

Annalara White Dorpers welcome you to our 11th Annual Sale

Well what a year we have had to date.

Dungary has recorded 705mm with 477mm falling since the start of June and it looks like the rest of the year will be above average.

Unfortunately we have had to transfer our sale back to the Dubbo Showgrounds pending this next rain event.

Annalara White Dorpers achieved fantastic results at this years NSW State Sheep Show in Dubbo where White Dorpers were the Feature Breed. After not showing for six years our four rams all came home with mainly blue ribbons and the Supreme Junior White Dorper Ram.

In the Hoof and Hook Lamb comp our two pens of lambs went exceptionally well under very tight competition. We received third place on the hoof for trade lambs and fifth & eight place overall with 79.8 pts, only three points behind the winner. 52.5 kg live 26.3 kg dressed. This pen of lambs also had an eye muscle of 21.6 mm and were the highest eye muscle overall of all breeds and classes.

Our Lambplan data for this year's sale, not probably as good as it should be with all the changes within lambplan and our muscle scanning needs better timing which is elimating some figures and accuracies.

We very much welcome AuctionsPlus back, to our sale after a break of several years. This years sale with be live audio and Video streamed.

AuctionsPlus have been the backbone of commercial sales of White Dorpers over the years from when Annalara set the benchmark of an Australian record price of Ewes to a top of \$210 in 2005

We wish you all the best with your breeding and please give us any feedback with your purchases that well help us, all to go forward with in our breeding.

Steve, Family and Staff
