Welcome to Sevenbardot at 'Wigelmar'

A lot has happened in the last 12 months.

House renovations are complete at Wigelmar and we will have been here 3 months by sale time. There is still a lot to do with water and fencing but some has been done and the place is starting look ok.

We have had our mature cow sale and somewhat reduced our numbers to nearly fit the herd on Wigelmar.

WE HAVE DEFINITELY NOT DISPERSED.

We have just finished AI'ing 160 heifers of which we will be keeping about 70 the rest are for sale. We also have for sale 50 3 year old heifers with their first calves at foot, 40 five year olds and 50 mainly 6/7& 8 year olds all with calves at foot and joined. Some of these will be around for sale on sale day for those who are interested. They would make an ideal addition to any herd.

This year we are doing something different. We have chosen 2 young sires to keep and as is our policy we only use these bulls once or twice. This year we are offering them at the beginning of the sale with Sevenbardot retaining 2 uses of the bulls. We will pay half the purchase price of the bull. The bull will be joined immediately to 40 females for 9 weeks and then delivered to the new owner. In year 2, if we want the bull back, the joining time will be a little more flexible. This gives you, the commercial breeder, the opportunity to buy into what we think are our best young bulls. We look forward to sharing these bulls with you.

We are offering 98 very nice bulls that are so even it has been very difficult to write original comments under them all. We think they are the most even well fleshed group of bulls that we have ever offered. They have had 9 weeks on oats with some silage, cottonseed and hay put through the mixer to assist them. They have had absolutely no grain.

Sam and Amy have a baby due in November so Ruby won't be the only grand child. That's exciting.

Angus starts a job managing a place at Bunnan in October so he can put into practice all he has learnt over the past 12 years. That's exciting also.

With the cattle market roaring along as it is and the season looking a lot better in a lot of areas the future looks more promising than it did 12 months ago. We hope things have improved for all of you and we get to see you on sale day for a steak, a beer and a good get together.

Good bulls, good steak, and a good day out.

The Gunn Family

Sam & Amie PTIC due November!

Jim & Paul Dooley Cow Sale.

Time wasters Sue.

Ben's Ruby growing up.

Angus networking Cow Sale.

SALE DAY

Information

DATE

Friday 11th September 2015

TIME

Bull Sale commences 1pm.

VENUE

Wigelmar, 6749 Bylong Valley Way,
Bylong 2849.

INSPECTION

From 9.30am on sale day or by appointment.

SELLING AGENTS

Landmark Townsend and Elders Pastoral
Paul Dooley Auctioneer.

REBATE

Outside agents apply to the vendor.

Auctions Plus

Will be on Auctions Plus. Refer to page 6.

DELIVERY

Free delivery to Wagga, Carcoar, Dubbo, Condobolin, Bourke, Goondiwindi, Tamworth, Mudgee, Scone and Singleton. Drop offs can be arranged at towns on the routes travelled to these centres.

Terms & Conditions

As displayed on the day.

HEALTH

All bulls are free to all states of Australia except WA. We are a Johnes Protected area. If any tests are required for your area they will be carried out at no cost to the purchaser.

All bulls have been treated with Cydectin and had a multimin and a seven in one.

INSURANCE

Brokers will be present on the day for your convenience.

REFRESHMENTS

Morning Tea and lunch will be provided.

Liability

The owners, employees, sale staff and representatives accept no responsibility for accidents that occur. Any persons attending do so at their own risk.

BUYING BULLS

A Different Perspective

BUYING bulls is difficult. It is like playing sport you need to be in form which means you need to practice. Buying bulls once a year doesn't give you that practice you need so the following questions arise -

- How much do I spend?
- Which one do I buy?
- What am I really selecting for?
- What do all these figures mean?
- Who do I go to for help?

Let us work our way through this list.

1 You should be prepared to spend somewhere between 8 and 10 times what your weaners average or 5 to 6 times what your bullocks make if you are to maintain your present herd standard. If you are trying to lift your herd performance you may need to spend a little more or you may get lucky and the bull you pick may come in under budget.

2 When you first arrive at the sale walk through the bulls from the last lot to the first and cross out any bull you don't like. Then go and have a cuppa and think about what you have seen. Then go back through the bulls that you have not crossed off from lot 1 to the end. Select the bulls you like, and make sure you pick at least twice as many as you need. Now go and look at the bulls EBVs and INDEXES and place the bulls in the order you would like and put a price on them that you are comfortable to pay. Now if you need any help go to your adviser and ask. I suggest you ask the owner as you then put him on the spot to help you and no one knows more about these cattle than the owner. If you are going to ask someone else make sure he is someone who breeds cattle.

3 I would hope you would have some idea of what you are trying to achieve with your breeding program. Select the bulls that have strengths in the areas that you have weaknesses in, and where possible have strong EBVs in these areas. For example if you are trying to increase the size of your cow herd pick a bull that is quite a bit bigger than you require and has EBVs above herd average and who has a birth weight figure that is no more than 10% of 600 day growth. You may have to give away a little in an area that you are strong in to get the bull you want but can fix that with your next sire.

4 There are a lot of figures pushed at us today and they are confusing even for those of us who work with them all the time. I suggest if you want a technical answer ask a geneticist or a departmental person. If you want a practical answer ask your seedstock producer or someone you know who has a good herd that you know uses Breedplan as a selection tool. I suggest you select your bulls and then look at the figures and go for the bulls where Breedplan supports your selection. However I would not eliminate a bull that I really liked if his figures were not quite as good as he looks.

5 Where to for help? If you were comfortable with the owner of the bulls then I would start there. If not take someone with you who you are comfortable with and who has a herd of cattle that you wished you owned. He does not necessarily have to have the same breed. And last but not least back your own judgement. However if you are getting advice and feel you need it don't ignore it? Remember it is not use going to the doctor, if you are not going to take the medicine.

I hope this has been of some use to you as it was to me when I was given it some 20 years ago. If you don't know, ask or you will never know.

HEREFORD EBVs

Explained

The EBVs contained within this catalogue can be validly compared with other Hereford GROUP BREEDPLAN EBVs or Hereford INTERIM EBVs in other herds. These EBVs can not be used to compare animals of another breed.

ESTIMATED BREEDING VALUES (EBVs): An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY: An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Although the accuracy of an EBV should be considered, animals should be compared on EBVs regardless of accuracy. Where two animals have the same EBV however, the animal with the higher accuracy would normally be used more heavily than the bull with the lower accuracy because the results can be predicted with more confidence.

CALVING EASE:

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

Direct: Direct calving ease indicates how this animal influences the birth of its progeny.

Daughters: Calving Ease - Daughter's indicates how well the animal produces daughters that have easier calving.

BIRTH

Gestation Length: The GL EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation length and generally easier calving.

Birth Weight: The Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

FERTILITY

Scrotal Size: The SS EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

Days to Calving: The DC EBV (days) is an indicator of female fertility based on the time between a cow's first exposure to a bull and when she subsequently calves. Cows that calve late in the season or fail to calve are penalised. This is more useful as a sire trait. Lower (negative) EBVs

are preferred indicating shorter days to calving for the sire's daughters.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth: The 200-Day EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight: The 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight: The 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight: The Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

CARCASE

Carcase Weight: The Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

Eye Muscle Area: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

Rib Fat: The Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent: The RBY% EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

\$INDEXES

Explained

SELECTION INDICES

Supermarket: The Supermarket Index estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting the domestic supermarket trade. Steers are either finished on grass or grain (eg 50-70 days). Steers are assumed marketed at 450kg live weight (250kg HSCW and 12 mm P8 fat depth) at 17 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

Grass Fed Steer: The Grass Fed Steer Index estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting pasture finished steers. Steers are assumed marketed at 600 kg live weight (330 kg HSCW and 8 mm P8 fat depth) at 23 months of age. Daughters are retained for breeding. In response to industry feedback regarding eating quality and tenderness, a small premium has been placed on marbling.

Grain Fed Steer: The Grain Fed Steer Index estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting pasture grown steers with a 125 day feedlot finishing period for the grain fed markets. Steers are assumed marketed at 600 kg live weight (330 kg HSCW and 20 mm P8 fat) at 20 months of age. Daughters are retained for breeding. There is a significant premium if steers reach a marble score of 2 or greater.

EU: The EU Index estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd targeting pasture finished steers for the EU market. Steers are assumed marketed at 620 kg live weight (340 kg HSCW and 14 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding. There is no marbling requirement.

AVERAGE \$INDEXES FOR ALL HEREFORD ANIMALS			
Supermarket	Grass Fed Steer	Grain Fed Steer	EU
+\$71	+\$66	+\$73	+\$80

The Hereford GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither Herefords Australia Limited nor the ABRI oversee or audit the collection of the data.

**All lots will be interfaced with
*AuctionsPlus***

Contact your local agent for details.

Our sale is live on-line in real time, and will be interfaced on AuctionsPlus with the physical auction that is being conducted by an auctioneer. A hand held wireless connected computer is used to bring the on sire bid price to the internet screen for remote bidders to observe.

These remote bidders can bid on computers at their location and the bid is immediately transferred to the auction barn through the wireless computer and relayed to the auctioneer.

* Bidding is only available to registered AuctionsPlus users.

* You must register at least 24 hours prior to the sale with AuctionsPlus Sydney on their website.

ONLY SALE BULL LOTS WILL BE ON AUCTIONSPLUS

Lot 1A

This year we are doing something different.

We are offering 2 bulls as Lots 1A and 1B that we would normally keep for our own use. As our policy is to only use a bull twice unless he is a superstar then these good bulls end up being wasted and as our joining time is from the first of August to the first of November these bulls never get exposure.

The 2 bulls will come in together and the winning bidder gets the pick, then we will sell the second bull. Sevenbardot are keeping a half share in each bull. This entails the right to use the bull twice. We will be collecting 100 straws of semen for our own use and for insurance.

We will be joining them both immediately for 9 weeks and then they will be delivered to the new owner at our expense. The second use times can be negotiable.

Lot 1B

BEST QUOTE OF AN ERA

*"The Budget should be balanced,
the Treasury should be refilled,
public debt should be reduced,
the arrogance of officialdom should be tempered and controlled,
and the assistance to foreign lands should be curtailed,
lest Rome will become bankrupt.
People must again learn to work instead of living on public assistance."*

- CICERO, 55BC

So, evidently we've learned bugger all over the last 2,060 years.

VALE SEVENBARDOT STUART B98

19/6/2006 to 25/6/2015

This year we put B98 down. He dressed a huge 800 kilograms and weighed 1454 kilograms all this at 9 years of age and not prime fat. He would not fit up any race we had on the place and would not fit down the race at the abattoirs or in the kill box. That is not a bad effort for your humble old poll Hereford.

B98 has bred the house down for us and on several occasions achieving 100% pregnancy from his joining. He was super fertile with an amazing temperament and the best carcass we have ever bred. He bred great females as well as outstanding bulls. Those that have had his sons often comment on how they have bred on so well and often punching way above their weight.

The last of his sons are in this years sale and we have just AI'd the last of his daughters.

I went back through his pedigree a long way recently and he has every influential bull we have ever used in his pedigree starting with Merawah Revenge, Kildrummie Torch, Kildrummie Tudor, Woodlands Cossack, Whattleview Indercater, Castle Bend Anthony, Glenkirk Vanguard, Floralview Oneway, Doonbiddie Hustler and going back to Sevenbardot Irish Maid 7th the first super cow we produced way back in 1962. He also goes back to our best cow families the Ursula A55 cow that did so much for us and Shamrock A173 who did wonders at Sundown, the Colleens that produced Cossack 17, the Minervas that produced Leopard 2nd and there is Dale Mischief 13 there also. It is amazing how these great cattle keep popping up in the pedigrees of your best cattle and you can get none of this information from breedplan.

After sale we will have sold about \$225,000 worth at an average of close to \$6,000, not bad with no ET and no AI just natural mating to 40 cows each year.

We have used two sons in the herd E188 who bred last years top priced bull and E196 who's opportunities were limited with an injury that took twelve months out of his breeding time. He was sold at our cow sale to RI & LH Rollinson for \$5,500.

We will be looking to find a son or two from B98's daughters to continue his legacy.

If you have not got one then this is your last chance so hook in. They are lots 1, 19, 31, 56, 57, 76, 88 and 96.
