Dear Limousin Enthusiasts, Welcome to our 9th Muscle Sale. It doesn't feel that long ago that we were discussing our first sale with a group of progressive breeders looking to promote heavy muscled (true to type) Limousin cattle and is very pleasing to look back and see the progress we have made in developing the Muscle Sale concept, This sale is a highlight on the Limousin sale catalogue and is a unique opportunity to access leading Full French and Muscle Genetics.

As a feature in this years sale we are excited to offer a run of the leading matrons of the Keystone Herd. These proven females are in the prime of their life and have had several progeny represented in the last few years Muscle Sales. With our ET program ramping up we have chosen to offer these cows whilst in the prime of their breeding life and present a great opportunity for people looking to establish quality Full French cow families in their herds.

Muscle Sale IX will again be run on Auctions Plus and we continue to find that the Auctions Plus sale format provides a range of low stress advantages for both vendors, purchasers and animals. If you haven't used Auctions Plus before or would like some tips please feel free to contact us or our sale agents.

Regards
Tim Keys
Keystone Genetics

MERESIDE JESTER

Jester is the complete package, combining excellent figures with a great pedigree and an exceptional female line.

Jester will be an easy choice for many herds due to his top end gestation figures and calving ease inside the top 25% of the Limousin breed.

These, along with his excellent muscle and growth data, make him a true curve bender.

We expect his combination of easy calving and low birth weights with growth and muscle figures to result in easily born, quick growing calves.

Muscle Sale IX

Auctions Plus (Online Only) www.auctionsplus.com.au

Friday 2nd March 2018. Commencing at 12 noon

AGENTS: SEJ Paul Phillips 0418 553 123, Neil Park 0408 515 117

Outside agent commission 2%

(Note: buyers must be introduced in writing at least 24hrs prior to the sale)

TRANSPORT/DELIVERY: Transportation following the sale is by arrangement with the Vendor. Vendors agree to hold cattle for a reasonable period whilst suitable arrangements are made. A network of Transport companies is available to facilitate delivery, please contact Vendors, Sale agents or Sale organizers for details.

Catalogue photos have been taken in December 2017, please be aware that sale animals will be approx. 2 months older by sale date than shown in the photo.

TYPE DESCRIPTION:

The origin of the Limousin breed in France uses 3 key type descriptions to define their cattle. These descriptions are linked to the maturity pattern of the animal and have been included in the catalogue to assist prospective purchasers:

Early (Boucherie) – an early maturing heavily muscle type, particularly suited to vealer production. Cattle grow fast up to 450kg at 10-12 months and then taper off to a mature weight of around 1000kg for bulls and 650kg for females. A to A+ muscle scoring.

Mixed (Mix) – the middle / general purpose type cattle are described as mixed, they are early maturing, which continue to grow on. Mature finished weight will be around 1200kg for bulls and 800kg for females. A to A+ muscle scoring.

Late (Elevage) – The later maturing / elevage limousin type is primarily used to put size into females. These cattle are not primarily used for direct beef production but selectively used to maintain size in the herd. Mature finished weight will exceed 1200kg for bulls and 800kg for females. A to B muscle scoring.

F94L "Muscle Gene" VERIFICATION:

Full French – Verification based upon the assumption that Full French cattle carry 2 copies of the F94L "Muscle" gene. This assumption is derived from sample testing of the Australian French Pure population which has shown the F94L gene to have an occurrence of 98.8% in this population. This assumption has been applied in verification of Full French lots as well as lots verified by pedigree.

DNA Test – Animals with a DNA Test verification have had a direct analysis of their DNA to confirm that they carry 2 copies of the F94L gene.

Pedigree – Animals verified by Pedigree are derived from French Pure and/or DNA tested pedigrees.

EBV's:

EBV's have not been included in the catalogue as ABRI indicates that they are not reliable below 90% accuracy and this accuracy is not achieved until an animal has had several progeny recorded. For prospective purchasers wishing to refer to EBV data, they will be provided in the supplementary sheet or upon request.

This is an Auction Plus Sale Only, there is no physical sale, so you can bid through your own computer.
 To bid you must be registered with Auctions Plus, preferably 48hrs prior to the sale.
 Bidding is done on a conventional Auctions Plus format (helmsman style).

AuctionsPlus

Comments:

FULL FRENCH POLLED. Ferrari daughter with typical style and shape with extra frame from her female. From a quality Joyau (Paris Champion) daughter sold to Jacinda Overy this heifer will grow into a big powerful cow with strong maternal ability. AI'd 7/10/17 to Posthaven Polled Yellowstone (Homozygous Polled) and depastured to Polled Leo.

Dam of Dennise

Ferrari sire of Dennise

BAHUT

SIRE: URAGUAY

DAM: NORVEGIENN

Bahut is an extremely wide, heavily muscled bull with great legs, locomotion and breed character. He was bred in the famous herd of GAEC Robert in France and subsequently purchased by a syndicate of UK breeders including Jim Bloom's famous Scorbora herd, Tom Cheshire (Parkhouse herd) and Elite Beef Semen - UK.

Bahut was 2010 Espoir Champion at the French National Show & Muscle Champion at Brive Show.

Feedback from France, the UK and Ireland continues to be extremely positive with good calving ease and strong maternal ability combined with the obvious muscle and growth.

Feedback on temperament is excellent and Bahut is currently the No. 1 AI sire in Ireland for docility. This ranking confirms the feedback from France and the UK as well as the performance of his progeny in Australia.

A well structured bull with great length and depth throughout. A docile French polled bull with sought after genetics; heifer prospects.

Jim Dandie sire of Maverick

MERESIDE LORENZO

**SIRE:** JACOT**DAM:** MERESIDE DAWNMARIE (ALASKA)

Mereside Lorenzo is the 3rd AI sire we have imported from the famous Mereside herd (following Bolide and Jester). Lorenzo's dam, Mereside Dawnmarie is the top-brood cow at Mereside Limousins producing sons up to 40,000gns and females retained in herd. Lorenzo is maternal brother to Mereside Jester (current Keystone AI sire) and Mereside Godolphin (sold for 40,000gns and widely used UK AI sire). Sired by Jacot (Pautreau herd in France) who is well know for transmitting conformation, muscling and previously producing sons such as Rocky, Requin, Rossignol and Saphir. Lorenzo ranks in top 1% for Muscle Depth, top 10% for 200 Day Growth and 400 Day Growth (October 2016 information)

James Hazard has indicated that "from day one, Lorenzo was viewed as a star in the making, admired by many on farm throughout the summer of 2015, his mother, Mereside Dawnmarie has proven herself to be our top-brood cow producing sons selling up to 40,000gns as well as outstanding daughters that have been retained in the herd for breeding. Sired by Jacot, well known for transmitting conformation and muscling, Lorenzo's growth rates are the fastest we have ever had at Mereside, combined with tremendous loin and width are just some of the reasons why we are so excited by him."

R M HAZARD & SONS, MERESIDE LIMOUSINS, LINCOLNSHIRE, UK.

FENOMEN

SIRE: DIAMANT

DAM: BOUCLEDOR

Fenomen was imported from France after winning at the 2014 National Show in Limoges, he has since worked as the principal stock bull in the joint owners herds at Scorboro and Dyfri. An exceptionally correct and sound bull, with great muscularity and length, he also has impressive power, stature and style.

His French figures place him in the upper echelons of the breed, with indices of 119 for Muscular Development, 110 for Skeletal Development and 115 for growth. His Overall Index is 120, which places him in the top 1% of the French population.

UK performance is equally impressive as in France with progeny recording qualifying Fenomen with an overall Beef Value of 156. He also rates in the top 1% for growth, scrotal and docility, whilst retaining a positive calving ease and birth within the best 10% of the breed.

First progeny in Australia are eagerly anticipated and we expect that they will deliver, the growth, muscle, calving ease and calm temperament that this sire is showing in the UK and Europe.
