

WATTLETOP ANGUS

# COMPLETE FEMALE DISPERSAL SALE

---

## 276 PTIC FEMALES

STAGE 1

**25 May, 2017 – 11am 'Wattletop' Guyra, NSW**

Your opportunity to buy the best. 35 years of breeding Angus with constant selection based on phenotype and genetic performance.

**LOT 3 NWPK72**

**SIRE: WATTLETOP FRANKLIN G188**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
1.9	4.3	124	15	74	5.4	2.5	\$136	\$150

K72 is beautifully mobile, walking and stopping with her head up with huge capacity and width of chest floor. K72 has superb figures across the board with a great mating to Glenoch K115 due 17/09/17.

**LOT 5 NWPK159**

**SIRE: RENNYLEA EDMUND E11**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
3.2	3.4	108	18	64	6.7	2.9	\$135	\$149

First calf graded 7. Mother Barunah E89 produced \$54,000 worth of progeny. Spectacular calving ease, fertility and marbling with a fantastic mating to Alpine Justice J108 due 19/07/17.

**LOT 7 NWPK218**

**SIRE: RENNYLEA EDMUND E11**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
1.5	4.5	113	18	66	6.7	2.9	\$135	\$152

K218 is a full sister to Lot 25 but with more growth. Her mother Barunah E89 produced \$54,000 worth of progeny. Lovely mating to Dick's 7 grading Westwood son Wattletop L45 due 12/09/17.

**LOT 9 NWPJ70**

**SIRE: SILVEIRAS CONVERSION 8064**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
-5.6	7	134	17	81	9.3	2.2	\$128	\$140

A beautiful young Conversion cow with a super maternal pedigree. J70's mother C136 is dam of E295 (Lot 23), the mother of Wattletop Franklin G188. J70's first calf Wattletop Lock L4 sold to Knowla Angus & Booragul Angus for \$16000. PTIC to Wattletop Frankel L435 due 17/09/17.

**LOT 10 NWPJ72**

**SIRE: TUWHARETOA REGENT D145**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
-0.4	4.3	121	17	77	4.2	3.1	\$121	\$141

Growth, carcass weight and marbling in this young cow. She is one of 3 full siblings with a sister L70 to be sold with calf at foot in stage 2 next March. Her brother L78 is stunning young sire used as a mating sire for cows in this sale. PTIC to Wattletop Westward L45 due 12/09/17.

**LOT 13 NWPJ397**

**SIRE: WATTLETOP FRANKLIN G188**

CE DIR	BWT	600	MILK	CWT	EMA	IMF	ABIS	HGRS
-1.1	5.3	133	19	67	6	2.9	\$136	\$158

Another favourite, beautiful young, G188 cow with matching figures. Her first calf L35 conceived to 1st AI. J397 has super growth, carcass, scrotal, carcass & feed efficiency. PTIC to Wattletop Westward L45 due 13/08/17.

## Welcome to Wattletop Angus' Complete Female Dispersal Sale – (Stage I)

**I have always thought things should be done with Passion, whether it be following Geelong Footy team or fishing, or cooking, eating and sharing with family and friends.**

**That is how I have bred Angus cattle for the last 35 years – with Passion. And together with Passion, I believe I have done it with integrity and a focus to breed cattle that are sought after for the right reasons. That it is to perform where it counts, in the paddock, in the feedlot, in the chiller and all importantly, on the plate.**

Due to succession and family planning and property distribution, the time has come to wind up my beloved Wattletop Angus Herd. My daughter Jess and her husband Henry MacDougall have moved back to Jess's home Wattletop to start their own commercial operation running angus cows and breeding F1 wagyu.

The 270 females that we are offering are the absolute best of the herd. Over 50% of the offering are the youngest two age groups (Ks and Js). The first 28 lots I have identified as potential donor cows. Some we have flushed and others have been selected for their ability to consistently produce progeny of outstanding phenotype, fertility and market acceptance with high performing EBVs. Of course there are numerous other cows scattered throughout the offering that will make excellent donors in any seedstock herds.

Stage 2 of the Wattletop dispersal which will be on the 15th March 2018 will include the youngest two age groups of PTIC "L" heifers with calf at foot as well as the PTIC "M" heifers.

The Wattletop Angus Herd has delivered to me over the years, an immense source of satisfaction and pride and of course a very handy income. As in all business, the relationships that are made are such an integral part of doing what we do. As all seedstock producers know, you can't be half hearted about breeding stud animals. It takes a huge amount of hard work, dedication and a lot of help from a lot of fantastic people.

People like Kevin Davidson and Donna, who worked at Wattletop for 12 years (26 year relationship this year) and still helps every year on sale day and buys a bull every year while in the sale ring and still AI's most of our cows these days.

Peter Brown has become a good mate after years of association and implementation of AI and ET programmes. Rob Pashen has done virtually all our ET work over the years. He is an outstanding technician producing some fantastic results for us over the years like 91% PTIC in an autumn programme years ago and 81% last spring in a difficult year.

Rob always seems to work at Wattletop on Wednesdays (Fish truck in Guyra day). We often talk more about food than cows and drugs!!!

Ali Cairns put her heart and soul into Wattletop for 10 years. The land and the animals were her absolute priority. She planted 1400 trees every year and carried out all the stock moves and feed assessments as well as paying the bills. She single handedly tagged and weighed around 2500 calves at Wattletop.

Dick Whale has had a tremendous impact on the Wattletop herd, sourcing genetics from all over Australia and America. He has graded every cow in the herd every year for the past 10 years. He has designed most of our matings (which I usually argue about and change a fair portion of!!)

Mitch Bennett has only been with us for two years. I am amazed at how quickly he has picked up the stud game with his knowledge of our cow herd and dedication and passion for the Wattletop Operation.

I have been on many fun trips to the US with Dick and other great Australian Angus breeders in search of new sire prospects and I'd like to mention the prolific impact that Bill Rishel's bloodlines have had on my herd. B/R New Design 036 was a game changer for the Angus breed and pops up in so many great Australian pedigrees. Most of the D drop that remain in the herd are by B/R Ambush 28 which is a true testament to the soundness and longevity of this bull.

John Portas did a fantastic job for eight years running Stratton growing and preparing sale bulls. His observation skills were outstanding. If an animal had pink eye or foot abscess, they were always treated that day.

Tony Dowe has been a great supporter of Wattletop over the years. We were so lucky to have Tony auctioneering at our early sales when his rostrum was a pallet of salt blocks. Tony passed the baton to Paul Dooley who has done an outstanding job selling Wattletop bulls.

We have had a great relationship with Sam White from Bald Blair and Andrew White from Eastern Plains over the years when we jointly marketed and advertised our bull sales under the WEB banner.

We had the greatest fun doing bizarre photo shoots with shots like the three of us sitting on one horse or sitting at a dinner table wearing dinner jackets with 100 young bulls around us, with the best one being with a lovely old bull X109 when he came and joined us at the table eating hay with me sitting on his back.

Lock classing heifers at Paraway Pastoral's Burindi Station with manager Richard Puddicombe

"Paraway Pastoral company is strong on their philosophy of being a consistent and reliable supplier of quality livestock."

Wattletop Angus Bulls over the past 8 years, have provided great support for that philosophy.

Our Burindi self replacing Angus herd is now highly regarded, and steer progeny consistently attract premiums for growth and reliable and desirable carcass traits.

Surplus Burindi females also attract plenty of competition when offered for sale.

The Wattletop Cows I have seen are magnificent, evident is their focus on structure, capacity, udders and temperament, which has flowed nicely into our Burindi herd."

**Richard Puddicombe**  
Manager, Burindi Station

Ben Simpson at OGA creative has dragged us kicking and screaming to be more professional at marketing the product that we are immensely proud of but have not always marketed as well as we could have. He has a terrific team and we appreciate the hard work they go to in designing our marketing material, our website and our catalogues.

I knew Richard Puddicombe (Pud) for a few years through pack horse rides in the Snowy Mountains before I ever sold him a bull. Pud was the first Manager for Paraway on Burindi at Barraba and has done an outstanding job developing the property Burindi and putting together a highly productive cow herd whose steers are highly regarded by all major feedlots in the north. It has been satisfying to develop a strong supply relationship with Paraway Pastoral supplying the majority of their bulls. They have become one of the leading suppliers of steers to Killara feedlot with best daily weight gain and best grade and are highly sought after by Rangers Valley. Six animals had a marble score of eight in one consignment.

There are many more breeders who have been major supporters and purchasers of Wattletop bulls like Greg Rafferty of Fernside, Rylstone, Ken and Barbara Ellis, Killarney, Wards Mistake, Peter and Christine Hall Who make great hay and hate my bulls but keep buying them!!! Peter Nicols, Throwley Station, Mike Campbell, Wirribilla, Walcha. James and Ted Laurie, Knowla together with Tim Vincent, Booragul sharing in at least two stud sires, E111 and Wattletop Lock L4. Glenrock Station have bought 49 bulls in the last 2 years which is a wonderful order for us. Tony Maurici from Castlebar, Cassilis bought 57 bulls over a four year period. Renato Gaspari, Coots Creek, bought approximately 100 stud cows and 6 bulls over a four year period on Auctions Plus and never set foot on Wattletop. He was a great user of Auctions Plus. James Harris from Abbingdon always bought a couple of good bulls every year. Fred Bell was a genuinely good supporter buying a good bull most years.

We have sold bulls to Tasmania, King Island, South Australia, Victoria, New South Wales, Queensland and the Northern Territory.

*I have made some great friendships and had a lot of fun and I will miss it.*

Regards,  
Lock Rogers

## Important Wattletop Sale Dates

### Herd Dispersal

The Stud Herd will be sold in a 2 stage complete Dispersal of 540 PTIC females.

#### Stage 1

May 25th 2017  
270 PTIC Cows, rising 3 and older

#### Stage 2

March 15th 2018  
– 270 PTIC females – 120 "L" Heifers PTIC and with a calf at foot  
– 150 "M" Heifers PTIC

### Bull Sales

August 2nd 2017  
120 Bulls on offer

August 8th 2018  
120 Bulls on offer

## Sale Information

### Sale Location

**PLEASE NOTE: DIFFERENT LOCATION TO THE BULL SALE.**

Stage one of the female herd dispersal will be held at "Wattletop", 18kms east of Guyra on the Guyra-Ebor Road.

### Refreshments

Complimentary morning tea, lunch and refreshments will be catered for by Bald Blair Primary School.

### Health

The routine vaccination program for the cow herd includes giving the cows a multi min, B12 and selenium and pesti guard prior to joining. We gave them the following treatments as part of their pre calving program on the 2nd and 3rd of April.

- 7 in 1
- Pestiguard
- Dectomax
- Fasinex

### Johnes Status

Wattletop is an MN2 herd.

### Pregnancy Status

The cows were foetal aged on the 19th of January by Robert Ferris from Australian Livestock Scanning Services (non vet contractor) to determine whether the cows were in calf to the AI or paddock sire. The detected sire has been shown in the comments as well as an average of the predicted EBVs for the progeny.

**Please note** that there are two cows that were not foetal aged but were preg tested, Lot 263 D244 and Lot 202 G206.

We have included the dates they were AI'd and joined to the paddock sire.

There are no guarantees that every calf will be by the foetal aged sire so if there are any queries about the sire because of variation in the calving date please let Lock know so that we can determine who the next possible sire is.

### Genetic conditions

All females offered will be free of the genetic conditions of AM, NH & CA. There are cows in the sale that are carriers of DD. Between printing this catalogue and the sale all cows with a 1% and higher chance of carrying DD have been tested and results will be available on a supplementary sheet on sale day. Closer to the sale day these results will also be available on the Angus Australia website on the online catalogue.

### Inspection

Cows will be available for inspection on Wednesday the 24th of May from 2pm and from 8am on the morning of the sale. Private inspections are welcome any time by appointment.

### Insurance

A representative from Wesfarmers Insurance will be available on sale day to assist with all enquiries. We recommend purchasers insure these females.

### Stud Transfers

All sale lots will be transferred to their new owners within 60 days of the sale.

### Delivery

There will be a degree of urgency to truck cows as soon as possible (the week after the sale) to ensure safe delivery before calving. Local and interstate carriers will be in attendance at the sale.

### Air Travel

Qantas and Regional Express airlines fly to Armidale Airport. Please contact the selling agents for pick up arrangements.

### Accommodation

#### Guyra

Guyra Park Motel  
(02) 6779 1022

#### Shiralee Motel

(02) 6779 1380

### Angus Society Registration codes

- Herd Book Registered (HBR)
- Angus Performance Registered (APR)

### Angus Quality Assurance Catalogue

Cattle producers using Angus bulls are making more money than those who don't. But that doesn't apply to just any Angus bull.

Don't be caught out with unregistered bulls with unknown backgrounds and without Angus Group Breedplan figures. Progeny on unregistered bulls are INELIGIBLE FOR CAAB™ and ASSURED ANGUS™ tags.

As a service to bulls buyers, the Angus Society has introduced a Quality Assured catalogue giving buyers confidence that bulls are registered and the catalogue truly reflects official data.

For more information contact the Angus Society or visit the website [www.angusaustralia.com.au](http://www.angusaustralia.com.au)

## Auctions Plus Interface

This sale will be a live physical auction through the sale ring at Wattletop. The sale will be interfaced with Auctionsplus (internet bidding) as well as audio streaming, that is, auctioneer can be heard in real time.

**Important Information:**

- Bidding is only available to registered AuctionsPlus users
- You must register at least 24 hrs prior to the sale with AuctionsPlus Sydney on their website: [www.auctionsplus.com.au](http://www.auctionsplus.com.au)

For further information contact the Auctionsplus Office on 02 9262 4222.

**AuctionsPlus™**

*Can't make the sale?*

*Log onto AuctionsPlus and bid on your phone, tablet or computer*

**REGISTER**

1 FREE once off registration for all auctions.

**VIEW CATALOGUE**

2 Stock history, photos, videos, pedigrees and more.

**LIMIT BID**

3 Can't make the auction? Set your maximum bid prior to the auction and let the system bid for you.

**ENTER AUCTION**

4 Log into the auction anytime, anywhere and bid on your mobile, tablet or computer.

**CONTACT SELLER**

5 Contact selling agent to arrange payment and delivery.

**PAYMENT**

6 Via the selling agent's terms and conditions.

**DELIVERY**

7 Arrange transport of livestock at your expense.

Log in today at [auctionsplus.com.au](http://auctionsplus.com.au) or call 02 9262 4222

# Let IBMS tick all boxes for you

## REVIEW AND DESIGN BREEDING PROGRAMS

- Breeding goals and markets targeted
- Breedplan and EBV's explained and tailored to your breeding aims
- Genetic defects (AM, NH, and others) explained in relation to the potential impact they may have on your herd
- Gene markers and molecular science understood.  
Taking your cattle breeding enterprise into the future

## ASSISTING BULL SELECTION AND PURCHASES

- Selecting herd sires at a seedstock sales.
- Selecting the bulls best suited to your breeding program
- Do you know how much you should be paying for these bulls

## ANNUAL HERD AND BULL ASSESSMENT

- Your breeders and herd sires accurately assessed for structural soundness.
- Non performing cows in your herd identified

## ADD VALUE TO YOUR BREEDING HERD

- Similar prices achieved for your surplus to requirement females as your feedlot or grass finished steers.
- A beef herd with optimum returns and minimal input costs

## Independent Breeding Marketing Services

For the past 10 years, every year in about December, Dick Whale from IBMS grades every cow and her calf with a score out of 7. To come to this score Dick takes into account their feet, leg angle, capacity, body length, udder attachment, muscling, temperament and overall doing ability. If a cow or her calf grade below a score of 3 they are downgraded to the commercial herd.

We believe this scoring method has allowed us to create a very structurally sound herd of cows with true longevity and a higher likelihood of producing phenotypically good quality calves. There are very few programs that are independently assessed and graded annually as the Wattletop herd.

Grade number	Description
1	Cull
2	Cull
3	Below Average
4	Average
5	Good
6	Excellent
7	Outstanding

Dick Whale IBMS, Bill Rishel (B/R Angus) and Lock on one of their tours to Bill's ranch in Nebraska.

## UNDERSTANDING ANGUS BREEDPLAN EBVs

### What is Angus BREEDPLAN?

Angus BREEDPLAN is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. Angus BREEDPLAN uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

Angus BREEDPLAN includes pedigree, performance and genomic information from the Angus Australia and New Zealand Angus Association databases to evaluate the genetics of animals across Australia and New Zealand.

Angus BREEDPLAN analyses are conducted by the Agricultural Business Research Institute (ABRI), using software developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England. Ongoing BREEDPLAN research and development is supported by Meat and Livestock Australia.

### What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

### Using EBVs to Compare the Genetics of Two Animals

Angus BREEDPLAN EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

### Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia and New Zealand.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to:

- ◆ the breed average EBV
- ◆ the percentile table

The current breed average EBV and percentile table is provided in these explanatory notes.

### Considering Accuracy

An accuracy value is published in association with each EBV, which is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50- 74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

### Description of Angus BREEDPLAN EBVs

EBVs are calculated for a range of traits within Angus BREEDPLAN, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this sale catalogue is provided on the following pages.

BIRTH			
<b>Calving Ease Direct</b>	(%)	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Calving Ease Daughters</b>	(%)	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
<b>Gestation Length</b>	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
<b>Birth Weight</b>	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
GROWTH			
<b>200 Day Growth</b>	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
<b>400 Day Weight</b>	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
<b>600 Day Weight</b>	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
<b>Mature Cow Weight</b>	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
<b>Milk</b>	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
FERTILITY			
<b>Days to Calving</b>	kg	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
<b>Scrotal Size</b>	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
CARCASS			
<b>Carcass Weight</b>	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
<b>Eye Muscle Area</b>	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
<b>Rib Fat</b>	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Rump Fat</b>	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
<b>Retail Beef Yield</b>	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
<b>Intramuscular Fat</b>	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

FEED EFFICIENCY			
<b>Net Feed Intake (Post Weaning)</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a growing phase.	Lower EBVs indicate more feed efficiency.
<b>Net Feed Intake (Feedlot)</b>	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
TEMPERAMENT			
<b>Dociity</b>	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
STRUCTURE			
<b>Front Feet Angle</b>	%	Genetic differences between animals in desirable front feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Front Feet Claw Set</b>	%	Genetic differences between animals in desirable front feet claw set structure (shape and evenness of claw).	Higher EBVs indicate more desirable structure.
<b>Rear Feet Angle</b>	%	Genetic differences between animals in desirable rear feet angle (strength of pastern, depth of heel).	Higher EBVs indicate more desirable structure.
<b>Rear Leg Hind View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from behind.	Higher EBVs indicate more desirable structure.
<b>Rear Leg Side View</b>	%	Genetic differences between animals in desirable rear leg structure when viewed from the side.	Higher EBVs indicate more desirable structure.
SELECTION INDEXES			
<b>Angus Breeding Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
<b>Domestic Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
<b>Heavy Grain Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
<b>Heavy Grass Index</b>	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Angus Group Breedplan EBV Percentile bands for animals born in 2015\*

Use this table as a guide to compare individual animals with the current genetic level of the Angus breed \* based on EBVs from the June 2016 Angus BREEDPLAN analysis.

**NB.** The composition of any selection index and actual \$ Index Value differences between animals is sensitive to the assumptions used in the BREEDOBJECT analysis.

## RECESSIVE GENETIC CONDITIONS INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

### **Putting undesirable Genetic Recessive Conditions in perspective**

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

***Key point: With today’s DNA tools undesirable genetic conditions can be managed!***

### **What are AM, NH, CA and DD?**

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

***Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.***

### **How are the conditions inherited?**

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

### **What happens when carriers are mated to other animals?**

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele), and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

***Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.***

### **How is the genetic status of animals reported?**

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on pedigree AM free – Animal has not been tested
AM__%	__% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Animal Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

***Key point: The genetic status of an animal is subject to change and will be re-analysed and adjusted each week as DNA test results of relatives are received.***

### **Implications for Commercial Producers**

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia’s Breed Development and Innovation Manager at (02) 6773 4602.

# IMPORTANT NOTICES FOR PURCHASERS

**~ SALE CATALOGUE DISCLAIMER ~**

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

**~ DNA PATERNITY VERIFICATION ~**

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

**~ PRIVACY INFORMATION ~**

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

***BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION  
TO THE ANGUS AUSTRALIA***

*If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.*

*I, the buyer of animals with the following registration numbers ..... from member ..... (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.*

*Signature: .....*

*Date: .....*

*Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.*

S A V PRIMROSE 8244  
S A V PRIMROSE STAR 1815

Notes: Big Sky was found and imported by Dick Whale. We love his progeny and those who have seen him are super impressed by his phenotype. He ticks all the boxes for calving ease, growth, carcase weight and EMA. Breedplan have him at +1.4 (top 60%) for IMF when in America he sits at top 2% for marbling which would make him well over +3 for IMF on breedplan. It makes it hard to use US bulls when Breedplan are so slow to pick up on US EPDs with their large data set.

TEHAMA ELITE BLACKBIRD K592  
TEHAMA ELITE BLACKBIRD H653

Notes: Y238 was uncovered in California by Dick Whale. We are immensely impressed by his progeny just weaned. The poor old Angus Society have him at +0.8 for IMF (bottom 20%) when his USA figures have his marbling EPDs at top 10%. It is a challenge using new sires from the states that may already have very good proven figures.

Notes: PTIC Glenoch K115 due 17/09/17. Another great heifer by G188 from the Dandloo family with Ambush 28 on the bottom side of her pedigree. She is beautifully mobile, walking and stopping with her head up with huge capacity and width of chest floor. K72 was flushed to Ayrvale General G18 in the spring for 13 embryos in the tank. K72 has superb figures across the board with a great mating to Glenoch K115.

Notes: J PTIC to Ayrvale General G18 due 19/07/17. J464's first calf L38 was used in the stud & is a mating sire for many cows in this sale. SUPER FERTILITY. J464's grandmother E13 calved at 14 months (mistake) the amazing thing was she had her 2nd calf G330 at 2 years when her normal peers were having their 1st calf. J464 is a super powerful G188 daughter with massive capacity, a really thick broody young cow.

## Experience Safety Reliability

### Experience

You have often spent years breeding them, so we understand the importance of handling your livestock with the greatest of care, minimum stress in the most time effective manner.

Our trucks, crates and drivers all come with the highest levels of expertise ensuring that your stock are delivered to your destination safely and humanely.

Our bulk tippers can do the hard work and load carrying they are designed to do, with ease and reliability.

### Safety & Reliability

Betts Transport is accredited nationally in the National Heavy Vehicle Regulator (NHVR) for mass, maintenance and fatigue.

We have a current, mechanically reliable fleet. Regular maintenance ensures that our trucks run efficiently and on time, covering all eastern states, as well as South Australia.

**Give us a call today, we would love to work with you.**

'Crap' photo by Lock Rogers

## From Angus Australia

### ASBP – Processing of Cohort 4 Steers Commences

The first mob of steers from Cohort 4 of the Angus Sire Benchmarking Program (ASBP) were processed and graded across the 30th and 31st June 2016.

This mob included 103 steers which were bred at "Burindi", Barraba, NSW which is a Paraway Pastoral property, managed by Richard and Ruth Puddicombe.

The steers, which were purchased by Rangers Valley as feeders, underwent a 270 feeding program including 100+ days in Tullimba research feedlot and the balance in Rangers Valley feedlot.

Out of the 103 carcasses, 94 (or 91%) graded marbling score 3 or greater while 8 bodies graded marbling score 5 or greater.

The eye muscle from ASBP steer PBHK182 from sire Wattletop Franklin G188. This steer had a carcass weight of 494 kg, dressing % of 60.5%, rib fat of 19 mm, 100 cm<sup>2</sup> EMA and Ausmeat marbling score of 5.

**Semen available, call Lock on 0427 792 007**

# Herd Status Certificate

Due to a change in the auditing of the Johne's disease market assurance program, this is the most valid certificate available.

<p><b>HERD STATUS CERTIFICATE</b></p>	<p><b>AUSTRALIAN JOHNE'S DISEASE MARKET ASSURANCE PROGRAM FOR CATTLE</b></p> <p><b>Certificate No. NC16052</b></p> <p>I certify that the cattle herd owned by:</p> <p><b>WATTLETOP PARTNERSHIP</b></p> <p><b>Wattletop Angus</b></p> <p>and run on the property: <b>Wattletop</b></p> <p>at: <b>Ebor Road GUYRA NSW 2365</b></p> <p>and which has been assigned the property identification code (PIC): <b>NE250949</b></p> <p>has satisfied the testing criteria and continues to meet the management standard required by the program.</p> <p>A Herd Status of: <b>MN2</b></p> <p>was assigned in: <b>2010</b></p> <p>This status is valid until: <b>30/04/2017</b></p> <p>Veterinarian's name: <b>Leisa BROWN</b> Veterinarian's address: <b>Guyra District Veterinary Services, 1/68 Ollera Street GUYRA NSW 2365</b></p> <p>Signature of Approved Veterinarian: </p> <p>Date: <i>7/6/16.</i></p>
	<p>This certificate will be withdrawn if there is evidence of disease on the property or if the herd owner does not comply with the conditions of the Australian Johne's Disease Market Assurance Program for Cattle.</p> <p><b>AUSTRALIAN JOHNE'S DISEASE MARKET ASSURANCE PROGRAM FOR CATTLE</b></p>
