12 Special Flock Rams

View individual videos: www.valma.com.au

These are the rams that just missed out on making our show team. They have excellent Lambplan figures, and structural soundness.

A video of each ram is available on our website for you to inspect.

The rams are currently at home in Tasmania, but upon purchase, delivery will be organised free of charge to Vic, into SA, southern NSW.

Eating Quality Index (EQ): is targeted at producers interested in improving the meat eating quality of their prime lambs. It is based on the same production targets as Carcase+ with the added emphasis on eating quality traits, including shear force (SF5) and intramuscular fat (IMF).

The figures in red show traits that are in the top 10% of all terminals born in 2015.

Gen = Genomics tested.
