Welcome to our 49th Annual Bull Sale. We also welcome this fantastic season and explosive cattle prices. We hope you are impressed by this year's sale draft as much as the current cattle prices.

We take great pleasure in offering you the opportunity to purchase Weebollabolla Bulls. Our Shorthorn genetics have survived and thrived under the Munro management from 1874 on Weebollabolla and before us the Hall brothers since 1848.

Fertility, performance and carcass composition are the three components to our breeding program. Structure and longevity attributes go without saying as you cannot survive over a century without them.

Since our 2015 sale, sires Weebollabolla Finlay F120 and Marellan Nuclear F215 indexes have improved from +\$57 and +\$58 to +\$63 and +\$69 respectively - a true testament to their genetics and the performance of their progeny in the paddock.

We have also been impressed with Weebollabolla Hercules H20. He has done a brilliant job over maiden heifers- his sons in the sale draft are an extremely even line. Tremendous fat cover and excellent 200DW comes as no surprise given his milk EBV. We will continue to use him in our future AI programs. We are excited about the genetic combinations by Finlay, Nuclear and Hercules' future progeny.

We have received a number of enquiries for females. If you are interested please contact Jen 0427 700 244 or email: jen.munro@weebollabolla.com.au for further details.

2016 has been an eventful year with the birth of Sandy and Jude's 10th grandchild, James Munro Jeffreys, son of Jen and John.

We look forward to seeing you at our 49th Annual Bull Sale on Friday 16th September. Or you can utilise one of two online services- the well known AuctionsPlus or the new live streaming via Elite Livestock Auctions from our sale ring. Visit www.auctionplus.com.au or www.elitelivestockauctions.com.au. Video footage and photos will be available on our website from Friday 2nd September.

Please enjoy our delicious steak provided on Sale Day.

Goodluck,

The Munro Family

More Beef, More Profit

SALE INFORMATION

DIRECTIONS

From Moree take the Gwydir Highway (Inverell road) and travel 3.2km after the 100km speed zone (next to Weebolla Bulls Rugby Fields). Turn right onto Terry Hie Hie road. Travel another 2km, Weebollabolla sale complex is on your right.

From Inverell heading West turn left at Terry Hie Hie sign and travel 2km the sale complex is on your right. If you hit the Weebolla Bulls Rugby Fields you missed the turn off.

INSPECTION

Cattle will be available for inspection from 9.30am on the morning of sale. Inspections are most welcome prior to the sale, please contact Sandy Munro 0429 700 244.

START TIME

1.00pm sharp in conjunction with AuctionsPlus and Elite Livestock Auctions.

Photos and footage available first week of September at www.weebollabolla.com.au.

BREEDING GUARANTEE

Our bulls have a breeding guarantee. Any issues please contact Jen or Sandy.

REBATE

A rebate of 4% to outside agents, 1% to those who do not attend the sale.

BUYER INSTRUCTION SLIP

No verbal instructions will be accepted. In the interest of buyers all instructions concerning the delivery of stock purchased at this sale must be given in writing and signed by the buyer or their representative.

ACCOMMODATION

We recommend the Spa Village Travel Inn 02 6752 4033 or the Albert Motel 02 6751 1040.

INSURANCE

Representatives will be available. We do recommend insurance for at least the first joining ie 6 months particularly for expensive bulls in the case of an unforeseen accident.

FREIGHT

We will deliver free to major Regional centres.

REFRESHMENTS

Morning tea will be available from 9am and our famous Weebollabolla steak and drinks will be provided from 11.00am.

MANAGEMENT

2016 Sale Draft were finished on oat crop. On the 9th September 2016 bulls were weighed, scrotal measured and scanned by Roger Evans, Bovine Scanning Services for EMA, Fat Depth and IMF%.

We maintain the minimum circumference for Scrotal Measurement is 35cm.

On 27th & 28th July 2016 bulls were semen tested and examined for structure by Peter Brown, Bovine Breeders. Please note the ideal time to semen test is within 6 weeks of joining.

In 2016 all bulls have been drenched with Eprinex, received 7 in 1 booster, and both Vibrio and Pestiguard shots.

WARNING

All Sale Bulls have been assessed for temperament and are quiet to handle. However, they are used to being in a large contemporary group and we cannot predict nor guarantee their behaviour on Sale Day. They are not used to crowds of people or being put through the sale ring by themselves. They become particularly oblivious to those around them if they start fighting. Please be aware and take care. Children and injured people should avoid going into the bull pens. Enter pens with this information in mind.

DISCLAIMER

Whilst all care and attention to detail has been made in accurately compiling this catalogue, neither the vendor, selling agents or representatives will assume any responsibility for the correctness, use or interpretation of information included in this sale catalogue.

WEEBOLLBOLLA 49TH ANNUAL BULL SALE.

The 49TH Annual Weebollabolla Bull Sale is to be conducted at 'Weebollabolla', Moree on Friday 16th September.

My involvement with the Munro family and their annual bull sale goes back to when I commenced working for Dalgety Winchcombe FGC Moree in 1985 and it's great to be once again associated with the sale through Elite Livestock Auctions.

I have inspected this year's lineup and I believe they are every bit as good if not better than any previous draft to go through the sale ring.

They are a very even lot of bulls that feature all the attributes the Weebollabolla cattle are renowned for – large frame – tremendous length – excellent muscling as well as good shoulder placement and neck extension.

The bulls are currently on oats and are doing fine; they will be in ideal condition to put straight out to work in any female herd come sale time.

Shorthorns are regarded as one of the most fertile breeds of cattle and with crossbreeding becoming more prevalent in Australia Weebollabolla bulls will lift the fertility of any herd.

Weebollabolla Shorthorns have shown that they can also perform where it really matters – in producing top quality beef.

The Munro family entered a line of Shorthorn and Shorthorn Charolais cross steers in the 2015 Sydney Royal Beef Challenge. Weebollabolla Shorthorns exhibited the Champion Pen of Export Steers; they were awarded first place in the live assessment section, total daily weight gain as well as first place in total feedlot and carcass grid scores, they were also second in carcass judge scores and third in profitability.

It's interesting to note that two Australian major beef processors are now offering premium contracts for shorthorn and shorthorn infused cattle fed on a long term feed lot program.

Whether you are using Shorthorn Bulls in a purebred herd or in a crossbreeding program, and you haven't tried Weebollabolla genetics, then I suggest you strongly consider introducing Weebollabolla sires – the name is synonymous with big strong robust cattle and they have proven that they will lift the profitability of any herd in which they are used.

A prime example of this is the outstanding results achieved by Weebollabolla infused steers sold at the annual Jeogla sale earlier this year where they realized over \$1620 a head.

Weaner Steers owned by the Murray family of Kindee Pastoral Company and sired by Weebollabolla bulls made up to 400 cents and returned up to \$1206 a head at the Roma Saleyards in June.

The Kindee steers were purchased online through the Elite Livestock Auction platform – the first time the concept had been used in a store cattle sale in Australia.

Mark Friday 16th September in your diary – if you haven't been before come and check out the Weebollabolla cattle – I'm sure you will be impressed with the draft of 100 bulls

If you can't make it to the sale Elite Livestock Auctions will be streaming the sale live – check out our website prior to the sale for all details in regards to registering to buy or watching the sale as it happens.

A handwritten signature in black ink that reads "John Shaw".

REFERENCE SIRES

WEEBOLLABOLLA FINLAY F120 (SR) (SC)

AGFF120

BORN: 21/06/2010

COLOUR: RED

THE GROVE LOCKYER X857 (SR) (P)

SIRE: YAMBURGAN LOCKYER C8 (SR) (P)

YAMBURGAN VIOLA 8TH (SR) (H)

WEEBOLLABOLLA IMPACT Y156 (SR) (P)

DAM: WEEBOLLABOLLA CHEMISTRY C123 (SR) (P)

WEEBOLLABOLLA SUCCESS Z58 (SR) (P)

Notes: Finlay F120 remains a trait leader for 600DW, scrotal, carcass, EMA, top 5% 200DW, 400DW, milk and top 10% retail beef yield and his MSA index. These exceptional EBVs are due to Finlay's length balanced by his width. Other attributes are neat sheath, good feet and excellent temperament. His dam Weebollabolla Chemistry C123 was flushed to Yamburgan Tobermorey F090 and has produced the following sons in the sale in Lots 11, 29, 46 and 57. Chemistry was put under pressure returning to the mob to be joined to Weebollabolla Gallahad G62 and succeeded in rearing Lot 36 in our sale. Finlay F120 sired Lots 1, 4, 7, 12, 20, 22, 25, 61, 69 and 86.

THE GROVE DALE 39TH (SR) (P)

YAMBURGAN MITTIEBAH 5TH (SR) (P)

DAM: YAMBURGAN MARGARET 32ND (SR)

YAMBURGAN MARGARET 28TH

Notes: Ossie E93's growth and shape are standout traits in his sons. This sire is well represented again in our 2016 sale draft; a tribute to him. This can be attributed to being in the top 5% for milk and EMA, 10% for 200DW and 15% for 600DW and retail beef yield as well as 20% for rib fat. Lots 6, 8, 30, 32, 35, 41, 63 are sons of his.

| JULY 2016 PERFORMANCE HERDS AUSTRALIA BREEDPLAN | | | | | | | | | | | | | | | | INDEX |

WEEBOLLABOLLA NINDETHANA (SR) (P)

INVERARY ROLEX Z100

DAM: MARELLAN SUSAN 8228L (SR)

MARELLAN SUSAN 96TH

Notes: We remain extremely impressed with Nuclear's progeny performance on paper and in the paddock. So has ABRI because his MSA index improved from \$58 to \$69 between 2015 and 2016 or top 15% to top 5% percentile. This balanced sire was purchased from Lincoln and Lisa Job of Marellan in 2012 for \$14,000. Other traits are in the top 5% for fat cover, top 10% for IMF, 15% for 200DW and 20% for 400DW and 600DW. Nuclear F215 has sired Lots 3, 16, 17, 18, 19, 21, 28, 33, 40 and 58.

This year Weebollabolla entered the RNA Paddock to Palate Class 38 - 70 Day Trade Feedlot Competition. The competition was split into 3 phases: Feedlot Weight Gain, Carcass competition and MSA Eating Quality, with the overall winner determined by who had the highest score. Scores are determined as per below table:

| | |
|----------------------------|---|
| Weight Gain | 35 points per head Class 37: 100 day - 1 point for every 9kg gained (to a max. of 315kg gain) Class 38: 70 day - 1 point for every 8kg gained (to a max. of 280kg gain) |
| Carcass Competition | 100 points per carcass PB fat depth - 10 points Rib fat depth - 15 points Fat colour - 10 points Meat colour - 15 points Marble score - 5 points Est. Lean Meat Yield - 10 points Eye muscle area - 20 points Fat distribution - 15 points |
| MSA Eating Quality | Points per pen – 1st 8 points, 2nd 6 points, 3rd 4 points |

Weebollabolla competed against 59 teams or 413 head in the Trade Class and is very proud to announce it placed 4th overall, narrowly missing 3rd, in Class 38: 70 day Trade competition. We also placed 3rd in the MSA Eating Quality Competition where MSA grading models predict eating quality of 40 muscles using 6 different methods.

CLASS 38 RESULTS

Weebollabolla Goodar G105

Weebollabolla Goodar G105 was purchased by The Grove in 2013 for \$15,000.

Spencer Morgan said this photo was taken at the beginning of 2016 after joining and "shows his constitution as it wasn't a great joining period season wise".

Spencer is very pleased with Goodar's sons and will have some available in his 2016 sale draft.

Our own Weebollabolla AI Program in 2013 produced all heifers and they are steaming ahead.

White man. Awesome!

Weebollabolla H82 has performed well for Chris & Pete Francis of Gobothery Forbes, who purchased the sire for \$5,500 in 2014.

Semen available
Weebollabolla H82

Big fella leaving his mark.

Weebollabolla Balance a Winner

Andrew Norris,
Courtesy The Land November 12, 2015

Shorthorn is a breed renowned for its fertility, but at Weebollabolla, Moree, the Munro family is projecting a broader message about their Shorthorn herd's potential, and the Sydney Royal Beef Challenge has been an important step to their strategy.

Jen Jeffreys of Weebollabolla points out how Shorthorns can be used in a crossbreeding situation to lift fertility, but without losing performance and carcass quality.

With crossbreeding expected to play a large part of the beef industry's future, she said it was important producers were aware of the other benefits the breed brought to the mix.

Her family – the Munros, who established the Weebollabolla herd about 150 years ago – produced the champion pen in this year's export section of the Beef Challenge.

If the performance of their stock is anything to go by, then it's working.

Their entries included Shorthorn and Shorthorn/Charolais.

The family's cattle also won reserve champion individual export animal for overall performance.

Helping their score was a first placing in the live assessment scoring, daily weight gain total, feedlot total and carcass grid scores.

They were also second in carcass judge scores and third in profitability.

In the individual export section scores, Weebollabolla got first and second for live assessment and highest daily weight gain score.

"We focus a lot on our maternal traits, not just the carcass side," Mrs Jeffreys said.

"It's important to have a balanced breeding program where you can hit a number of markets."

Therefore, the cows had to perform in the paddock while their offspring hit the specifications in the feedlot and along the slaughter chain.

The winning pen of the Weebollabolla entries were three-quarter Shorthorn and one quarter Charolais, having been sired by Weebollabolla Shorthorn bulls and from Charolais/Shorthorn cows.

"Mike MacCue from Wilga Feedlot, he's done a fantastic job putting a commercial focus into the lot feeding side of the competition, from awarding points to consistency in pen performance to penalising teams that have a death – he's a really good operator," she said.

The consistency of weight gain of the Shorthorn-cross pen they entered helped that pen's total daily weight gain score and Mrs Jeffreys said this was likely helped by the progressive work in their herd to shorten their joining period.

"That possibly helps with their consistency because there's not

Judy & Sandy Munro, Weebollabolla Shorthorns, Moree, took out the champion export pen, reserve champion export individual and a silver medal in the taste testing.

that age variation," she said.

She also said the taste test this competition ran was a relevant aspect for what the industry was all about.

"You could have a really high performing animal, but it's tough and coarse to eat," she said.

She acknowledged producers might not be directly paid for taste, but if their stock had good marbling it could help set their herd up for the future.

Overall though, she said the result was a reflection of their strong focus on fertility.

"Fertility is the number one trait we focus on, so to achieve overall export champion pen as well says we have a balanced, progressive genetic program".

WEEBOLLABOLLA WINS

- 1st Export Pen Live Assessment
- 1st Export Pen DWG
- 1st Export Pen Feedlot Trial
- 1st Export Pen Carcass Grid
- 2nd Export Pen Carcass Judge
- 3rd Export Pen Profitability
- 1st Export Individual Live Assessment
- 2nd Export Individual Live Assessment
- 1st Export Individual DWG
- 2nd Export Pen Taste Test
- 1st OVERALL CHAMPION EXPORT PEN**
- 2nd OVERALL RESERVE EXPORT INDIVIDUAL**

Left: Steers being taken down to the yards on 21 June 2016 and (right) later that day in the bull pen. These steers were processed the following day.

Due to woeful grain prices and limited grass availability we fired up our opportunity feedlot. Along with some cracker cows we fed 126 steers for 100 days. We achieved 99.21% compliance 347.6kg carcass weight HGP FREE, 17.43mm fat and 60.56 MSA index to average \$2,064.31 (ex gst) or \$5.94/kg on a \$5.95/kg grid on 29/06/2016.

Whilst conversion rates and weight gains did not break any competition records they performed solidly for the cold snap and wet weather the cattle endured.

Needless to say Stephen Moy and Grant Coleman from Wingham Beef Exports were thoroughly pleased with the cattle. Ross Becker, Weebollabolla Cattle Manager, fed the cattle and Keiren Te Velde of Bob Jamieson Agencies inspected the carcasses on kill date 22/06/16. Thank you to Wingham Beef Exports' for their hospitality and access granted in allowing photos throughout the meat works.

The next consignment of 120 head went on 9th August to Wingham Beef Exports.

Ross Becker, Weebollabolla Cattle Manager with Keiran Te Velde of Bob Jamieson Agencies inspecting the carcasses.

Below: These steers (pictured on 2 August 2016) were processed on 9 August 2016 at Wingham Beef Exports and the meat has been kept for sale day.

The White Cattle King

Georgie Poole and Nell Montgomery

Having watched the cattle industry grow and evolve, breeds come and go, markets and producers rise and fall, it seems Cedda O'Neill has had the last laugh.

A lifelong dedication to pure white shorthorn breeders may have raised eyebrows over the years, but his longevity in the industry speaks for itself.

Next year marks Weebollabolla Shorthorns' 50th sale and as the Munro family stop to reflect on the years gone by, Cedda remains a steadfast favourite on the Shorthorn circuit. Jen Jeffreys cannot think of a Weebollabolla Bull Sale without Cedda, and admits that every time she sees a white Shorthorn heifer, cow or steer, he immediately springs to mind.

"As soon as a Shorthorn bull steps into the round yard there's always a collective whisper 'here's a Cedda, Cedda will buy him' – It's getting to the point where we almost take him for granted, although we don't of course!"

Infact, the Munros' admiration and affection for the gentleman from Garah is unbounded. "With 50 years of bull sales rolling around you cannot but help contemplate and reflect upon your client base, and Cedda would have to come close to being one of our oldest and most treasured clients."

While softly spoken and unassuming by nature, Jen is quick to affirm Cedda's strength of conviction, 'he knows what he wants and does not muck around.'

"I can only remember one sale when Cedda did not buy a white bull, and that's when we had a contingency of Victorians' chasing the whites to put over their herefords and it might have also been the year a white bull topped the sale as well."

"It's common knowledge Cedda only buys the white bulls because they are the cheapest – smart really when you think about it," admits Jen.

She believes it's this practical, low cost and level headed approach that has ensured his consistency within the industry.

Cedda and his father, Clinton, bought their first white Shorthorn Bull from the late Ken Livingston in Mungindi in 1951, 65 years ago.

With the theory of the time suggesting White Bulls were attacked by Aphids and susceptible to sunburn, they were cheap, and Cedda chuckles as he recollects Gerald and Frank Moore paying dearly for Red Bulls based on this untruth.

"I started buying bulls from Wallace Munro when Weebolla started its sale 49 years ago and I've always been satisfied with my Weebolla Bulls – it doesn't matter what they look like, their progeny is consistently outstanding," Cedda says.

It was after a sale in the 1950s, when Cubby Station sent a mob of Bullocks to Moree, that Cedda's White Shorthorn's first flexed their market value.

He reflects fondly on the purchase of 50 light condition roan bullocks for 31 pound 10 shillings – about \$63 in today's value.

"We put them on oats for 10 weeks and resold them during that period and the lightest beasts bought 50 pounds, or \$100 today."

"We kept eight very big bullocks and sold them in Moree at the end of the 10 weeks for 80 pounds."

"Gerald Moore was at that first sale and just couldn't understand why we bought roan over red, insisted to my father that red fattened so much faster - I think we had the last laugh in the end!" Chuckles Cedda.

Cedda O'Neill started buying bulls from Wallace Munro 49 years ago and has always been satisfied with my Weebolla Bulls. (Photo courtesy Amy Lawson, The Land).

He also recalls Keith Munro, Wally's cousin, marking the white bull calves believing they would be inferior bulls.

While today's beef industry prospects are exciting, it was not too long ago during the drought of 2013/14 when Cedda recalls selling eighteen old, dry cows at an early July sale in 2014 for 117 cents, averaging \$500 a head. Then in December 2015 his cull cows averaged 248 cents, over \$1500 per head through Pitman Deakin.

A consistent marbling score of about 2.5 and an average dressing percentage of about 57 percent were some of Cedda's preferred attributes of the white shorthorns, while minimal bloat, easy handling and good mothering were also attractive features.

"This season there is a lot of clover around, 15 head have blown on the stock route - 11 in one night but I've not lost any of a mob of 50 cows calving down next to them."

Inspired, Cedda's brother Kevin also bred from Weebolla stock and his other brother Max O'Neill still breeds shorthorns, as well as crossing with black polled angus bulls.

Janelle and Mike Montgomery also started their white herd from Cedda's cattle, with bulls bought from Weebollabolla.

"His stories of the years gone by offer a rare insight into the industry, which is as fascinating as it is inspiring," Jen reflected.

With Janelle recently collecting his stories for a book, Jen recalls the straight shooting Cedda laughing as he announced that it was probably for his obituary.

"He is like a rare breed, there are not many around like Cedda anymore - tough as they come, work all day - on an empty stomach by the look of him - but you would never hear a word of complaint. Always dressed neatly in a tie and coat for the sale, Cedda is a gentleman through and through, and one not short of a yarn either."

It's almost 90 years since his parents first bought "Banyandah", Garah, and with his mother living until 99 and father 88, it doesn't look like Cedda, born after the great depression in 1932, is about to hang up his boots just yet.

"when I spoke to Cedda yesterday one of the first questions he asked was how many white bulls would we have in the sale and he also told me he's looking forward to the 50th Sale next year."

"There are not many other seed stock producers in Australia who can claim 50 years of Bull Sales, let alone have such a wonderful client as Cedda. Thank you Cedda for all your support over the past 49 years, you truly are one of the gems of rural Australia," Jen said.

Thank you Keith ...

We are farewelling one of our long term employee, Keith Clark, who is retiring after nearly 30 years.

Whilst Keith isn't as known around the Bull Sale ring, he is one of our hardest working employees. Keith was our Irrigation Manager at Boonal, east of Boggabilla for nearly three decades.

We would like to take this opportunity to pay tribute to a man with incredible work ethic, loyalty and pride in his machinery and crops. No tool ever out of place, the farm was always immaculate.

Keith, our family will be forever grateful for your commitment and we thank you sincerely.

Behind every good man is an exceptionally good woman - thank you to Keith's wife Janelle - a real trooper who worked just as hard and raised three strong daughters in Kate, Sharon and Amanda.

We wish you both all the best in your well deserved retirement.

Weebollabolla Hallmark H82

Sometimes you can learn valuable information from mistakes. Our utter dismay was put to rest six months after we learnt that Weebollabolla Hallmark H206 (he was not intended as a heifer bull) had managed to serve his mob plus take on 7 young maiden heifers. Not one heifer was pulled! Talk about relief. Another future sire with good feet, smooth shoulders, head carriage and incredible constitution- we are expecting great outcomes by this bull. Semen available.

Thank you

On behalf of the team at Weebollabolla thank you for attending our sale.

Your support is greatly appreciated and we wish you well with your purchases.

We look forward to seeing you next year for our 50th Sale.

Sandy and Jen

PERFORMANCE HERDS AUSTRALIA BREEDPLAN

More Beef, More Profit

EBVs

Estimated Breeding Values (EBVs) are the best estimate of an animal's genetic merit, for that trait, half of which will be passed on to its progeny.

Calving Ease EBVs (%) are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

CE % Direct = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

CE % Daughters = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

Gestation Length EBV (days) is an estimate of the time from conception to the birth of the calf and is based on Artificial Insemination and hand mating records. Lower (negative) Gestation Length EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

SELECTION INDEX

There is currently one standard selection index calculated for Performance Herds Australia animals. This is the MSA-B2 Index.

Index values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system. More information is available on selecting animals using a selection index.

MSA-B2 Index (\$) Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd in Cool Temperate/Mediterranean and Warm Temperate /Grassland environments (e.g. Shorthorn, Angus or Hereford cows) targeting the production of steers for the heavy domestic MSA food service market and the Japanese B2 export market. Steers enter the feedlot at 425 kg and are subsequently feed for 450 days. Steers are pasture grown to feedlot entry at 460kgs lwt at 16 mths then grain finished for 120 days to be slaughtered at 20 mths weighing 675kgs lwt with a cwt of 360kgs. They are slaughtered at 750 kg live weight (450 kg HSCW) at 30 months of age. Select heifers are retained for breeding and the balance grass fattened to MSA slaughter at 540kgs lwt and 290kgs cwt.

ACCURACY

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

ELITE LIVESTOCK AUCTIONS

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

- 1  Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
- 2  Click on the "Sign Up" page / link
- 3  Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
- 4  Agree to the Elite livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5  Click "Register"
- 6  You will then be notified by email that an account has been created

- 7  Once an account has been created you are all "Set to Bid"
- 8  Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
- 9  Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
- 10  The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
- 11  On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
- 12  At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.
