SELF REPLACING PRIME LAMB SHEEP

The Cashmore Oaklea Performance Maternal sheep stud, which is owned and operated by Don and Ann Pegler of Mt Gambier SA and John and Brigita Keiller of Portland Vic will be holding its 20th annual ram sale at the Hamilton showgrounds on Friday the 16th of October 2015.

We have been breeding self replacing XB sheep targeted at speciality lamb production systems for the past 33 years with excellent results.

Clients are using Cashmore Oaklea sheep in self replacing systems and are also mated to First Cross Ewes and Merinos to grade up to a full self replacing prime lamb flock. *Ewes are highly fertile producing mostly twins, with excellent mothering and milk, easy care and show a high resistance to internal parasites. Wether lambs are fast growing with excellent meat and skin qualities and ewe lambs are able to be joined successfully at 7 months of age.*

An online search of the Sheep Genetics Lambplan system <http://www.sheepgenetics.org.au/LAMBPLAN> shows Cashmore Oaklea is the leader in Australia producing high performance self replacing prime lamb genes. Developed from a Coopworth base the best maternal lines from other breeds have been added since 1994. We have been performance recording since 1982 and have in excess of 70,000 animals on the Lambplan data base. Over 4,500 stud lambs are tagged and fully performance recorded with full pedigree each year, these lambs are weighed at birth, weaning, early post and post weaning and as yearlings, they are scanned for fat and muscle measurements and individual faecal egg counts are taken to determine worm resistance. We also send to Lambplan adult body weights and pregnancy scan results each year on 8,000 fully pedigreed stud and flock ewes.

Cashmore Oaklea run stud sheep under commercial conditions and our clients report they are performing very well in SA, NSW, VIC and Tasmania. We ask you to consider the importance of the following points to your prime lamb business.

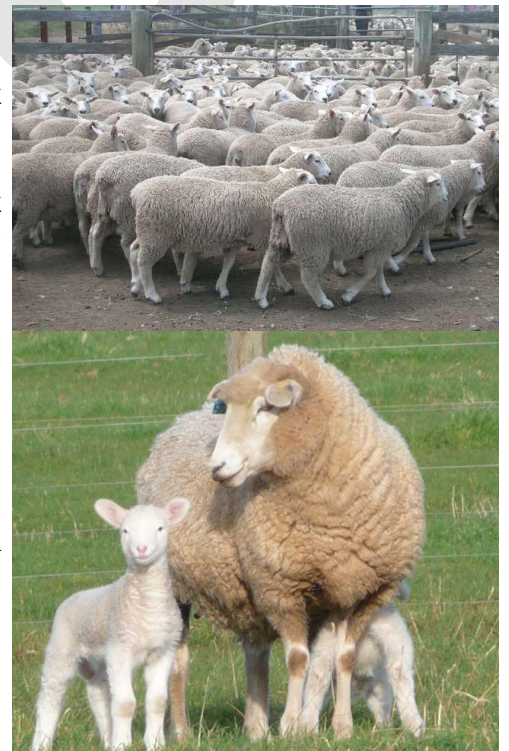

- **Fast 100 and 200 day growth**
- **Ample milk supply for multiple lambs**
- **Easy care**
- **Self replacing**
- **High numbers of lambs weaned**
- **Resistance to internal parasites.**

Sale rams are at the very top of the Lamb Plan percentile bands which is our guarantee that they will perform.

Also tight valuable skins and lower ewe replacement cost with a self replacing system puts you in control of your lamb business.

Looking forward to meeting you soon.

Don Pegler and John Keiller.
