# Welcome

The Better Value Charolais Group Stud & Commercial Spring Female Sale represents a great opportunity to access performance recorded Charolais females suitable to breed performance bulls and females for the commercial industry. With both stud and commercial females in this sale, there is something to suit all buyers.

Changes to property management have required a reduction in breeding females and this sale is effectively a dispersal of Orara's Autumn calving females. A majority of the cattle offered in this sale have been exposed to ticks, lutana and fire weed, either bred on the coast or adapted from the west for nearly 2 years which makes this an excellent opportunity for anyone interested in purchasing quality charolais females that are adapted to coastal conditions.

A feature of this sale are 30 Autumn calving cows with calves at foot and rejoined offered by Orara Waterfall Charolais located west of Coffs Harbour. Most calves are sired by Glenlea Hilton (P) lead sire from Glenlea's senior bulls in 2014 and leading son of 2011 Brisbane interbreed bull RP Redemption (P).

In addition, Orara Waterfall Charolais are offering a number of Spring calvers, either with calves at foot or to calve, as well as a further 20 Autumn calving PTIC cows. Rounding out this offering are a number of PTIC heifers from Glenlea Charolais along with a group of heifers bred on the coast.

The cattle have been run under commercial conditions and as such have had minimal supplementary feeding through a tight winter on the coast. We have photographed every female for this sale and some were in store condition at the time. They are all on quality improved pasture and will present in forward store to prime condition by sale day.

All calves, either from stud or commercial charolais females, are eligible for registration with the Charolais Society of Australia if required. All are by registered stud sires with DNA profiles on file with the Society.

As founder of the Better Value Charolais Group and with 42 years of experience breeding and selling charolais seedstock into all states of Australia through Glenlea Charolais, I highly recommend these females to any buyer, going into any environment.

*Roderick Binny*

### Comments

Selected in 2014 as GLENLEA'S leading rising 2 year old sire prospect. His calves have not disappointed, with moderate birth weight, an ideal combination of thickness and softness, good bone and weight gain with quiet temperaments.

We have used "Hilton" extensively in the stud. His sire was 2011 Brisbane Royal Interbreed Champion and has gone on to produce outstanding progeny all across the country for several studs that used him through AI.

"Hilton's" dam from one of Glenlea's oldest cow families has been a fantastic producer in the herd, with daughters becoming donors and sons selling to \$8000. A feature of the "Caarol" family has always been, moderate birth weights, very soft easy doing cattle, excellent udders with great temperaments.

### Comments

Selected as the leading yearling double polled sire prospect from the Glenlea Herd in 2014. We have some excellent calves on the ground with another drop due later in spring. Both sire and dam are breed leading performance cattle, with Hi Guy's own performance ranking him as a sire having moderate birthweights with those extra carcass traits of above breed average muscle with high fat cover EBV's. All progeny have been polled to date so we are very confident Hi Guy is homozygous polled (100% polled progeny). We are excited about his marbling potential as both parents are in the top 1% of the breed for IMF%. We eagerly await the first carcass scan data on his progeny. When aiming for high value grids with progeny from grassfed or grainfed programs, the combination of the extra growth, yield and marbling that comes from these types of sires can make \$100 to \$200 extra per head value on progeny.

### Comments

A double polled bull selected for our stud as an outcross to all bloodlines that Orara Waterfall Charolais was based on.

His low birthweight, excellent conformation and early maturity, growth EBV's and especially his carcass traits which are outstanding being top 5% of breed for both muscle and fat cover!

Most of the PTIC autumn calving cows from Orara Waterfall are in calf to this bull.

### Comments

Top priced bull at our 2011 Armidale bull sale at \$11,000 and has exceeded expectations through his progeny.

Top 1% of breed for low birthweigh, early maturing, with massive carcass traits, see his EBVs. His sons have been sort after by commercial breeders and very easy to sell. His daughters are some of the best "doing" cattle we have. Two joined daughters are features in this sale, both thick early maturing females PTIC.

### Comments

Fast becoming one of the great breeding bulls of the breed in Australia. Selected by Glenlea to add softness and polling to horned females and has exceeded all expectations. Progeny in over 20 studs. Amazing EBVs with very high accuracy puts him at the very top of the breed in Australia in many traits and overall. Proven by progeny Homozygous Polled. Low birthweight. Growth in top 1% of breed, EMA top 10%, Fat cover top 1%, IMF top 1%. Fine hair coat, tight sheath in all progeny, length and eye appeal. Loveevity - still a working natural sire in the Glenlea Herd. Sire and dam are breed legends in their own right. Used extensively over horned females with French sires at Glenlea and has added softness, 100% smooth polling (no scurs), lowered BW and increased calving ease. At the same time maintained growth, volume and substance that so many pure North American bloodlines don't. Semen available from UCBS, Allora QLD or contact Roderick Binny direct.

### Comments

Trait leading sire in the Australian Charolais breed for 200, 400, 600 day weight. Top 1% of the breed for retail beef yield and carcass weight. Both these traits are often overlooked but measure overall thickness and muscling much better than EMA alone. All this performance in a Polled, Red Factor sire!

Daughters are now weaning there second calves with great milk, perfect udders and good doers.

75% of progeny red factor.

Semen available.

### Comments

Senior Champion Bull at Sydney Royal 2010. He has become our most reliable easy care heifer bull, being in the top 2% of the breed for low birth weight.

His progeny being thick and square with plenty of natural muscling and fat cover have great commercial appeal.

With many daughters now into production, their doability and genetically added value milking ability are going to make them great breeders.

Top Priced bull at National Show and Sale 2006 at \$20,000.

His progeny have been so popular with both commercial and stud breeders. They have been used in cross breeding programs from Tasmania to Charters Towers in QLD. Tremendously thick progeny with high yielding carcasses and a very docile temperament.

His influence will live on in his daughters in the Better Value Charolais Group Stud Herds.

Semen available.

### Comments

Photo taken only 2 weeks out from a mob of females.

An outcross bloodline to the Glenlea Herd, our pick of three E.T. brothers born in 2013.

Tested Homozygous Polled, big testicles, explosive early growth, with moderate mature frame, top 1 % breed for milk.

Excellent EBVs combine with an early maturing phenotype to make this young sire standout to us. We have used extensively over heifers and selected mature females.

Semen available in limited release.

Sire of many of the Myall females in the sale both commercial and stud.

Great breeding bull that has great EBVs from many progeny, a feature being the outstanding carcass data in the top 1% of the breed.

His daughters breed on and produce industry focused progeny that increase value across the whole supply chain.

This sale will be the only chance to access proven progeny of this sire.

### Comments

Exceeding breeding expectations in many traits. Low birthweight calves with plenty of growth, thickness, softness and style.

His first progeny have had excellent carcass scan raw data. The doability of his calves are excellent and this is the number 1 trait selected for in the whole BETTER VALUE CHAROLAIS GROUP program. The greatest EBVs are of no value if sires and their progeny are not capable of performing in less than ideal seasonal conditions.

Approximately 50% of progeny are red factor and most are polled. 1/2 share purchased by Bauhinia Park Charolais, the Holzwart Family, Emerald QLD.

Semen now available from UCBS, Allora QLD or contact Roderick Binny direct.

# Autumn Calving Cows

## with calves at foot

These first 27 lots are the complete mob of Autumn calving cows at Orara Waterfall Charolais with calves at foot. None have been retained as we want to offer them in this sale as a feature.

Due to land use changes we are forced to reduce our cow numbers and this has been the foundation for this sale. As a group they are an outstanding line of mixed age females from first calvers to mature herd cows, that are very hard to part with. Both stud and commercial females are included with all details.

The calves are mostly by our leading sire Glenlea Hilton (P), who was selected in 2014 as Glenlea Charolais lead 2 year old sire prospect, with some by Glenlea Hi Guy (P) who was selected in 2014 as the lead yearling bull.

These cows have not had any special preparation and all were moved from west of the range to the coast in early 2014 and have adapted very well. They have been exposed to lantana, fire weed and ticks, and have had all health treatments to help that process and with management of the acclimatisation process have thrived in their new environment. They are able to move to anywhere without restriction.

Currently this mob are grazing improved pasture. Both cows and calves are gaining condition rapidly and will present in more forward condition than when photos were taken.

### Comments

High performance charolais female. Her sire is the number 1 French sire in Australia today and her Dam was grand champion female at the 2007 Charolais National Sale. Outstanding heifer calf at foot sired by GLENLEA HILTON (P) and rejoined the same from 1/6/15 till sale day 9/10/15. Top class unit that would fit into any stud charolais herd. Great EBV's with low birthweight and excellent growth. Her carcass data was not collected when she was younger but her phenotype and pedigree suggest that she will be strongly positive for EMA with good fat cover. Her heifer calf displays all these traits. Calf born 21/3/15.

Extra thick, red factor, polled young female sired by 2010 Sydney Royal Interbreed Champion. Outstanding red factor, polled heifer calf at foot sired by GLENLEA HI GUY (P). Rejoined to GLENLEA HILTON (P) 1/6/15 to sale day 9/10/15. Her dam was a great breeding Carabiner daughter, one of the best French sires ever imported to Australia, so a strong French influence in her breeding with her sire also by leading French sire IMPAIR. EBV's are mid parent and show low birthweight with excellent growth and very high milk, that's showing through in her lovely heifer calf born 13/03/2015.

### Comments

This first calver has a big future. Moderate framed, early maturity and loads of performance. She is double polled and has her whole life in front of her. EBV's predict top 10% of breed growth with low birthweight and balanced carcass traits. Sired by very well known US sire Cigar out of the high selling female at the now dispersed Gobongo herd. Has a sweet polled heifer calf at foot, with 3 generations of polled genetics behind her. Sired by the High marbling Glenlea Hi Guy (P), this calf is the youngest of the Autumn calvers born 26/5/15. Rejoined to Glenlea Hilton (P) 1/6/15 to 9/10/15.

# JACKSON ELLEN (P)

Animal ID: MEJ E24E

Sex: F

DOB: 24/09/2009

Vendor: ORARA WATERFALL CHAROLAIS

### Comments

Another feature female. E24 is from the leading cow family at Jackson Charolais. As with all these Autumn calving cows they are being offered as a group, all in, to reduce over herd size at Orara Waterfall to suit changes to farm management. These types of females are normally only offered at dispersals, which effectively this is. Sired by Rosedale Axle (P) out of the X24E female who had 7 calves broken in and shown to represent the stud. EBV's show very low birthweight, with outstanding fat cover traits. Double Polled Sire prospect white bull calf at foot sired by Glenlea Hi Guy (P) born 26/4/15. Her heifer calf from 2014 will continue her influence in the Orara Waterfall herd for many years to come.

### Comments

Another big volumed mature female with great milking ability. These Goodview (HEL) females are outstanding and I recommend anyone serious about purchasing charolais females this year to come along to our open day on 5th October and inspect these cows first hand. They will impress. Standout polled/scur white heifer calf at foot sired by Glenlea Hilton(P). Rejoined same 18/5/15 to 24/7/15. PTIC.

### Comments

Matriarch of the herd with a great production record. These females were catalogued in no particular order, just as we photographed them as the AuctionsPlus sale system has all lots offered simultaneously. Great polled bull calf could be a sire prospect. Born 29/3/15 sired by Glenlea Hi Guy(P). Rejoined to Glenlea Hilton(P) 1/6/15 to 9/10/15.

# GOODVIEW CHRYSAL (P)

Animal ID: HEL C5E

Sex: F

DOB: 1/04/2007

Vendor: ORARA WATERFALL CHAROLAIS

### Comments

It was a very difficult decision to offer all these outstanding "HEL" cows, C5E is no exception. Big volumed, soft and polled with heaps of milk. Her EBV's will lift significantly with more calves data recorded. These "HEL" females did not have progeny performance data submitted to BREEDPLAN until purchased by Orara Waterfall. A lovely white heifer, born 24/3/15 sired by Glenlea Hilton(P). Rejoined same 1/6/15 to 9/10/15. A real opportunity for buyers to put together a line of females with all progeny from an outstanding Sire and rejoined that way.

# Spring Calving Cows

This small group of spring calvers from Orara Waterfall were selected as a group out of one management mob that included joined heifers which we are retaining.

They have come through a tight winter and managed to calve down well. They have not been fed up for sale and they are all gaining condition rapidly now as Spring arrives.

This group includes both stud and commercial cows. When we purchased the herd the commercial cows showed the same quality as the stud cows and are able to have all progeny registered with the charolais society and performance recorded, providing full EBV's etc. Very similar to the Angus breed that have both Herdbook registered and performance registered cattle.

# Autumn Calving Cows

## PTIC

This group of Autumn calvers are tested in calf (PTIC). They have come through a tight winter being run under commercial conditions, however are now on improved pasture and are gaining condition rapidly. They will present on sale day in forward condition.

These females are sound, good doing cattle that have performance, muscling and good finishing ability. With a couple of exceptions, most have been joined to Little Valley Grandiose (P), an outstanding double polled sire (see details in the reference sire section).

These females include some outstanding individuals. A feature in this group is the line up of commercial females in their prime and sired by Palgrove Abode (P) (R/F) (see reference sire section for details).

These are a sound mob of high quality breeding charolais females, ready to go on and produce for their new owners in any environment.

Vendor: ORARA WATERFALL CHAROLAIS

### Comments

Big deep bodied, good boned mature cow by Palgrove Valiant. Red factor, polled, tremendously sound udder and teats for an older female. She has produced some outstanding progeny with sons selling \$8000. EBV's reflect milk and muscle, with moderate growth and that all important "doability". Still has plenty of life left and the calf she is carrying could be a champion! Joined to LV Grandiose(P) 13/5/15 to 13/7/15 PTIC.

### Comments

FEATURE LOT: Big volumed polled, red factor female with a very fine coat, good bone and great "doability". Sire was an outstanding sire with softness, thickness and volume. Dam was a big strong Palgrove Valiant daughter. She is a total outcross to all North American Bloodlines and has donor potential. This is the sort of cow you can breed stud sires and show champions. EBV's are balanced through all growth traits but it's her strength of phenotype that really appeals in this cow. A.I. to Voliet Hills Zachariah (P) (see reference sires) 10/6/15. Running with Glenlea Hi Guy (P) 24/6/15 to 13/7/15. PTIC.

# Joined Heifers

The Glenlea heifers were bred at Westbrook Station near Guyra, home of Glenlea Charolais. These heifers have not been to the coast, however they have had the full range of health treatments, as all Glenlea cattle do, and are able to travel anywhere.

These females are maiden heifers, specially selected for this sale to represent two outstanding sire lines in the stud from our joined replacement heifer mob. All have been AI'ed to planned mating's with specific breeding outcomes in mind. Specific details provided in the lot comments.

The six "Dougalsdale" heifers were bred and raised on the coast. These females are currently located at Westbrook Station, Guyra and delivery will be from there. Details of their joining sire "Gatsby" can be found in the reference sire section.

**Lot: 70****GLENLEA CHAROL 74TH (P) (R/F)**

Animal ID: GLE J41E

Sex: F

DOB: 14/09/2013

Vendor: R.J BINNY

**Comments**

FEATURE LOT: Polled, red factor, performance heifer again by "RP RIO" out of the "Caarol" cow family noted for low birthweight, softness and milking ability. This heifer is no exception to that description. Extra soft female with great volume and doability. Showing top 5% of breed for fat cover and top 1% for marbling (IMF%) still with above breed average EMA, low birthweight with plenty of growth give "CAAROL 74th" almost double breed average for export \$indexes. A.I. to EC No Doubt (P) a well proven US sire on 18/5/15 and running with Glenlea Jimmy (P) R/F till 31/8/15. PTIC.

### Comments

Another fine coated well grown heifer. Low birthweight with top 5% of breed for milk. A class heifer here. Joined to "Gatsby" 7/12/14 to 7/8/15. PTIC. Outstanding bloodlines combining Palgrove bred sire with a dam with original French Bloodlines and one of the all time greatest milk and calving ease sires "Duke261".

### Comments

Magnificent heifer, well grown, fine coat, polled and with great bloodlines. Performance data was never submitted for this heifer, hence no EBV's spread, but she is a class female in her contemporary group, matching or exceeding their performance. Joined to Palgrove Halycon (R/F) 7/12/14 to 7/8/15. PTIC.

### Comments

Well made polled female on more moderate frame with volume and extra low birthweight and top 1% of breed for Milk. Will develop into a lovely breeding female. EBV's reflect her phenotype of volume on a moderate frame. Bloodlines some of the best US bloodlines with a nice dash of French blood. Joined to "Gastby" 7/12/14/ to 7/8/15. PTIC.

# Bulls

**These four bulls are the lead group from Orara Waterfall and were calves at foot when their dams were purchased.**

**They are all outstanding bulls with lot 77, Goodview Javlin, a stud prospect sire. “Javlin” is an outcross to all the females in this sale.**

**Have a good look at them as this is a great opportunity to purchase a sire to go with your purchase of charolais females.**

**Lot: 77****GOODVIEW JAVLIN (P/S) (R/F)**

Animal ID: HEL J7E

Sex: M

DOB: 25/11/2013

Vendor: ORARA WATERFALL CHAROLAIS

**Comments**

Thick set, well covered carcass, red meat everywhere you look on him! Good growth EBV's indicating early to mid maturity as with all four of these bulls. Ideal over a mob of F1 bos indicus type cows or British bred cows. Lovely rich red factor will keep that stronger red colour in your line of weaners. Semen tested and ready to work.
