*2% rebate to  
outside agents*

**We have poor mobile phone reception at our sale ring.  
Please call Phil or Jim from Elders to organise phone bidding.**

# RED ANGUS GROUP BREEDPLAN

## ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait.

### ACCURACY:

Accuracy is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait.

**Gestation Length EBV** (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

**Birth Weight EBV** (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV** (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV** (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV** (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV** (cm) This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Carcase Weight EBV** (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

**Eye Muscle Area EBV** (sq cm) This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs** (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV** (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat EBV** (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

**For further information please contact the Red Angus Society or Red Angus BREEDPLAN.**

# Beef Class Structural Assessment System

Structural problems in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and thus reducing the overall productivity of the Australian Beef Industry.

Over the past decade, use of the Beef Class Structural Assessment System in the seedstock industry has produced a marked improvement in herds which have shown commitment to using the information appropriately. Through these dedicated breeders, there has been a flow on affect of structural improvement through out all sectors of the beef cattle industry.

Jim Green and Liam Cardile of 'BEEFXCEL' service many of the leading seedstock herds in Australia. 'BEEFXCEL' is not involved in any genetic marketing or specific breeding advice and therefore has no conflict of interests to influence their stock appraisal. The integrity of the structural data provided by 'BEEFXCEL' is recognised throughout the industry as Jim and Liam are fully INDEPENDENT assessors.

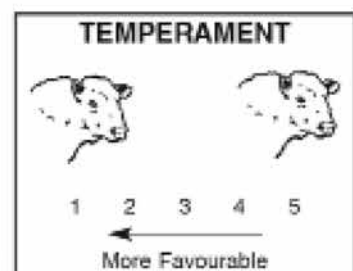

**HICKS BEEF STRUCTURAL PROGRAM:** Since 2003 Hicks Beef have used the services of BEEFXCEL to assess the structure of all sale bulls. The SPRING 2015, HICKS BEEF Sale Bulls have been independently structurally assessed to maximise the quality of stock on offer. Any animals deemed inadequate have been removed from the sale draft. The Hicks Beef sale bulls were assessed by **Liam Cardile** of BEEFXCEL on 19/12/2014.

## How to Use The Beef Class Structural Assessment System

The Beef Class Structural Assessment System uses a 1-9 scoring system;

- A score of **5** is idea (Note: Temperament Score of 1 is preferable!);
- A score of **4 or 6** shows slight variation from ideal, but this includes most animals. An animal scoring 4 or 6 would be acceptable in any breeding program;
- A score of **3 or 7** shows greater variation but would be acceptable in most commercial programs. However, seedstock producers should be vigilant and understand that this score indicates greater variation from ideal;
- A score of **2 or 8** are low scoring animals and should be looked at closely before purchasing;
- A score of **1 or 9** should not be catalogued and are considered culls.

**Liam Cardile** on 0409 572 570

# Multi-Breed Estimated Progeny Difference Figures

Since starting our Australian Beef Composite program we have been frustrated by not being able to use figures to describe our cattle to clients, or to use them to increase genetic improvement in our own breeding program.

Why has it taken so long? Unfortunately Australian Breedplan figures are owned by their respective breeds, and there is no common base between breeds. Different breeds' figures sit quite separately to each other.

Fortunately the US Simmental Association has solved all our problems with their true multi breed EPDs.

## **BENEFITS OF EPDS HUGE VOLUME OF DATA**

- 11.5 million head recorded
- 300,000 + animals recorded annually
- Plus 11 million American Angus EPDs incorporated into the database
- Largest multi breed data base in the world

## **TRUE MULTI BREED DATABASE**

Figures directly compare all participating breeds. The Australian multi breed figures start with a base breed, all new breeds are brought in without any adjustment for their own breed figures. The US Simmental Multi Breed EPDS run

- American Simmental
- American Red Angus
- American & Canadian Gelbvieh
- American Maine Anjou
- Canadian Angus
- Canadian Red Angus
- Canadian Simmental
- Incorporates American Angus data
- It also brings in Australian figures indexed into the US system

## **TOP QUALITY DATA**

- With the large volume of data, there are better links between sires, 35,000 matings
- Progeny tests of over 5,000 carcasses
- 500 sires progeny tested, 60 – 70 tested per annum

## **DNA ENHANCED EPD CAPABILITY**

- In 2012 the American Simmental Association introduced a highly effective 50K DNA test
- This increases the accuracy of EPDs

## **OUR COMMENTS ON THE US FIGURES**

The US figures are a god send to our breeding program. We are now part of one of the world's largest data banks in our industry. It enables clients to more exactly match the bull to the program.

## ANY RESERVATIONS?

Initially these figures have been incorporated into the US system, with only a few years of our data bank from over 18 years of collecting data. It was considered too labour intensive to include too much back data.

We are happy with how it ranks our sale bulls. Possibly some of our home bred sires without the depth of records are slightly below where we think they should sit (possibly all breeders think this).

We are sure that with more years of data input, this will be solved.

Currently we are using as many bulls linked to the US figures as we can, to improve links and accuracy.

If this year's figures are a good indicator of our bulls performance, the following years will just get better.

## 2015 MULTI-BREED PERCENTILE TABLE

## Over 20 Years Breeding ABC Bulls

At the end of our 1997 Pine Hill bull sale catalogue we offered two 2 year old bulls - Andy and Luke. They were Red Angus X Simmental bulls. The data supplied included raw muscle scan and fat depth, weight, scrotal, pelvic area and serving capacity.

The bulls were purchased by the now famous Dick Whale.

The preamble to the offering:

*"This cross was derived to maximise hybrid vigour in Hereford herds. The Simmental to add muscle ad width, and the Red Angus to modify birth weight, and improve carcass merit."*

*"We realise that this hybrid development is in its early stages, but if you are willing to join with us to develop these cattle, we are sure it will be a worthwhile experience."*

GROUP OF SPRING 2015 BLACK ABC SALE BULLS.

Greg Popplewell

### Genetic Advisor

Hicks Beef have bought Greg Popplewell onto the team as a genetic advisor.

As the science of seedstock cattle increases an in depth genetic knowledge is needed. To keep on the cutting edge of beef cattle production we welcome Greg Popplewell. Greg has been involved with many large scale breeding operations, including AA Co. Greg, with a Masters Degree in Animal Breeding Management from Sydney University, is one of Australia's leading cattle genetics experts. Along with the help of Dr Wade Shafer, ASA, we are confident our team is second to none.

### High Roughage Diet

Producing bulls in optimum condition for their first joining season has got to be our first priority.

Yes we want them to look well for photos and sale presentation, but they must be able to go out and work.

This year we have tried to keep our bulls on steady weight gain on grass throughout their entire lives, with just a high roughage silage based rations to keep them going through the winter.

# GUIDE TO EPDS

## MM

MATERNAL MILK

## API

ALL PURPOSE INDEX

(Dollars per cow exposed in a self replacing herd bred to both angus heifers and mature cows. Great economic index based on production system)

## CE

CALVING EASE

## BW

BIRTH WEIGHT

- 300,00 + animals recorded annually
- 500 sires progeny tested (now 60-70 per year)
- 35,000 waiting on angus heifers (progeny tested)

## YG

YIELD GRADE

(Lower ranks higher on the percentile table)

## TI

TERMINAL INDEX

(Dollars per cow exposed under a Terminal sire scenario)

	CE	BW	WW	YW	MCE	MM	MWW	YG	MB	BF	REA	API	TI

MARBLING  
(Based on actual marbling scores)

## BF

BACK FAT  
(Lower ranks higher on percentile table)

## REA

RIB EYE AREA

- 30 - 35,000 carcass scans per year
- 5,000 progeny test carcass recorded

# COMPOSITE REFERENCE SIRE

## GW PARAMOUNT 718Y

Born: 21/02/2011

**Black Angus Simmental**

G A R PREDESTINED  
**GW PREDESTINED 701T**  
 GW MISS LUCKY STRIKE 363

GW PREMIUM BEEF 021TS  
**GW MISS PREM BEEF 545U**  
 GW MISS BLUE MOON 931TS

This is our new sire from Gate Way. We are impressed with the thickness and consistency of his calves. He combines two of the best sires in the Angus and Simmental breeds – GAR Predestined and GW Premium Beef. He covers most of the economic bases with calving ease, above average growth and good carcass figures and a top 5% All Purpose Index.

**ABC MISS LUCKY C580**  
 CO-OP MISS LUCKY Z401

Hicks ABC Indexer E538 is our home bred sire that has been sold to the US to some of the leading US breeders, including Gate Way Simmentals. His All Purpose Index ranks him well in the top 1%. He is very strong on calving ease and marbling, and his daughters are magnificent. He leads the breed for calving ease. Top 1% for CE is 19.5 this bull is 26.9. Top 1% for Birth weight is -4.2, Indexer is -7.4. This calving ease ranks better than Angus. We talk about his figures, but it is his phenotype that we love, great feet, thick heavy and easy doing.

This is a practical bull that covers all the economic bases. He is one of the highest All Purpose Index (API) bulls in the catalogue. This index calculates the profit potential of the bull used over an Angus herd, both cows and heifers.  
 He will leave some of the best carcass cattle that can be found anywhere with great muscle and top 1% marbling. This thick meaty Beef Maker son would be good over heifers or cows.

Some of the extensive film crew

Japanese cow boys

Capturing cows and mountains

## Hicks Beef Bulls Checklist

- ✓ **Moderate Birth** - we aim to have birth weights lighter than breed average
- ✓ **Specialist Heifer Bulls** - in all our breeds, top 20% calving ease
- ✓ **Weight Gains** - up in the top 20% of breed for 200 & 400 day weights
- ✓ **Mature Weights Less** than breed average, large cows need more maintenance
- ✓ **Carcass** - we believe muscle and yield will be demanded by industry and that marbling is an important trait
- ✓ **Temperament** - is important, we cull heavily on temperament, sale bulls and cows
- ✓ **Structurally Correct** - we feel that we are competent enough to structurally assess bulls, but we know you want an independent professional. We use Liam Cardile from CTC to assess all our sale bulls for feet, legs, sheath and testicles
- ✓ **Tested** - for known genetic abnormalities, results will be available on sale day.
- ✓ **Tested negative** - Pestivirus carriers.

 HICKS CHEROKEE Z555  
**HICKS RED RAFFIA F546**  
 HICKS RED RAFFIA C529

A very good red angus bull that has caught the eye of some of the good judges. He is thick, moderate, reasonable birth, very good growth, milk numbers and leads the breed for muscle and retails yields. We believe he would work well as a sire for a Red seed stock producer.

This bull is from an outstanding Te Mania Mittagong cow that we believe represents some of the best black bloodlines in the business, stacked with Daiquiri, Africa and New Design. This dark, stout, Split Ear son is nothing short of exceptional, with all growth figures in the top 10% of the breed. His 400 day weight is in the top 2%, his EMA top 5%, Milk top 5%, Marbling top 5% and Supermarket Index top 5%. This attractive bull does it on three levels phenotype, pedigree and figures.

# Sale Details

**SALE DETAILS:** All bulls will be yarded by 10.30am on the morning of the sale. Inspections prior to the sale can be arranged by calling Andrew Hicks on (02) 6036 2538.

**HEALTH:** All bulls have been vaccinated with "7 in 1" which includes leptospirosis. They have been drenched with Evermectin. All bulls vaccinated - vibrio, and pesti virus tested.

**DELIVERY:** Stock awaiting delivery will be held free of charge for up to 14 days of the sale at the buyer's risk.  
**CATERING:** Lunch and refreshments will be available.

**GUARANTEE:** We have always provided full replacement guarantee against fertility and genetic faults. It is important that we are contacted as soon as possible to rectify any problem.

**FEEDING POLICY:** We believe that overfeeding can cause many problems to bulls long and short term. All our cattle are run in large paddocks under commercial cattle conditions. All Breedplan figures are assessed under these conditions usually from mobs of over 100 cows and calves.

As we sell our bulls younger than most studs we feel it is important that they are in suitable condition to withstand the rigours of their first season. The bulls are given a supplementary ration for 10 weeks, out in the paddock still in their calving groups.

All bulls are treated identically with no preferential treatment for the top bulls. We have sold bulls to many areas of Australia and have had no complaints about their mobility or fertility.

**ACCOMMODATION:** Holbrook has several motels, please call Andrew to make a reservation for you.

## Terms and Conditions of Sale

1. Subject to reserve prices, the highest bidder shall be the purchaser, and in the event of any dispute arising it shall be settled by the Auctioneer, unless one of the claimants will advance the bidding above the disputed bid, in which case the lot or lots shall be put up again.
2. The purchaser shall deposit the whole or any part of the purchase money if required at any time during the sale.
3. All stock shall be paid for in cash immediately on conclusion of sale, and prior to delivery, but, in the event of delivery being made, or possession obtained by the purchaser or his representative prior to the payment of the purchase money, or any cheque given on account of same, the purchaser shall hold the stock as trustee only for the vendor.
4. All stock shall be at the risk of the purchaser upon the fall of the hammer.
5. No warranty is given by the Auctioneers with any lot, and, as all lots are available for inspection previous to the commencement of the sale, the same are sold with all faults, if any.

The Auctioneers shall not be responsible for any errors or omissions in any particular appearing in the description or pedigrees of any lot for sale, and no error, omission, or misdescription in such particulars or pedigrees shall invalidate the sale or be made the subject of any claim for compensation.

### New Directions from the South

With the Hume Highway now bypassing Woomargama, you need to take the new Woomargama exit to get on the Old Hume Highway. If you miss this exit, turn right at the Holden dealers in Holbrook.

### Directions from the North

From Holbrook turn east down the Jingellic Road, travel 8.1kms then turn right into Annandayle Road and we are 2.8kms on the left.
