers may also bid independently by logging on to AuctionsPlus themselves. International bidders will need to preregister with GDL.

Bidding from Beef Australia 2015, Rockhampton

Potential buyers can register with GDL to receive a bid card number, and place their bids via the GDL bidding stations. Early registration can be arranged by contacting Harvey Weyman-Jones on hweymanjones@gdlrural.com.au or 0414 941 788.

Bidding from Australia

Potential buyers can bid independently and directly with AuctionsPlus. Please register at www.auctionsplus.com.au. If this is your first time, you will need your PIC number and registered trading name. We recommend you register with AuctionsPlus a few days prior to the sale. Demonstration auctions can be viewed to assist new users in becoming familiar with the system.

International Bidders

International bidders must contact GDL to pre-register and receive trading approval. A buyer number, username and password will be provided by AuctionsPlus to the bidder. Please contact Harvey Weyman-Jones by email at hweymanjones@gdlrural.com.au or +61 414 941 788.

Goods and Services Tax

All bids are made exclusive of GST. GST of 10% will be added to the purchase price, on the invoice, after the conclusion of the sale.

Payment

Payment shall be made by the Buyer, or Buyer's Agent, direct to GDL within 7 days of the sale date. Whilst legal ownership passes from Seller to Buyer at the conclusion of the sale (fall of the hammer), delivery of goods purchased will not be allowed unless full payment has been received.

Outside Agents Rebate

There will be no outside agents rebate paid.

Insurance

Ruralco insurance representatives will be available on sale day, or prior to the event by contacting Michael Lynn at mlynn@ruralcoinsurance.com.au or 0417 957 495.

Timetable of Events

- | | |
|----------------------------|--|
| Online Auction Commences - | 12:00 noon (AEST) on Monday, May 4th, 2015 |
| Online Auction Concludes - | The Heggold Stadium will be open to patrons of the Genomix Beef Genetic Sale from 4:00 pm to 6:00 pm on Wednesday, May 6th, 2015. The auction enters the final stages at 5:30 pm, at which time, and after two minutes (120 seconds), if there are no further bids on any lot, the auction will be declared completed. Each time there is a bid on any lot, the time will reset to two minutes. Bidding may continue for another 15-30 minutes, depending on the activity. |
| Catering - | Light finger food of beef, donated by Irelands Angus, AAA Speckle Park, Shorthorn Beef and Herefords Australia will be available from 4 pm on Wednesday, May 6th. Bar service will also be open. |

SUBJECT TO CHANGE

Conditions of Sale

Special Conditions

The Sale will be conducted under the ALPA Livestock Auction Terms and Conditions of Sale and The Genomix Special Conditions of Sale.

1. All Vendors are members of their own respective breed societies and all progeny is capable of being registered by their respective breed society.
2. Embryos - Each lot of 'A' grade embryos has a 50% pregnancy guarantee provided that the implants are carried out by Genomix or a Genomix approved ET technician. See approved ET directory. Additional embryos from the same joining or other mutually agreed joining will be supplied by the Vendor to meet the guarantee of the 50% pregnancy rate. Implants to be at Purchaser's cost. All claims to be made within 12 months of the sale date. NB: There is no "live calf" guarantee.
3. Flushes - From the named Female. Two straws of semen to be supplied by the purchaser. While the purchaser owns the complete flush, regardless of results, four 'A' grade embryos are guaranteed. Additional embryos from another flush of the same animal or other mutually agreed flush will be supplied by the Vendor. Original flushing and implants to be at the Purchaser's cost. All claims to be made within 12 months of sale date. NB: There is no "pregnancy" or "live calf" guarantee.
4. Semen - All lots of semen will be licenced semen and as such must comply with minimum standards for identification, disease testing, packaging and can only be collected from bulls housed at a licenced semen production centre. However, the vendor does not guarantee the performance or characteristics of the semen and the Purchaser is buying such semen "as is".
5. Recessive Genes - All lots to be "free by pedigree" for known recessive conditions.
6. Export Protocol - Availability of lots to overseas countries is indicated in the catalogue but it is the responsibility of international buyers to check with their appropriate authorities to ensure access to their purchases.
7. Vendors will disclose if any genetic materials of an animal have been retained for cloning.
8. A Vendor shall not be liable to a Purchaser for an amount greater than the original selling price of the lot and transport costs or appropriate proportion thereof.

RBSELLARS

A photograph of two men in a dry, arid landscape. One man stands on the left, wearing a blue shirt and a hat, leaning against the trunk of a large baobab tree. The other man sits on the ground to the right, wearing a light-colored shirt and a hat. The tree has a thick, bulbous trunk and bare branches with some small, round fruits. In the background, there are mountains and a fence with a white dog.

6 A Grade Embryos Extra Terms:

Successful Buyer has option to purchase another 2 A grade embryos from this mating at the auction price (only the buyer has this option) A sensational mating combining the outstanding Booroomooka Winch B69 with the highly proven Emperor. B69 has "bred the house down at Booroomooka", and that is no easy feat.

SIRE:

Emperor is a rare gem, who covers all the bases for the cattle industry: He is a trait leader for both growth and calving ease. His high ranking in a cross section of traits enables him to add significant profitability to the industry. He is a proven performer for structure, phenotype and docility.

DAM:

She is the mother of the elite Galileo G501 - chosen for the Angus Benchmark Programme Cohort 4. So far, she has had 5 sons offered and sold, at an average of \$8,800. Her maternal strengths are shining through, with daughters G1 and G7 breeding so well.

SIRE:

VAR Reserve 1111 is a exciting new sire used in the Booroomooka progamme. He has a unique genetic package with an impecable pedigree. His progeny are quiet, have low birth weight and then grow quickly with lovely muscle pattern. Reserve comes from a strong cow family. His maternal brothers topped sales at \$250,000 and \$330,000 in 2012/13. His father B/R New Day has bred well and has some lovely productive daughters.

DAM:

Volition C11 is the chosen one, to further enhance the highly successful female line of Booroomooka Theo T30. Theo is a legend of the breed with 3459 progeny analysed. Theo's progeny are renowned to be highly fertile, quiet, muscular, highly marbled and have excellent doing ability. Volition C11 is highly fertile. She is a standout phenotypically with style and length. Her first calf she raised as a two year old sold for \$11,000.

Booroomooka Angus Female Flush

Pick of the Herd Flush - Sample Females Shown

Description:

The successful purchaser is able to pick and flush a female once from the Booroomooka Herd. The flush can be managed and taken place on farm at Booroomooka Angus or at an agreed recognised breeding centre. The winning bidder is to pay all associated costs with flushing and any export costs if applicable. The vendor guarantees a minimum of 4 A grade eggs from the flush. The buyer has the option to use two straws of semen in one of the following bulls in the flush programme free of charge : Booroomooka Galileo G501(NGMG501), Booroomooka Barnaby E246 (NGME246) or Booroomooka Hyperno H605 (NGMH605). This is a tremendous opportunity to get access to pick from one of Australia's most renowned Angus maternal herds. The Booroomooka Angus Stud was founded in 1926 by Mr H Gordon Munro. The stud is now run by Gordon's son Hugh and grandson Sinclair. In 2015, more than 850 herd book registered females will calve down. The herd has made significant genetic progress by a thorough selection process and undertaking large scale AI and ET programmes. The Stud has an Annual On Property Bull sale held in August selling over 200 Bulls.

BOOROOMOOKA BARNABY E246 or BOOROOMOOKA GALILEO G501

Booroomooka Barnaby E246

Booroomooka Galileo G501

Description:

Buyers Option of two sires: Barnaby E246 (NGM246) or Galileo G501(NGMG501) Country eligibility will be announced prior to auction. **Booroomooka Barnaby E246** is producing exceptional progeny. He is breeding cattle that have high growth combined with doing ability. Lovely temperament , excellent structure - a real improver for feet. He has a lovely slick coat and displays muscularity. His first 29 sons sold with a 100% clearance in 2014, selling \$1,000 above the sale average. **Booroomooka Galileo G501** was selected for the Angus Benchmark Programme Cohort 4 Progeny test programme. Galileo is an easy doing bull with heaps of length. He is producing light calves that really grow on. He has a lovely quiet temperament and is already a trait leader for 400day and 600day growth, with a short gestation length.

SIRE:

Raff Explosive E108 is one of only a handful of Connealy Danny Boy sons in Australia. He is a massive bull with phenomenal growth, extreme length and capacity, great neck extension and shoulder set. He was sound on his feet and legs with a powerful head and strength of jaw and prowled the paddock like a cat while maintaining his condition at the completion of a season.

DAM:

Vicky Z15 is a super breeding female and we consider her to be one of our best. Her ability to breed is supported by her sales. We have sold over \$860,000 of progeny from this cow without counting the progeny we have kept. She is a big volume, powerful cow with heaps of capacity and length. She has a perfect udder and is so fertile. Her pedigree is second to none when it comes to consistency and maternal strength. Her grand-dam was interbreed cow in Melbourne Royal and won many other royal shows. When it comes to genetic strength and rock solid performance, it gets no better.

What a combination.

This mating is proven with sons selling to \$16,000 and our first females from this mating about to wean their first calves.

A real performance package here.

SIRE:

Aberdeen J302, is a young sire who we are very excited about. We purchased him as a 12 month old calf and are extremely excited on how he is developing. He is long, clean fronted individual with real thickness and super top to him, yet has the softness and growth we are looking for. His pedigree is as solid as a rock with his dam coming from a very strong and successful cow family in the US. An exciting sire for the future.

DAM:

Rosebud G169 is an outstanding young cow who has joined our donor team. She has an outstanding pedigree, deriving from the famous "Rosebud" family who was imported from NZ, this young cow combines the Dream and Champagne families on her sires side. What a combination our powerful breeding females from the Angus breed. She is long, big capacity with great udder and silky soft skin. G169 has demonstrated she can breed with her first heifer, who is in my mind outstanding just like her mother, grandmother and great grand mother. Her consistency and predictability is second to none. A daughter of G169 sold at the Sydney Royal Show 2015 sale for \$22,500.

Irelands Angus Female Flush
Pick of the Herd Flush - Sample Females Shown

Irelands Vicky Z15

Irelands Eclypta E23

Description:

We are offering a flush from the pick of any female from our herd that has calved. We are guaranteeing a minimum of 8 embryos from the flush to a sire of your choice. This is the first time ever we have thrown the doors open to the public to purchase a flush from the pick of our herd. What an opportunity. There are so many cows to choose from that have performed so well over many years. The possibilities are endless depending on your preference. Some options include:

Vicky Z15, an outstanding cow who has sold over \$860,000 of progeny. Her daughters are breeding so well, as are her sons.

Eclypta E23, the dam of Irelands Jeopardy J356 who sold for \$105,000 to Holstons Past Co. She has bred so well and yet again has an outstanding heifer at foot.

Wargoona C52, the dam of Irelands Gapsted G25, who sold to Ascot angus for \$54,000 in 2012. This cow has done an extraordinary job and her daughters are performing so well. She is also a maternal sister to Irelands Fletcher F1 who sold for \$43,000.

Pleasure A23, the grandma of Irelands Galaxy who sold for the Australian Record price of \$117,500 in 2013. His first son sold for \$105,000. This cow can do no wrong.

The list goes on and this opportunity is a 'once in a lifetime' to secure the heart of our herd.

SIRE:

Jackpot J137 sold for \$10,000, as Lot 2, at the record breaking Millah Murrah bull sale in September. We used him widely by AI last spring. Pictured at 20 months, Jackpot is an imposing bull, standing frame 7, with a strong top line, outstanding structure and gentle temperament. His dam, Prue E16, was the \$13,000, Lot 1 cow at the record breaking 2013 Millah Murrah Female sale. She is an outstanding example of the breed, with other sons selling to \$18,000.

DAM:

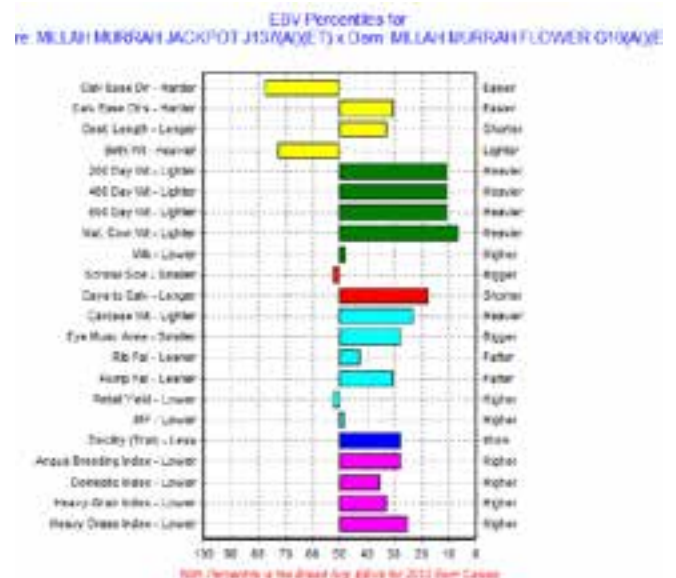

Flower G16 is from the most prolific cow family in the Millah Murrah herd. A 5.5 frame cow, she exhibits all the attributes traditionally associated with the breed: sound structure, robust constitution and quiet disposition. Her 1st two natural sons by Silveiras Conversion show exceptional muscle and thickness.

Three sibling calves to these embryos are due to arrive at Millah Murrah in August. Their pedigree combines the very best of Northern and Southern hemisphere Angus bloodlines, with maternal powerhouses Hingaia 469, Millah Murrah Woody W100, Glenoch Megaforce and BT Crossover all in the background.

SIRE:

New Zealand bred Hingaia 469 has been a lynch pin sire in the Millah Murrah program since 1993. He is world renowned for his capacity to transmit docility, beautiful fleshing and structure along with superb maternal traits to his progeny. Semen is all but unprocurable from this breed legend, selling for well in excess of \$1000 per straw.

DAM:

Flower J17 is a massive volume, frame 6, young cow with the potential to be one of the best we have bred. Her pedigree traces directly to our matriarch Powerplay cow, Flower G20. J17's dam, E172, sold for \$13,000 at our cow sale in 2013 with two sons at \$11,000 already to her credit. E172's pedigree carries two shots of 469 a couple of generations back. J17's sire, Conversion, crossed over 469 and Crusader influenced cows has delivered some of the best 1st calvers in Millah Murrah's history.

Line breeding to 469, with sensible generation intervals, for over 20 years, has been a key to the consistency of type entrenched in the Millah Murrah herd. With his influence layered back in for a 3rd time in the pedigree of these embryos, they represent truly unique, proven genetics, of foundation quality.

Millah Murrah Angus Female Flush

Pick of the Herd Flush - Sample Females Shown

Rose G109

Brenda G182

Prue H4

Description:

Please refer to www.millahmurrah.com for extensive information about the herd.

Established as a Stud herd in 1969, Millah Murrah cattle are known for their extra length, width and depth of body relative to a lot of cattle in today's beef industry. They are medium framed, easy fleshing animals with prodigious weight for age. Breedplan is used as guide, not a goal, in our breeding decisions.

Millah Murrah attained the highest Angus bull sale average in Australia for three of the past four years and 2nd highest average in 2012. In 2014, Millah Murrah set a new Australian record Angus bull sale average of \$9,147 for 95 bulls, bettering the previous mark set at Millah Murrah in 2011. At the 2013 Millah Murrah Angus female sale, an Australian auction record average for beef females was achieved, including 61 cow/calf units at \$8'943.

With 100's of superb breeders to choose from, we look forward to working closely with the winning bidder to ensure selection of the right genetics to achieve your goals.

Special Flush Conditions:

- Selection is limited to any female in the Millah Murrah herd that has calved.
- No maidens will be eligible.
- Flush must take place by the end of May 2016.
- The winning bidder to pay all costs associated with flushing, including semen and, if required for export, flush centre costs, feeding, freight, export costs etc.
- Embryos resulting from the flush cannot be on-sold without permission of the vendor.
- Flush includes a four A-grade-embryo minimum guarantee, up to eight embryos. Should the number of embryos collected exceed eight, the balance will be shared evenly between the purchaser and the vendor.
- The winning bidder is entitled to one flush only, providing the minimum number of embryos is collected.
- A 50% pregnancy guarantee is offered by the vendor, provided the embryos are implanted by a vendor approved technician.

Twenty five (25) Semen Straws AUS only

MILLAH MURRAH HERCULES H250(AI)

REFER TO LOT 1 FOR A PICTURE OF HERCULES

Description:

Account Gilmandyke Angus – Orange NSW

Hercules was the highest selling Angus bull in Australia in 2014 at \$70,000 to Gilmandyke Angus Stud, Orange NSW. Used as a yearling and raised entirely on grass, Hercules tipped the scales at 1082kg with 45cm testes at 24 months of age. Hercules exhibits an extraordinary volume of fleshing and depth, with tremendous mobility. He stands a shade under frame 7.

Hercules' sire and the full brother to his dam placed in the top eight of 35 sires tested for feed efficiency in the 1st cohort of the Angus Sire Benchmarking programme.

Hercules' first 15 calves were all born unassisted from two year old heifers.

To date, semen sales from Hercules have been restricted to 500 straws only. This is a unique chance for early access to the next generation of Australian Angus.

SIRE:

IH Bar None has explosive growth and exceptional bone. A smooth coated bull with a tidy sheath, he covers the ground well on correct feet. This bull oozes sire and breed character. His 2014 calves are very heavy in the bone and exhibiting the explosive growth he is known for.

DAM:

This cow has an incredible depth of pedigree, her Sire is arguably the most influential sire in the Brangus breed to date. Her maternal line is purely Australian known for quality and consistency. Virtue is named such because she exhibits those virtues we strive to breed in our herd, big framed cow with impressive carcass traits, is highly fertile, has good milk and calm temperament.

The progeny of this flush is expected to be second to none exhibiting exceptional bone, depth of muscle with explosive growth.

SIRE:

Harvie Redemption is a Canadian champion homozygous polled red factor bull. He has great softness with very high positive fat EBVs. He is in the top 1% for 400 day weight, rib & rump fats & scrotal, top 5% for 200 & 600 day weights. This sire's positive fat & breed leading weight traits combined with Moongool Quarter Moon 7's huge capacity & length are very complimentary. As Redemption is homozygous polled the resultant progeny from these embryos have a very high probability of being either polled or scurred. All siblings from this mating at Ascot have been polled.

DAM:

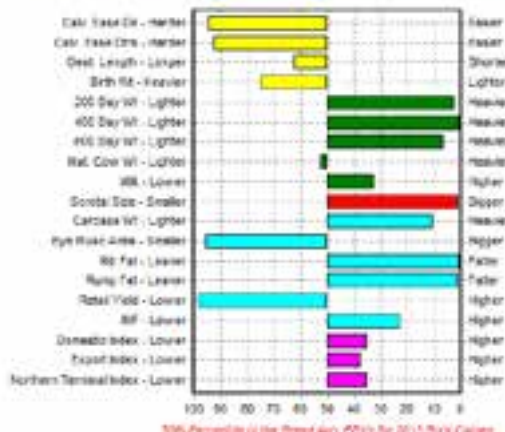

Moongool Quarter Moon 7 was top priced female at Moongool stud's last female sale at \$16,000. She went on to be interbreed champion cow at Brisbane Royal, the biggest beef show in Australia apart from Rocky Beef week. Quarter moon 7, now deceased had huge capacity & length. Ascot has sold sibling bulls to this mating sell to \$9,000 & retained red factor females with very favourable red factor offspring resulting.

SIRE:

LT Western Edge is a homozygous polled bull from the famous LT stud in the US. He has great softness & very high positive fat EBVs.

Top 2% Gest length, birth weight, milk, scrotal size, rib & rump fats. This mating brings together one of the best overseas sires with one of the best traditional Australian Charolais females.

DAM:

Palgrove Refine is a moderate framed yet large capacity female with great milking ability. Great feet & legs & always has one of the best calves in the Ascot herd each year. She was Interbreed champion cow at Brisbane Royal in 2010. Two polled sibling sons to the same mating have sold to other studs, one going to Peter & Judy Milton of Copplestone Charolais in Western Australia. They cannot speak more highly of the bull. As Western edge is homozygous polled the resultant progeny have a high probability of being polled or scurred. All siblings of this mating have been polled at Ascot. This is a highly proven mating.

SIRE:
 LT VENTURE was one of the high selling \$50,000 2014 sale bull his a maternal brother to LT SUNDANCE.
 Use Venture to improve feet, temperament and body type.

DAM:
 Rosedale Highness G114E is a lovely thick, soft and moderate framed cow with excellent breeding potential. She is a young cow and at just 3.5 years old cow, we are just about to wean her 2nd cracking bull calf. Her 1st bull calf by LT Ledger will be one of the star lots in this year's Rosedale May Bull Sale. Her mother (MRX27E) is a retired donor cow herself and is back in calf again at 13 years of age, thus highlighting the longevity and productivity of this quality female line.

Description:

Rosedale Donotello was the 2009 Royal Sydney Show Grand Champion and Interbreed Hordern winning bull at just 12 months of age. Since then he has emerged as one most proven "curve bender" Polled sires in the breed today. In the 2013 Australian Southern Charolais BIN Research project, Donotello emerged out in front of other Australian Leading Sires in the breed with his progeny earning him the number 1 ranking for Carcase Weight for age and the number 2 ranking for Eye Muscle Area. This combined with his ranking as one of the lowest birthweight bulls with one of the lowest gestation lengths proves he is a quality sire that will take the breed forward.

Description:

Day's Calibre comes from one of the most renowned and well respected studs in Australia. Awarded Senior & Grand Champion Bull at the prestigious Australian Poll Hereford National Show & Sale, June 2013. Calibre G74 quoted as 'One of the most popular Champion bulls ever' described as 'An exceptional bull you can't walk past'. Auctioned & purchased for a record price of \$90,000, selling to Stephen & Jodi Peake of the Bowen Stud & David & Olwyn Lyons of the Melville Stud, both long standing established Hereford breeders in Australia, both conduct on property annual bull sales. Upon purchasing Calibre G74 the bull was sent to Total Livestock Genetics AI station, where he has been collected for Australia, New Zealand, E.U., Canada & USA, enquiry for semen world wide has been constant. His pedigree combines four leading cow families, including a full sister to Allendale Musketeer, also his pedigree goes back to the Davis Unique cow which Stephen rated as the best cow he had seen when visiting Canada & USA in 1989. Calibre's sire Allendale Waterhouse D1, the supreme Poll Hereford Exhibit at the 2009 Sydney Royal & also sired the 2012 Wodonga Hereford Show & Sale Grand Champion Poll Hereford Bull. Calibre had out standing individual, his data from from National Show. Weighing 1100 kilgrams, Eye muscle are of 143square centimetres, fat scores of 22mm rump & 16mm rib. Scrotal circumference of 47cm.

VENDOR INJEMIRA BEEF GENETICS

Injemira Beef Genetics Female Flush

Pick of the Herd Flush - Sample Females Shown

**Description:****ANZAC Sired Donors**, Allendale Anzac E114 (P) (AEDE114); Pick of the Anzac Daughters for Flush Program

Extra Terms: Flush to be completed by the purchaser within 12 months of sale date. All flushing costs to be borne by the purchaser. The successful purchaser has the option to select a second Anzac daughter at the same auction price. A minimum of 4 embryos is guaranteed if not achieved in the first flush the female will be left open until that number is achieved. The female will be made available for all export quarantine time frames.

Comments: The Anzac line has been so successful at Injemira over the last two years rocketing Anzac to the position of arguably Australia leading Poll Hereford Sire. In 2014 at Injemira annual Bull Production sale 19 Anzac sons sold to \$45,000 and averaged \$10,850 with all Anzac sons born at Injemira being sold in the sale. In 2015 Anzac did it again with all 18 sons born at Injemira making the sale and topping at \$32,000 and averaging close to \$12,000. We have never seen a sire have such a consistent contribution to our breeding program and the sisters to these sale bulls are a tremendous line of females, with outstanding udders, structure and overall capacity along with breed leading EBV's. With the pick of them you are certainly getting the leading breeding females in the Australian's Poll Hereford herd. Over the last two years Injemira's has been recognised through its sale results as arguably the leading whiteface herd in Australia. In 2014 a 100% bull sale clearance was achieved with the top of \$45,000 being the top priced Poll Hereford sire in Australia for 2014. The bull sale average of \$6,931 was the highest average price for all breeds in Southern Australia for the bull selling season. In February 2015 Injemira set an all-time on property sale record average price for the whiteface industry recording an average of \$8,217 and a year to date equal top price of \$32,000.

Buyer _____ \$ _____

VENDOR INJEMIRA BEEF GENETICS

Injemira Beef Genetics Female Flush

Pick of the Herd Flush - Sample Females Shown

**Description:****Pick of the Herd** (excluding Anzac daughters) for Flush Program

Extra Terms: Flush to be completed by the purchaser within 12 months of sale date. All flushing costs to be borne by the purchaser. The successful purchaser has the option to select a second female at the same auction price. A minimum of 4 embryos is guaranteed if not achieved in the first flush the female will be left open until that number is achieved. The female will be made available for all export quarantine time frames.

Comments: Injemira is like no other whiteface stud operation in Australia, our stud herd is analysed through real world analysis of our genetics. Annually Injemira turns off ~2500 commercial steers and heifers off grass into various high end southern markets. We know what genetics perform in the real world and this is utilised to ensure our stud female herd is delivering the results. The female herd is scrutinised annually for structure and fertility traits allowing only the best females to contribute to our program. Injemira is recognised as the Carcass herd amongst the southern beef industry with carcass attributes selected for over numerous generations. Some outstanding matrons will be available for selection including Happy Day D053 (Aberdeen Daughter) who 5 ET sons in 2013 grossed over \$100,000 also daughters of Happy Day D053 including Happy Day G019 (National Daughter) who first natural son sold for \$18,000 this year. Numerous Redford daughters will be available to select from, whose first drop of sons sold in 2015 for an average of \$9,624 topping at \$23,000. Over the last two years Injemira has been recognised through its sale results as arguably the leading whiteface herd in Australia. In 2014 a 100% bull sale clearance was achieved with the top of \$45,000 being the top priced Poll Hereford sire in Australia for 2014. The bull sale average of \$6,971 was the highest average price for all breeds in Southern Australia for the bull selling season. In February 2015 Injemira set an all-time on property sale record average price for the whiteface industry recording an average of \$8,217 and a year to date equal top price of \$32,000. You need good females to achieve this and you are getting the pick of them.

Description:

50 Semen Straws in our 2015 Bull Production Sale top priced sire. Injemira Anzac J188

Extra Terms: Further semen will be made available to only the purchaser of this lot.

Comments: Purchased in February by leading stud operations Talbalba Herefords, Millmerran Qld and Days Whiteface, Bordertown SA for \$32,000. NB: Homozygous Poll. This sire represents everything the whiteface breed is crying out for he is structurally correct has tremendous carcass all packaged in a moderate frame. Clearly one of the best bulls ever bred at Injemira phenotypically, then you look at his pedigree and figures and this statement is backed up. He comes from a great cow line that has two leading ET donor females. His EBV set puts him in the top 1% of the breed for IMF% and the lucrative Grain Fed Index. A truly outstanding stud sire that comes with our highest recommendations. Extra Terms: Further semen will be made available to only the purchaser of this lot.

**HEREFORD TRUE
BEEF**

Like true blue Aussies, Hereford cattle are easy going by nature. It's hardly surprising that Australia's most laid-back beef cattle make for Australia's happiest beef eaters.

Try the natural true flavour of Hereford True Beef for yourself.

For more information contact: info@atron.com.au

Hereford True Beef will be available to sample at the Genomix Genetic Sale, Tuesday 5th May at Beef Australia 2015

Mawarra Herefords Female Flush

Pick of the Herd Flush - Sample Females Shown

Description:

Mawarra Herefords are renowned for the quality, productivity, consistency and performance of their breeding herd. The herd boasts two of the most successful Hereford females of modern time: Minerva 554 and Miss Titania 123. The combined sales of their progeny exceed \$525,000. They include three Herefords Australia National Grand Champions and internationally recognised sires Mawarra Vice Admiral, Mawarra Sentimental and Mawarra Trail Blazer. With more than fifty years of selective breeding behind the current herd, and well documented results pertaining to the Mawarra influence on the modern gene pool, Mawarra has earned its place at the forefront of the Hereford breed in Australia. Proven family lines combine with industry leading sires to offer a herd of elite young cows that will add value to any program.

Flush conditions:

- 12 months expiry date, from time of sale.
- Winning bidder to pay all flushing costs, if sold internationally this includes quarantine, export and associated expenses.
- The selected Donor must hold a Mawarra prefix.
- Flush includes a minimum of 4 fertilised A grade eggs. If harvest exceeds 15 eggs excess to be split equally between purchaser and vendor.
- Winning bidder has the option of selecting the flush sire from the current Mawarra herd sires or AI battery.

Four (4) Nuclear Transfer Embryos

VENDOR LE MARTRES LIMOUSINS

DONOR: LE MARTRES CELEST OR LE MARTRES FIFI

DAM: Le Martres Fifi LEM2F57 (P)(PU)

DAM: Le Martres Celest LEMPC55 (PU)

DESCRIPTION:

Nuclear Transfer is the latest scientific reproductive technology. Tissue is collected from the donor on property and embryos are developed in the laboratory. Embryos are suitable for export to all states of Australia and to all Overseas Countries. No semen is involved. The embryos are exact duplicates of the donor. "What you see is what you get".

The Le Martres Limousins herd was established in 1988 and over the ensuing years the principals have focused on accumulating Elite Cow Families selected on grassland performance. Then, in turn, scientifically engineering the pedigrees of all dams to carry at least 3 or 4 of these families. "The strength of any Beef Cattle Breed is the power in the dominant females".

Pedigree:

-----> LE MARTRES ATLAS (PU)
SIRE -----> LE MARTRES DALEY (P) (PN) (AA)
 -----> LE MARTRES SUCROSE (P) (PU)
LE MARTRES FIFI (P) (PU)
 -----> LE MARTRES WASHINGTON (PN)

---> BEWICK LUCY LAL-003 (PU)

TOPAKI NERO PN147 (P) (B) (PN)**TOTARA BLACKBIRD BD332 (PU)**

---> EDMOND CIM58 (PN)

---> ESBROUFFEUR (PU)

DAM ---> TOPAKI ALICE AP2 (PU)**DAM** ---> TOTARA NERIDA NC45 (PU)

---> GLENTARFF OLGA OP2 (PU)

---> TOTARA LB 27 (PU)

Topaki Nero is an outstanding young sire. He was born small and grew like a mushroom. Showing lots of this strength of character in the above photo. His dam was the renowned Topaki Alice, an Edmond daughter. An incredible cow.

Totara Blackbird is an outstanding mature black dam. Selected as an Elite Dam based upon her ability to repeatedly produce progeny better than herself. Of excellent body type and milk performance.

Le Martres Limousins imported these embryos into Australia as an outcross bloodline. The progeny will be expected to be black & polled and sure to please. **Le Martres Limousins highly recommends these embryos.**

Pick of the Herd Flush - Sample Females Shown

LE MARTRES ANABEL LEMPA63 (PU)

LE MARTRES BRIDGET LEMPB51 (PU)

LE MARTRES BLACK ANTOINETTE LEMPA08 (PU)

Description:

Nuclear Transfer is the preferred technique. Sampling anytime during the year.

Nuclear Transfer is the latest scientific reproductive technology. Tissue is collected from the donor on property and embryos are developed in the laboratory. Embryos are suitable for export to all states of Australia and to all Overseas Countries. No semen is involved. The embryos are exact duplicates of the donor. "What you see is what you get".

The Le Martres Limousins herd was established in 1988 and over the ensuing years the principals have focused on accumulating Elite Cow Families selected on grassland performance. Then, in turn, scientifically engineering the pedigrees of all dams to carry at least 3 or 4 of these families. "The strength of any Beef Cattle Breed is the power in the dominant females".

Ian Martin, Senior Principal, who milked Dairy Cows for 40+ years prior to entering the Stud Beef Cattle Industry, has overseen selection for milk production, udder shape and longevity, teat size and milk navel. All of these important details have been scrutinised by the Master.

The herd has now reached most of these goals and so with confidence **Le Martres Limousins proudly offer this great opportunity to purchase a Female Flush.**

SIRE:

Both sire and dam are truly elite animals, both genetically and phenotypically. Stratosphere Multi-Traitleader, has a great track record. Sons have sold to \$20,500 (top selling bull, All Breeds in WA in 2011, M Engine Driver), others have been Junior Champion Bull in Perth (M. Blockbuster), Senior Champion Brisbane & Beef 2009 (M Mr Cool) while daughters are making outstanding matrons. Just one daughter shown, was Junior Champion Perth 2011 (M Showgirl F83).

DAM:

Showgirl T54 Trait Leading Female. Is an elite breeder and has a proven track record that stands out above the crowd. A daughter M. Showgirl A130 was Supreme Junior Champion Heifer ALL Breeds Perth 2006 while her daughter M Showgirl F83 was Junior Champion Female Perth 2011. Another daughter of T54 sold for \$9500 as an unjoined female at the 2005 MG World Congress. Four sons, all sold through the ring, ave \$5750. Fantastic opportunity to acquire 'leading edge genetics' with a proven track record. No guess work here!!

VENDOR MONTEREY MURRAY GREYS **Monterey Murray Grey Female Flush**
Pick of the Herd Flush - Sample Females Shown

Description:

The successful purchaser is able to pick and flush a female from the MONTEREY Herd. The flush is to take place by end of May 2016 The flush can be managed and take place on farm at MONTEREY Murray Greys or at an agreed recognised breeding centre. The winning bidder is to pay all associated costs with flushing and any export costs if applicable. The vendor guarantees a minimum of 4 A grade eggs from the flush. Should the flush produce 20 A grade eggs all are the property of the winning bidder. Two straws of semen from our semen tank are available to the purchaser if they require it, at no charge. The only such chance to acquire genetics 'off the top shelf' from a herd recognised as the Breed's foremost female producer. The calibre of the herd can be gauged by... Monterey having sold the top selling female at the Premier MG sale, in Wodonga Vic. for 5 of the last 6 years to a top of \$15,000. ... Monterey sold a pen of purebred Murray Grey commercial heifers PTIC for \$2650 in Feb. at the 2015 Annual Sale. (A new National Record for commercial beef heifers PTIC) ... Monterey holds the largest on property bull sale in the Breed. In excess of 100 bulls are sold through sales and privately each year. ... Monterey consistently has the largest number of Performance Trait leaders in the Breed on MG Group Breedplan.

VENDOR Monterey Murray Greys **Monterey - Greyman Female Flush**
Olive Brahmans
Droonoodoo Brahmans **MONTEREY STARLIGHT X OLIVE MISS BRISBANE OLV 503**

Description:

GREYMAN EMBRYO LOT The flush is to take place by end of May 2016 The flush can be managed and take place at Genomix or Droonoodoo. The winning bidder is to pay all associated costs with flushing and any export costs if applicable. The vendor guarantees a minimum of 4 A grade eggs from the flush.

SIRE MONTEREY STARLIGHT

DAM OLIVE MISS BRISBANE OLV503

A fantastic opportunity to source the 'best of the best' to access genetics that can take Greymans to a new level. STARLIGHT is an exceptionally well muscled Murray Grey with docile temperament, super smooth shoulders, great length and width while possessing one of the best butt profiles around. Not only does he have the muscling but he has the softness (fat cover) to produce outstanding carcasses that meet MSA standards with ease. His dam is an outstanding female with first class fertility (rearing 13 calves). Blend Starlight with the power, presence, structure and potential that Olive Miss Brisbane possesses and you have something very special. Miss Brisbane is the daughter of the elite Olive Brahman female that won Supreme Brahman Exhibit at Brisbane in 2014 and was sold to Thailand for \$80,000. Opportunity Knocks!!!

Buyer _____ \$ _____

VENDOR MONTEREY MURRAY GREYS

BUYER'S CHOICE: MONTEREY STARLIGHT or MONTEREY SUNDOWNER**Monterey Starlight: Twenty Five (25) Semen Straws (Export)**

Monterey Starlight

Description:

Monterey Starlight. Semen licensed for Canada, S America, Chile, Argentina, S Africa, China Trait Leader-Scrotal, Retail Beef. Starlight is a unique bull having tremendous muscle development yet retaining excellent fat cover.

Once described by Prof. Harlan Ritchie as 'the best muscled British Breed bull I've ever seen with excellent cover'.

Supreme Murray Grey Exhibit Perth Royal Show. His dam was Junior Champ Female ALL BREEDS at Perth Royal Show.

Starlight has bred outstanding sons, being the sire of M. Gotcha, M.Sensational, M. Marvelous, M. Whirlwind etc.

His dam was the Junior Champion Female All Breeds at the Perth Royal and he has been a prolific sire of elite females.

Has the distinction of being one of the few bulls that has left a dynasty of sons, grandsons and great grandsons that have gone on to be top stud sires. (Buyer has the option to purchase up to a further 300 straws qualified for export).

---> ORCADIA PARK CENTURY

SIRE ORCADIA PARK SUNDANCE

---> ORCADIA PARK CLAIR 12TH

---> PARAFIELD BUDDY

DAM DOUBLE D MATILDA M20

---> DOUBLE D MATILDA 771

Description:

Fifteen (15) Semen Straws in 3 Lots of 5. SIRE Double D Ace R62. In 1998 in conjunction with Bookoola Stud we purchased Double D Ace R62 privately. This 1120 kg frame 7 Sire was an AI son of Orcadia Park Sundance out of Double D Matilda M20. Matilda M20 was all breeds champion cow at Brisbane Royal in 1994. Ace R62 was Reserve Senior Champion at Brisbane and Sydney Royals and All breeds Champion at the North Coast National. Every calf that Ace sired was easily born but went on to be above average in size. Unfortunately we lost him after only one season however semen was collected and he has been used sparingly over the years. Sons that have sold include Whitburn Boseley who was Champion at Sydney Royal for \$20,000 and Whitburn sold another Ace son who topped the Roma sale last year at \$5,000. Ace R62 sire has flown under the radar and purchasers have a unique opportunity to secure the blood lines of this superior sire

Embryo Package – Goondoola Miss D G02 x Red Fine Line Mulberry 26P(4 embryos)

We are pleased to offer a unique flush out of the 2012 RAS Supreme All Breeds Junior Female. Goondoola Miss D G02 won the hearts of many across Australia as an 11 month old female when she won the 2012 Dubbo Beef Spectacular Junior Interbreed Female and then went on to be the 2012 RAS Supreme All Breeds Junior Female.

Red Fine Line Mulberry 26P is the 2006 Supreme Champion Bull at Farmfair International in Edmonton, Canada. Since his introduction into Australia, Mulberry made his mark stamping his progeny with depth of side, easy fleshing and udder correctness. Mulberry semen is now off the open market within Australia.

Miss D is a beautiful deep red female with tremendous doing ability and presence. Her capacity, thickness and overall completeness sets her aside in many circumstances. We believe that her performance characteristics combined with the strength of Mulberry will present calves with style and consistency that you are continually impressed with.

Miss D's Achievements:

- 2012 Beef Spectacular Junior Interbreed Female
- 2012 Beef Spectacular Heifer Show Grand Champion
- 2012 RAS Supreme All Breeds Junior Female
- 2012 Bathurst Royal Supreme Angus Exhibit & All Breeds Female
- 2012 National All Breeds Jackpot Heifer & Grand Champion
- 2012 Cowra Show Supreme Exhibit
- 2012 Melbourne Royal Supreme Red Angus Exhibit
- 2014 Blayney Show Interbreed Female

Conditions:

- Guaranteed 50% conception if an agreed ET technician is used to implant embryos

Embryo Package – BST Tullatoola Robin's Doll C104 x Red DMM Glesbar Barndance 35X (4 embryos)

BST Tullatoola Robin's Doll C104 is a renowned high producing donor at Goondoola. We have watched this female develop and grow into such a feminine, correct, deep bodied female and knew she would be one that we want to base our herd around. Her progeny has had enormous success around Australia proving she is capable of producing greatness.

The sire of these embryos Red DMM Glesbar Barndance 35X was extremely successful in his show career overseas being the 2012 Grand Champion Red Angus Bull at Canadian Western Agribition and Farmfair International where he went on to be the Supreme Champion Bull.

We believe the overall combination of capacity, thickness and soundness these individuals both possess will produce a high quality set of calves that will stand out within your herd.

Conditions:

- Guaranteed 50% conception if an agreed ET technician is used to implant embryos

SIRE:

This US sire Andras New Direction is backed by outstanding performance data and is described as a big bodied, capacious powerhouse, with an outcross pedigree and robust phenotype. We intend using him widely in our AI program, to improve calving ease, growth and carcass. These embryos will give the new owner the chance to tap into some of the very best and most current genetics with built in fertility and soundness. Hicks Red Angus are known as one of Australia's largest Red Angus performance herds.

DAM:

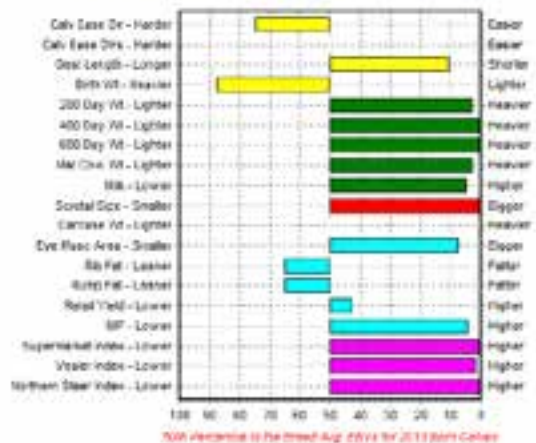

A beautiful young cow that offers a ton of growth, length and carcass, with top 1% 400 day weight, top 1% 600 day weight and top 10% eye muscle area and intra muscular fat. She is structurally sound with great feet and udder. She calved before her second birthday and again in her third year, now flushing. Her pedigree includes our own sire Hicks Ada E565 that has consistently produced our sale topping bulls since he started with his first progeny. Her dam is from one of our top Patricia families.

This US sire Andras New Direction is backed by outstanding performance data and is described as a big bodied, capacious powerhouse, with an outcross pedigree and robust phenotype. We intend using him widely in our AI program, to improve calving ease, growth and carcass. These embryos will give the new owner the chance to tap into some of the very best and most current genetics with built in fertility and soundness. Hicks Red Angus are known as one of Australia's largest Red Angus performance herds. Dam Hicks Red Patricia Z614 is possibly the best cow we have owned in 65 years of pure bred breeding.

DAM:

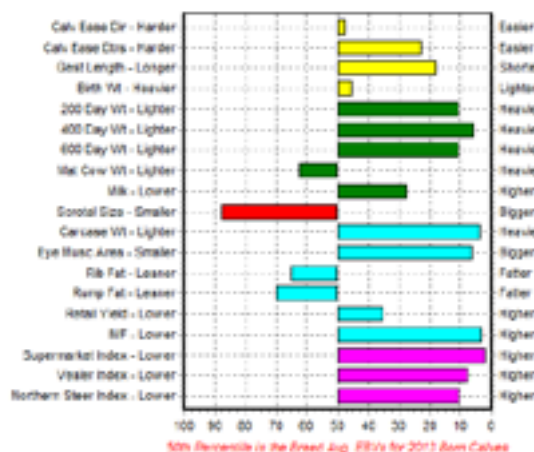

This 10 year old cow does the lot. She has had 9 calves one every year since a two year old. Four of her sons have been used as sires in our herd. As a 10 year old cow she is as sound as you can make them, with perfect feet and udder and great temperament. She is backed by figures that are still up the top, with better than average calving ease, top 10% growth and top 5% carcass, muscle and IMF. SM Index \$53, Vealer \$42 and Northern \$51. Her pedigree is stacked with the who's who of the Red Angus breed with LCC Cheyenne a trait leader for 200 day, 400 day and 600 day growth and milk, and Leachman Ladiesman, Leachman Heavenly, Leachman Robinhood all performance leaders in their day. Combine this with Andras New Direction, the latest US sire with a stacked pedigree of the most successful bloodlines in the Red Angus world. He is described as a crowd favourite. Study the photo to see why he is one of the most used Red Angus sires in the US. The Hicks Beef herd was recognised this year when the family was awarded the Beef Farmer of the Year for South Eastern Australia.

Description:

EXPORT eligible Flush Lot in Either Marellan Isobel 2018 (P) OR Marellan Molly 2137 (P). Purchaser to pay all flushing costs and export costs (if applicable). Please speak to Lincoln about sire options.

Guaranteeing a minimum of five (5) A-Grade embryo's.

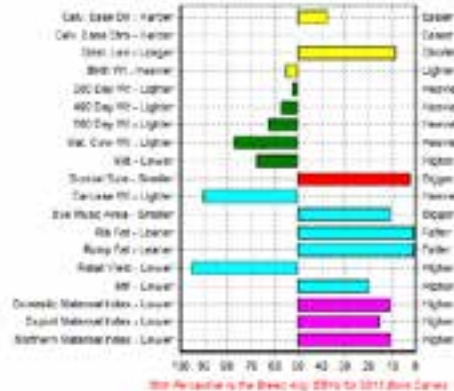

Isobel 2018 (P) and Molly 2137 (P) are two of our best young cows, both will calve with their 2nd calf in July/August. Isobel 2018 has that unmistakable Isobel "look" that has lead to that family being potent and successful in numerous countries. She is a full sister to Prince Caspian and a maternal sister to Nicodemus, Queensland Red and Quade Cooper. Isobel 2018 is a long, feminine female that maintained her body condition very well whilst lactating. Molly 2137 is our best young Nicodemus daughter. Nicodemus is one of our leading sires, virtually all of his sons are working in commercial herds in Central Queensland. Molly 2137 is a moderate framed cow that is super productive, she has a nice carcass and ideal doing ability. Molly 2137 and her first calf (Marellan Rene Ranger) at 8 months had a combined weight of over 1000kg. Molly 2137 and Rene Ranger will be on display at the Marellan site, site 254C.

ARE YOU TRADING PROFITS FOR POPULARITY?

Let's face it, costs keep rising but prices don't. You can't pay tomorrow's bills with today's production. You need change; your system must return more, without increasing your risk. And it must generate sustainable, multi-trait performance, and do it simply. That's the kind of result you get when you add Shorthorns. Because Shorthorn cattle are bred to solve problems, not create them. And they are in demand. Shorthorns can complement your existing program like no other because they improve all the traits that increase your profit, not just a few. We know your program works today, but when you are breeding cattle that must work tomorrow, count on Shorthorns to increase your bottom line.

SIRE:

Yamburgan Tobermorey F90 has the combination of genetics we value as a stud sire. He combines the maternal strength of Theodore with the carcase attributes of the New Legend cattle. Tobermorey has the maturity pattern, muscle shape, depth and fat distribution in a red, slick coated package. He is the leading bull of the breed for the Northern Maternal Index and is in the top 1% of the breed for Calving Ease Daughters, Domestic Maternal Index and Export Maternal Index. He is also a trait leader for 400 and 600 day weight.

DAM:

Yamburgan Cloudy C61 is the dam of our 2014 sale topping sire, Yamburgan Octagonal H246, selling for \$28,000 to the Carlton Stud, SA. She is also the dam of Yamburgan Sparta F149 (homozygous poll), a leading sire at Manchee Agriculture. F149 is also being used in New Zealand. Cloudy C61 is a very correct, quiet natured female with excellent constitution, udder and teat shape. A very consistent, high quality breeding female who we rate very highly within the Yamburgan Stud. A rare opportunity to purchase the very best.

Pick of the Herd Flush - Sample Females Shown

Yamburgan Connie D133 (P), dam of Y Tobermorey F090

Yamburgan Matilda 59th (P)

Yamburgan Matilda 45th (P)

Description:

Yamburgan is part of the Manchee Agriculture operation and has been producing superior stud and commercial cattle since 1947. The Manchee Agriculture breeding program aim has been to deliver cattle that breed consistently and deliver superior profits. We have won over 43 industry leading feedlot and carcass awards in the last 5 years with a strong emphasis on paddock to plate attributes.

Flush Conditions:

The successful purchaser is able to pick and flush a female from the Yamburgan Herd. The flush is to take place within 12 months of sale. The winning bidder is to pay all associated costs with flushing and any export costs if applicable. The vendor guarantees a minimum of 4 A grade embryos. The buyer has the option to use semen from the Yamburgan Semen Tank at no further cost, including sires collected for overseas. Overseas sires include Y Sparta F149 (Brazil & New Zealand), Y Tobermorey F90 (Canada & USA) and Y Zeus H140 (Brazil, Canada, Kazakhstan, New Zealand, Russia, Uruguay & USA).

SIRE:

Here is a great opportunity to get right into the front of our program, as we are yet to implant After Shock embryos ourselves. The Spread of figures on the bull are incredible, with Top 10% for Calving Ease, Growth, Marbling and Rib-eye. Importantly for Australian conditions, he is in the top 1% for more Fat.

DAM:

C370 has been a standout for phenotype since she was a calf. Simply, she's neat, sound and soft. She has consistently delivered outstanding progeny by a range of bulls including TNT Tanker, Nichols Manifest, Triple C Bettis and GW Comfort Zone. C370 has a Yearling Weight in the top 10% of the US database making her our highest growth donor, yet she still has moderate mature frame size and lots of softness. These embryos are 7/8ths Simmental, so when mated to purebred Simmental will give purebred progeny.

These C370 embryos present a fantastic opportunity to access a proven performer with a bit of a different pedigree and outstanding phenotype.

SIRE:

Cowboy Cut is in the top 2% for API profit index. He is a really high growth bull, maintaining good calving ease. He has top-end marbling, great rib-eye and is top 10% for more Fat. He is a bull we're really excited about and are looking forward to seeing how he develops as part of our program.

DAM:

C324 is a really maternal cow. She has great femininity and does a wonderful job on her calves. She is the dam of the 2 top selling bulls in our 2015 sale. Both TNT Tanker sons, LCS Jackal J161 sold for \$16000 to Ulmarra Simmentals NSW and LCS Juggler J155 sold for \$11000 to Woonallee Simmentals SA. With her elite calving ease (top 3%) and the power of Cowboy Cut, these embryos have really nicely balanced EPD's across the board.

These purebred embryos are a really exciting prospect out of our Donor 'of the moment'. They will have the tremendous type C324 has consistently been producing, as well as a very nice EPD profile, with strong figures for calving, growth and carcase traits.

Woonallee Simmentals Female Flush

Pick of the Herd Flush - Sample Females Shown

Woonallee Charo J252

Woonallee Kathie G73

Woonallee Dreamlady J277

Description:

Woonallee was established in 1972 and the Baker family had the first Simmental calf born in Australia. In recent years we have grown our herd to 250 traditional cows and 50 Red and black cows. Our herd has been designed specifically for the modern day cattle person with cattle that possess explosive early growth, extra thickness, softness and style on a moderate efficient frame, this is what we call the "Woonallee Stamp".

The flush in the pick of the herd gives you the opportunity to access the very best we have from a herd that is rich in history yet extremely driven for the future. The choices are endless in our traditional herd which has produced Royal show champions in Sydney, Brisbane, Melbourne and Adelaide shows in the last 5 years. More importantly our ability to perform in the sale ring has allowed us to sell Bulls and females to every state in Australia. Bulls such as the Australian record priced Goldrush (\$46,000 in 2013) and Justified (\$45,000 in 2015) have been part of our recent successful sales.

The solid coloured part of our programme has been developed over the past 5 years. We have sourced the very best from the famous Lewis farms herd in Canada and have developed a solid coloured simmental with all of the traditional Simmental traits. We have left no stone unturned in our quest for solid red and black cattle that offer the "Woonallee Stamp", and the results are outstanding. We have retained the very best females from this part of our programme and with names like Charo (the same cow family that produced the \$170,000 Riddler bull at the 2015 Lewis Farms Sale), Amber (the legendary red donor female at LFE) and Keepsake, the opportunities are endless.

We are proud to be associated with this sale and the opportunity to offer you the best we have is something we have never done before and we look forward to working with the successful purchaser to find that hidden gem. We are also happy to open the lid on the semen tank and give you the access to the most elite Simmental sires in the industry. We guarantee 8 freezable embryos with a 50% conception rate if an accredited embryo technician is used.

SIRE:

Hirashigetayasu (ETJ001) J2351 Kedaka lineage shows strong propensity for growth and balance with a larger frame. An official Japanese progeny test showed that at least 80 percent of his steers would gain A5 grade, the highest given to carcasses in Japan.

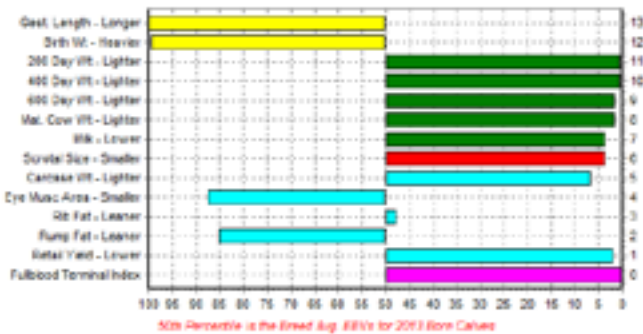

DAM:

Irongate Dai 2 Kinntou F15 is sired by Irongate Nombu Ichiryuno C016 who's progeny have recently achieved BMS 9+ with +500kg carcass. This embryo mating is free of all genetic tests and has a low 1% inbreeding coefficient. These embryos will produce high growth bulls or dams good for mating with high marbling cattle.

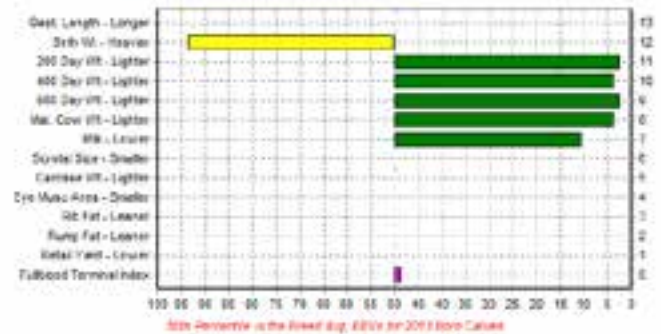

Pedigree:

Breed AVG	0.1	0.9	9	14	18	18	1	0	11	1.5	0.3	0.4	0	-	-	0

SIRE:

Bulls descended from Shigeshigenami especially TF148 have the best consistency in terms of meat quality. Despite the superficial shortcomings of thin shoulders and a lack of hip width, the meat quality is typically extraordinary and is having a huge effect in Australian carcasses.

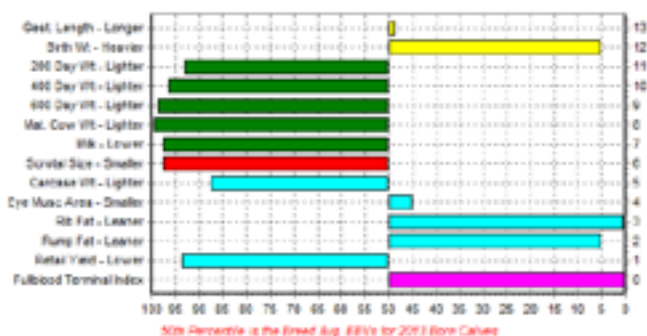

DAM:

The dam in this embryo mating IGWFD0025 is sired by Hirashigetayasu (ETJ001) who's Kedaka lineage shows strong propensity for growth and balance with a larger frame brought back to the progeny. With 0% inbreeding coefficient you can expect these embryos to deliver sound marbling progeny.
