up to date with  
Greenup Eidsvold Station  
news & stock sales

# Invitation

Join us at Eidsvold on Friday September 18, at 12.00pm as we offer our select team of 120 bulls, consisting of 100 Santas and 20 Sangus. The draft includes 82 poll/pollscur and 84 Classified S bulls.

All are welcome to our VERY casual BBQ, at Eidsvold Station the evening before the sale.

It's phenomenal how the market has changed in the last twelve months. We are enjoying record prices, with terrific industry and market fundamentals going forward. We knew it was on its way, but it was a tough wait. Last year, our rain arrived in December after a cruel drought and then a cyclone in March brought some welcome run-off at Eidsvold – also known as a flood, but no-one was complaining! Cardowan is still waiting on run-off rain, but we are staggered at the response of the country to the rain we received and compensatory gain exhibited by the cattle. Our hearts are with those still waiting on precious rain.

Driving efficient production at the least cost to maximise margins remains critical to capitalise on the high prices.

Genetics remain one of the most powerful levers to drive profit into a beef business. Genetics impact the bottom line by:

- Reducing cost per calf, with bulls that are structurally fit, fertile and reared for a long working life;
- Reducing inventory day with genetics that finish easily at a younger age and have more kilos for age;
- Producing consistent lines that hit the top of the grid, evenly and reliably with superior feedlot performance & maximise gross margins;
- Breeding functional fertile daughters that maximise their efficiency of turning pasture into kilos of live calf weaned

The huge demand for Santas is reflected in the premiums consistently received at each stage of the supply chain. People pay more, because they do better, cost less to feed, weigh more and put more money in the pocket – it's that simple.

This year our steers placed second at The EKKA in the heavyweight 100 day grain-fed class. Our pen of six milk tooth steers at 21 months of age was the heaviest pen in the heavy weight class at 680 kg.

This draft of sale bulls is jam-packed with fit, functional, fertile bulls. The traits we consider to be most relevant to producing a profit are evident through the line: weight for age, constitution, easy finishing, market versatility, fertility, carcass traits and muscle.

For those concerned with BJD we are pleased to say our herds have been tested for BJD and have returned negative tests.

For those who cannot attend on the day, the 56th Greenup Eidsvold Station Bull Sale is interfaced with AuctionsPlus. Bulls can be inspected on property at any time.

Our intention is to make your investment in bulls easier, convenient and tailored to your markets, country and budget – please let us know how we may assist.

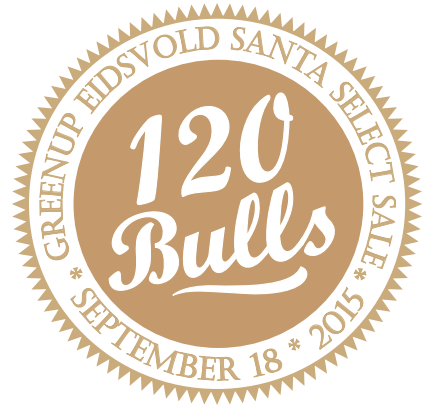

See you at Eidsvold

Rick and Alice

Melanie Faith Dove.

## POLL POSITION

There is a middle line to walk in life, and particularly with genetics. Our intent to increase the percentage of poll genes within our herd has been clear. However we are insistent that progress in that one trait does not come at the expense of fertility, body type, conformation and character - and all the other things we place emphasis on. Our progress in this trait has been measured and effective. We will let the data do the talking.

## SUPPLYING COMMERCIALY IDEAL BULLS

The economics of a beef business depends on:

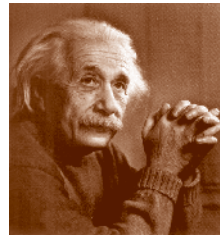

1. Productivity of the herd: fertility, survivability;
2. Growth rate, inventory days and feed conversion efficiency;
3. Value of product: meeting markets, getting premiums;
4. Costs of producing the animal.

Greenup Eidsvold Station breeds fertile cattle that are ideal for self replacing herds focussed on profit. Our cattle are bred to achieve more weight for age and leave you with a profitable herd of functional fertile daughters. Our focus is profit driven to maximise returns, with low inventory days and costs of production.

When cows and bulls lack constitution, they cull themselves out of our system, unable to handle the tough country, the tough seasons and the pressure we put them under. Constitution cannot be measured with a simple tool or set of scales. Constitution is selected predominantly in the female herd. By raising cows under environmental pressure, those genetics that express these complex traits emerge and reveal themselves.

All bulls have been scrutinized since weaning to make the final cut and have passed our criteria for conformation, temperament, semen morphology, scrotal size, growth and muscling, while retaining softness.

Our annual sale team is the elite ten percent of our herd - bred out of over two thousand classified breeders and our top unregistered females. This is the best draft of bulls we have put together. **Enjoy!**

*Not everything that can be counted counts. And not everything that counts can be counted.*

.....Albert Einstein

## Each year there is more data in catalogues to sift through. But is it important to you?

At Greenup Eidsvold Station we provide a range of Breedplan values and raw data, however the inclusion of this material does not mean these are things that we place the most emphasis on.

Greenup Eidsvold Station sires must pass our criteria for fertility traits, scrotal size, semen morphology, structural soundness and temperament, as well as muscle, growth, weight for age and doing ability. The physical appearance and structure of a bull weighs heavily in our selection process. Objective performance recording and contemporary group data is used to refine that selection to ensure that our genetic gains are consistent and permanent.

## Mind Your Own Business

Bigger is not always better. What works for one breeder will not necessarily work for another. Define your own breeding objectives that suit your business and family. Desirable traits may not always be easily measurable but may be the highest priority to your business, for example constitution, structural soundness and fertility. Identify as few breeding objectives as possible to achieve optimum progress while remaining balanced in your approach to selection.

Average EBV bulls may be suited to your business. The Santa Gertrudis Breed has lifted growth to heady heights. The current breed average for growth traits is at a very functional level. Excessive growth will result in high-maintenance daughters with low fertility and high resource demand and steers that do not achieve market weight at a young age and require more feed to achieve market readiness. The following steps will help you get the bulls you need:

1. Consider market specifications.
2. Consider your land type and environment.
3. Define traits of economic importance.
4. List your breeding goals.
5. List your selection criteria.
6. Prioritize your selection criteria.
7. Identify ALL bulls that meet your criteria and mark them down.
8. Make sure the agents are aware of your bids.
9. Arrange necessary paperwork for transfer and transport.
10. Enjoy some refreshments after your hard work.

# First Release Sires

## Greenup Grandpa G40 (P)

Soc ID: GUP11MG040 - S Bull

Tyndale Noddy (P) (AI)  
**S: Rosevale Basalt B32 (P)**  
 Rosevale Excite Y407

**D: Greenup Dandy D45**  
 Greenup X-Hibitionist Y44  
 Greenup Maple Y69

Dam ICI: 441

Dam calving dates: 2/09/2010 17/11/2011

Greenup Grandpa G40 (P) is another standout son of Basalt with a trim sheath, large stones, high semen morphology and balanced Breedplan figures.

His strong sire line is backed up by a dam by the easy doing, high constitution of an X-hibitionist Y44 dam.

Greenup Grandpa G40 (P) is represented by Lots 25, 28, 45, 89, 102 & 120

# First Release Sires

## Benelkay Firestone (PP)

Soc ID: 295835

Waco Landlord  
**S: Sujo First Class (AI) (P)**  
 Sujo Buttercup

**D: Benelkay Hebrew (P)**  
 Benelkay Fireball 744 (P)  
 Benelkay 920 (P)

Dam calving dates: 5/7/06 3/8/07 16/9/08 25/9/09  
 12/8/10 10/9/11 10/10/12

Benelkay Hebrew (P) has had seven calves of which three have classified.

Benelkay Firestone was purchased in 2011 for the top price of \$32,000 at the Benelkay Fishington Sale.

Firestone has solid all round performance figures. In the working department, this clean-sheathed bull is 43 cm in the testes and had a semen morphology of 81%. This combination of growth, muscle, softness, ability to lay down fat and fertility traits is the type of genetic package that we are targeting to return profits to the beef industry. We have retained a number of his sons for stud use.

Firestone is represented by Lot 94.

## Clanricard Farrer O10 (PP)

Soc ID: 297515 - S Bull

S: Eidsvold Station Zoro Z188  
**Eidsvold Station Zoro C236 (PS)**  
 Eidsvold Station Y187

D: Eidsvold Station Sparta Y300 (P)  
**Clanricard Barcelona 609 (P)**  
 Clanricard Barcelona X128 (P)

Farrer was purchased at the 2012 Ag-Show for \$13,000. He is a homozygous poll bull, with good growth, stones and a semen morphology of 83%.

With strong knowledge of the pedigree and the genetics this bull carried for fertility and growth, we were confident in the package. Farrer is being used in the Greenup Stud.

**Farrer (PP) is represented by Lots 32, 67 & 99**

It is with great fondness that we remember John Riley who passed away as this catalogue went to print. John was a passionate Santa man and both he and Anne were very supportive and encouraging to us through our journey. Our love and blessings are with the Riley Family.

## Dangarfield Tycoon (P)

Soc ID: 290592

Image taken at 5 years of age, off pasture

S: **Dangarfield Cactus Jack**  
**Dangarfield Patrol Chief**  
Dangarfield 3647

D: **Dangarfield Jack Junior (P)**  
**Dangarfield 5337 (P)**  
Dangarfield 671

We are excited about the contribution Tycoon is making to the beef industry. Tycoon was purchased at 2011 Dangarfield Annual Sale for \$17,000. Tycoon stood out from the rest of the sale team for his thickness throughout his body, thick topline and powerful hindquarters. His pedigree carried the figures we like and will in turn provide industry with the genetics to meet market specifications. He has grown into an impressive bull and handles the forest country with ease.

Tycoon is a gentle quiet bull.

Furthermore, Tycoon demonstrates the softness in himself that we are looking for to maintain the finishing ability in our sons and fertility in our daughters. Tycoon is a poll bull.

We have assessed Tycoon's scrotal size at 41 cm and his semen morphology at 83% normal. In 2014, 12 sons of Tycoon sold to average \$5250. A son, Greenup Jagger sold to Rosevale Stud for \$9,500.

**Dangarfield Tycoon (P) is represented by Lots 24, 66, 68, 93 & 108**

Debonair (Poll) is a moderate framed bull with explosive growth - characteristic of his sire X90 - who was a trait leader for weight, scrotal size and carcass weight.

Debonair has proven to be a reliable sire, with incredible consistency in his outstanding progeny who continue to display his polledness, tidy sheath and terrific weight for age. This bull demonstrates incredible constitution and doing ability as we place him under huge pressure.

He breeds, honest consistent cattle, with the genetic package that can take you where you want to go.

This sire offers a unique package of growth, fertility and ability to lay down fat and finish, complete with a very quiet temperament. This sire was used extensively in our breeding programs until damaging his hip in 2013.

Debonair sired Greenup Carlos H18 (P) - a homozygous bull, who sold to Geoff Goodland's Wightfield Stud for \$15,000 in 2013. Another homozygous polled son, Greenup Jordan J204 (PP) sold to Mark & Chloe Madew's Cundara Stud in Western Australia in 2014.

We have retained a number of his sons in the stud herd, Greenup Giant G170 (P), Greenup Garrett G176 (P) Greenup Hammer H20. To date 13 sons have sold to average \$6115.

**Eidsvold Station Debonair D48 (P) is represented by Lots 7, 13, 61 & 90**

Fiesta was retained for stud use and bred in the Eidsvold herd for his excellent traits of muscling, growth and very tidy underline and sheath. This bull has a large set of stones, which he is passing onto his sons.

Fiesta's EBVs are in the top 15 % for growth and eye muscle area, and top 1% for scrotal size,

Fitzgerald is a high growth sire that stands out amongst his peers. The raw figures on this bull at 600 days, off pasture, tell the main story why we kept this bull - at 600 days Fitzgerald weighed 804 kg, had an eye muscle area of 126 cm and 16 & 9 mm fat measurements - *off pasture!*

Fitzgerald is a game changer - offering growth with easy doing ability, handling our tough forest country like it's scrub country.

Without doubt this is an exciting young sire, with a unique combination of the attributes of fertility, growth and most of all, constitution - this package is wrapped up with an incredibly docile temperament.

Fitzgerald's first sons sold in 2014, 8 sons average \$5312. One son, Greenup Justice J20 (PP) - a homozygous polled bull, sold to Scott & Rebecca Dunlop's Dunlop Stud for \$12,000.

Gyranda Atom was purchased in 2006 from the Gyranda Annual Sale for the top price of \$26,000. He was chosen for his weight for age, excellent muscle pattern, extremely quiet temperament and doing ability. Atom has proved himself to have exceptional constitution in tough seasons on native pasture.

To date 24 sons have sold to average \$4758. One son sold to Dangarfield for \$6000, another sold to John Hazleby at the Biara Stud in Western Australia for \$6000.

- S: **Tyndale Noddy (P) (AI)**  
**Bowenfells Danelle 2nd**
- Kelly Wallah Commodus
- D: **Rosevale Excite Y407**  
Rosevale Y214

Basalt was purchased for \$32,000, the top price at the 2007 Rosevale Sale. Basalt is a polled bull and he was purchased for his exceptional weight for age and growth characteristics. We liked Basalt's tropical style and breed character.

Basalt's constitution and libido have been put to the test for a number of seasons, regularly having been mated with maiden heifers, followed by our premium stud cows, then lastly a mob of yearling heifers. Basalt's semen was also used extensively in our AI programs at Eidsvold and Cardowan and was used at Eidsvold for natural mating.

A number of sons have been retained for stud use, including Greenup Groove G34 (P), Greenup Grandpa G40 (P), Greenup Epic E252 (P), Greenup Exceptional E294 (P) Eidsvold Station Empire E86 (P) (AI), Greenup Fiesta F164 (P) and Greenup Fiasco F106 (P) who have sons catalogued this year. In 2012 a son of Basalt, Greenup Gustav G108 (P) sold to John & Anne Riley's Claricard Stud for \$13,000.

To date 44 sons of Basalt have been offered by auction to average over \$5000.

**Rosevale Basalt B32 (P) is represented by Lots 9 & 91**

The Angus stud sires, E44 and E74 were purchased in 2011 from the inaugural Valorbrook sale for the top prices of \$9000 and \$8000. Both sires are registered HBR.

We selected these sires for their docile temperament, good muscling, growth, clean coats, high semen morphology and large testicles. Both sires have scrotal measurements of 44 cm

The sires are run in a multiple mating situation with unregistered females from the Eidsvold Station stud herd. **They are represented by Lots 69 - 88.**

Note: Angus Group Breedplan EBVs cannot be compared with Santa Gertrudis Group Breedplan EBVs.

**Eidsvold Station G113 (P)**  
 Eidsvold Station W443

Dam calving history: 17/10/2013

A great combination of tropical traits, poll genes and growth. Kremlin is a homozygous polled bull, with great length and scale. Like his sire Echidna, Kremlin has a powerful hindquarter, a sleek, tropical skin type and very tidy underline.

Kremlin is out of a maiden heifer ES G113 (P) who brings the softness of Banana - a characteristic of the Handyman line. In 2014, five sons of Banana sold to average \$5000.

 Eidsvold Station X257 (P)  
 Rosevale Rippon X74  
**D: Greenup Ainsley A103**  
 Rosevale Y606

Dam calving history: 1/10/2007 20/10/2008 4/10/2009 14/10/2010 19/11/2011 23/11/2012 14/11/2013

Keynote is a loose, skinned tropical style of poll bull with great balance and structure. Keynote is a young bull at only 668 days of age. Debonair injured his back in 2013, so Keynote is the first of only three sons to be offered in 2015. To date 13 sons of Debonair have sold to average \$6115, with one son selling to the Wightfields stud for \$15,000 in 2013 and another to Western Australian Mark Madew's Cundarra Stud for \$11,000.

Ainsley has had seven calves in seven years, two daughters and five sons. The first four sons all made the annual sale team and have averaged \$5000 - they were all by different sires. This is her fifth son to be sold. She's a cracking good dam - not surprising as a daughter of X74, the sire of Ability!

## Lot 21 Eidsvold Station Knox K508 (P)

Classified "S" Poll DOB: 15/09/2013 Age: 24 mths Soc ID: EID14MK508

**S:** Greenup Bingo B78 (P)  
Greenup Fiddle F110 (P)  
Greenup Swan

**D:** Greenup Caboodle C56  
Eidsvold Station G55 (P)  
Classified Santa Gertrudis Cow

Dam calving history: 15/09/2013

Knox is a polled son of Fiddle, with excellent finishing ability and an early maturity pattern. This bull has explosive growth and fine shoulders that would suit maiden heifers. Knox's scrotal size EBV places him in the top 5% of the breed for this trait. This is the first son of Fiddle to be offered for sale. This son of Bingo was retained for his constitution, structure and well-balanced figures. Knox exhibits the characteristic softness, fertility and growth we've come to expect from the Bingo line.

Knox is out of a maiden heifer.

 11/10/2010 18/11/2011 6/10/2012 30/01/2014

Kurrajong is the second youngest bull in the draft at only 591 days of age - this is over 200 days younger than the oldest bulls in the team.

Kurrajong is a big-boned bull with terrific softness and easy doing ability. Kurrajong's EBV for scrotal size places him in the top 1% of the breed for this fertility trait.

Kurrajong is the only son of Ability to be offered for sale in 2015. Ability and his sons exhibit great capacity and constitution. To date 21 sons have sold to average \$6476, including Greenup Downpour who sold to Celamba stud for \$27,500 and Greenup Gaffer, who sold to Tookey Creek for \$11,000.

Geraldine has had thirteen calves in fourteen years

## Lot 31 Eidsvold Station Kudos K92 (P)

Classified "S" Poll DOB: 28/08/2013 Age: 25 mths Soc ID: EID14MK92

Greenup Bingo B78 (P)  
**S:** Greenup Fiddle F110 (P)  
 Greenup Swan

Eidsvold Station Axle A232 (P)  
**D:** Eidsvold Station G91  
 Eidsvold Station Y037

Dam calving history: 28/08/2013

Kudos is a sleek-coated, tropical style of bull with plenty of length and the softness we expect from the Fiddle line, however not surprising given the influence of Axle - another soft, easy doing sire. Kudos's EBVs for fat place him in the top 15% of the breed for this trait.

G91 is a maiden heifer.

Dam calving history: 27/10/2011 20/09/2013

King Kong is a polled bull with scale, length and powerful hindquarter. King Kong has a clean tropical coat. Farrer is a homozygous polled bull, whom we purchased for \$13,000 at the 2012 Ag-Show, for his complete package of structure, high semen morphology, and growth coupled with finishing ability.

Zene E139 (P) has had three calves in three years. Her 2012 calf died shortly after birth, two classified - a son and daughter - both are poll.

Kewpie is a lighter-coloured, poll bull with great length of body and a tidy underline. Kewpie is the third son of Greenup Grandpa G40 (P) to be offered for sale and again tops the field with his EBV for eye muscle - placing him in the top 15% of the breed for this trait.

Kewpie also sports a scrotal size EBV that places him in the top 5% of the breed. This genetic package ticks all the boxes.

ES A301 was bred in the multiple herd and calved first as a two year old. She had no additional records until she was moved to the single sire herd in 2008 and has had another five calves in five years.

 Warena M73 (AI) (P)

Dam calving history: 16/08/2008 20/09/2009 14/09/2010 2/10/2011 18/10/2012 16/10/2013

Kennedy is a polled carcass bull with terrific length, a square, large-capacity body and good set of stones. Warena R143 was purchased in 2009 for \$15,000 with a calf at foot, a son of Glen Oaks Braveheart, Warena Dublin D692 (P). To date nine of Dublin's sons have sold to average \$5055.

Warena R143 had seven calves in seven years. She is a consistent dam. We've retained a polled son by Atom, Greenup Helium H72 (P) whose first calves will be released in 2016.

Greenup Santa Gertrudis Cow

Dam calving history: 1/09/2010 25/11/2011 20/11/2012 26/10/2013

Another powerful, polled son of Tycoon. In 2014, 12 of Tycoons first release sons sold to average \$5250. We love this sire - his muscle, constitution and growth suit our country and production objectives ideally. We've retained a number of his sons for stud use. Koolabah is a sleek coated tropical style of bull, with great length and a thick hindquarter. ES D687 has four calves in four years, 2 sons and 2 daughters. Three have classified. Her first son Greenup Jury J270, sold to Arm & Dagger for \$5500 in 2014. Koolabah is her second son to be offered.

## Elite Sanguis Sires

In 2011 we purchased two high performing black angus sires to satisfy our clients request for a Santa Angus cross article. Our search for suitable sires with the constitution and growth began... and after months of research... concluded at Valorbrook Angus Stud, Bell.

Our Angus sires are bred in a multiple sire herd of unregistered stud Santa females. The Sanguis bulls are raised alongside our Santa bulls and have impressed us with their doing ability and carcass qualities.

## Lot 94 Greenup Firestone K270 (P)

Classified "S" Poll DOB: 3/02/2014 Age: 20 mths Soc ID: GUP14MK270

Sujo First Class (AI) (P)  
**S: Benelkay Firestone F31 (P)**  
 Benelkay Hebrew (P)

Warenda Dempsey D656 (P)  
**D: Greenup Agnes H67 (P)**  
 Greenup Agnes E79

Dam calving history: 3/02/2014

Greenup Firestone K270 (P) is the youngest bull in the draft at only 587 days - this is over 200 days younger than the oldest bulls in the team.

This Firestone-Dempsey (Warenda Mahogany) cross has a great balance of figures and is out of a maiden heifer born into a raging drought. His raw figures show that he is closing the gap quickly on his older siblings and be a great asset to any breeding program.

## SALE INFORMATION

### Auctions Plus

Online bidding is available only to registered users. Registration is free - visit [www.auctionsplus.com.au](http://www.auctionsplus.com.au) to register. Please register at least 48 hours prior to the sale. Microsoft Silverlight is required to connect to AuctionsPlus sales; first time users are advised to visit the Downloads section of the AuctionsPlus website to ensure Silverlight is installed. Demonstration Auctions may be viewed in order for new users to become familiar with the system. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

**Breeding Soundness** All bulls have passed a breeding soundness examination by veterinarian Ced Wise.

**Semen morphology** All bulls have passed a semen morphology test by veterinarians Ced Wise

**Health** All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

**Buyers Inspections** Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

**Supplementary Sheets** Supplementary sheets will be on our website: [www.greenup.com.au](http://www.greenup.com.au) and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat.

**Brands** Symbol Brands:

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

**Guarantee** Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
  - Gross negligence or willful misconduct on the part of the purchaser;
- In the event of an animal failing to breed, we agree that;
- The animal may be replaced with an animal of comparable value;
  - Credit shall be given in the sum of the full purchase price, less salvage value;
  - The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

**Insurance** Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

**Outside Agents** The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale. Settlement by the outside agent on the purchasers behalf must occur within fourteen days of the sale.

**Delivery** Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

**Risk & Responsibility** Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

**Disclaimer** The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.

## BREEDPLAN EXPLAINED

**Only Santa Gertrudis GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.**

### Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

### Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

### Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

| ACCURACY RANGE | INTERPRETATION  |
|----------------|---|
| Less than 50%  | Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available. |
| 50 - 74%       | Medium accuracy, usually based on the animal's own records and pedigree.  |
| 75 - 90%       | Medium-high accuracy and usually includes some progeny information. Becoming a more reliable indicator of the animal's value as a parent.           |
| 90% and above  | High accuracy. It is unlikely that the EBV will change much with the addition of more progeny data.   |

### Growth

**200-Day Milk** EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

**200-Day Growth** EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight** EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight** EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

## AUGUST 2015 SANTA GERTRUDIS GROUP BREEDPLAN

### Percentile bands for all 2013-born animals

**Mature Cow Weight EBV** (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

#### CARCASE

**Eye Muscle Area EBV** (cm<sup>2</sup>) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

**Rib Fat EBV** (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**Rump Fat EBV** (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

#### SELECTION INDICES

Selection indices can and possibly should be developed for each individual enterprise, however for convenience a Breed Society Index has been compiled based on common breeding objectives and some assumptions of breeding criteria. However not all operations are the same and will NOT want to place the same emphasis on each criteria, therefore these breeders should not use the Society Indexes but instead construct their own using Breed Object.

If you would like a specific index calculated for your herd, please contact Rick and Alice or visit [www.breedobject.com](http://www.breedobject.com).

**DOMESTIC PRODUCTION:** Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

**EXPORT PRODUCTION:** Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

#### Breed Average for 2013-born Animals

| 200D Milk | 200D Wt | 400D Wt | 600D Wt | Mat Wt | Scr Size | EMA  | Rib Fat | P8 Fat | \$ Index Value |     |
|-----------|---------|---------|---------|--------|----------|------|---------|--------|----------------|-----|
|           |         |         |         |        |          |      |         |        | Dom            | Exp |
| +1        | +10     | +16     | +22     | +26    | +0.7     | +2.2 | 0       | -0.4   | +14            | +16 |

The Santa Gertrudis GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Santa Gertrudis Breeders (Australia) Association nor the ABRI oversee or audit the collection of the data

Use this table as a guide to compare individual animals with the current genetic level of the Santa Gertrudis breed.

## PRE- SALE INSPECTIONS

---

Prior to sale day, all bulls are depastured on oats at 'Belvedere' and can be inspected anytime.

Belvedere is situated on the Kerwee-Mt Perry Road, 10 minutes north of Eidsvold township.

To arrange inspection, contact Rick on 4164 4260 or his mobile 0427 644 260.

## DIRECTIONS TO EIDSVOLD SALEYARDS

---

Eidsvold Saleyards are on the Southern side of town just off the Burnett Highway. Take Hollywell Road at the BP Petrol Station.

## AIRSTRIIP INFORMATION

---

Transport from the airstrip to sale venue can be arranged with advance notice.

### Eidsvold Airstrip

250°/22°S 150°/07E

1200 m long

Licensed air strip

Driving time Airstrip to

Eidsvold – 5 minutes

Alternative strips suited to twin engine jets are located at Monto, Thangool and Gayndah.

## ACCOMMODATION
