More History at Kansas

Rob and Pam Crosby showing the Champion and Reserve Champion Steers at the 2008 Sydney Royal Angus Feature Show

Farmers Daughter U15

Kansas has conducted 15 Annual Bull Sales. The Stud had the honour in this time to have the Top Angus Sale Average on Two Occasions. In 2004 Kansas was the top average and in 2008 the record blew the rest away!

Then with the change to presenting younger bulls, the 2015 Sale of predominately 16 to 18 month old bulls averaged \$6,500.

Overview of our 2011 Female Reduction Sale

With Compliments

*Hi Rob + Pam,
We just thought we'd send you a catalogue so you could see what a great job Kansas genetics have done for our herd. 19 of our 40 lots have some type of 'Kansas' influence. Hope your bull sale preparations are going well.*

Looking forward, Looking Back

Matt + Shelley

Purchasers of cows at this sale have had fantastic success with Kansas Genetic material.

Trio Angus wrote us this lovely message in July "Hi Rob and Pam, We just thought we'd send you a catalogue so you could see what a great job Kansas Genetics have done for our herd. 19 of our 40 lots have some type of 'Kansas' influence. Hope your bull sale preparations are going well. Matt & Shelley" Trio bought a cow with bull calf at foot and in calf for another bull; both Bulls turned out to be sires for them.

Chris Knox and Helen Alexander of the DSK Stud bought Annie Y656 with a Bull Calf, Kansas Upward G158. They resold the cow later at their dispersal at a profit and kept the bull calf. That bull calf, Kansas Upward G158, in turn sired for DSK the Reserve Champion carcass at Sydney Royal 2015.

Wheelview stud bought Kansas Blackbird B118 with a heifer calf at foot, Blackbird G118. This cow's mother was Y24, a daughter of Ranchers Sister, Blackbird R4. At Wheelview's dispersal earlier this year, their Top Price was Kansas Blackbird G118 and her daughters were also a feature of the sale.

Ascot Angus, Warwick, Qld, bought 26 Top Class cows. A quick return for them was with the purchase of the magnificent, Barbara A71, with a Bull calf at foot, Kansas G205. Well, just 12 months later at Ascot's first Bull sale, Kansas G205 was their Top Priced Bull at \$17,000. Another bull who was purchased on a cow sold to Clunie Range Stud at that sale.

Randal Carlaw of Kidman Angus and Steven Peake of Bowen Angus bought the super cow, Kansas Annie Y18, an unjoined Embryo Donor for \$18,000. Top Price Bull at Kidman Sale 2015 was a son of Annie Y18

Over the past 30 years we have had times of boom and times of bust. These two photos are from both ends of the spectrum. This past year has been one of the better times, which we are thankful for. To all of the purchasers of the cattle offered we wish you great success and may you have more boom times than the alternative.

And now to this Female Sale

This is not a production sale where the older generation is making way for the New Young Guns. These are the Young Guns! We are offering the pinnacle of 30 years of breeding Registered Angus Cattle. You will notice that all the calves are sired by bulls which we own, some with partners.

The Mature Cow sale in 2011 was meant to give Rob and Pam more time to do the Grey Nomad thing and visit friends etc. However, we kept too many females; there were 60 two year olds and 70 yearling heifers which have bred up again. We still don't have the time to do the "old" thing. So this time the Grandchildren have a few stud females and some of the the Genetic Carriers; (which there is nothing wrong with).

The Angus Breed of cattle have been increasing in popularity over the years, beginning with the marbling push by feedlots to produce more consistent product. However, over the years the general cow herd has had a decent influx of Marbling blood and the emphasis seems to be going back to producing cattle with adaptability to an environment and longevity. Cows with body capacity and true leg structure seem to adapt and stay sound and the main object to longevity in this type of female is teeth wear. This year for our Bull Sale we had our Bulls Structurally Assessed by Jim Green. He is the guru of Structural Assessment. He said normally when he first came into a new herd he would ask to Assess the cows, but with the scores he was able to give the bulls it would not be necessary as the Structure and good angles were obviously inherent within the herd. The old rule of thumb for joining weight for heifers was 270 kg. Well, we are weaning them at that weight now.

As you will see as you read thru the catalogue the cows are as a general rule, big, roomy, structurally correct and the 30 years of breeding Angus cattle has produced a herd to be proud of.

This is an E Mail sent from Andy McGeoch Tuesday, Septmeber 15, 2015

Rob, the inspection today was simply wonderful. If I were to be quoted I would simply say this---

"it was my pleasure to inspect the lots that will make up Stage 2 of the Kansas dispersion on Wednesday 14th October. Simply, even with all the data available to a breeding programme the real genius will still belong to our best cattlemen. Even if you do not need more females you should visit this sale to realise what standard you need to attain to enjoy the many Angus riches that await in the future. Rarely have I seen such easy doing cows with such well nourished calves. Not just one but all."

*Rob
&
Pam*

Kansas Paladin 1996

The last time we showed a Registered Angus was 2001 at Brisbane when Farmers Daughter won Grand Champion Angus Female.

The Cow Family's

Panda Line

TeMania Panda Z11 was the first registered Angus we purchased. We sold her daughter E12 as a 5 year old to DSK Angus which formed their base of Royal Show Champion Females. The Panda Line are high milking, very sound and fertile cows.

Annie

The Annie Line at Kansas began in 2000 with the purchase of Amaroo U020 and U024 as yearling heifers. Both were imported as embryos from the carcass oriented herd of Summitcrest in Ohio USA. In the past few years the Annies have flourished as you will see when reading the catalogue.

Rita

This line derived from two GAR Precision females purchased from Ythanbrae in 2002 and imported USA embryos from Sinclair Cattle Co in Pennsylvania.

Fancy

Fancy Originated with the purchase of Merrigrange D74, the top price female at Merrigrange Female Production sale in 1986. Kansas Fancy R39 was Reserve Champion female in Brisbane Royal 2000, the year Kansas Stud was the most successful exhibitor. Fancy S55 produced our top priced bull in 2006.

Tariku

Tariku T14 was top priced joined heifer at Booramooka Female Sale in the year 2000. She was a high marbling heifer imported from Summitcrest as an embryo. Her flush brother topped their sale that year.

Cowgirl

This line originated from an embryo purchase from Merrigrange. The original sire for this family was the incomparable Scotch Cap. A bull noted for his foot structure and carcass of that era.

Diana

Abbaringa Diana N2 was the absolute best daughter of GT Max. She was top price of the Abbaringa dispersal who went on to Reserve Senior Female Sydney Royal 1997. Her daughters at Kansas have excellent depth of quarter and overall quality.

Heart

The original Heart was imported from TeMania Stud in New Zealand. We sold the best Appaloosa mare we ever owned to buy that cow and she has multiplied the money many many times over.

Jedda

TeMania Jedda A13 was the second registered female purchased in 1986. After she left us 2 heifers she was sold at a NEAB sale where she was record price for a female selling to Wattletop. Jedda U50 was a real Matriarch of that line. She sold in 2011.

Ruby

Ruby started with the purchase in 2002 of the W119 cow for \$12,500 as a joined heifer from Lawsons. W119 was a flush sister to the highly successful AI Sire Ythanbrae Rocky.

Farmers Daughter

This family is an offshoot of the Jedda Line. The original Farmers Daughter U15 was shown as a heifer to win Junior Champion at Tamworth then 1st and Reserve Junior Champion at 11 months of age at Sydney Royal. Her only other show was as a first calver where she stood Grand Champion Female at Brisbane Royal. Her daughter A69 produced our top priced bull in 2010, Kansas Darwin.

Hyline Pride

The first female from this family came from the famous Hyline Herd in Montana USA; she came to us as an embryo.

Beauty

An excellent line of cattle derived from Summitcrest. The Beauty's are still highly thought of in America. Some wonderful cows here.

Blackbird

This line began with the embryos from Canada which were, our great sire, Rancher R6 and his sister Blackbird R4. A friend had been to Canada and told me he saw a magnificent cow at the Canadian Agribition. I did some home-work, made a phone call to the owner and the rest is history. What a great outcome for a phone call.

Dolly

Came originally from Merrigrange. Kansas Dolly was supreme Exhibit at Gunnedah Show.

Some family's only have a few representatives. Some family's may have been producing more male than female progeny.

SALE DATES AND INSPECTION TIMES

Selling will commence at 11:00 am sharp on Wednesday October 14, 2015. The sale is to be interfaced with AuctionsPlus (details in catalogue) therefore we must sell Lot 1 at 11:00 am. This means visitors will be called to take their positions for the auction 30 minutes prior to commencement time.

All sale animals will be yarded for inspection from 9:00 am on the day of the sale and on Tuesday October 13, from 1:00 to 5:00 pm.

Prior inspections are welcome and recommended by appointment and may be arranged by calling Rob on his mobile 0427434348.

CARD REGISTRATION SYSTEM

The selling agents, Elders Ltd will be using the card registration number system at the auction. Prospective buyers are asked to register with the selling agent well before the commencement of the auction and to nominate their Buyer Registration Number on the fall of the hammer. If representing a third party, please ensure you have their PIC number available. Pre-Sale Registration can be arranged thru Elders, Tamworth by filling in the slip at the back of the catalogue. Register early and get a free lunch voucher.

GST

All lots are sold exclusive of GST.

MOBILE PHONE SERVICE

A mobile phone service will be available on sale day. Please contact the selling agent to arrange a phone number, time, and buyers Registration Number. All phone bids are entirely at the buyer's own risk. As far as we are aware Mobile Phone Reception in the area is reasonable.

REBATES

The vendor agrees to allow 1% rebate to all outside agents introducing buyers to the selling agent prior to the sale, or accompanying the buyer; and settling on their behalf within seven (7) days of the sale.

DELIVERY & TRANSPORT

Transport will be co-ordinated by the selling agents at commercial competitive rates. All delivery, and any testing requirements for interstate travel, will be at the purchaser's expense.

ANGUS SOCIETY OF AUSTRALIA / TRANSFER OF OWNERSHIP

All females in the sale are registered with the Angus Society of Australia and are available for transfer at the buyers expense. Anyone wishing to transfer ownership will need to complete the Request for transfer form (at the back of this catalogue), stating the Membership Name, Herd Ident, and the Lot Numbers to be transferred. We would appreciate it if all purchasers could complete the form directly after the sale.

INSURANCE

Buyers are reminded that the responsibility for their purchase commences from the fall of the hammer. We recommend you insure your purchases and a representative from Elders Insurance will be available to assist with your needs.

PEDIGREE RELIABILITY

The vendors have, to the best of their ability, maintained strict and accurate recording of animals and their pedigrees. If ever there is a doubt about the parentage of a calf, a hair sample is sent away for parent verification. Kansas has met the requirements of the Angus Society of Australia for qualification for registration including DNA testing when necessary. However, we cannot stress too strongly, the requirement of the Angus Society of Australia, that bulls used to sire calves for Registration in the Society Herd Book, Red Angus Register & Angus Performance Register and all females used as Donor Cows must be Parent Verified. Our Donors have been parent verified and have DNA case numbers on file at the Angus Society. No other cattle in this sale have been parent verified.

AM, NH, CA & DD

The genetic status of all animals is clearly stated with each lot. We have tested most animals with a percentage. The results for some of these tests were outstanding at the time of printing but should be available before sale day. Please contact Kansas for updated information.

BREEDING WARRANTIES & GUARANTEES

As this is a dispersal sale, we are not in a position to offer a guarantee on the animal lots. All Autumn Calving Cows and Dry Cows will be preg tested and will be listed on a supplementary sheet. Equally purchasers are advised that pregnancies after 90 days are far more stable than prior to 90 days and should be aware that some pregnancies may be aborted post pregnancy testing. Every care will be taken to make sure that all details are accurate and available: however, we accept no liability for any errors.

HEALTH

The cattle are from a Bovine Johnnes Protected Zone. They are free to travel to all areas including Qld, NSW, Victoria and Tasmania and comply with Bovine Johnnes requirements. Cattle purchased for interstate can be held at Kansas free of charge until all relevant health tests have been completed. This includes cattle moving into tick infested areas which may require blooding for re water. The purchaser will be responsible for all health tests and transport costs. All cows have been vaccinated with a 7 in 1 annual booster being given in May. The Autumn calving calves have been vaccinated with 7 in 1, Multi Min injected and given a Pilgard vaccine for pink eye.

CALVING

We enjoy an outstanding level of calving ease with the Kansas Breeders. However, the vendor makes no guarantee as to the delivery of a live calf by any lot in this sale that carries a positive pregnancy status.

ACCOMODATION

Boggabri, Gunnedah and Narrabri are in the middle of a Coal Mine Boom. Accommodation could be hard to find. Listed are some of the local motels. Boggabri is 10 km, Gunnedah 40 km, and Narrabri 60 km. Nestle Inn Boggabri 67434308 The Overlander Motor Lodge Gunnedah 67422677 The Plains Motor Inn Gunnedah 67422511 The Red Chief Motel Gunnedah 67426096.

CATERING

On sale day morning tea and lunch can be purchased from the Red Cross Ladies. A reminder about Pre Registration to receive a free lunch voucher, please fill in the slip at the back of the catalogue. Light refreshments will also be available on Thursday afternoon during pre-inspection.

HOW TO FIND KANSAS

The Sale is to be held on property "Northam Boggabri. From Boggabri, go toward Narrabri and turn right on the Manilla Rd, at T intersection turn right and follow Manilla Rd, turn right on Braymont Rd. Kansas gateway approx. 1 km on left. The complete journey is 13 kms from Boggabri.

PRIVACY INFORMATION

The animals included in this catalogue are registered with the Angus Society of Australia. All member buyers are encouraged to have transferred to his or her membership, any animals purchased. In order for this transaction to be effected, the buyer will need to provide certain personal information to the Society and consent to the collection and disclosure of that information by the Society in certain circumstances. If the buyer does not wish for his or her personal information to be collected and disclosed by the Society, the buyer must opt out of the option to consent by completing the form which will be available on sale day and forwarding it to the Society. If the form is not completed, the buyer will be taken to have consented to the collection and disclosure of that information by the Society.

DISCLAIMER

The owner, employees and representatives of Kansas Angus accept no liability for any accidents that may occur. Although such occurrences are rare, any persons attending the Kansas Angus sale do so at their own risk. Under no circumstances are children allowed to enter the cattle pens. All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

Kansas Datalink as his name suggests does blend measured traits along with physical attributes; which are not measured. He has a slick pliable skin, walks extremely freely and has a docile attitude. His family tree indicates he is a predictable sire which he is already proving. Datalink was turned out with an assortment of cows and maiden heifers when he was just 15 months of age. These calves were sired when he was 15 months of age, he had no calving difficulty. He then did a spring 2014 joining at 21 months, then again this 2015 autumn. All this did not hamper his growth, the calves with green tags were sired by Datalink.

Kansas Evidently is reported by all who have seen him to be the heir to his special sire, Dunoon Evident. Evidently has the advantage of having a super cow family behind him. This bull exhibits a special carriage, he has good bone and muscle. Evidently was mated to cows and maiden heifers, he had no calving difficulties at all. Evidently was used at 15 months, here at Kansas and The Orange Tag calves here at the sale are his, and they were sired when he was 15 months of age. We then sold one half share to Steven Peake of Bowen Angus at Barraba. He then did stud service beginning October 2014 at Bowen. He returned to Kansas for the autumn mating where he returned 100% pregnancy. He has gone back to Bowen for a spring joining where Steven Peake is overwhelmed by the quality of his progeny.

Kansas Jumbo was used as an 18 month old bull here at Kansas, and has sired as expected being a son of 9969. Jumbo was a feature of our 2014 Bull Sale. He sold to long time friend, Charles McKinlay, of Comet, Qld. Charles reports that the bull has a special calf crop over his Brahman and Charolais Cows. The Dam of Jumbo, Kansas Beauty Stone E111 sells in this sale.

Kansas Aberdeen. The judgement to commit to Aberdeen at a young age has been justified; although the decision was not really so painstaking as he sold himself to us. It started back when we bought his imported great Granddam, Annie U020. She produced Annie Y71, from the first semen available in Australia of the soon to be exceptional female sire, New Design 1407. Y71 in turn produced the beautiful Annie D62. Annie D62 was such a beautiful heifer we couldnt wait for her to come into production. So when Annie D62 calved Aberdeen as her first calf we were so pleased. The bull Aberdeen F84 continued to flourish during his first year, then he was selected for stud use at 15 months. Our justification as to the quality of his parents were proven when at our 2011 Female Sale his 3 year old Dam sold to Neville Duddy for \$10,000 and Granddam Annie Y71 sold to KO Angus for \$16,000. Aberde. **WILL BE ON DISPLAY ON THE DAY.**

Kansas CC & 7 was self selecting for his commercial attributes. He passed his structural test with perfect scores for feet, foot and leg angle, sheath and temperament, together with ideal muscling and quality outlook and pedigree. His dam, Annie Y18, was the top selling cow for \$18,000 at our 2011 Female Sale selling to Bowen and Kidman Angus. His sire CC & 7 is a magnificent individual himself and is proving to be a sire of sires. CC & 7 was the Number One sire for Docility in the USA. J175 is a mating sire of some of the K heifers.

KO Daiquiri: His sire was admired by Rob at TeMania open day in January 2012. The TeMania Daiquiri bull was not used in the Kansas herd because he was a red gene carrier. Then Daiquiri H113 was spotted by Josh Crosby at KO Bull Sale in 2014. Rob became interested because Daiquiri H113 carried no red gene and no genetic impurities. Knowing the quality of the cow family which Kansas had sold to KO for \$16,000 and was H113s dam, Rob purchased him in conjunction with his brother, Lex Crosby of Crosbys Angus at Forbes. H113 is a top class bull with semen available. He has faultless docility, feet, legs and general stucture plus his EMA +6.5 and IMF +3.5 and positive Fat.

SAV Tenspeed 3022 One of Ten Xs most powerful and complete sons both Phenotypically and on paper and sold for US\$260,000 at the 2014 SAV Sale. An outcross to most bloodlines, he combines low birthweight and fantastic growth and carcass data and has been admired by many for Rib Shape, Width of base, muscling and correctness. His attractive and productive Bismark dam has a perfect Udder with an ideal body type from a proven cow family.

Reality is rated by Matauri as the most versatile sire to have been used in 50 years. He is sound footed with impeccable disposition and amazing constitution. His dam has perfect udder quality and structure. Inspected by many Australians, Reality is a square, upstanding sire, free in movement, sound in structure and clean sheathed. His docile nature, outstanding progeny, combined with brilliant CE, Birth, GL, Fertility, IMF and Docility EBVs make Reality a go sire.

Goodthing was the high selling bull in the 2013 Dunoon Autumn Bull Sale and was purchased by Kansas Angus, Waitara Angus, Trangie, Lawsons Angus, Victoria, and Burenda Angus in Qld. If you trace back 7 generations on the maternal side of Goodthings pedigree to 1979, these 7 dams account for 309 progeny. An impressive average of 44 progeny each generation. Very few young sires around the world can offer such a strong maternal line of proven dams in their pedigree. A great combination of a strong maternal pedigree with breed leading carcase genetics, ranking in the top 5% for Carcase Weight, Eye Muscle Area, Rib and Rump Fat and top 1% for IMF EBVs. Goodthing is structurally sound, square hipped and moves freely on sound feet and legs.

Gothenberg was the high selling \$25,000 bull of the 2013 TeMania Bull Sale, the purchasers were; Kansas Angus, Crosbys Angus at Forbes, and Hard Hat Angus at Condoblin. The losing contenders at the sale was a syndicate from NZ and Tasmania.

He was the most talked about bull of that seasons Bull Sale Open Day Week. Gothenberg; besides his own physical and computer data can claim authority over contemporaries by the long line of female breed shapers. His Granddam is no other than the incomparable Barunah R312, dam of 104 calves including Xamined and Expo. Seven generations on the female side have been embryo donor cows, producing a total of 301 calves. Gothenberg was used here at Kansas Angus at 18 months of age and produced 52 calves in that season. He was mated to both mature cows and maiden heifers. His calving ease was exceptional - (but that can be seen in his sons by their s shoulders and neck extension shape). He maintained good body weight and was very athletic at his business. His sale sons have masculine heads, with wide muzzles, terrific neck extension, laid in shoulders, extreme body length, large scrotal and importantly for the Northern and Western cattle producers his skin type gives a glow sheen type. With his first crop analysed, he has become a trait leader for scrotal and his IMF figure has rocketed to elite status at +4.5 and he has positive fat cover.

Her dam sold to Ascot in 2011 for \$10,000. "Notes" on Z172 in the 2011 sale book "Beautiful cow, always looks like she just came back from the hairdresser." Her Dams full brother was top priced bull at Lawsons Sale and at the time was Number One Eye Muscle bull of the breed. In the deal to buy V470, we had to give Lawsons two embryos, those embryos produced their best cow! Rearing a bull calf with WEIGHT! Depastured Kansas Evidently J81 on 12/4/15. Depastured Kansas Aberdeen F84 on 27/6/15.

We still like to use the old sire U28. We purchased Precision U28 for \$19,000 in 2001, the top priced bull in Australia that year. He later became a leading source for low birth weight in the breed, along with his Number One for Milk Bull Status. Weight 646 kg. A.I.d to SAV Tenspeed 3022 on 15/4/15. Depastured with Kansas Evidently J81 on 16/4/15. Depastured with Kansas Aberdeen F84 on 26/6/15.

Fantastic finishing ability, especially considering she is rearing a calf. 746 kg for a two year old in lactation. Pretty good, but we expect that from these great sires and grandsires. The original Jenny cow started from the great heifer we bought in 2001, in shares with brothers Russell and Lex from the Lawson, Gardner Embryo heifer sale. We paid \$18,000 and were happy to get her for that. A son of the original Jenny sired the Grand Champion carcass at the Sydney Royal Steer Show. A daughter won the prestigious female performance class at that same show for Brother Russell. Weight 746 kg on 9/9/15. Depastured with Kansas Emblazon F185 on 27/4/15.

IMPORTANT NOTICES FOR PURCHASERS

~ SALE CATALOGUE DISCLAIMER ~

All reasonable care has been taken by the vendor to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor nor the selling agents make any other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in this catalogue. You are encouraged to seek independent verification of any information contained in this catalogue before relying on such information.

~ DNA PATERNITY VERIFICATION ~

It is a requirement of Angus Australia that all bulls used to sire calves for registration in the Angus Australia Herd Book Register, Red Angus Register or Angus Performance Register must have been DNA paternity verified if they are born in or after the 'Y' year (2003). Buyers intending to use bulls listed in this catalogue to produce calves to be registered in these registers should obtain DNA paternity verification on those bulls before they are used for breeding.

~ PRIVACY INFORMATION ~

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYER'S OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO THE ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its databases and disclosing that information to its members on its website.

I, the buyer of animals with the following registration numbers from member (name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the following animal(s) that I have purchased, maintaining its databases and disclosing that information to its members on its website.

Signature:

Date:

Please forward this completed consent form to Angus Australia, Glen Innes Road, Locked Bag 11, Armidale NSW 2350. If you have any queries, please telephone 02 6772 3011 or e-mail office@angusaustralia.com.au.

RECESSIVE GENETIC CONDITIONS

INFORMATION FOR BULL BUYERS

This is information for bull buyers about the recessive genetic conditions, Arthrogryposis Multiplex (AM), Hydrocephalus (NH), Contractural Arachnodactyly (CA) and Developmental Duplications (DD).

Putting undesirable Genetic Recessive Conditions in perspective

All animals, including humans, carry single copies (alleles) of undesirable or “broken” genes. In single copy form, these undesirable alleles usually cause no harm to the individual. But when animals carry 2 copies of certain undesirable or “broken” alleles it often results in bad consequences. Advances in genomics have facilitated the development of accurate diagnostic tests to enable the identification and management of numerous undesirable or “broken” genes. Angus Australia is proactive in providing its members and their clients with relevant tools and information to assist them in the management of known undesirable genes and our members are leading the industry in their use of this technology.

Key point: With today's DNA tools undesirable genetic conditions can be managed!

What are AM, NH, CA and DD?

AM, NH, CA and DD are all recessive conditions caused by “broken” alleles within the DNA of individual animals. When a calf inherits 2 copies of the AM or NH alleles their development is so adversely affected that they will be still-born.

In other cases, such as CA and DD, calves carrying 2 copies of the broken allele may reach full-term. In such cases the animal may either appear relatively normal, or show physical symptoms that affect their health and/or performance.

Key point: The number of reported observations of AM, NH, CA and DD calves is very low and there is certainly no need for panic.

How are the conditions inherited?

Research in the U.S. and Australia indicates that AM, NH, CA and DD are simply inherited recessive conditions. This means that a single gene (or pair of alleles) controls the condition. For this mode of inheritance two copies of the undesirable allele need to be present before the condition is seen; in which case you may get an abnormal calf. A more common example of a trait with a simple recessive pattern of inheritance is black and red coat colour.

Animals with only one copy of the undesirable allele (and one copy of the normal form of the allele) appear normal and are known as “carriers”.

What happens when carriers are mated to other animals?

Carriers, will on average, pass the undesirable allele to a random half (50 %) of their progeny.

When a carrier bull and carrier cow is mated, there is a 25% chance that the resultant calf will inherit two normal alleles, a 50% chance that the mating will result in a carrier (i.e. with just 1 copy of the undesirable allele, and a 25% chance that the calf will inherit two copies of the undesirable gene.

If animals tested free of the undesirable gene are mated to carrier animals the condition will not be expressed at all. All calves will appear normal, but approximately half (50%) could be expected to be carriers.

Key point: For the condition to be expressed the undesirable gene needs to be present on both sides of the pedigree and both the sire and dam need to be a carrier.

How is the genetic status of animals reported?

DNA-based diagnostic tests have been developed which can be used to determine whether an individual animal is either a carrier or free of the alleles resulting in AM, NH, CA or DD.

Angus Australia uses advanced software to calculate the probability of (untested) animals to being carriers of AM, NH, CA or DD. The software uses the test results of any relatives in the calculations and the probabilities may change as new results for additional animals become available.

The genetic status of animals is being reported using five categories:

AMF	Tested AM free
AMFU	Based on pedigree AM free – Animal has not been tested
AM__%	__% probability the animal is an AM carrier
AMC	Tested AM-Carrier
AMA	AM-Affected

For NH, CA and DD, simply replace AM in the above table with NH, CA or DD.

Registration certificates and the Angus Australia web-database display these codes. This information is displayed on the animal details page and can be accessed by conducting an “Animal Search” from the Angus Australia website or looking up individual animals listed in a sale catalogue.

Key point: The genetic status of an animal is subject to change and will be re-analysed and adjusted each week as DNA test results of relatives are received.

Implications for Commercial Producers

Your decision on the importance of the genetic condition status of replacement bulls should depend on the genetics of your cow herd (which bulls you previously used) and whether some female progeny will be retained or sold as breeders.

Most Angus breeders are proactive and transparent in managing known genetic conditions, endeavouring to provide the best information available. The greatest risk to the commercial sector from undesirable genetic recessive conditions comes from unregistered bulls with unknown genetic background. The genetic condition testing that Angus Australia seedstock producers are investing in provides buyers of registered Angus bulls with unmatched quality assurance.

For further information contact Angus Australia’s Breed Development and Innovation Manager at (02) 6773 4602.

Understanding Estimated Breeding Values (EBVs)

Estimated Breeding Values (EBVs) are predictions of an animal's genetic merit, based on available performance data on the individual and its relatives.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences from the breed base. As the breed base is set to a historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic change within the breed. The current breed averages are shown below. These averages provide a useful benchmark for comparing EBVs for animals.

	September 2015 Angus Australia BREEDPLAN										
	Calving Ease Dir	Calving Ease Dtrs	Gest Length (days)	Birth Wt (kg)	200 Day Wt (kg)	400 Day Wt (kg)	600 Day Wt (kg)	Mature Cow Wt (kg)	Milk (kg)	Days to Calving	Scrotal
	-0.3	-0.02	-3.0	+4.5	+40	+73	+95	+84	+13	-3.5	+1.5

Carc Wt (kg)	EMA (sq cm)	Rib Fat (mm)	Rump Fat (mm)	RBV (%)	IMF (%)	NFI-p (kg/d)	NFI-F (kg/d)	Doc-ility (trial)	Angus Breeding	Dome- stic	Heavy Grain	Heavy Grass
+53	+3.8	-0.2	-0.3	+0.2	+1.3	+0.07	+0.13	+3	+\$98	+\$98	+\$98	+\$98

CALVING EASE TRAITS

Calving Ease (DIR): estimate of genetic differences among animals in the ability of their calves from 2 year old heifers to be born unassisted. Higher, more +ive, Calving Ease (DIR) EBVs are more favourable.

Calving Ease (DTRS): estimates of genetic differences among animals in the ability of their 2 year old daughters to calve without assistance. Higher, more +ive, Calving Ease (DTRS) EBVs are more favourable.

Gestation Length: estimate of genetic differences among animals in the number of days from the date of conception until the calf birth date. Lower, or more -ive, Gestation Length EBVs are generally more favourable.

Birth Wt: estimate of genetic differences between animals in kg of calf birth weight. Calf birth weight is the biggest contributing factor causing calving difficulty in heifers. While low Birth Wt EBVs are favoured for calving ease they are also often associated with lower growth potential. Small, or moderate, Birth Wt EBVs are more favourable.

FERTILITY TRAITS

Days to Calving (DC): estimate of genetic differences among in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. Females with shorter DC EBVs tend to commence cycling earlier after calving and conceive earlier in the joining period. They also tend to attain puberty at a younger age as heifers. Lower, or more -ive, Days to Calving EBVs are more favourable.

Scrotal Size: estimate of the genetic differences among animals in scrotal circumference at 400 days of age. Increased scrotal size is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Larger, or more +ive, Scrotal Size EBVs are more favourable.

GROWTH TRAITS

200-Day Wt: estimate of the genetic differences among animals in weight at 200 days of age. This is a measure of an animal's early growth to weaning. It is an important trait for breeders turning off animals as vealers or weaners.

400-Day Wt: estimate of the genetic differences among animals in weight at 400 days of age. This is an important trait for breeders turning off animals as yearlings.

600-Day Wt: estimate of the genetic differences among animals in live-weight at 600 days of age. This is an important trait for breeders targeting the production of animals suited for heavy weight grass finished or grain fed market

MATERNAL TRAITS

Milk: estimate of the genetic differences among animals in milk production potential, expressed through variation in calf growth performance. Larger, more +ive, or moderate, Milk EBVs can be more favourable, depending on the environment.

Mature Cow Wt: estimate of the genetic differences among animals in cow weight at 5 years of age.
