Nindooinbah's Spring Sale

It is great to welcome you to our annual Nindooinbah sale. Certainly the atmosphere in agricultural space is positive and there is a vibrancy evident that has been absent for far too long.

We continue to work with the University of Queensland and other industry players to further enhance our genetics and to develop new reproductive and genomic technologies. Traceability along the whole supply chain has been on the industry agenda for quite a few years and at Nindy we are working to establish genetic traceability at commercial production levels to further enhance our clients efficiency and profitability.

The bulls and heifers on offer today are the result of our tremendous Nindy team's efforts and Kaye and I are proud of the offering.

Best regards,

Kaye & Euan

NINDOOINBAH STUD CATTLE MANAGEMENT PROGRAM:

At birth all calves are weighed and tagged with management tags, Dam ID tag and electronic ID. This data is submitted to Breedplan for calving traits. Prior to weaning all calves have had 7 in 1, Botulism injections. At weaning they are weighed and vaccinated with three-germ blood. Post weaning they finish their “calving vaccinations” with Pestigard.

The weaners are freeze branded with their tattoo number and have carcass ultrasonic scan data taken between 400 and 600 days plus a weight by an accredited technician. The weaners are kept in large management groups so we can make full use of the Breedplan analysis.

The stud cattle are pasture fed and supplemented in the paddock at key points in the year. Their weights and condition are monitored so that they develop well during this critical phase of their life.

Annual boosters 7 in 1, Pestigard, Botulism and BEF (three-day sickness). Bulls receive Vibiro. Booster vaccinations will be due in September 2017.

Females are programmed in a fixed time AI program, cover bulls are used 14 days after AI. A final preg test is done between 40-60 days by Ultrasound.

The bulls undergo full Veterinary Bull Breeding Soundness Evaluation (VBBSE) results will be available via the web and a supplementary on sale day.

During mustering at Nindooinbah we expose our cattle to as many different styles as possible. We regularly use horses, dogs and motorbikes using Low Stress Stock Handling principals. A great deal of time is spent with them in the paddock on foot or with vehicles. Good temperament is very important particularly with animals that are being handled so frequently.

Preliminary tick treatments have been done and cattle are eligible to be presented to the clearing dips.

A MESSAGE FROM NICK

Spring is certainly in the air with some great early rain received that will be a fantastic platform for most producers going into summer. As we all know, the climatic conditions that have relieved many producers from crippling drought, have not had the same effect on every operation and some are still having to ride out unfavourable conditions. I hope that by the time you receive this catalogue, we have the very rare climatic event, of Australia being drought free.

This year's line up of cattle in our Spring sale come with our first run of Nindooibah specific EBV's. We are delighted to be working with ABRI and Breedplan to produce these in-house performance indicators. We have taken this step not lightly but for several reasons I believe that it is the way forward for the Nindooibah seedstock operation. One reason was that although EBV's for animals within a particular BREEDPLAN analysis can be directly compared (i.e. a breed society), from the Angus multi-breed register, we were then having to split out breed compositions into their own subset for direct comparison. The weight of influence that Angus appears to carry in these calculations also made the EBV's hard to compare.

Another influencing factor is the research and development that we are continually carrying out at Nindooibah. Having a "clean" data set for the work we are doing in this space is paramount. We will eventually be incorporating industry specific indexes as well as enhancing our accuracies through genomics. We have some exciting new developments that we are hoping will have a significant impact on the Northern Industry.

Cattle purchased at the sale will have access to information on Nindooibah's database but can be transferred to the Angus Multibreed Register if the purchaser wishes.

Any progeny born or sired by Nindooibah genetics, must be fully performance recorded if the owner wishes them to be registered on Nindooibah's

Breedplan in the future. This is to maintain a data set as ridged as possible for future improvement.

I would like to thank Nat McGhee for his efforts in getting the data supplied to ABRI. It is no small task when there are 11,500 animals to input going back three generations. This is on top of the great work that Nat and all the team at Nindooibah do on a daily basis. I am fortunate to have such a great bunch of people to help run, what is at times, a challenging operation.

The "10 out of 10 EZI – guide" is another new feature that we have included in this catalogue. Its objective is to make deciphering EBV's a simple task that lets purchasers see at a glance, where cattle rank in this BREEDPLAN analysis.. EBV's are a powerful tool for selection but it takes time to appreciate their value if it is presented in a complex way. I am hopeful that some of the complexity is taken away by presenting them this way. I look forward to any feedback on improvements to how we have formatted them.

I am proud of the lineup presented at our 2016 Spring Sale. They are a terrific set of bulls and females and I am sure that they will produce and do their job well at the new home they find.

You will note that the sale includes trait leaders as well as sires that we have retained semen rights on. These sires have already been collected but in the future, once their progeny have been analysed, we may request that semen be collected at the purchasers convenience. These sires are Ultrablack Lots 32, 33, 37, 44 and Brangus Lots 91, 92, 112.

All females have been PTIC and are bred to some of our leading sires in multisire groups or single sire groups.

I look forward to seeing you at the sale and catching up for a beer once the dust settles.

All the best. *Nick Cameron*

Nindooinbah BREEDPLAN

Nindooinbah is committed to performance – recording their beef cattle for objective traits of economic value. Those traits include Birth weight, growth to 18 months, scrotal size on bulls and ultrasound carcass scanning for carcass traits including IMF% (Marbling).

For the last 8 years Nindooinbah has evaluated the genetics of the Ultrablack and Brangus herd by being part of the Angus Multi-Breed Register. 11,500 animals have been recorded for multiple EBVs in that time with additional animals added as they enter our system.

For 2016 Nindooinbah has changed its genetic evaluation to Nindooinbah BREEDPLAN – a within-herd system supplied to Nindooinbah exclusively from ABRI (Agricultural Business Research Institute), the exclusive commercialiser of BREEDPLAN.

The Nindooinbah team believe that the new within-herd genetic evaluation, based uniquely

and solely on the performance and measurement of the Nindooinbah Brangus and Ultrablack cattle in our sub-tropical environment, in the presence of ticks and sub-tropical grasses, will give more accurate EBVs than ever before.

The new EBVs, though of lower magnitude than previous catalogues will more accurately rank the animals for their performance at Nindooinbah with more relevance for northern Australia based on the 11,500 animals previously recorded and incorporated in these new EBVs plus the 2016 crop of calves.

The Nindy “10 out of 10” EBV EZI-Guide

To minimise the numbers you need to look at to assess if a bull or female meets your breeding aims we have developed an EZI-Guide. The within-herd BREEDPLAN EBVs are converted into decile rankings (a block of 10 percentile points) and displayed as a single number for each trait.

- 10 = Trait Leader
- 9 = ranked in the top 10% for the trait
- 8 = ranked in the top 20% for the trait
- 7 = ranked in the top 30% for the trait
- 6 = ranked in the top 40% for the trait
- 5 = is herd average for the trait
- 4 = ranked in the bottom 40% for the trait
- 3 = ranked in the bottom 30% for the trait
- 2 = ranked in the bottom 20% for the trait
- 1 = ranked in the bottom 10% for the trait

So look at the numbers ranking how your bull's EBVs rank for a trait and quickly assess if he suits your needs. We recommend a balanced profile of numbers.

Remember: A 10 for Birth weight is the trait leader for low birth weight. Bulls with a score of 5 to 10 are recommended as heifer bulls.

In contrast a 10 for Scrotal Size means the trait leader for Scrotal circumference EBV, a 5 means herd average for Scrotal Size and 1 for the bottom 10% decile for Scrotal Size.

The abbreviations for the traits are as follows:

- BW – Birth Weight
- GL – Gestation Length
- 200 – 200 day Growth
- 400 – 400 Day Growth
- 600 – 600 Day Growth
- MCW – Mature Cow Weight
- SS – Scrotal Size
- ADAP – Adaptation
- EMA – Eye Muscle Area
- RIB – Rib Fat
- RUM – Rump Fat
- RBV – Retail Beef Yield
- IMF – Intramuscular Fat
